TOWN OF Brownsburg

ADVISORY PLAN COMMISSION

DOCKET NO.
PCPP-25-4
IN THE MATTER OF:
KARAM CONVENIENCE CENTER

FINDINGS OF FACT, CONCLUSIONS OF LAW, AND ORDER

In compliance with the Unified Development Ordinance of the Town of Brownsburg (the "Ordinance"), the Advisory Plan Commission (the "Commission") held a public hearing pursuant to notice at 6:00 p.m. on December 17, 2025, to hear Docket No. PCPP-25-4, an application for Primary Plat approval dividing 11.28 acres into 2 lots to be known as KARAM CONVENIENCE & RETAIL CENTER. Applicant Donald Fisher, Insight Engineering, appeared and presented testimony and evidence in support of the application.

FINDINGS OF FACT

The Commission, having this matter presented at a public hearing on December 17, 2025, having considered the arguments of the applicant, and being duly advised in the premises, now finds and makes the following Findings of Fact:

(1) The real estate subject to the application is identified as part of Indiana Parcel Number(s), 32-07-03-300-022.000-016.

(2) The real estate to which the application is addressed is within the Town of Brownsburg, Hendricks County, Indiana, and is subject to the terms and provisions of the Town of Brownsburg Municipal Code and the Unified Development Ordinance.

(3) That KARAM PROPERTIES LLC is/are the owner(s) of the real estate subject to the application.

(4) The real estate to which the application is addressed is currently zoned C3.

(5) The Applicant has requested Primary Plat approval dividing 11.28 acres into 2 lots to be known as KARAM CONVENIENCE & RETAIL CENTER.

(6) The Department of Development Services submitted a Project Synopsis to the Commission, dated December 3, 2025, which included the following recommendations:

1. All remaining technical review comments will be addressed prior to stamping the Primary Plat.

2. The final plat shall be recorded in the Office of the Recorder of Hendricks County prior to issuance of any building permits.

3. The approval of the Findings of Fact and Report of Determination by the Plan Commission.

4. The addition of a sidewalk along the northern end of the parcel along Northfield Drive that is required per the Brownsburg Transportation Plan.

CONCLUSIONS OF LAW

Based upon the above Findings of Fact, the Commission does now conclude:

(1) The subdivision is consistent with the *Brownsburg Comprehensive Plan.*

(2) The subdivision satisfies the prerequisites, minimum development requirements and design standards for the applicable subdivision type in *Article 6: Subdivision Types*.

(3) The subdivision satisfies the applicable design standards in *Article 7: Design Standards*.

(4) The subdivision satisfies all other applicable provisions of the Unified Development Ordinance.

(5) The subdivision satisfies the construction requirements of the *Brownsburg Construction Standards*.

ORDER

Based upon the foregoing Findings of Fact and Conclusions of Law, the Commission does now **APPROVE** the Primary Plat requested by Donald Fisher, Insight Engineering, known as Docket No. PCPP-25-4.

_____

ATTEST:

_____
Steve Fletcher- Development Services Director

TOWN OF Brownsburg

ADVISORY PLAN COMMISSION

DOCKET NO.
PSDP-25-9
IN THE MATTER OF:
PROJECT FALCON

FINDINGS OF FACT & REPORT OF DETERMINATION

The Brownsburg Advisory Plan Commission held a hearing for docket PSDP-25-9 Project Falcon located on Parcel No(s): 32-08-07-305-002.000-016 on December 17, 2025.

This Report of Determination is based, in whole or in part, on the Applicant's Development Plan Review Application, submitted on October 28, 2025 and the same is hereby incorporated herein, by reference.

Staff prepared a Project Synopsis, dated December 02, 2025, and the same is incorporated herein, by reference.

After hearing a presentation from the Applicant the Commission voted 7 in favor, 0 against and 0 abstained, on a motion to **APPROVE** the Development Plan Review subject to the following:

1. The approval of Findings of Fact and Report of Determination.
2. The stamping of the construction plans by the Director.
3. The completion of any outstanding TECH comments.

The Commission took the following into consideration when making their decision on this above referenced proposal:

(1) The development plan is consistent with the Brownsburg Comprehensive Plan.

(2) The development plan satisfies the development requirements of Article 2: Zoning Districts.

(3) The development plan satisfies the standards of Article 5: Development Standards.

(4) The development plan satisfies any other applicable provisions of the Unified Development Ordinance.

(5) The development plan satisfies any provision related to a development's design, especially street layout, street features, pedestrian facilities, drainage, and utility installation as outlined in the Unified Development Ordinance.

(6) The development plan satisfies the construction requirements of the Brownsburg Standard Details.

(7) The development plan satisfies the intent of the architectural guidelines.

PROTECTION AND DEMOLITION NOTES:

TREE REMOVAL AND PROTECTION:

1. TREES SHALL BE REMOVED FROM THE PROJECT ONLY WHERE THE AREA IS TO BE OCCUPIED BY ROAD, SURFACED AREAS, OR DRAINAGE SWALES.

2. TREES SHALL BE REMOVED FROM THE PROJECT SITE WHERE THEY INTERFERE DIRECTLY WITH THE PLACEMENT OF STORM OR SANITARY SEWERS AND THAT SUCH EXCAVATION WILL BE FATAL TO TREES.

3. THE CONTRACTOR SHALL ENDEAVOR TO SAVE AND PROTECT TREES OF VALUE AND WORTH WHICH DO NOT IMPAIR CONSTRUCTION OF IMPROVEMENTS AS DESIGNATED. IN THE EVENT CUT OR FILL EXCEEDS 0.5 FEET OVER THE ROOT AREA, THE DEVELOPER SHALL BE CONSULTED WITH RESPECT TO PROTECTIVE MEASURES TO BE TAKEN, IF ANY, TO PRESERVE SUCH TREES.

4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DETERMINING THE METHOD FOR PROTECTION OF TOPS, TRUNKS AND ROOTS OF EXISTING TREES ON THE PROJECT SITE THAT ARE TO REMAIN. EXISTING TREES SUBJECT TO CONSTRUCTION DAMAGE SHALL BE BOXED, FENCED OR OTHER MATERIAL AND EQUIPMENT SHALL NOT BE STOCKPILED OR STORED WITHIN THE SPREAD OF BRANCHES. BRANCHES WHICH NEED TO BE REMOVED OR ARE BROKEN SHALL BE NEATLY TRIMMED AND SCARS SHALL BE COVERED WITH TREE PAINT.

CLEARING AND GRUBBING:

1. CLEARING AND GRUBBING SHALL CONSIST OF CUTTING, REMOVING AND SATISFACTORY DISPOSING OF ALL TREES, BRUSH, PROJECTING ROOTS, STUMPS, RUBBISH, BROKEN PAVEMENT, BROKEN CONCRETE, FENCING (AS DESIGNATED) AND OTHER MATERIALS ON THE PROJECT SITE AND WITHIN THE BOUNDARY AS SHOWN ON THE CONSTRUCTION DOCUMENTS AND / OR DESIGNATED BY THE CONSTRUCTION LIMITS.

2. ALL "UNSUITABLE MATERIAL" FROM CLEARING OPERATIONS SHALL BE REMOVED TO DISPOSAL AREAS AS DIRECTED BY GENERAL CONTRACTOR.

STRIPPING OF TOPSOIL:

1. THE CONTRACTOR SHALL VERIFY THAT ALL TOPSOIL HAS BEEN REMOVED IN THE AREAS TO BE OCCUPIED BY ROADS, WALKS AND DESIGNATED BUILDING AREAS. TOPSOIL SHALL BE REMOVED TO A DEPTH OF SIX (6) INCHES OR DEEPER, IF NECESSARY, TO REMOVE ORGANIC MATTER WHERE REQUIRED.

2. TOPSOIL SHALL BE KEPT SEPARATED FROM SUITABLE FILL MATERIALS AND SHALL NOT BE USED AS FILL UNDER PAVEMENT, BUILDING AREAS AND / OR FUTURE STRUCTURAL AREAS.

3. TOPSOIL SHALL BE STORED AT A LOCATION WHERE IT DOES NOT INTERFERE WITH CONSTRUCTION OPERATIONS AS DIRECTED BY THE GENERAL CONTRACTOR.

4. TOPSOIL SHALL BE REASONABLY FREE FROM SUBSOIL DEBRIS AND STONES.

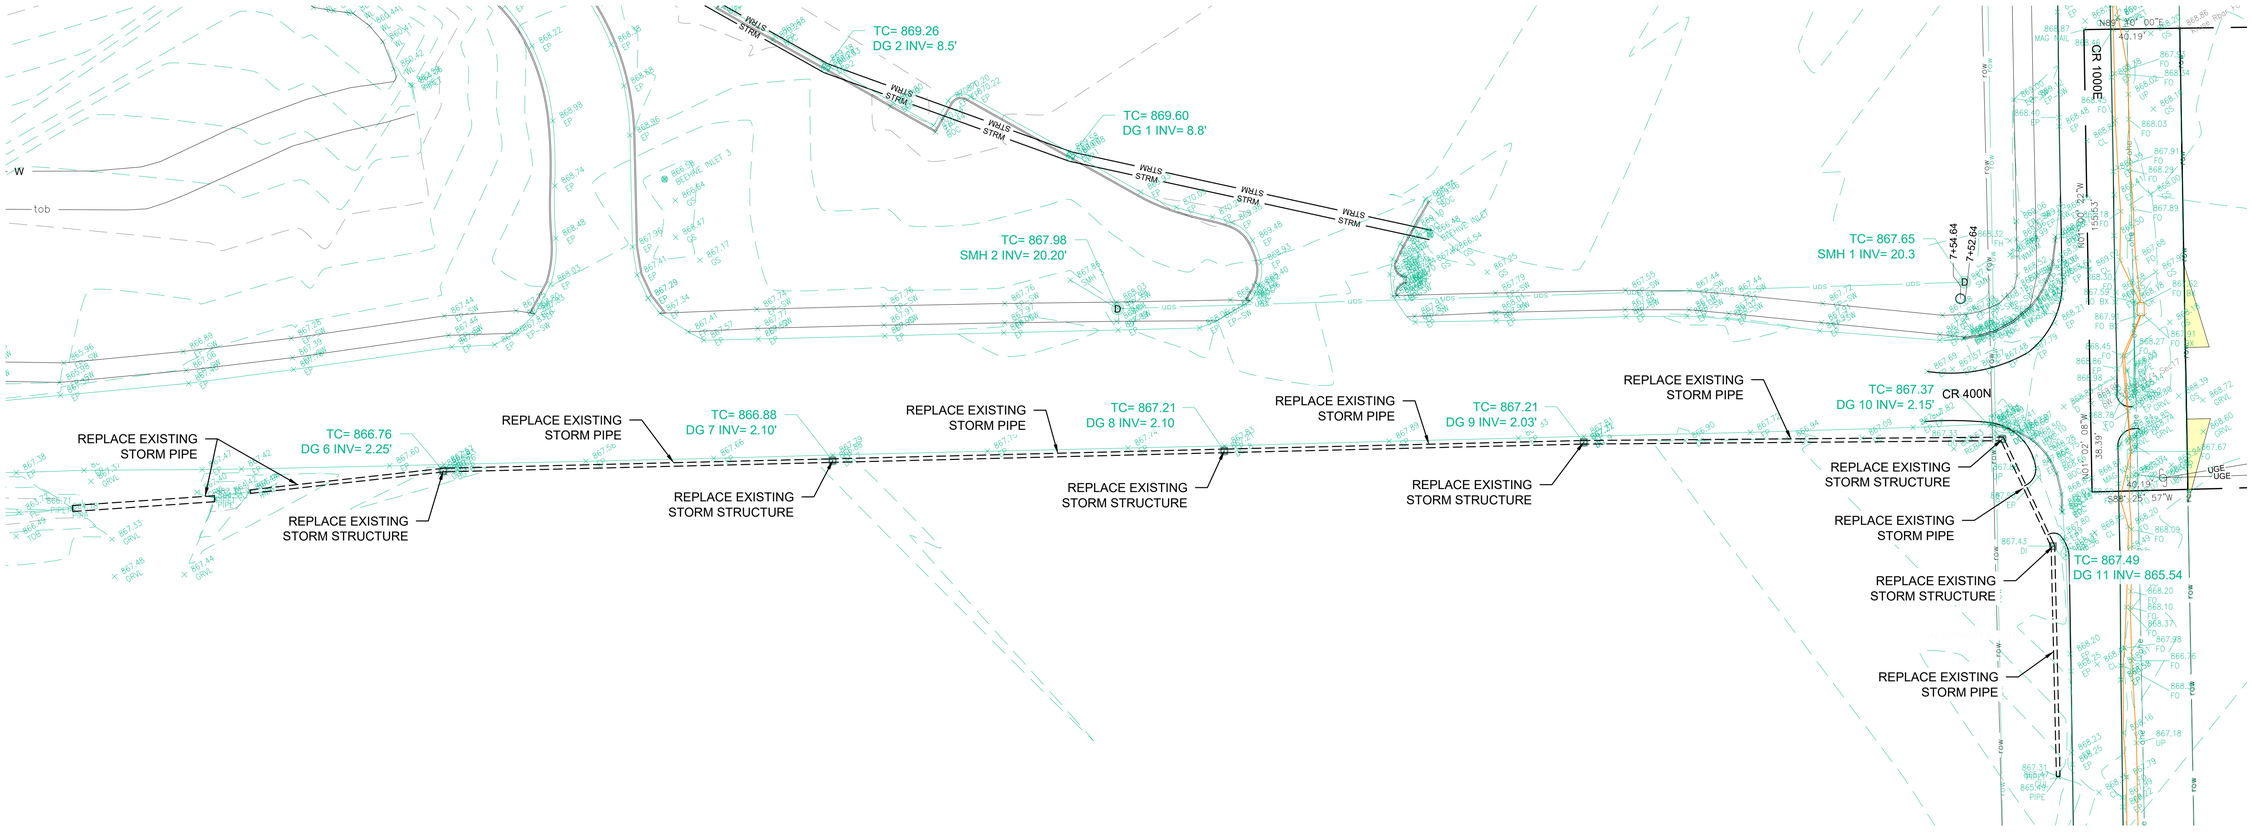

DEMOLITION:

1. ALL MATERIAL AS A RESULT OF THE GENERAL DEMOLITION SHALL BE THE PROPERTY OF THE CONTRACTOR. THE CONTRACTOR'S LUMP SUM BID PRICE FOR THE DEMOLITION SHALL TAKE INTO ACCOUNT THE SALVAGEABLE VALUE OF MATERIALS AND SAID BID PRICE SHALL REFLECT SAID DRAWINGS.

2. THE CONTRACTOR SHALL OBTAIN FROM ALL APPLICABLE GOVERNMENT AUTHORITIES NECESSARY PERMITS REQUIRED. A COPY OF SUCH PERMITS TO BE FURNISHED TO THE OWNER PRIOR TO COMMENCEMENT OF ANY WORK HEREIN.

STONE REMOVAL:

1. EXISTING STONE SURFACE TO BE REMOVED, STOCKPILED AND REDISTRIBUTED AFTER NEW GRADES ARE COMPLETED.

LEGAL DESCRIPTION

LEGAL DESCRIPTION:
Per Instrument No. 202121241 SUR filed in the Office of the Recorder in Hendricks County, Indiana, and described as follows:

Addresses and Parcel Numbers:
4005 N C.R. 1000 E., Brownsburg, IN 46112
#32-08-17-365-002.000-016

The following represents a modernized legal description of a tract of land, as described in Instrument #1998-04591 in the Office of the Recorder of Hendricks County, Indiana and being located in the Southwest Quarter of Section 17 and the Northwest Quarter of Section 20 both in Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana. Said tract being more particularly bound and described as follows, to-Wit:

East line of the Southwest quarter of Section 17 as being North 01 degrees 22 minutes 53 seconds West, deed, measured North 01 degrees 00 minutes 22 seconds West and all other bearings being relative thereto.

Beginning at a Hendricks County Aluminum monument found marking the Southwest corner of the Southwest quarter Section 17, Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana; thence running North on and along the West line of the Southwest quarter of Section 17 bearing North 01° 22' 53" West 155.58 feet, deed, and measured North 01° 00' 22" West 155.53 feet to a point on said West line, marking the Northeast corner of the National Hot Rod Association tract as referenced in the caption; thence running East on and along the North line of the National Hot Rod Association bearing North 88° 42' 57" East 546.58 feet, deed, and measured North 89° 10' 00" East a distance of 40.19 feet to a found 5/8" rebar with Kruse Consulting cap affixed and the *Point of Beginning* of this description; thence continuing North 89° 10' 00" East a distance of 508.15 feet to a found 5/8" rebar with Kruse Consulting cap affixed marking the intersection with the Southwesterly Right-of-Way of the CSX Railroad; thence running Southeasterly on and along the CSX Railroad Right-of-Way and traveling into the Northwest quarter of Section 20 bearing South 61° 12' 10" East 366.62 feet, deed, and measured South 60° 46' 15" East a distance of 365.01 feet to a found 5/8" rebar with Gaston cap marking the Northeast corner of Lot 1 in Villa Farms Subdivision, as per plat thereof recorded in Plat Book 3, page 134 in the Office of the Recorder of Hendricks County, Indiana; thence running West on and along the North line of said Lot 1 in Villa Farms Subdivision bearing South 88° 25' 57" West 863.49 feet (plat for Villa Farms shows this line to be 860.54 feet), calculated to be 823.52 feet to a point marking the intersection with the East right-of-way of N. CR. 1000 E; thence North 01° 02' 08" East, on and along said right-of-way, 38.39 feet; thence North 01° 00' 22" East 155.02 feet to the *Point of Beginning*. Containing 2.895 acres, more or less, subject to all easements and rights-of-way of record.

Dedicated Right-of-Way:
Beginning at a Hendricks County Aluminum monument found marking the Southwest corner of the Southwest quarter Section 17, Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana, and the *Point of Beginning* of this description; thence running North on and along the West line of the Southwest quarter of Section 17 bearing North 01° 22' 53" West 155.58 feet, deed, and measured North 01° 00' 22" West 155.53 feet to a point on said West line, marking the Northeast corner of the National Hot Rod Association tract as referenced in the caption; thence running East on and along the North line of the National Hot Rod Association bearing North 88° 42' 57" East, deed, and measured North 89° 10' 00" East a distance of 40,19 feet to a found 5/8" rebar with Kruse Consulting cap affixed, marking the intersection with the east right-of-way line of N. CR 1000 E.; thence South 01° 00' 22" East 155.02 feet on and along said right-of-way; thence South 01° 02' 08" East 38.39 feet on and along said right-of-way, traveling into the Northwest quarter of Section 20; thence South 88° 25' 57" West 40,19 feet to a point on the West line of the Northwest quarter of Section 20; thence North 01° 02' 08" West on and along aforementioned West line, 38.39 feet to the *Point of Beginning* of this Dedicated Right-of-Way description. Containing 0.179 acres, more or less.

- = EROSION CONTROL BLANKET ON ALL SLOPES 3:1 OR GREATER

SITE NOTES:

HANDICAP RAMP CONSTRUCTION NOTES:

1. ALL HANDICAP RAMPS SHALL MEET THE REQUIREMENTS OF THE AMERICAN DISABILITIES ACT. THE MOST RECENT INDOT STANDARD SPECIFICATIONS AND THE GOVERNING JURISDICTIONS MOST RECENT STANDARDS. CURB SWIPES REQUIRED FOR HANDICAP RAMPS SHALL BE PROVIDED AT TIME OF INITIAL CONSTRUCTION.

2. MINIMUM WIDTH OF CURB RAMP SHALL BE 4 FEET NOT INCLUDING FLARES. MAXIMUM SLOPE OF RAMPS SHALL BE 12:1

3. HANDICAP RAMPS ARE TO BE LOCATED AS SHOWN ON PLANS.

4. TYPE 'E' RAMPS SHALL BE PROVIDED AT THE CENTERLINE OF RADIUS AT ALL CORNERS OF EVERY STREET INTERSECTION WHERE THERE IS AN EXISTING OR PROPOSED SIDEWALK AND CURB. IN CASE OF "T"-INTERSECTION, A TYPE 'C' RAMP SHALL BE PROVIDED ADJACENT TO EACH CORNER RAMP. TYPE 'C' RAMPS ALSO SHALL BE PROVIDED AT WALK LOCATIONS AT MID-BLOCK IN VICINITY OF HOSPITALS, MEDICAL CENTERS OR ATHLETIC STADIUMS. THE USE OF DETAILS CONTRARY TO THOSE SHOWN HEREIN SHALL REQUIRE THE PRIOR WRITTEN APPROVAL OF THE GOVERNING JURISDICTION.

5. SURFACE TEXTURE OF THE RAMP SHALL BE THAT OBTAINED BY A COARSE BROOMING TRANSVERSE TO THE SLOPE OF THE RAMP.

6. RAMPS SHALL BE PROVIDED WHERE THE DRIVEWAY CURB EXTENDS ACROSS THE SIDEWALK.

7. CARE SHALL BE TAKEN TO ASSURE A UNIFORM GRADE ON ALL RAMPS WITH NO BREAKS IN GRADE.

8. DRAINAGE STRUCTURES SHALL NOT BE PLACED IN LINE WITH THE RAMPS EXCEPT WHERE EXISTING DRAINAGE STRUCTURES ARE BEING UTILIZED IN THE NEW CONSTRUCTION. LOCATION OF THE RAMPS SHALL TAKE PRECEDENCE OVER LOCATION OF DRAINAGE STRUCTURES.

9. THE NORMAL GUTTER LINE PROFILE SHALL BE MAINTAINED THROUGH THE AREA OF THE RAMP.

10. EXPANSION JOINTS FOR THE RAMP SHALL BE A MAXIMUM 1/2" WIDE. THE TOP OF THE JOINT FILLER FOR ALL RAMP TYPES SHALL BE FLUSH WITH THE ADJACENT CONCRETE.

11. CROSSWALK AND STOP LINE MARKING, IF USED, SHALL BE LOCATED TO STOP TRAFFIC SHORT OF ALL RAMP CROSSINGS.

12. SLOPE OF RAMP MAY BE WARPED WHEN FILED CONDITIONS WARRANT AND WHEN APPROVED BY THE GOVERNING JURISDICTION.

LOT COVERAGE

	ACRES	PERCENT
ASPHALT	1.845	60%
BUILDINGS	0.086	2.8%
SIDEWALK	0.016	0.5%
PERVIOUS	1.123	36.6%
TOTAL LOT	3.07	100%

SITE NOTES:

GENERAL NOTES:

1. REFER TO THE INDIANA DEPARTMENT OF TRANSPORTATION (INDOT) STANDARD SPECIFICATIONS, LATEST EDITION, FOR BASIC MATERIALS AND CONSTRUCTION METHODS. THE SECTIONS BELOW FOR VARIOUS ITEMS ARE TO CLARIFY THE INTENT OF THE REQUIREMENTS FOR THIS PROJECT. PLEASE NOTE THAT OTHER SECTIONS OF THE INDOT STANDARD SPECIFICATIONS MAY ALSO BE APPLICABLE.

2. ALL RADII SHELL BE 5 FOOT UNLESS NOTED OTHERWISE ON PLANS.

3. CONTRACTOR TO VERIFY EXACT LOCATION AND INVERT OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.

4. STORM SEWER PIPE OF OTHER MATERIAL OR MATERIAL NOT MEETING THESE SPECIFICATIONS SHALL REQUIRE THE PRIOR WRITTEN APPROVAL OF THE ENGINEER.

5. THE CONTRACTOR SHALL SUBMIT INFORMATION TO THE APPROPRIATE JURISDICTIONAL CONTACT SHOWING CONFORMANCE WITH THESE SPECIFICATIONS UPON REQUEST.

6. NOTICE SHALL BE POSTED NEAR THE MAIN ENTRANCE OF THE PROJECT SITE CONTAINING ALL DOCUMENTATION LISTED IN IDEM CSGP SECTION 3.3(a)(13)(A).

PAVEMENT CONSTRUCTION:

1. THE INDIANA DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS, LATEST EDITION, SHALL APPLY TO WORKMANSHIP AND MATERIALS IN CONSTRUCTION OF SUBGRADE, PAVEMENT, CURBS AND WALKS.

A) PREPARE THE SUBGRADE IN ACCORDANCE WITH INDOT SECTION 207. NO TRAFFIC WILL BE PERMITTED ON THE PREPARED SUBGRADE PRIOR TO PAVING.

B) BITUMINOUS PAVEMENT IN ACCORDANCE WITH INDOT SECTION 403.

C) FINISHING EARTH GRADED SHOULDERS, DITCHES AND SLOPES IN ACCORDANCE WITH INDOT SECTION 208.

CONCRETE PAVEMENT AND WALKS:

1. SEE DETAIL FOR TYPE AND DETAILS.

2. CONCRETE SHALL BE READY MIXED PORTLAND CEMENT AND WATER CONFORMING TO ASTM C-150. AGGREGATES SHALL CONFORM TO ASTM C-33. COMPRESSIVE STRENGTH OF CONCRETE AT 28 DAYS SHALL BE 4000 P.S.I. WHERE REQUIRED, REINFORCEMENT SHALL BE WELDED STEEL WIRE FABRIC CONFORMING TO ASTM A-185.

3. ALL EXTERIOR CONCRETE SHALL CONTAIN 6% ± 1% AIR ENTRAINMENT.

APPLICATION:

A) PLACE CONCRETE ONLY ON A MOIST, COMPACT SUBGRADE OR BASE FREE FROM LOOSE MATERIAL. PLACE NO CONCRETE ON MUDDY OR FROZEN SUBGRADE IN ACCORDANCE WITH INDOT SECTION 604 AND 605.

B) CONCRETE SHALL BE DEPOSITED SO AS TO REQUIRE AS LITTLE REHANDLING AS PRACTICAL. WHEN CONCRETE IS TO BE PLACED AT AN ATMOSPHERIC TEMPERATURE OF 35 DEGREES OR LESS, PARAGRAPH 702.10 OF THE INDOT SPECIFICATIONS SHALL APPLY.

C) EXCEPT AS OTHERWISE SPECIFIED, CURE ALL CONCRETE BY ONE OF THE METHODS DESCRIBED IN INDOT SECTION 501.17.

PARKING LOT STRIPING:

1. PAINT MATERIAL SHALL COMPLY WITH FEDERAL SPECIFICATION TT-P-115A FOR TRAFFIC PAINT WITHOUT GLASS SPHERES. (COLOR BY OWNER SELECTION).

2. SUBCONTRACTOR TO PERFORM ALL FIELD LAYOUT WORK NECESSARY TO ACHIEVE STRAIGHT AND TRUE LINES. ASPHALT MUST BE CLEANED WITH POWER BROOM AND HAND BROOM TO REMOVE LOOSE MATERIAL BEFORE STRIPING. THE SUBCONTRACTOR IS TO PROVIDE BARRIERS TO PREVENT MARRING OF LINES BY VEHICLES UNTIL PAINT HAS DRIED. STRIPING PAINT SHALL BE APPLIED AT THE MINIMUM RATE OF ONE GALLON PER 100 SQUARE FEET OF PAINT (BASED ON 39% SOLIDS) AT A WIDTH OF 4 INCHES.

STREET PAVEMENT NOTES:

1. MATERIALS AND CONSTRUCTION FOR STREETS, WALKS, CURBS AND STORM WATER SEWERS SHALL CONFORM TO THE REQUIREMENTS OF THE INDIANA DEPARTMENT OF TRANSPORTATION "STANDARD SPECIFICATIONS" LATEST PRINTED EDITION UNLESS SHOWN OR NOTED OTHERWISE.

2. PAVEMENT COMPOSITION NOTED ON DETAIL IS THE MINIMUM REQUIREMENT FOR STREET CLASSES 1, 2, 3, 4 AND 5, WITH A GOOD SUB-GRADE SOIL CLASSIFICATION. PAVEMENT COMPOSITION FOR OTHER CLASSES OF STREET SHALL BE DESIGNED WITH CONSIDERATION GIVEN TO THE TRAFFIC VOLUME, SUB-GRADE SOIL EVALUATION AND TYPE OF PAVEMENT MATERIAL TO BE USED.

3. THE SUB-GRADE MUST BE PROOF ROLLED BY THE CONTRACTOR USING A FULLY LOADED TRI-AXLE DUMP TRUCK, MINIMUM LOAD OF 20 TONS

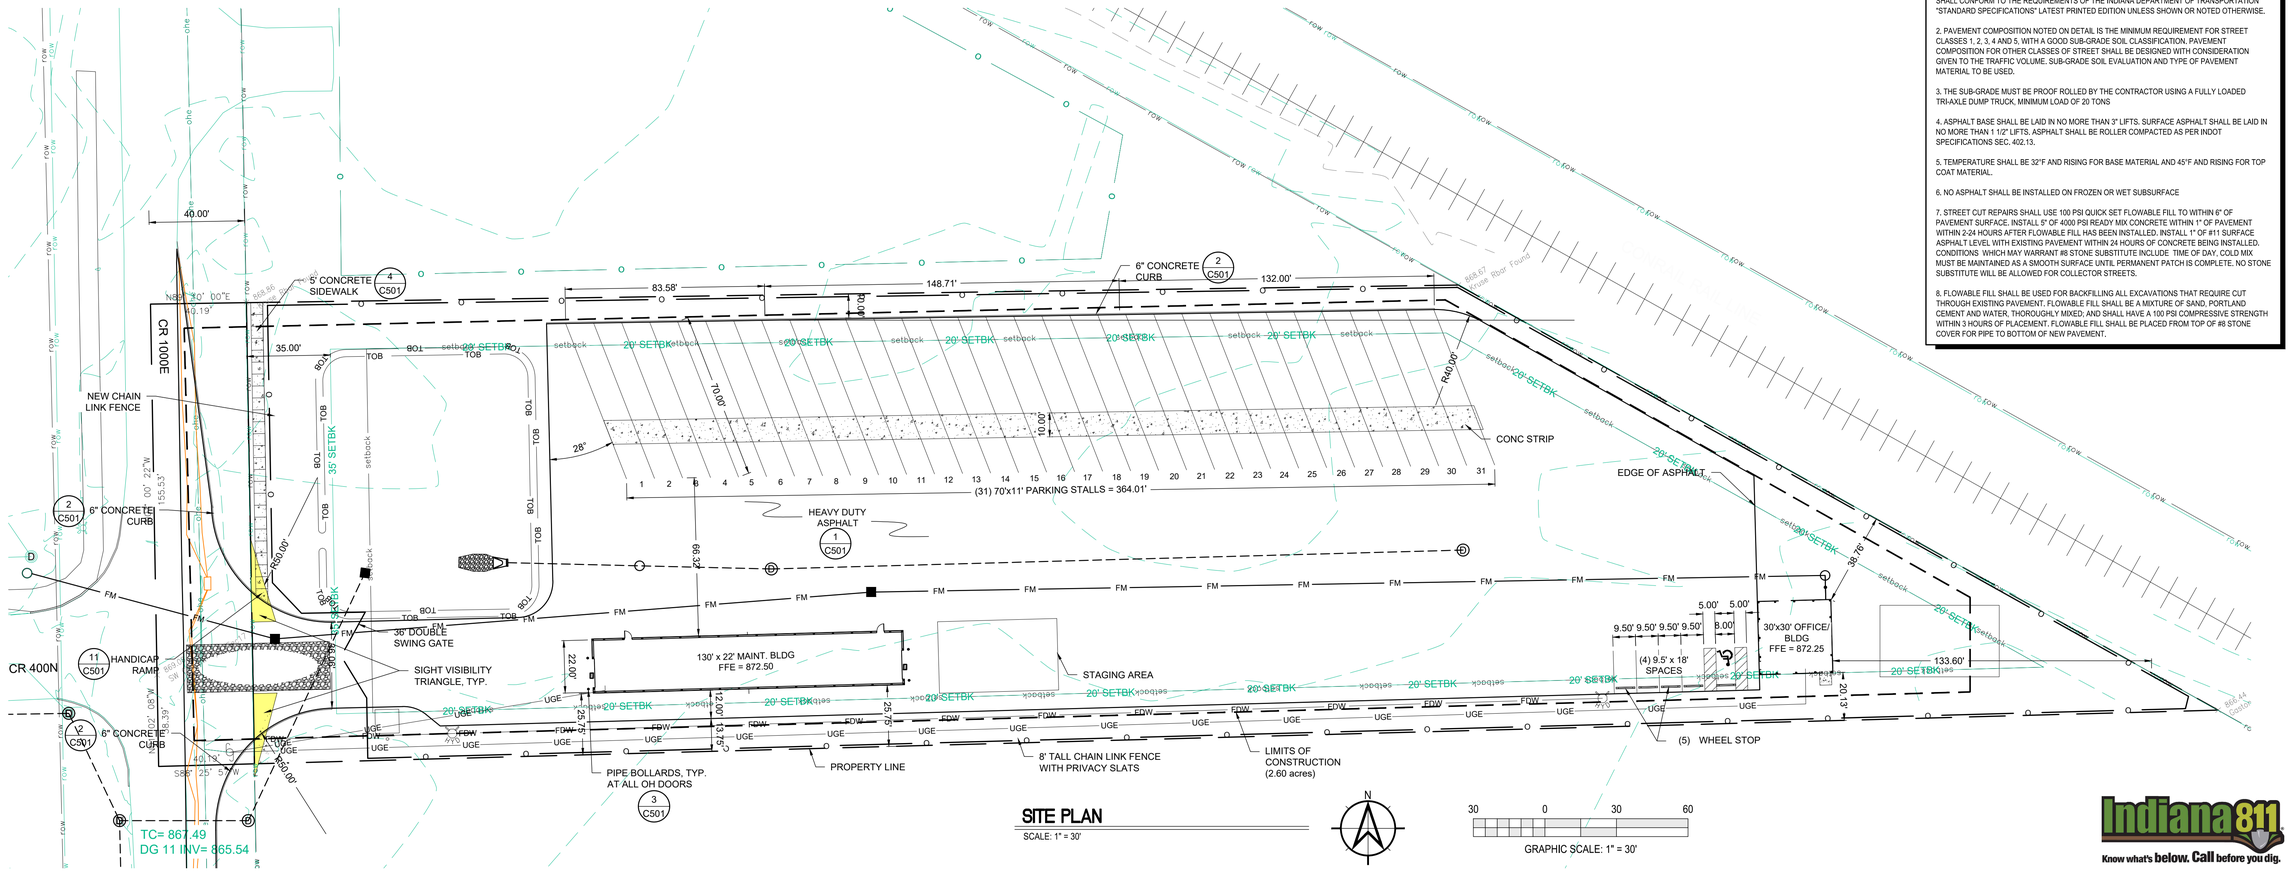

4. ASPHALT BASE SHALL BE LAID IN NO MORE THAN 3" LIFTS. SURFACE ASPHALT SHALL BE LAID IN NO MORE THAN 1 1/2" LIFTS. ASPHALT SHALL BE ROLLER COMPACTED AS PER INDOT SPECIFICATIONS SEC. 402.13.

5. TEMPERATURE SHALL BE 32°F AND RISING FOR BASE MATERIAL AND 45°F AND RISING FOR TOP COAT MATERIAL.

6. NO ASPHALT SHALL BE INSTALLED ON FROZEN OR WET SUBSURFACE

7. STREET CUT REPAIRS SHALL USE 100 PSI QUICK SET FLOWABLE FILL TO WITHIN 6" OF PAVEMENT SURFACE. INSTALL 5" OF 4000 PSI READY MIX CONCRETE WITHIN 1" OF PAVEMENT WITHIN 2-24 HOURS AFTER FLOWABLE FILL HAS BEEN INSTALLED. INSTALL 1" OF #11 SURFACE ASPHALT LEVEL WITH EXISTING PAVEMENT WITH 24 HOURS OF CONCRETE BEING INSTALLED. CONDITIONS WHICH MAY WARRANT #8 STONE SUBSTITUTE INCLUDE TIME OF DAY, COLD MIX MUST BE MAINTAINED AS A SMOOTH SURFACE UNTIL PERMANENT PATCH IS COMPLETE. NO STONE SUBSTITUTE WILL BE ALLOWED FOR COLLECTOR STREETS.

8. FLOWABLE FILL SHALL BE USED FOR BACKFILLING ALL EXCAVATIONS THAT REQUIRE CUT THROUGH EXISTING PAVEMENT. FLOWABLE FILL SHALL BE A MIXTURE OF SAND, PORTLAND CEMENT AND WATER, THOROUGHLY MIXED, AND SHALL HAVE A 100 PSI COMPRESSIVE STRENGTH WITHIN 3 HOURS OF PLACEMENT. FLOWABLE FILL SHALL BE PLACED FROM TOP OF #8 STONE COVER FOR PIPE TO BOTTOM OF NEW PAVEMENT.

GRADING PLAN (EAST)

SCALE: 1" = 30'

GRAPHIC SCALE: 1" = 30'

GRADING NOTES:

GENERAL GRADE NOTES:

1. REFER TO THE INDIANA DEPARTMENT OF TRANSPORATION (INDOT) STANDARD SPECIFICATIONS, LATEST EDITION, FOR BASIC MATERIALS AND CONSTRUCTION METHODS. THE SECTION BELOW FOR VARIOUS ITEMS ARE TO CLARIFY THE INTENT OF THE REQUIREMENTS FOR THIS PROJECT, PLEASE NOTE THAT OTHER SECTIONS OF THE INDOT STANDARD SPECIFICATIONS MAY ALSO BE APPLICABLE.

2. FILL MATERIAL SHALL CONSIST OF EARTH OBTAINED FROM CUT AREAS, BORROW PITS OR OTHER APPROVED SOURCES. EARTH SHALL BE FREE FROM ORGANIC MATTER AND OTHER DELETERIOUS SUBSTANCES AND LARGE ROCKS. THE FILL MATERIAL SHALL BE PLACED IN LAYERS NOT TO EXCEED SIX INCHES FOLLOWING COMPACTION. PROPER MOISTURE CONTENT OF FILL MATERICAL WILL BE SUCH TO ACHIEVE SPECIFIED COMPACTION DENSITY. ALL FILL BENEATH PAVED AREAS, FLOOR SLABS AND FURTURE BUILDINGS SHALL BE COMPACTED TO AT LEAST 95% OF THE MAXIMUM DRY DENSITY PER ASTM D-1557. FIELD COMPACTING TEST SHALL BE RUN ON EACH LIFT, IN FILL SECTIONS, AND THE REQUIRED COMPACTION ON EACH LIFT SHALL BE IN ACCORDANCE WITH INDOT SECTION 211.

3. MAXIMUM LAWN SLOPE IS 3:1.

4. THE CONTRATOR SHALL CONTACT ALL UTILITY COMPANIES TO LOCATE MAINS, CONDUITS, SERVICE LINES, ETC. IN THE AFFECTED CONSTRUCTION AREA EXISTING UTILITY STRUCTURES ARE SHOWN HERE IN ACCORDANCE WITH AVAILABLE INFORMATION. THE LOCATION AND PROTECTION OF UTILITY STRUCTURES, THEIR SUPPORT AND MAINTENANCE DURING CONSTRUCTION (IN COOPERATION WITH APPLICABLE UTILITY COMPANY) IS THE EXPRESSED RESPONSIBILITY OF THE CONTRACTOR.

5. ALL SPOT ELEVATIONS ARE TO FINISHED GRADE.

6. ALL EXISTING MANHOLE CASTINGS TO BE ADJUSTED TO FINISH GRADE.

7. COMPACT "B" BORROW BACK FILL REQ'D. OVER ALL UTILITIES IN PAVED AREAS.

8. DISTURBED AREAS TO BE GRADED TO FINAL GRADE AND RECEIVE A MIN OF 4" TOPSOIL

9. STABILIZATION MUST BE INITIATED BY END OF THE 7TH DAY THE AREA IS LEFT IDLE AND STABILIZATION SHALL BE COMPLETED WITHIN 14 DAYS AFTER INITIATION.

10. FINAL STABILIZATION IS ACHIEVED WHEN ALL LAND DISTURBING ACTIVITIES HAVE BEEN COMPLETED AND A UNIFORM PERENNIAL VEGATATIVE COVER WITH DENSITY OF 70% ON ALL UNPAVED SURFACES.

11. WATER SHOULD BE PUMPED THROUGH BMP AND INTO THE DETENTION POND.

REINFORCED CONCRETE PIPE:

1. REINFORCED CONCRETE PIPE SHALL BE CLASS III, IV OR V AS SPECIFIED IN ASTM C-76.

2. REINFORCED ELLIPTICAL CONCRETE PIPE SHALL BE CLASS HE-III OR HE-IV AS SPECIFIED IN ASTM C-507.

3. LIFT HOLES ARE NOT ALLOWED FOR PIPE LESS THAN 24 INCHES IN DIAMETER. A MAXIMUM OF TWO LIFT HOLES ARE ALLOWED FOR PIPE 24 INCHES IN DIAMETER OR LARGER. LIFT HOLES SHALL BE REPAIRED ACCORDING TO MOST RECENT INDOT STANDARD SPECIFICATIONS.

4. FITTINGS AND SPECIALTIES SHALL BE IN ACCORDANCE WITH THE SPECIFICATIONS FOR THE TYPE OF PIPE BEING USED.

5. EACH PIPE SECTION SHALL BE MARKED WITH DATE OF MANUFACTURE, SIZE AND CLASS OF PIPE, SPECIFICATION DESIGNATION, MANUFACTURER AND PLANT IDENTIFICATION.

6. PIPE SHALL BE FURNISHED WITH A BELL OR GROOVE ON ONE END OF A UNIT OF PIPE AND A SPIGOT OR TONGUE ON THE ADJACENT END OF THE ADJOINING PIPE. ALL JOINTS SHALL HAVE A GROOVE ON THE SPIGOT FOR PLACEMENT OF A RUBBER "O-RING" OR PROFILE GASKET IN ACCORDANCE WITH ASTM C-443. THE GASKET SHALL BE A CONTINUOUS RING WHICH FITS SNUGLY INTO THE ANNULAR SPACE BETWEEN THE OVERLAPPING SURFACES OF THE ASSEMBLED PIPE JOINT.

G = STRAW MULCH 2 TONS/ACRE

* / I / * = IRRIGATION NEEDED DURING JUNE, JULY, AUGUST AND/OR SEPTEMBER ** = IRRIGATION NEEDED FOR 2 WEEKS AFTER SUPPLYING SOD

INSTALLATION SCHEDULE:

CONSTRUCTION PHASE:	CONSTRUCTION SCHEDULE:
PRE-CONSTRUCTION ACTIONS (EVALUATION/PROTECTION OF IMPORTANT SITE CHARACTERISTICS)	BEFORE CONSTRUCTION, EVALUATE, MARK AND PROTECT IMPORTANT TREES AND ASSOCIATED ROOTING ZONES, UNIQUE AREAS (e.g., WETLANDS) TO BE PRESERVED, ON SITE SEPTIC SYSTEM ABSORPTION FIELDS IF APPLICABLE, AND VEGETATION SUITABLE FOR FILTER STRIPS, ESPECIALLY IN PERIMETER AREAS.
CONSTRUCTION ACCESS (CONSTRUCTION ENTRANCES, CONSTRUCTION ROUTES, EQUIPMENT PARKING AREAS)	STABILIZE BARE AREAS IMMEDIATELY WITH GRAVEL AND TEMPORARY VEGETATION AS WORK TAKES PLACE.
SEDIMENT BARRIERS AND TRAPS (BASIN TRAPS, SILT FENCES, OUTLET PROTECTION)	INSTALL PRINCIPAL BASINS AFTER CONSTRUCTION SITE IS ASSESSED. INSTALL ADDITIONAL RUNOFF CONTROL MEASURES DURING GRADING AS NEEDED.
RUNOFF CONVEYANCE SYSTEM (STABILIZED STREAM-BANKS, STORM DRAINS, INLET AND OUTLET PROTECTIONS, WATER QUALITY STRUCTURES)	WHERE NECESSARY, STABILIZE STREAMBANKS AS EARLY AS POSSIBLE. INSTALL PRINCIPLE CONVEYANCE SYSTEM WITH RUNOFF CONTROL MEASURES. INSTALL REMAINDER OF SYSTEM AFTER GRADING.
LAND CLEARING AND GRADING (CUTTING/FILLING/GRADING, DRAINS, SEDIMENT TRAPS, BARRIERS, DIVERSIONS, SURFACE ROUGHENING)	BEGIN MAJOR CLEARING AND GRADING AFTER INSTALLING THE KEY SEDIMENT AND RUNOFF MEASURES. CLEAR BORROW AND DISPOSAL AREAS AS NEEDED. INSTALL ADDITIONAL CONTROL MEASURES AS GRADING PROGRESSES.
SURFACE STABILIZATION (TEMPORARY AND PERMANENT SEEDING, MULCHING, SODDING, RIPRAP)	APPLY TEMPORARY OR PERMANENT STABILIZATION MEASURES IMMEDIATELY ON ALL DISTURBED AREAS WHERE WORK IS DELAYED OR COMPLETED.
BUILDING CONSTRUCTION (BUILDINGS, UTILITIES, PAVING)	INSTALL NECESSARY EROSION AND SEDIMENT CONTROL PRACTICES AS WORK TAKES PLACE.
LANDSCAPING & FINAL STABILIZATION (TOP SOILING, TREES AND SHRUBS, PERMANENT SEEDING, MULCHING, SODDING, RIPRAP)	STABILIZE ALL OPEN AREAS, INCLUDING BORROW AND SPOIL AREAS. REMOVE TEMPORARY CONTROL MEASURES AND STABILIZE.

RESPONSIBLE PARTY FOR EROSION CONTROL

COMPANY: LIONS TRAN INC.
NAME: MALHI KULWINDER
ADDRESS: 7655 E. US HWY 36
AVON, INDIANA 46123
PHONE: 317-989-1580

EROSION CONTROL NOTES:

SOIL EROSION CONTROL SUMMARY:

1. CONTRACTOR SHALL INSTALL SODDING, INLET PROTECTION, AND FILTERS AS SHOWN.

2. MASS GRADE THE SITE (SIDES OF SWALES, MOUNDS AND PONDS TO BE SODDED OR SEEDED AND MULCHED IMMEDIATELY UPON COMPLETION). TEMPORARY SEEDING SHALL BE RECOMMENDED FOR ALL SWALES AND DISTURBED AREAS THAT CANNOT BE FINAL SEEDED WITHIN A TIME PERIOD THAT WILL PREVENT SOIL EROSION, FOR TEMPORARY SEEDING THE CONTRACTOR SHALL UTILIZE A FAST GROWING SEED OF EITHER OATS, ANNUAL RYE GRASS, WHEAT OR RYE DEPENDING UPON TIME OF YEAR. DISTURBED AREAS SHOULD BE KEPT TO A MINIMUM AT ALL TIMES.

3. CONTRACTOR SHALL CONTROL MUD ACCUMULATION ON ALL STREETS SURROUNDING THE PROJECT BY INSTALLING STONE SURFACE AT ALL LOCATIONS WHERE CONSTRUCTION TRAFFIC LEAVES THE SITE. DUST SHALL BE KEPT TO A MINIMUM BY UTILIZING SPRINKLING, CALCIUM CHLORIDE, VEGETATIVE COVER, SPRAY ON ADDITIVES OR OTHER APPROVED METHODS.

4. MAINTAIN ALL FILTERS DURING CONSTRUCTION TO PREVENT ANY BLOCKAGES FROM ACCUMULATED SEDIMENT. ADDITIONAL SEEDING MAY BE REQUIRED DURING CONSTRUCTION AS SPECIFIED BY ENGINEER OR SOIL CONSERVATION SERVICE, RIPRAP SHALL BE PLACED IN AREAS OF HIGH VELOCITY STREAM FLOW (MINIMUM SIZE 1/3 CU.FT.). PAYMENT FOR ADDITIONAL RIPRAP NOT SHOWN ON PLANS AND SEEDING SHALL BE ON A UNIT BASIS.

5. CONTRACTOR SHALL INSTALL ALL STORM SEWER INLET FILTERS AS STORM SEWER SYSTEM IS INSTALLED.

6. ALL PROPOSED STREET AREAS TO BE PAVED AS SOON AS POSSIBLE AFTER SUBGRADE IS PREPARED.

7. CONTRACTOR SHALL REMOVE ALL TEMPORARY EROSION AND SEDIMENT CONTROLS ONLY WHEN THERE IS SUFFICIENT GROWTH OF GROUND COVER TO PREVENT FURTHER EROSION.

8. ALL SWALES SHALL BE SEEDED AND SODDED (AS INDICATED ON THE EROSION AND SEDIMENT CONTROL PLAN) IMMEDIATELY AFTER FINAL GRADING.

9. ALL EROSION CONTROL MEASURES SHALL BE INSTALLED IN ACCORDANCE WITH THE INDIANA HANDBOOK FOR EROSION CONTROL IN DEVELOPING AREAS, MOST RECENT EDITION.

MAINTENANCE:

INSPECT PERIODICALLY, ESPECIALLY AFTER STORM EVENTS, UNTIL THE STAND IS SUCCESSFULLY ESTABLISHED. (CHARACTERISTICS OF A SUCCESSFUL STAND INCLUDE: VIGOROUS DARK GREEN OR BLUISH-GREEN SEEDLINGS; UNIFORM DENSITY WITH NURSE PLANTS, LEGUMES, AND GRASSES WELL INTER-MIXED; GREEN LEAVES; AND THE PERENNIALS REMAINING GREEN THROUGHOUT THE SUMMER, AT LEAST AT THE PLANT BASE.)

PLAN TO ADD FERTILIZER THE FOLLOWING GROWING SEASON ACCORDING TO SOIL TEST RECOMMENDATIONS.

REPAIR DAMAGED, BARE, OR SPARSE AREAS BY FILLING ANY GULLIES, RE-FERTILINZING, OVER- OR RE-SEEDING, AND MULCHING.

IF PLANT COVER IS SPARSE OR PATCHY, REVIEW THE PLANT MATERIALS CHOSEN, SOIL FERTILITY, MOISTURE CONDITION, AND MULCHING AFTER RE-PREPARING THE SEEDBED.

IF VEGETATION FAILS TO GROW, CONSIDER SOIL TESTING TO DETERMINE ACIDITY OR NUTRIENT DEFICIENCY PROBLEMS. (CONTACT YOUR SWCD OR COOPERATIVE EXTENSION OFFICE FOR ASSISTANCE.)

IF ADDITIONAL FERTILIZATION IS NEEDED TO GET A SATISFACTORY STAND, DO SO ACCORDING TO SOIL TEST RECOMMENDATIONS.

EROSION CONTROL NOTES:

PRIOR TO ANY WORK BEING DONE, A TEMPORARY CONSTRUCTION ENTRANCE AND SILT FENCING SHALL BE INSTALLED.

AFTER COMPLETION OF A STORM STRUCTURE, THE CURB INLET PROTECTION SHALL BE INSTALLED IMMEDIATELY.

UPON COMPLETION OF SWALES AND SIDE SLOPES, CONTRACTOR SHALL INSTALL THE EROSION CONTROL BLANKETS.

ALL AREAS NOT DENOTING PERMANENT SEEDING OR FIBER BLANKETS SHALL BE TEMPORARILY SEEDED.

THE EARTHWORK CONTRACTOR IS RESPONSIBLE FOR KEEPING THE EXISTING ROADWAYS CLEAR OF DIRT AND DEBRIS.

ADDITIONAL EROSION CONTROL MEASURES MAY BE REQUIRED BY INSPECTOR AS CONDITIONS WARRANT.

EROSION PROTECTION DURING CONSTRUCTION AND SEEDING:

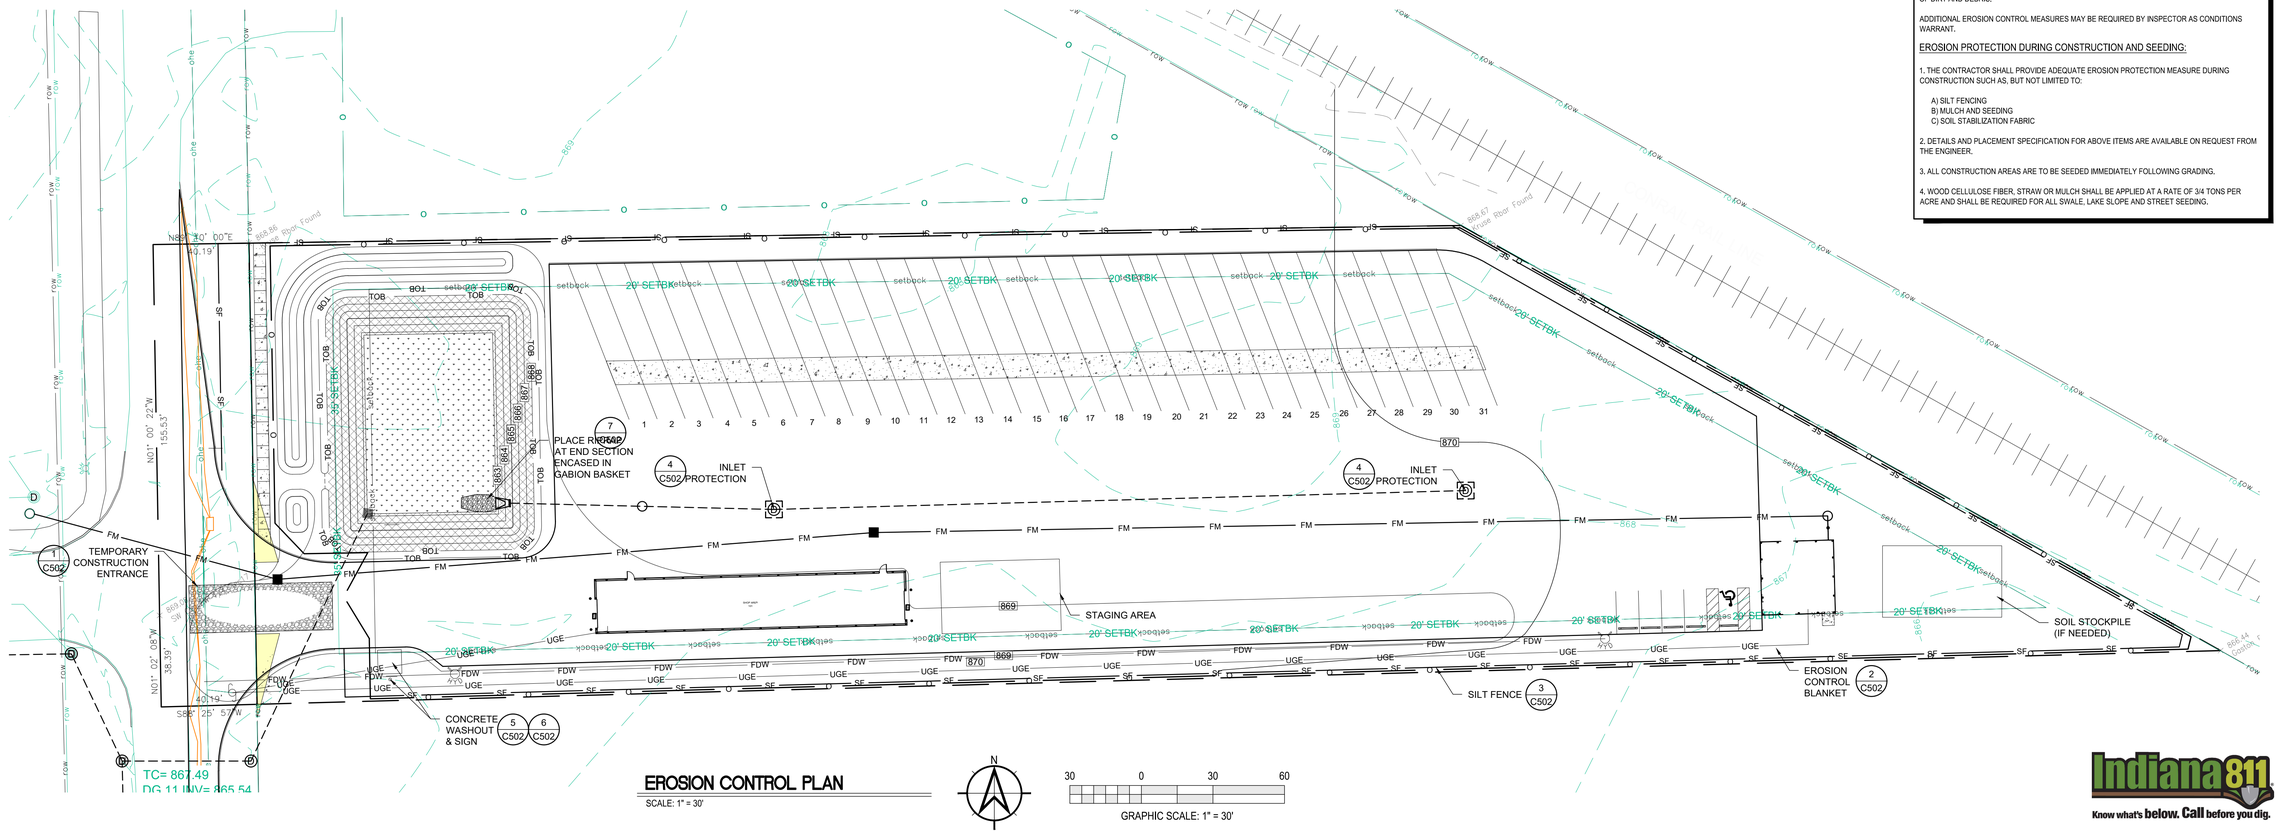

1. THE CONTRACTOR SHALL PROVIDE ADEQUATE EROSION PROTECTION MEASURE DURING CONSTRUCTION SUCH AS, BUT NOT LIMITED TO:

A) SILT FENCING
B) MULCH AND SEEDING
C) SOIL STABILIZATION FABRIC

2. DETAILS AND PLACEMENT SPECIFICATION FOR ABOVE ITEMS ARE AVAILABLE ON REQUEST FROM THE ENGINEER.

3. ALL CONSTRUCTION AREAS ARE TO BE SEEDED IMMEDIATELY FOLLOWING GRADING.

4. WOOD CELLULOSE FIBER, STRAW OR MULCH SHALL BE APPLIED AT A RATE OF 3/4 TONS PER ACRE AND SHALL BE REQUIRED FOR ALL SWALE, LAKE SLOPE AND STREET SEEDING.

C6	Entity that will be responsible for operation and maintenance of the post-construction storm water measures	C302

NOTES:
"NA" - NON APPLICABLE

Construction Storm Water General Permit Notes Section A

A1 - Index of the location of required plan elements in the construction plan:

An index addressing the required elements within the drawing set is on C000 - Cover Sheet.

A2 - A vicinity map depicting the project site location in relationship to recognizable local landmarks, towns, and major roads:

A map showing the project in relationship to other areas of the county is on C000 - Cover Sheet.

A3 - Narrative of the nature and purpose of the project:

The project consists of the development of a new heavy duty asphalt parking lot with 36 truck and trailer stalls, a 2860 sq. ft. maintenance building, and 900 sq. ft. office building w/ employee parking. The site is located at 4005 North County Road 1000E in Brownsburg, Indiana 46112. Associated with the new improvements will be storm water management system consisting of overland flow, storm inlets, and retention/percolation basin with outlet control. (Shown on C303 - Construction Storm Water General Permit Notes).

A4 - Latitude and Longitude:

The latitude is 39°49'21"N and longitude is 86°20'42.19"W. (Shown on C000 - Cover Sheet)

A5 - Legal description of the project site:

A legal description of the overall parcel is on C201 - Site Plan

A6 - 11 x 17-inch plat showing building lot numbers/boundaries and road layout/names:

An 11x17 in. plan showing the overall property and new improvements is attached to this narrative.

A7 - Boundaries of the one hundred (100) year floodplains, floodway fringes, and floodways:

The 100 year floodway and floodway fringe is on C301 - Grading Plan and is based on best available information from the Indiana Department of Natural Resources.

A8 - Land use of all adjacent properties:

North - Commercial
South - Undeveloped/Woods
East - Railroad/Commercial
West - Residential/Agricultural
(Shown on C303 - Stormwater Pollution Prevention Plan)

A9 - Identification of a U.S. EPA approved or established TMDL:

Site to discharge stormwater into ground via percolation basin or through evaporation. Any dicharge via the emergency spillway will likely evaporate/percolate prior to being received by White Lick Creek (INW01D2_05) which is EPA 303d listed, but has no established TMDL (Shown on C304 - Construction Storm Water General Permit Notes)

A10 - Name(s) of the receiving water(s):

Receiving water is White Lick Creek (INW01D2_05) - (Shown on C303 - Stormwater Pollution Prevention Plan)

A11 - Identification of discharges to a water on the current 303(d) list of impaired waters and the pollutant(s) for which it is impaired:

The impaired condition of White Lick Creek is due to presence of Escherichia Coli (E. coli) (Noted on C304 - Construction Storm Water General Permit Notes)

A12 - Soils map of the predominate soil types:

The soils on this property are predominantly Brookston Silty Clay Loam-Urban Land Complex and Crosby Silt Loam.
Brookston Silty Clay Loam features wetness as the main limitation affecting use and management of this soil type. Crosby Silt Loam features slow permeability and available water capacity is high with moderate content of organic matter.

Both soils are fair to poor for use as subgrade material as well as shear strength, compaction, and stability, medium to high compressibility, moderate to low shrink-swell potential, subject to frost heave, and seasonal high water table. A soils map is on C301 - Grading Plan.

A13 - Identification and location of all known wetlands, lakes, and water courses on or adjacent to the project site (construction plan, existing site layout)

There are no known water courses on or adjacent to this site.

A14 - Identification on any other state or federal water quality permits or authorizations that are required for construction activities:

This phase of the project scope will not require any additional federal or state water permits as noted on C304 - Construction Storm Water General Permit Notes.

Construction Storm Water General Permit Notes Section A (cont'd)

A15 - Identification and delineation of existing cover, including natural buffers:

The site is almost entirely covered with thick/heavy vegetation and trees with partial remnants of an existing gravel drive. The delineation of the various surface coverage is on C301 - Grading Plan.

A16 - Existing site topography at interval appropriate to indicate drainage patterns:

The existing site topography is largely flat with minor relief at the southeast of the site. The existing and proposed contours are on C301 - Grading Plan.

A17 - Location(s) where run-off enters the project site:

As referenced above, the topography in this area is largely flat resulting in little to no potential for run-off entering the site from adjacent property. The existing contours are on C301 - Grading Plan.

A18 - Location(s) where run-off discharges from the project site prior to land disturbances:

The existing site topography is largely flat with minor relief at the southeast of the site. The existing contours are on C301 - Grading Plan.

A19 - Location(s) of all existing structures on the project site:

The existing site is a vacant lot with no existing structures as depicted on C301 - Grading Plan.

A20 - Existing permanent retention or detention facilities, including manmade wetlands, designed for the purpose of stormwater management:

There are no existing retention facilities on site as depicted on C301 - Grading Plan.

A21 - Locations where storm water may be directly discharged into ground water, such as abandoned wells, sinkholes, or karst features:

There are no locations on property where storm water may directly discharge into the groundwater as illustrated on C301 - Grading Plan.

A22 - Size of the project expressed in acres:

The total project are if 3.07 acres as noted on C000 - Cover Sheet.

A23 - Total expected land disturbance expressed in acres:

The total disturbed area is 2.60 acres as noted on C000 - Cover Sheet.

A24 - Proposed final topography:

The final topography is on C301 - Grading Plan and is illustrated as spot elevations and contours.

A25 - Locations and approximate boundaries of all disturbed areas:

The total disturbed area is 2.60 acres as noted on C000 - Cover Sheet and shown as the Limits of Construction on C201 - Site Plan.

A26 - Locations, size and dimensions of all stormwater drainage systems such as culverts, stormwater sewer, and conveyance channels:

The stormwater is conveyed by overland flow, underground storm pipes, and retention pond. These are shown on C301 - Grading Plan.

A27 - Locations of specific points where stormwater and non-stormwater discharges will leave the project site:

Stormwater discharge from the site will be via an emergency spillway from the retention pond at the east end of the site and sanitary discharge will be via a pump and force main at the west end of the site.(Shown on C301 - Grading Plan & C402 Sanitary Force Main Plan & Profile.

A28 - Location of all proposed site improvements, including roads, utilities, lot delineation and identification, proposed structures, and common areas:

All the surface improvements including buildings, impervious areas, new surface finishes, etc. are on C201 - Site Plan for horizontal notations and C301 - Grading Plan for elevations.

A29- Location of all on-site and off-site soil stockpiles and borrow areas:

The soil storage area will be on site located at the east end of the site (west of the pond). All soil will be placed in the final location or hauled off upon completion of construction as shown on C302 - Erosion Control Plan.

A30- Construction support activities that are expected to be part of the project

Any construction support area will be within the limits of disturbance and used as directed by the contractor. Since they are within the limits of disturbance, there will be no impact sensitive areas.

A31- Location of any on-stream activities that are planned for the project including, but not limited to, stream crossings and pump arounds:

There are no in stream activities associated with this project.

Construction Storm Water General Permit Notes Section B

B1- Description of the potential pollutant generating sources and pollutants, including all potential non-storm water discharges:

1. Concrete Washout Area: Specific concrete washout area shall be established and labeled.
   a) The specific concrete wash out will be in a provided lined roll off box at a specific location near the entrance to the job site.
   b) The lined roll off box will be placed on stable soil with a stone approach.
   c) Once the lined roll off box is full, it will be removed from the site and discarded as clean fill once solid. A new lined roll off box will replace the one removed.
2. Construction Mobile Equipment Fluid
   a) All fueling of equipment will be managed and completed on a stone surface.
   b) Daily observation of all equipment for inspection of leaks or potential leaks of any fluids.
   c) Any observed fluid leaks are to be handled immediately with the equipment being moved to a stable stone surface and placed out of operation until maintenance is completed.
   d) Spill kits are to be utilized once the equipment is moved to the stable stone surface to prevent leakage from penetrating the ground or impacting storm water runoff.
3. Construction Material Waste
   a) All material waste is to be placed in provided roll off boxes as it is generated.
   b) Full roll off boxes are to be removed and properly disposed of in a licensed facility.
   c) No debris is to be stored on the ground surface at any time.
   These items are noted on C303 - Stormwater Pollution Prevention Plan.

B2- Stable construction entrance locations and specifications:

A stable construction entrance consisting of compacted subgrade, filter fabric and #2 stone is to be used for all construction traffic entering / exiting the site. The stone surface is to be maintained with new stone as necessary to maintain a solid drive surface. The location of the temporary construction entrance is shown on C302 for plan view and Sheet C502 for detail.

B3- Specifications for temporary and permanent stabilization:

The provisions for temporary stabilization during construction as well as permanent stabilization are included in the drawing set. The information contains specific stabilization techniques for the conditions of the site as well as timing of installation.

For temporary construction stabilization, it is the Contractor responsibility to maintain the stabilization during the construction duration and until permanent stabilization is installed.

For permanent stabilization, it is expected installation to occur immediately after final grading of the soil surface. Permanent stabilization is to be maintained by the Owner until 75% effective cover is established on the soil surface.

The stabilization is noted on C302 - Erosion Control Plan.

B4- Sediment control measures for concentrated flow areas:

The concentrated flow is protected at the pond inlet with riprap of minimum size being 6 inches and at the emergency spillway with stone dam as shown on C301 - Grading Plan and details on C501 & C502 - Sections and Details.

B5- Sediment control measures for sheet flow areas:

Sediment control for sheet flow is handled at the project perimeter with silt fence. (Shown on C302 - Erosion Control Plan).

B6- Run-off control measures:

Sediment control for sheet flow is handled at the project perimeter with silt fence. (Shown on C302 - Erosion Control Plan).

B7- Stormwater outlet protection location and specifications:

The concentrated flow is protected at the pond outlet with the previously mentioned rock dam as shown on C302 - Erosion Control Plan.

B8- Grade stabilization structure locations and specifications:

The grade on the site is largely flat and remain so post construction. There are no stabilization structures planned for this project as illustrated on C301 - Grading Plan.

B9- Dewatering applications and management methods:

Any dewatering required will be directed to the low area of the site (east) where it can percolate into existing soil. The use of sump pumps can be used to dewater where necessary. (Noted C303 - Stormwater Pollution Prevention Plan)

B10- Measures utilized for work within waterbodies:

This is not applicable to this project. (Noted C303 - Stormwater Pollution Prevention Plan)

B11- Maintenance guidelines for each proposed stormwater quality measure:

Silt fence both surrounding the site and at each protected inlet is to be inspected weekly and after storm events. Breaks, tears, or damaged silt fence is to be replaced immediately. Erosion control blankets are to be inspected weekly and after storm events. Damaged areas are to be repaired by re-securing displaced matting, replacing torn areas, and or removing debris to ensure vegetation growth. Concrete washouts are to be inspected daily to ensure there are no tears, structural damage, or leaks. Damaged concrete washouts are to be repaired.

B12- Planned construction sequence that describes the implementation of stormwater quality measures in relation to land disturbance:

The construction sequence for installation of the erosion control measures and stormwater pollution prevention devices are detailed on C302 - Erosion Control Plan. A pre-construction meeting is to be scheduled with the Town of Brownsburg a minimum of 48 hours prior to the start of construction. Per the IDEM CSGP Section 6.4(a)(9)(B) a notice of termination shall be verified by the local MS4 before submittal to IDEM. The town of Brownsburg shall be contacted prior to filing of the Notice of Termination to verify eligibility, for termination of permit coverage.

B13- Provisions for erosion and sediment control on individual residential building lots regulated under the proposed project:

Not applicable to this project. (Noted C303 - Stormwater Pollution Prevention Plan)

B14- Material handling and spill prevention and spill response plan meeting the requirements in 327 IAC 2-6.1:

The potential materials on site that could cause a spill response include fuels, petroleum fluids or other liquids as part of the construction equipment on site. If a spill occurs, immediate determination of the extent and emergency response requirements should be determined. Immediate containment of the spill with onsite spill kits should be completed. Once the spill is contained, contact is to be made to the Indiana Dept. of Environmental Mgmt., Office of Land Quality, Emergency Response Section: 1-888-233-7745 for in-state calls (toll free) within two hours of the spill. The contact should include the likelihood of damage to the waterways of the State of Indiana. This information is noted on C303 - Stormwater Pollution Prevention Plan.

B15- Material handling and storage procedures associated with construction activity:

All construction debris and wastes are to be loaded directly into provided roll off boxes for proper disposal off site. In no terms is debris or waste to be stored on site awaiting disposal or burned on property. Liquid wastes such as concrete wash out is to be disposed in the appropriate concrete wash out lined roll off boxes as provided. This includes any mortar/masonry/concrete grout material. Once these containers are full, they are to be removed from the site and disposed of in a licensed facility. Roll off boxes are to be rotated empty for full boxes for the entire project duration.

Construction Storm Water General Permit Notes Section C

C1- Description of pollutants and their sources associated with the proposed land use:

The post construction land use will have potential contaminants such as fuels, oils, grease, tires and other mobile equipment fluids. All materials, including mobile equipment will be stored on impervious surfaces during non-use or operation. (Noted on C303 - Stormwater Pollution Prevention Plan)

C2- Description of proposed post-construction stormwater measures:

The post construction contaminants are minimized by impervious surfaces being directed to a hydrodynamic separator designed to collect sediment and pollutants prior to entering the bioretention pond. This helps alleviate any debris that may overtop the emergency spillway. (Noted C303 - Stormwater Pollution Prevention Plan)

C3- Plan details for each stormwater measure:

The post construction stormwater measures is primarily a hydrodynamic separator and bioretention pond as shown on C301 - Grading Plan and L101 - Landscape Plan.

C4- Sequence describing stormwater measure implementation:

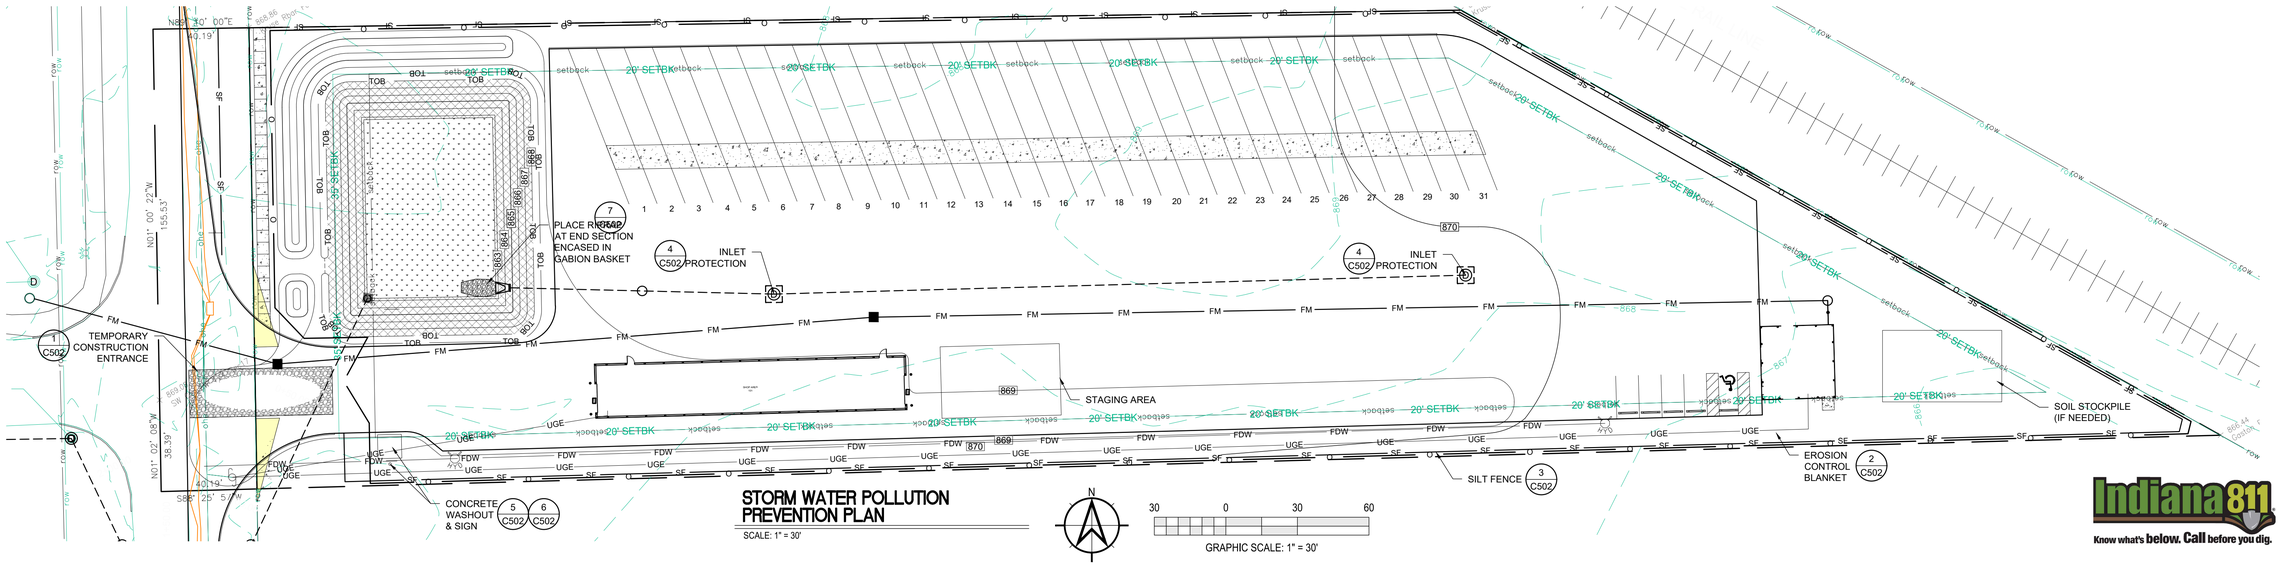

The sequence of installation for the post construction stormwater measure is part of construction sequencing shown C302 - Erosion Control Plan.

C5- Maintenance guidelines for proposed post-construction stormwater measures:

An operations and maintenance manual are part of the submittal information under separate documentation.

C6- Entity that will be responsible for operation and maintenance of the post-construction stormwater measures:

The responsible person for the post construction stormwater measures is the property owner as noted on C302 - Erosion Control Plan.

STORM WATER POLLUTION PREVENTION PLAN

UTILITY NOTES:

SANITARY GENERAL SPECIFICATIONS:

1. (A) 100 PSI FLOWABLE FILL SHALL BE REQUIRED FOR ROAD CROSSINGS UNDER EXISTING PAVEMENT AND WITHIN FIVE (5) FEET OF THE PAVEMENT EDGE. STREET CUT REPAIRS SHALL USE 100 PSI FLOWABLE FILL TO WITHIN 6" OF PAVEMENT SURFACE. INSTALL 5" OF 4000 PSI READY MIX CONCRETE WITHIN 1" OF PAVEMENT 2-24 HOURS AFTER FLOWABLE FILL HAS BEEN INSTALLED. INSTALL 1" OF #11 SURFACE ASPHALT LEVEL WITH EXISTING PAVEMENT WITHIN 24 HOURS ON CONCRETE INSTALLATION.

(B) FLOWABLE FILL SHALL BE A MIXTURE OF SAND, PORTLAND CEMENT AND WATER, THOROUGHLY MIXED, AND SHALL HAVE 100 PSI COMPRESSIVE STRENGTH WITHIN 3 HOURS OF PLACEMENT. FLOWABLE FILL SHALL BE PLACED FROM TOP OF #8 STONE PIPE COVER TO BOTTOM OF NEW PAVEMENT.

(C) IN LOCATIONS OF NEW DEVELOPMENT, WHERE UTILITIES ARE INSTALLED PRIOR TO ROAD CONSTRUCTION, TRENCH BACKFILL UNDER FUTURE ROAD SHALL BE ENTIRELY #8 CRUSHED STONE FROM MANHOLES.

2. ALL OSHA SAFETY STANDARDS SHALL BE STRICTLY ENFORCED FOR PROTECTION OF WORKERS.

3. NO SEWER SYSTEM CONSTRUCTION MAY BEGIN UNTIL APPROVAL FROM I.D.E.M.

4. ONE SET OF I.D.E.M. APPROVED PLANS SHALL BE ON THE JOB SITE AT ALL TIMES

POLYVINYL CHLORIDE (P.V.C.) PIPE:

1. PIPE DIAMETERS OF 10 INCHES THROUGH 15 INCHES SHALL MEET OR EXCEED ALL THE REQUIREMENTS OF ASTM D-3034, AND SHALL HAVE A MINIMUM CELL CLASSIFICATION OF 12454-C, REFERENCE SHOULD BE MADE TO ASTM D-1784 FOR A SUMMARIZATION OF CELL CLASS PROPERTIES. PIPE DIAMETERS GREATER THAN 15 INCHES SHALL MEET OR EXCEED ALL REQUIREMENTS OF ASTM F-679, AND SHALL HAVE A MINIMUM CELL CLASSIFICATION OF 12454-C, P.V.C. RIBBED SEWER PIPE SHALL MEET OR EXCEED ALL REQUIREMENTS OF ASTM F-794 AND SHALL HAVE A MINIMUM CELLL CLASSIFICATION OF 12454.

2. THE MINIMUM WALL THICKNESS FOR PIPES OF 10 INCHES THROUGH 15 INCHES IN DIAMETER SHALL CONFORM TO SDR-35, TYPE PSM, AS SPECIFIED IN ASTM D-3034. THE MINIMUM WALL THICKNESS FOR PIPE DIAMETERS GREATER THAN 15 INCHES SHALL CONFORM TO T-1 AS SPECIFIED IN ASTM F-679. P.V.C. PIPE SHALL HAVE A MINIMUM PIPE STIFFNESS OF 46 POUNDS PER SQUARE INCH FOR EACH DIAMETER WHEN MEASURED AT FIVE PERCENT DEFLECTION AND TESTED IN ACCORDANCE WITH ASTM D-2412.

3. PIPE JOINTS SHALL HAVE A BELL WALL, GASKET GROOVE AND SPIGOT WHICH IS INTERGRAL WITH THE PIPE. THE ASSEMBLY OF JOINTS SHALL BE IN ACCORDANCE WITH THE PIPE MANUFACTURERS' RECOMMENDATIONS AND ASTM D-3212. NO SOLVENT CEMENT JOINTS SHALL BE ALLOWED. GASKET MATERIAL SHALL BE CONSTRUCTED OF STYRENE BUTADIENE OR BUTYL RUBBER AND MEET THE REQUIREMENTS OF ASTM F-477.

4. EACH PIPE SECTION SHALL BE MARKED WITH THE NAME OF THE MANUFACTURER, TRADEMARK OR TRADEMANE, NOMINAL PIPE SIZE, PRODUCTION / EXTRUSION CODE, MATERIAL AND CELL CLASS DESIGNATION AND ASTM NUMBER.

5. INSTALLATION SHALL BE IN ACCORDANCE WITH ASTM RECOMMENDED PRACTICE D-2321.

SANITARY SEWER NOTES:

1. 10 STATES STANDARDS AND INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT REQUIREMENTS SHALL BE MET OR EXCEEDED FOR ALL DESIGN, MATERIALS AND CONSTRUCTION METHODS.

2. SANITARY SEWER MANHOLES SHALL BE MONOLITHIC PRECAST SECTIONS, INCLUDING THE BOTTOM SECTION. ALL SECTIONS SHALL BE PRECAST CONCRETE IN ACCORDANCE WITH ASTM C-478. ALL MANHOLE INLET CONNECTIONS SHALL BE LOCK JOINT FLEXIBLE SLEEVES CONFORMING TO ASTM C-923. ONLY PRECAST CONCRETE RINGS SHALL BE ALLOWED FOR CASTING RISERS. ALL MANHOLES, GRADE RINGS AND CASTING SHALL BE SEALED TO PREVENT INFILTRATION.

3. MANHOLE INVERTS SHALL BE SHAPED FOR FLOW CHANNELS WITH CONCRETE AND SMOOTHLY FINISHED BY A SEMI CIRCULAR SECTION CONFORMING TO THE INSIDE DIAMETER OF THE CONNECTING SEWERS. NO BRICK, ROCK OR SAND FILLERS WILL BE ALLOWED.

4. ALL MANHOLE COVERS SHALL BE TRAFFIC BEARING, NON-ROCKING DESIGN WITH NON-PENETRATING PICK HOLES.

5. SANITARY SEWERS SHALL BE POLYVINYL CHLORIDE (PVC) SDR 35 MEETING ASTM D3034 SPECIFICATIONS. ALL SEWER MAINS SHALL HAVE A MINIMUM DIAMETER OF 8", ALL PIPE SPECIFIED SHALL SUPPORT ANTICIPATED LOADS.

6. ALL JOINTS SHALL BE PUSH-ON TYPE (SLIP SEAL) OR SOLVENT WELD.

7. BEDDING FOR PVC PIPE SHALL CONFORM TO BEDDING CLASSES I, II OF III, AS DESCRIBED IN ASTM D2321, FLEXIBLE SEWER PIPE INSTALLATION REQUIREMENTS.

UTILITY NOTES (cont'd):

8. ALL SEWER PIPE SHALL BE LAID USING PIPE LASER EQUIPMENT FOR BOTH VERTICAL AND HORIZONTAL ALIGNMENT.

9. MINIMUM ALLOWABLE COVER SHALL BE 5'-0" OVER TOP OF PIPE.

10. ALL SEWER MAINS SHALL BE DEFLECTION TESTED WITH AN 11 POINT, 5% MANDREL AFTER COMPACTED AGGREGATE IS IN PLACE FOR ALL STREETS. FLEXIBLE PIPE WILL BE TESTED AFTER BACKFILL HAS BEEN IN PLACE FOR AT LEAST 30 DAYS. ALL PVC PIPE FAILING THE MANDREL TEST SHALL BE REROUNDED IN PLACE OR AN ALTERNATE METHOD APPROVED BY THE GOVERNING JURISDICTION IF REPAIR REQUIRED, SEWER SHALL BE RETESTED 30 DAYS AFTER REPAIR IS COMPLETE.

11. ALL SEWER MAINS SHALL BE LAMPED AT THE TIME THE MANDREL TEST IS CONDUCTED, ALL MAINS SHALL BE TRUE TO ALIGNMENT AND GRADE.

12. ALL SEWER MAINS AND LATERAL CONNECTIONS SHALL BE AIR TESTED IN ACCORDANCE WITH UNI-BELL UNI-B-6-85, MINIMUM TIME FOR THE AIR TEST SHALL BE FOR A 1.0 PSIG PRESSURE DROP. ALL SECTIONS FAILING AIR TEST SHALL BE REPAIRED AND RETESTED.

13. ALL SERVICE WYE BRANCHES SHALL BE INSTALLED AT THE TIME OF THE SEWER MAIN INSTALLATION. NO DIRECT TAPS WILL BE ALLOWED ON NEW MAIN CONSTRUCTION. NO VERTICAL CONNECTIONS WILL BE ALLOWED.

14. A SEPARATE (6" MINIMUM) SERVICE SHALL BE PROVIDED FOR EACH UNIT SERVED APPROXIMATELY SIX (6) FEET TO THE RIGHT OF THE LOT CENTERLINE, NO WYE'S SHALL BE ALLOWED, INCLUDING CONDOMINIUMS.

15. THE MAXIMUM ALLOWABLE VERTICAL DISTANCE BETWEEN ANY INFLUENT LINE AND THE EFFLUENT MAIN SHALL BE 6' FOR TYPE 'A' AND 'C' MANHOLES. ANY DISTANCE GREATER THAN 6" SHALL REQUIRE A TYPE 'B' MANHOLE.

16. WHERE A SEWER EXTENSION OR IMPROVEMENT CONNECTS TO A EXISTING SEWER OR MANHOLE, IT MUST BE LOCATED IN A STREET, ROAD OR HIGHWAY R/W AND NOT LOCATED IN SUCH A MANNER WHERE IT WILL CUT THROUGH LOTS OR DEVELOPMENTS.

17. ALL EXTENSIONS SHALL BE INSTALLED AT MINIMUM GRADES.

CONCRETE MANHOLE NOTES:

1. ALL MANHOLES SHALL BE NEGATIVE AIRE PRESSURE (VACUUM) TESTED AS PER ASTM C1244-93 STANDARD METHOD.

2. NO MANHOLES SHALL BE MORE THAN 14' FROM BACK OF CURB.

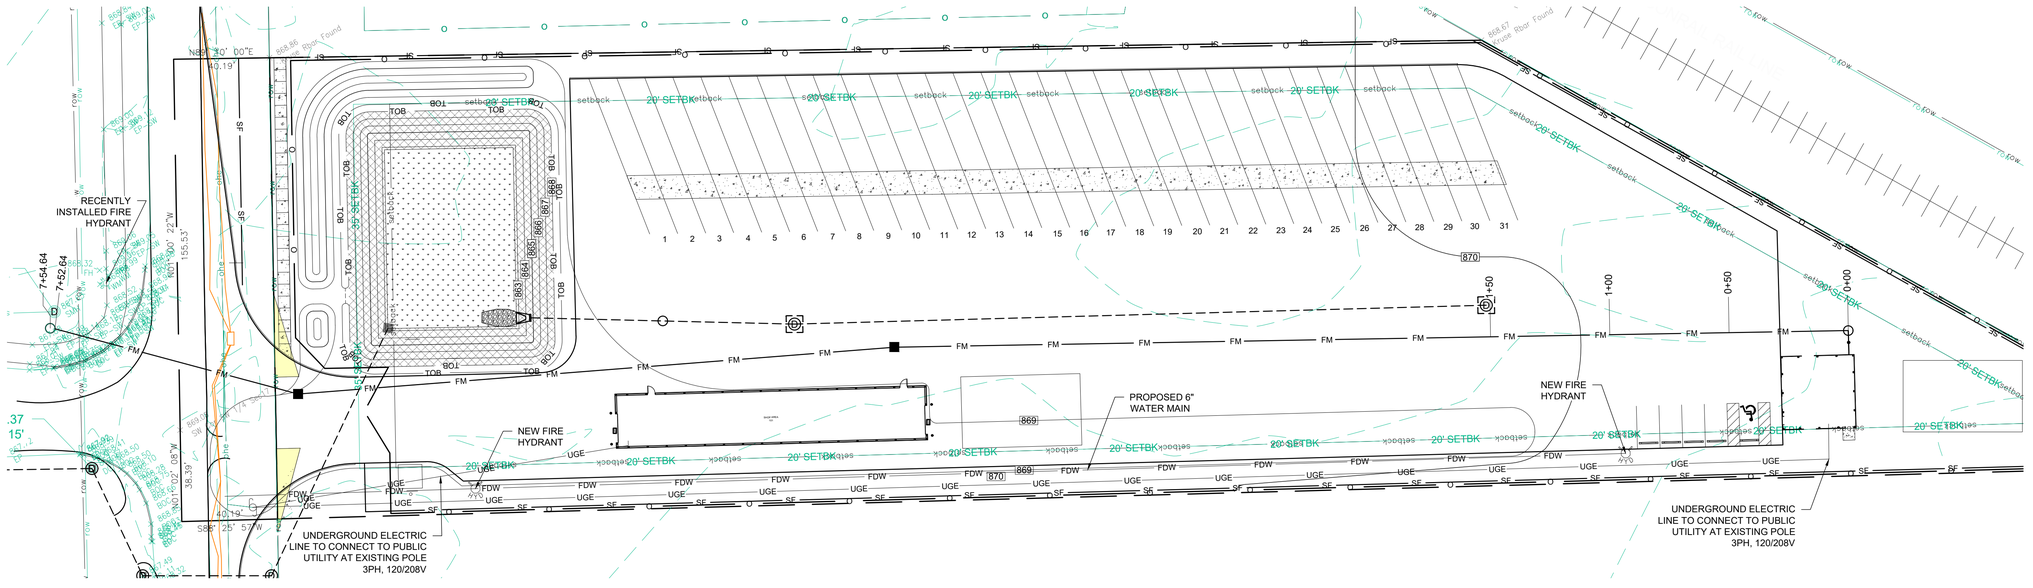

3. NO MANHOLE SHALL BE LOCATED IN ANY BACKYARD OR SIDE YARD. THEY MUST BE LOCATED IN THE FRONT YARD OR FRONT LOT THAT IS FRONTING A STREET.

4. ALL JOINTS IN MANHOLES SHALL BE SEALED TO PREVENT INFILTRATION BY USING A RUBBER 'O-RING' GASKET AND A 1/2" EXTRUDABLE PERFORMED GASKET BETWEEN ALL PRECAST SECTIONS.

5. ANNULAR SPACE AROUND SANITARY SEWER AT POINT OF ENTRANCE INTO THE MANHOLE SHALL BE GROUTED COMPLETELY AROUND SANITARY SEWER, INSIDE AND OUTSIDE TO INSURE SMOOTH TRANSITION.

6. WHEN CONNECTING A NEW SEWER INTO AN EXISTING MANHOLE, THE EXISTING MANHOLE SHALL BE BROUGHT UP TO MEET PRESENT STANDARDS.

7. SECTION JOINTS ON PRECAST CONCRETE MANHOLES SHALL BE SEALED WITH BLACK TAR MASTIC 6" ABOVE AND 6" BELOW JOINT, ON MANHOLE EXTERIOR.

CONNECTION TO EXISTING STREETS
NO SCALE

NOTE:

THIS DETAIL SHALL BE USED FOR CONNECTING TO THE END OF AN EXISTING STREET.

EXISTING PAVEMENT SHALL BE SAW CUT, FULL DEPTH, AT A UNIFORM LOCATION INSIDE OF THE EXISTING EDGE OF PAVEMENT, WHERE THE PAVEMENT IS IN GOOD CONDITION AND WILL PROVIDE AN INTERFACE WITH THE FULL PAVEMENT SECTION LINE AND GRADE, FREE FROM LOOSE, DAMAGED, DETERIORATED OR OTHERWISE COMPROMISED MATERIAL. A MINIMUM OF SIX (6) INCHES FROM THE EXISTING EDGE OF PAVEMENT FOR THE FULL WIDTH OF THE EXISTING PAVEMENT; LOCATION OF SAW-CUT TO BE DETERMINED BY THE TOWN OF BROWNSBURG. THE ENTIRE AREA OF THE PROPOSED INTERFACE SHALL BE EXCAVATED TO THE PROPOSED SUBGRADE ELEVATION. THE SUBGRADE SHALL BE STABILIZED IN ACCORDANCE WITH TOWN OF BROWNSBURG STANDARDS AND SPECIFICATIONS. AFTER THE SUBGRADE HAS BEEN STABILIZED AND APPROVED, EXISTING HMA PAVEMENT WILL BE SURFACE MILLED 10 FEET ALONG THE NEW SAW-CUT END OF PAVEMENT TO PROVIDE A MATER STOP AND SMOOTH TRANSITION TO THE NEW PAVEMENT WHEN THE SURFACE MIX IS APPLIED. THE NEW PAVEMENT SECTION SHALL BE INSTALLED IN ACCORDANCE WITH TOWN STANDARDS AND SPECIFICATIONS.

TOWN OF BROWNSBURG
DETAIL NO. TR-13
REVISION DATE: SEPT 2016

NOT TO SCALE — 11 / C501

SECTION 02504 – ADJACENT ROADWAY IMPROVEMENTS

PART 1 - GENERAL

1.01 Roadways adjacent to proposed developments shall conform to the following requirements and standards.

A. Adjacent Roadway Improvements

1. Developers shall be responsible for improvements to the existing roadway(s) that front their property. These improvements shall include, but are not limited to, the following items:
   a. Construction of acceleration lanes, deceleration lanes, and passing blisters for each entrance or street intersection as indicated in the Standard Details.
   b. In order to construct adequate acceleration lanes, deceleration lanes, and passing blisters, right-of-way shall be obtained which has a width consistent with the most current accepted Thoroughfare Plan.
   c. The existing roadway along the development frontage shall be widened to match the width requirements based on the functional classification of the roadway as defined by the Thoroughfare Plan. Once widened, the entire roadway fronting the development shall be resurfaced for consistency.
2. Additional improvements may be required depending on field conditions and as determined by the Town of Brownsburg.

DRAWN BY:	JBF
CHECKED BY:	BEM
PROJECT NUMBER:	21346
DATE:	1/13/22
SHEET NUMBER:	C501

ROCK DAM REQUIREMENTS:

1. CONTRIBUTING DRAINAGE AREA: 50 ACRES MAXIMUM

2. DESIGN LIFE: LIMITED TO 3 YRS.

3. SEDIMENT STORAGE: 1,800 CU.FT./ACRE DISTURBED (MINUMUM) MEASURED 1 FT. BELOW SPILLWAY CREST.

4. BASIN SHAPE: MINIMUM 2:1 LENGTH-TO-WIDTH RATIO.

5. BASIN AREA: VARIABLE; THE LARGER THE SURFACE AREA THE GREATER THE TRAPPING EFFICIENCY.

6. DAM CREST HEIGHT: LIMITED TO 8 FT.

7. SPILLWAY CAPACITY: PEAK RUNOFF FROM A 10-YR. FREQUENCY, 24-HR. DURATION STORM EVENT, A MAXIMUM FLOW DEPTH OF 1 FT. AND MINIMUM FREEBOARD OF 1 FT. (ENTIRE LENGTH OF DAM BETWEEN ROCK ABUTMENTS MAY SERVE AS SPILLWAY.)

8. DAM DIMENSIONS: TOP WIDTH, 5 FT. MINIMUM; SIDE SLOPES, 2:1 OR FLATTER UPSTREAM, 3:1 OR FLATTER DOWNSTREAM.

9. EARTH ABUTMENTS: SMOOTH, STABLE, 2:1 OR FLATTER SLOPES.

10. ROCK ABUTMENTS (TO PROTECT EARTH ABUTMENTS): EXTENDED ALONG DOWNSTREAM FACE TO TOE OF DAM AND AT LEAST 1 FT. HIGHER THAN SPILLWAY FACE AT ALL POINTS, 2 FT. ABOVE SPILLWAY CREST, AND 1 FT. THICK, WITH 2:1 OR FLATTER SIDE SLOPES.
11. OUTLET PROTECTION: ROCK APRON, 1-1/2 FT. THICK (MINIMUM), ZERO GRADE, WITH LENGTH EQUAL TO HEIGHT OF DAM OR EXTENDED TO STABLE GRADE, WHICHEVER IS GREATER.

12. ROCK MATERIAL: INDOT REVETMENT RIPRAP.

13. PROTECTION FROM PIPING: GEOTEXTILE FABRIC FOR SEPARATION AND FILTRATION COVERING ENTIRE FOUNDATION, INCLUDING EARTH ABUTMENTS AND APRON.

14. BASIN DE-WATERING: THROUGH A 1 FT. THICK LAYER OF INDOT CA NO. 5 STONE ON UPSTREAM FACE OF THE DAM.

INSTALLATION

SITE PREPARATION:

1. DIVERT RUNOFF FROM UNDISTURBED AREAS AWAY FROM THE ROCK DAM AND BASIN AREA.

2. EXCAVATE THE FOUNDATION FOR THE APRON, USING IT AS A TEMPORARY SEDIMENT BASIN DURING CONSTRUCTION OF THE DAM.

3. CLEAR AND GRUB THE AREA UNDER THE DAM, REMOVING AND PROPERLY DISPOSING OF ALL ROOT MAT, BRUSH, AND OTHER DEBRIS.

4. GRADE THE EARTH ABUTMENTS NO STEEPER THAN 2:1.

DAM AND BASIN CONSTRUCTION

1. EXCAVATE A CUTOFF TRENCH AT THE CENTER LINE OF THE DAM, EXTENDING ALL THE WAY UP THE EARTH ABUTMENTS, AND BACKFILL WITH COMPACTED EARTH FILL.

2. SMOOTH THE DAM FOUNDATION.

3. COVER THE ENTIRE FOUNDATION, INCLUDING BOTH EARTH ABUTMENTS, WITH GEOTEXTILE FABRIC, MAKING SURE THE UPSTREAM STRIPS OVERLAP THE DOWNSTREAM STRIPS AT LEAST 1 FT.

4. CONSTRUCT THE DAM TO PLANNED DIMENSIONS.

5. ONCE THE DAM IS IN PLACE, CLEAR THE SEDIMENT BASIN AREA, PROPERLY DISPOSING OF THE CLEARED MATERIAL.

6. SET A MARKER STAKE TO INDICATE THE CLEANOUT ELEVATION (I.E., POINT AT WHICH THE BASIN IS 50% FULL OF SEDIMENT).

7. DIVERT CONSTRUCTION SITE RUNOFF FLOW INTO THE UPPER END OF THE BASIN USING TEMPORARY DIVERSIONS.

8. STABILIZE ALL DISTURBED AREAS EXCEPT THE LOWER HALF OF THE BASIN.

SAFETY PRECAUTIONS:

1. BECAUSE SEDIMENT BASINS THAT IMPOUND WATER ARE HAZARDOUS, (A) BE SURE SIDE SLOPES ARE 2:1 OR FLATTER, (B) FENCE WITH WARNING SIGNS IF TRESPASSING IS LIKELY, (C) DE-WATER THE BASIN BETWEEN STORM EVENTS, AND (D) FOLLOW ALL STATE AND LOCAL IMPOUNDMENT SITE REQUIREMENTS.

MAINTENANCE

1. INSPECT THE ROCK DAM AND BASIN AFTER EACH STORM EVENT.

2. REMOVE SEDIMENT WHEN IT ACCUMULATES TO HALF THE DESIGN VOLUME (MARKED BY A STAKE).

3. CHECK THE DAM AND ABUTMENTS FOR EROSION, PIPING, OR ROCK DISPLACEMENT, AND REPAIR IMMEDIATELY.

4. IF THE BASIN DOES NOT DRAIN BETWEEN STORMS, REPLACE THE STONE ON THE UPSTREAM FACE OF THE DAM.

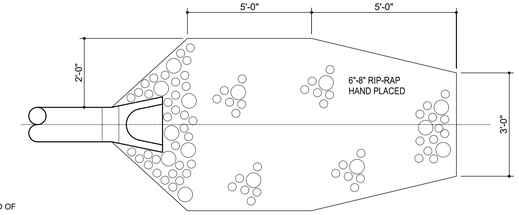

5. IF THE BASIN DRAINS TOO RAPIDLY FOLLOWING A STORM (I.E., LESS THAN 6 HRS.), ADD INDOT CA NO. 5 GRAVEL ON THE UPSTREAM FACE OF THE DAM.

6. ONCE THE CONTRIBUTING ŷŷŷŷŷŷŷŷDRAINAGE AREA HAS BEEN PERMANENTLY STABILIZED, (A) REMOVE WATER AND SEDIMENT FROM THE BASIN;

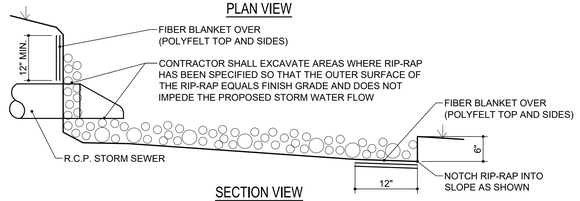

(B) REMOVE THE DAM, DISPOSING OF THE ROCK IN DESIGNATED DISPOSAL AREAS; (C) SMOOTH THE SITE TO BLEND WITH THE SURROUNDING AREA; AND (D) STABILIZE.

COMMON CONCERNS:
FAILURE FROM PIPING ALONG ABUTMENTS-BECAUSE THE FILTER MATERIAL WAS NOT PROPERLY INSTALLED OR THE EARTH ABUTMENTS ARE TOO STEEP. STONE DISPLACEMENT FROM FACE OF DAM-BECAUSE STONE SIZE IS TOO SMALL OR THE FACE IS TOO STEEP. EROSION BELOW DAM BECAUSE THE APRON WAS NOT EXTENDED TO STABLE GRADE. EROSION OF ABUTMENTS DURING SPILLWAY FLOW-BECAUSE THE ROCK ABUTMENT IS NOT HIGH ENOUGH. SEDIMENT CARRIED THROUGH SPILLWAY-BECAUSE THE DRAINAGE AREA IS TOO LARGE; TO SOLVE, DIVERT RUNOFF FROM THE UNDISTURBED AREA AWAY FROM THE BASIN. SEDIMENT LOSS THROUGH DAM-BECAUSE THE LAYER OF AGGREGATE ON THE UPSTREAM FACE IS NOT THICK ENOUGH OR IS TOO COARSE TO RESTRICT FLOW THROUGH THE DAM.

ROCK DAM
NOT TO SCALE — 8 — C502

PLAN VIEW

SECTION VIEW

RIP-RAP REQUIREMENTS:

CONTRIBUTING DRAINAGE AREA: 100 ACRES MAXIMUM.

CAPACITY: PEAK RUNOFF FROM 10-YR. FREQUENCY, 24-HR. DURATION STORM EVENT.

APRON: DESIGN DEPENDS ON CHANNEL DEFINITION, BUT IS LONG ENOUGH TO DISSIPATE RUNOFF ENERGY, SET ON ZERO GRADE, STRAIGHT AND ALIGNED WITH THE RECEIVING STREAM. (IF SITE CONDITIONS REQUIRE A CURVE, SET IT NEAR THE UPSTREAM END.)

FOUNDATION: GEOTEXTILE FABRIC FOR STABILIZATION AND FILTRATION OR WELL-GRADED GRAVEL FILTER LAYER AT LEAST 6 IN. THICK.

MATERIAL: HARD, ANGULAR, AND HIGHLY WEATHER-RESISTANT RIPRAP STONE OF 6 - 8 INCHES IN SIZE.

THICKNESS: 12 IN. MINIMUM OR TWO TIMES THE D 50 STONE DIAMETER,wHICHEVER IS GREATER.

INSTALLATION:

1. EXCAVATE THE APRON AREA SUBGRADE BELOW DESIGN ELEVATION TO ALLOW FOR THICKNESS OF THE FILTER (OR GRAVEL LAYER) AND THE RIPRAP. (THIS OVER-EXCAVATION GREATLY INCREASES THE AMOUNT OF SPOIL.)

2. COMPACT ANY FILL USED IN THE SUBGRADE TO THE DENSITY OF THE SURROUNDING UNDISTURBED MATERIAL, AND SMOOTH ENOUGH TO PROTECT FABRIC FROM TEARING.

3. PLACE THE GEOTEXTILE FABRIC (OR GRAVEL LAYER) ON THE COMPACTED AND SMOOTHED FOUNDATION. IF MORE THAN ONE FABRIC PIECE IS NEEDED, THE UPSTREAM PIECE SHOULD OVERLAP THE DOWNSTREAM PIECE BY AT LEAST 1 FT.

4. INSTALL THE RIPRAP TO THE LINES AND ELEVATIONS SHOWN IN THE DESIGN. IF THE CHANNEL IS POORLY DEFINED, THE FINAL CROSS-SECTION SHOULD BE LEVEL OR SLIGHTLY DEPRESSED IN THE MIDDLE; IF WELL DEFINED, THE FILTER (OR GROUND LAYER) AND RIPRAP SHOULD EXTEND TO THE TOP OF THE BANK.

5. IF THE GEOTEXTILE FABRIC TEARS WHEN PLACING TH RIPRAP, REPAIR IMMEDIATELY BY LAYING AND STAPLING A PIECE OF FABRIC OVER THE DAMAGE AREA, OVERLAPPING THE UNDAMAGED AREAS BY AT LEAST 12 INCHES.

6. MAKE SURE THE TOP OF THE RIPRAP APRON IS LEVEL WITH OR SLIGHTLY BELOW THE RECEIVING STREAM. (RIPRAP SHOULD NOT RESTRICT THE CHANNEL OR PRODUCE AN OVERFALL.)

7. BLEND THE RIPRAP SMOOTHLY TO THE SURROUNDING GRADE.

8. STABILIZE ALL DISTURBED AREAS IMMEDIATELY FOLLOWING INSTALLATION.

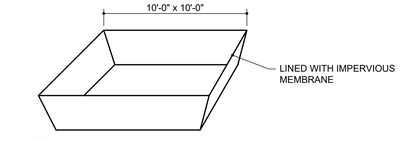

MAINTENANCE:

* INSPECT ROCK CHUTES AFTER STORM EVENTS FOR STONE DISPLACEMENT AND FOR EROSION AT THE SIDES AND ENDS OF THE APRON.
* MAKE NEEDED REPAIRS IMMEDIATELY; USE APPROPRIATE SIZE STONE; AND DO NOT PLACE THEM ABOVE FINISHED GRADE.

COMMON CONCERNS:

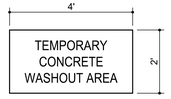

FOUNDATION NOT EXCAVATED DEEP ENOUGH OR WIDE ENOUGH--RIPRAP RESTRICTS THE FLOW CROSS SECTION, RESULTING IN EROSION AROUND THE APRON AND SCOUR HOLES AT THE OUTLET.
RIPRAP APRON ON ZERO GRADE--

GENERAL STAPLE RECOMMENDATIONS

SLOPE GRADIENT

CHANNEL LININGS UTILIZE STAPLE PATTERN "C" WITH ADDITIONAL STAPLES ON SIDE SLOPES.

NOTES:
1. STAPLE PATTERNS APPLY TO ALL NORTH AMERICAN GREEN EROSION BLANKETS.

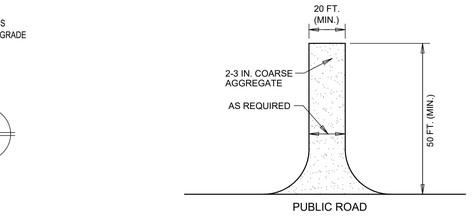

2. STAPLE PATTERNS MAY VARY DEPENDING UPON SOIL TYPE AND AVERAGE ANNUAL RAINFALL.

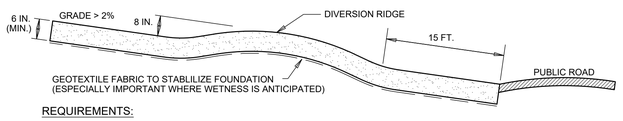

3. AT SLOPE LENGTHS GREATER THAN 300 FEET OR WHERE DRAINAGE OVER LARGE AREAS IS DIRECTED ONTO BLANKETS, STAPLE PATTERN "C" SHOULD BE UTILIZED.

4. CHANNEL LININGS REQUIRE A 2' (MIN.) OVERLAP AT LONGITUDINAL JOINTS AND SIDE SLOPES REQUIRE A 6" (MIN.) OVERLAP. WHERE OVERLAPS OCCUR, THE UPSTREAM BLANKET SHALL OVERLAP THE DOWNSTREAM.

5. NORTH AMERICAN GREEN S150BN TO BE USED FOR EROSION CONTROL BLANKETS.

EROSION CONTROL BLANKET STAPLE PATTERN
NOT TO SCALE — 2 — C502

REQUIREMENTS:

Material: 2-3 in. washed stone (INDOT CA No.2) over a stable foundation.

Thickness: 6 in. minimum

Width: 12 ft. minimum or full width of entrance/exit roadway, whichever is greater.

Length: 50 ft. minimum. The length can be shorter for small sites such as for an individual home.

Washing facility (optional): Level area with 3 in washed stone minimum or a commercial rack, and waste water diverted to a sediment trap or basin.

Geotextile fabric underliner: May be used under wet conditions or for soils within a high seasonal water table to provide greater bearing strength.

INSTALLATION:

1. Avoid locating on steep slopes or at curves in public roads.

2. Remove all vegetation and other objectionable material from the foundation area, and grade and crown for positive drainage.

3. If slope towards the road exceeds 2%, construct a 6-8 in.-high water bar (ridge) with 3:1 side slopes across the foundation area about 15 ft. from the entrance to divert runoff away from the road.

4. Install pipe under the pad if needed to maintain proper public road drainage.

5. If wet conditions are anticipated, place geotextile fabric on the graded foundation to improve stability.

6. Place stone to dimensions and grade shown in the erosion control plan, leaving the surface smooth and sloped for drainage.

7. Divert all surface runoff and drainage from the stone pad to a sediment trap or basin.

MAINTENANCE:

* Inspect entrance drive and sediment disposal area weekly and after storm events or heavy use.
* Reshape pad as needed for drainage and runoff control.
* Topdress with clean stone as needed.
* Immediately remove mud and sediment tracked or washed onto public roads by brushing or sweeping. Flushing should only be used if the water is conveyed into a sediment trap or basin.
* Repair any broken road pavement immediately.

COMMON CONCERNS:

Inadequate runoff control--results in sediment washing onto road.
Stone too small, pad too thin, or geotextile fabric absent--results in ruts and a muddy condition as stone is pressed into the soil: add more stone.
Pad too short for heavy construction traffic--extend the pad beyond the 50-ft. length as needed.
Pad not flared sufficiently at road entrance--results in mud being tracked onto the road and possible damage to the road edge: widen stone entrance and repair road damage.
Unstable foundation--use geotextile fabric under th pad and/or improve foundation drainage.

LITHONIA LIGHTING

Catalog Number:
Notes:
Type:

FEATURES & SPECIFICATIONS

INTENDED USE — Provides a maintenance-free emergency illumination for the rated wattage upon loss of AC power to meet code-required emergency lighting. Ideal for applications requiring low profile, emergency code for fewer mounting heights.

CONSTRUCTION — The housing is standard white, or optional black, thermoplastic with a compact and low profile design with all-inclusive lamp, reflector and lens assembly. It is 30% flame rated and impact-resistant.

OPTICS — The typical life of the LED is 10 years. One, 0.37W white LED per lamp head.

ELECTRICAL — Dual-voltage 120/277 standard.

Bi-color LED status indicator for battery condition. (Green-normal, Red-check battery).

One and a half watts of remote capacity available with REM option.

BATTERY: 3.6V maintenance-free, rechargeable, nickel-cadmium.

INSTALLATION — Wall mount and ceiling mount. Surface mount back plate fits most industry-standard size junction boxes and snaps into place.

LISTINGS — UL Listed. Meets all applicable requirements for: UL 924, NFPA 101 (Lumen Life Safety Code), NFPA 70 — NEC (National Electrical Code) Article 700.12F and/or 1600.9 (2012), CEC Title 24, Part 12, Subpart B and 2016 Federal Energy Standard 10FR Pa 1064 P. (50°C to 40°C) listed standard.

WARRANTY — 5 year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty-terms-and-conditions

NOTE: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

OLWP

LED Wall Pack

Customize the color temperature and of effortlessly automate your wall pack for dusk-to-dawn operation with the CLWP Wall Pack. Featuring switchable CCT (3000/4000K/5000K) and a selectable photocell, the CLWP Wall Pack is designed to deliver years of maintenance-free general illumination for residential outdoor applications such as driveways, entryways, patios, and other outdoor areas that require consistent and reliable lighting performance.

FEATURES:
- Switchable CCT (3K/4K/5K)
- Selectable ON/OFF photocell for dusk-to-dawn or switched operation
- Cast aluminum construction for durability
- Impact-resistant polycarbonate diffuser

5 YEAR WARRANTY

CS CONTRACTOR SELECT — LITHONIA LIGHTING

Specifications

INTENDED USE:
The OLWP provides years of maintenance-free general illumination for commercial or residential outdoor applications such as driveways, patios, loading areas and warehouses.

CONSTRUCTION:
Rugged cast aluminum, corrosion-resistant rear housing. Impact resistant polycarbonate front cover/diffuser resists fading and cracking. Driver operates at 120V. Operating temperature -40°C to 40°C.

OPTICS:
High-performance LEDs maintain 70% of light output at 50,000 hours of service. (LED lifespan based on IESNA LM-80-08 results and calculated per IESNA TM-21-11 methodology.). Lenses are engineered for superior lighting distribution, uniformity and fixture spacing. See Lighting Performance Table for specific fixture performance.

INSTALLATION:
Designed for wall mounting more than 4' above the ground. Mounts to a recessed junction box (by others).

LISTINGS:
UL Listed for U.S. and Canadian safety standards for wet locations.

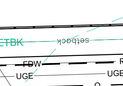

WARRANTY:
5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty-terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

☒	Tech Review
☒	Site Plan/Civil
☒	Landscape Plan
☒	Architectural Plans
☒	Other: Lighting Plan

Site and Zoning Map:

Project and Site Background:

This development plan review is for a 2,860 sq.ft. over the road truck maintenance building and a 900 sq. ft. office building to serve Lion's Trans Inc. The use would fall under Vehicle/Equipment Services – Heavy. The site has one access point off of N CR 1000 E. The proposed access drive lines up across from E CR 400 N. The site does not have any previous variances. The initial application for this project was uploaded on April 24, 2023, but never went before the Advisory Plan Commission.

Technical Review:

The TECH review for this project took place on November 6, 2025. Development Services commented that a lighting spec sheet needs added for the outdoor lighting and the light output needs shown in lux on the lighting plan. Pole, wall, or ground mounted fixtures must be full-cutoff fixtures. Landscape tables need to be provided that show the calculations of required versus provided landscaping (onsite landscaping requirements, any applicable buffer planting requirement, etc.) A sidewalk needs added to side of CR 1000 E and material percentages for each façade need added to the architectural detail submittal with details for the office on the site, not just the maintenance building. The Wastewater Department commented that the site is outside of Brownsburg's sanitary service area. The Stormwater O & M appears to be the drainage report. A Stormwater O & M will need to be provided indicating the property owner is responsible for stormwater system maintenance. The Street Department commented that radiuses need to be shown at entrances and a TR-13 connection to the existing street needs to be added as well. The Fire Territory commented that the utility plan does not show any fire hydrants. The east end of the maintenance building is approximately 300 feet from the front of the property. IN Fire Code 675 IAC 22-2.5 states that where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road, as measured by an approved route around the exterior of the facility or building, on-site fire hydrants and mains shall be provided. The applicant's revised plan uploaded on 10/7/25 includes an office building at the east end of the property that was not included in the original submission. The new building is more than 700 feet from the hydrant shown on CR 1000 E. A private fire main and hydrant will be required within 400 feet of all points on the exterior of buildings per IFC 507.5.1.

Traffic Study:

A traffic study was not required for this project.

Criteria:

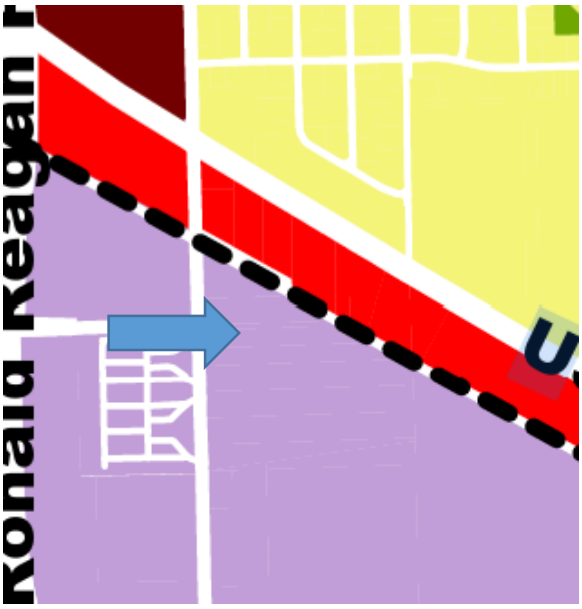

Pursuant to Chapter 8 of the Brownsburg Unified Development Ordinance the Advisory Plan Commission shall make findings of fact on the following criteria:

1) The Development Plan is consistent with the **Comprehensive Plan**.

   Future Land Use Map Link: https://www.brownsburg.org/DocumentCenter/View/1068/2021-Future-Land-Use-Map-PDF

   a) The Future Land Use Map notes the site as being used for flex/ light industrial. Flex space is a permitted use in an MS district as well as light manufacturing. The Comprehensive Plan notes that motorsport related development may be suited to a commercial retail space, an office, or require large flex spaces that may feature loading docks or vehicle bays. These may be suited in

either commercial or industrial employment areas. This project's proposed use is in line with the Future Land Use Map and the MS district.

Based on the above information, staff believes this criterion has been met.

2) The Development Plan complies with applicable development requirements and standards of **CHAPTER 2 – ZONING DISTRICTS, CHAPTER 3 – PERMITTED USES,** and/or the PUD Ordinance.

https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=14

a) The project meets the minimum front setback of 35', the minimum side setback of 20', and the minimum rear setback of 20'. Maximum lot coverage is 80% in an MS district, this project is only 65.4%. The maintenance building on the site is 30'-9" tall, which is under the maximum height allowed for a primary structure (65'). However, to date no elevations of the office building have been submitted, to review for compliance.

Based on the above information, staff believes this criterion has not been met.

3) The Development Plan complies with applicable standards found in **CHAPTER 5: SITE DEVELOPMENT** and/or the PUD Ordinance.

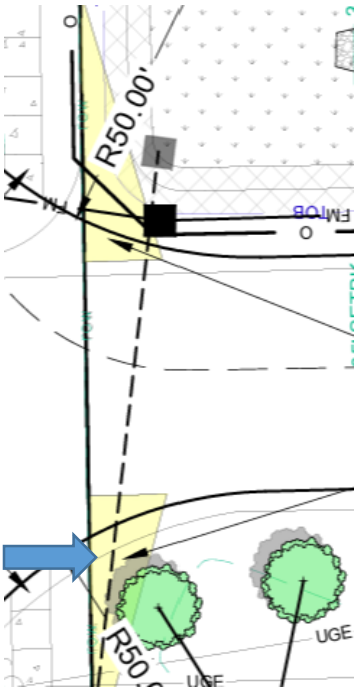

https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=101

a) *Landscaping*: The applicant has added the planting quantity that was required along with the provided landscaping amounts to their planting schedule per Development Services TECH review comments. This standard has been met.

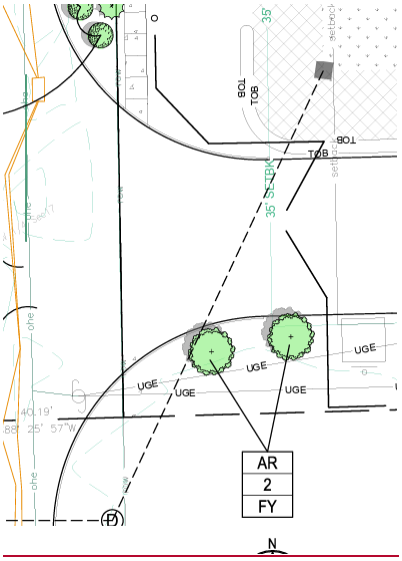

b) *Lighting*: The maximum light trespass allowed for an MS zoned district is 30 lux, the proposal does not exceed this by the property line.

c) *Parking*: The applicant provided 36 truck parking spaces, 4 standard spaces, and 1 ADA handicap space for a total of 40 spaces that meets the parking standards.

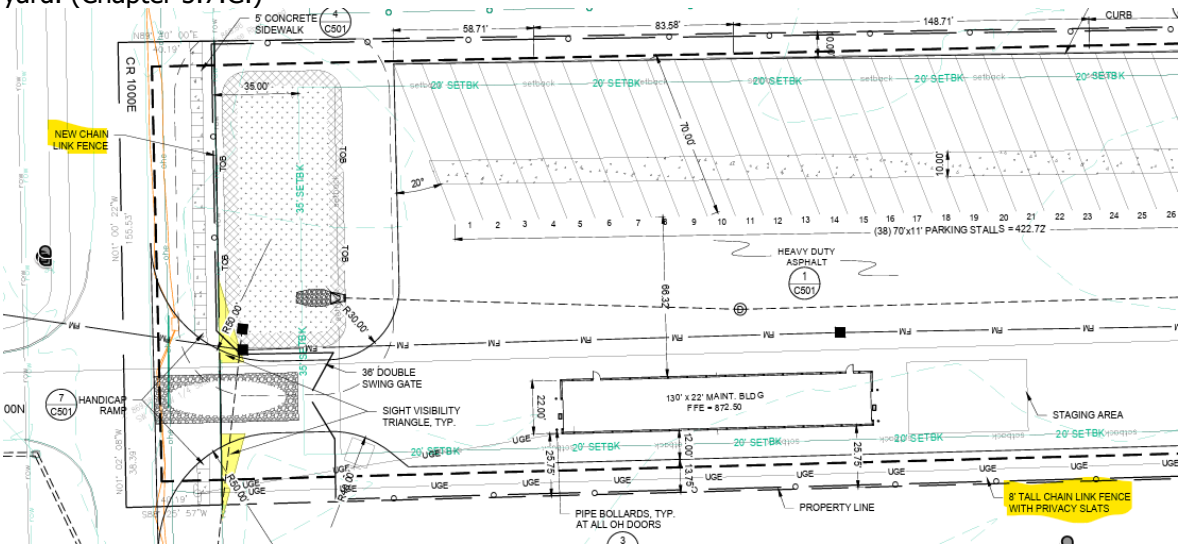

d) *Vision Clearance Triangle*: The VCT's are labeled on their Civil and Landscape Plan submittal. There is a red/ sugar maple (canopy, deciduous tree) that has a listed height on the planting schedule of 40-50 ft and a spread of 30-40 ft that is in violation of Chapter 5.16.B. Vertical Area on page 142 of the UDO. 'Landscaping shall be permitted to be placed or to project into the vision clearance triangle between the heights of two feet and nine feet above the crown of the adjacent roadway.' The proposed tree would exceed this requirement and therefore need to be moved back to the east out of the VCT. The proposed fence on the north side of the access drive (shown below) is within the applicant's vision clearance triangle.

Since the continuance on December 17th, 2025, the applicant has resubmitted the landscape plans. This led to a deletion of the vision clearance triangles from the new landscape plan shown below). The triangles will need added to the new landscape plan.

e) *Other*: The applicant has marked an 8' tall chain link fence with privacy slats around the perimeter of the property and a chain link fence in the front yard. There is a 36' double swing gate that leads into the property off the access point from CR 1000 E. Chain link is a prohibited material for a vehicle/ equipment services – heavy use. Permitted materials consist of wood, brick, masonry, or other similar durable materials. The fence or wall must be constructed high enough to conceal vehicles, equipment, or parts located on the lot. (Chapter 3.5.P. of the UDO) Non-residential fences and walls are also not permitted in front yards, only in the side or rear yard. (Chapter 5.7.G.)

Based on the above information, staff believes this criterion has not been met.

4) <u>The Development Plan complies with any **other applicable provisions** of this Ordinance or **Overlay Standards.**</u>

a) No special provisions that relate to the plat are noted for this site.

b) Overlay districts are not applicable to this project.

Based on the above information, staff believes this criterion has been met.

5) Satisfies any provision related to a development's design as found in **CHAPTER 7 – SUBDIVISION REGULATIONS** and/or the PUD Ordinance.

https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=168

a) The project meets the standards for setbacks, lot coverage, and height. Easements are shown and labeled on the plat. A sidewalk has been added along the west side of the property that fronts CR 1000 E to satisfy the Brownsburg Transportation Plan requirements.

Based on the above information, staff believes this criterion has been met.

6) The Development Plan satisfies the construction requirements of the **Brownsburg Construction Standards and Specifications.**

a) The applicant has been coordinating with Wessler Engineering and the Wastewater Department to find a solution for the discharge from the post developed property since it is limited by the receiving conveyance (detention on-site or increasing capacity downstream were mentioned as being appropriate solutions). The design requirements in Chapter 151 (Stormwater Management) must be met. No waivers have been requested. If the applicant can meet the design requirements, then no waiver is needed. TECH review comments will need to be completed before permitting and the completion of the comments will be added as a condition for approval.

Based on the above information, staff believes this criterion has not been met.

Recommendations:

The Advisory Plan Commission may request conditions and commitments related to the project and criteria. Conditions or commitments must be made as part of the motion.

Based on the information provided and the criteria responses, staff recommends a motion to

☐	Approve PSDP-23-21 as presented.
☒	Approve PSDP-23-21 with the following staff conditions: 1. The approval of Findings of Fact and Report of Determination. 2. The stamping of the construction plans by the Director. 3. The completion of any outstanding TECH comments. 4. The removal of the fence from the front yard and change the material from chain link to a permitted material. (Options listed in Chapter 3.5.P.4.d. of the UDO) 5. The removal of the red/sugar maple tree from the vision clearance triangle on the south side of the access road.
☐	Deny PSDP-23-21 based on the following criteria:

Advisory Plan Commission
TECHNICAL REVIEW COMMITTEE

TOWN OF Brownsburg
61 North Green Street | Brownsburg, Indiana 46112
Tel 317.852.1128 | Fax 317.852.1134

Project Name: Lions Trucking DPR
Record Number: PSDP-23-21
TECH Meeting Date: November 6, 2025

The following Technical Review Committee ("TECH") members provided comments for the project as detailed below:

Development Services
- ☐ Jenna Wertman, AICP, Director
- ☒ Lauren Bouslog, Associate Planner
- ☐ Steve Fletcher, Building Commissioner
- ☐ Frank Wise, Senior Building Inspector

Town Administration
- ☐ Debbie Cook, Town Manager
- ☐ Aaron Kaytar, Capital Projects & Procurement Manager
- ☐ Ethan Pierce, Economic Development Manager

Water Department
- ☐ Frank Monts, Superintendent

Wastewater Department
- ☒ Kathy Dillon, Water Utilities Director
- ☐

Street Department
- ☒ Aaron Love, Superintendent
- ☐ Matt Griner, Asst. Superintendent

Parks Department
- ☐ Amber Lane, Director
- ☐

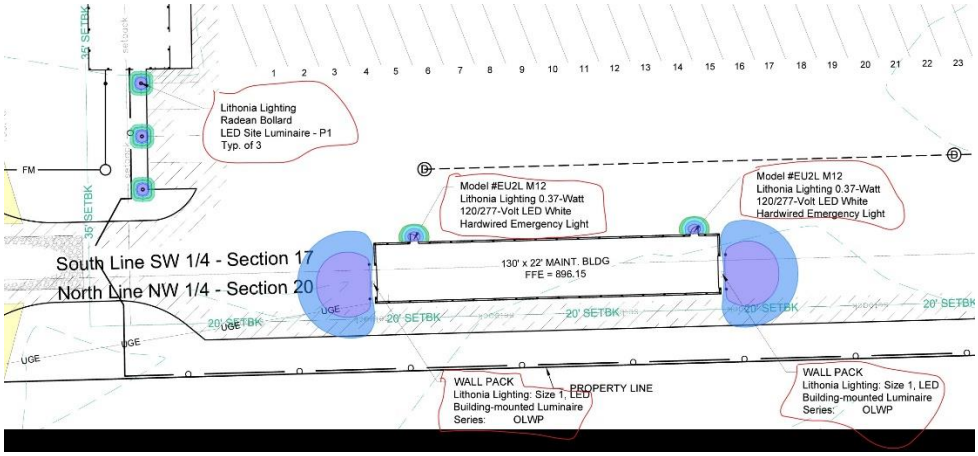

Fire Territory
- ☒ Paul Hudson, Fire Marshal
- ☐ Jeff Schlageter, Deputy Fire Marshal

Police Department
- ☐ Joe Grimes, Chief
- ☐ Pat Bullock, Captain
- ☐ Bryan Fultz, Major

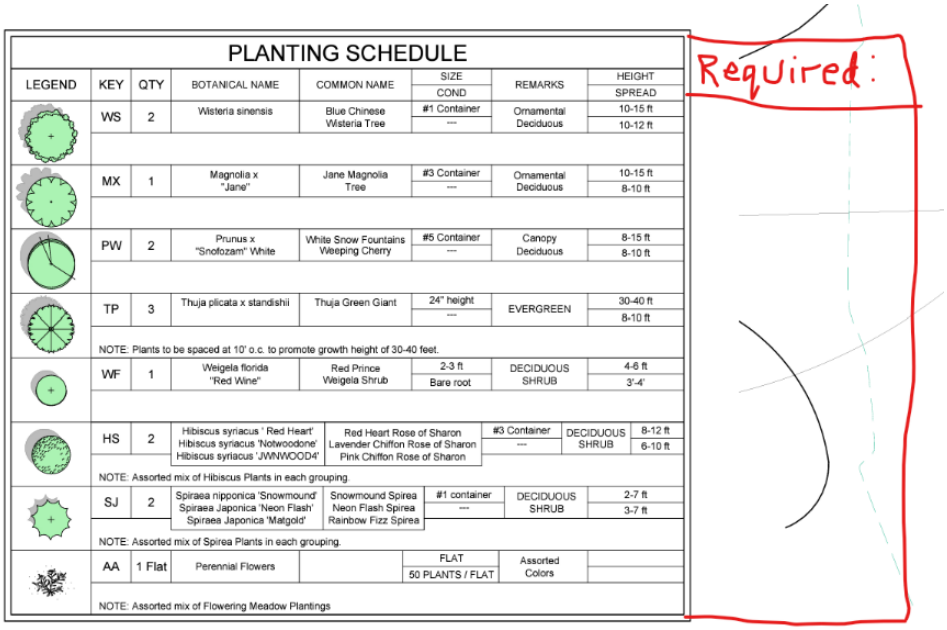

External Agencies
- ☐ Regan Huff, BCSC
- ☐ Dave Gaston, P.S., Hend. Co. Surveyor
- ☐ John Ayers, Hendricks Co. Engineer
- ☐ Mary Atkins, Wessler Engineering
- ☐ Angie DeKemper, CountryMark
- ☐ Gerry Jones, Vectren

1) DEVELOPMENT SERVICES

a) Add a lighting spec sheet for your outdoor lighting. We also need the light output shown in lux. Since this is an MS zoned district, the allowable light at the property line is 30 lux. Pole, wall, or ground mounted fixtures must be full-cutoff fixtures.

b) Provide landscape tables that show the calculations of required versus provided landscaping (onsite landscaping requirements, any applicable buffer planting requirement, etc.) You only have provided currently, see pic below.

PLANTING SCHEDULE

LEGEND	KEY	QTY	BOTANICAL NAME	COMMON NAME	SIZE / COND	REMARKS	HEIGHT / SPREAD
	WS	2	Wisteria sinensis	Blue Chinese Wisteria Tree	#1 Container / ---	Ornamental Deciduous	10-15 ft / 10-12 ft
	MX	1	Magnolia x "Jane"	Jane Magnolia Tree	#3 Container / ---	Ornamental Deciduous	10-15 ft / 8-10 ft
	PW	2	Prunus x "Snofozam" White	White Snow Fountains Weeping Cherry	#5 Container / ---	Canopy Deciduous	8-15 ft / 8-10 ft
	TP	3	Thuja plicata x standishii	Thuja Green Giant	24" height / ---	EVERGREEN	30-40 ft / 8-10 ft
NOTE: Plants to be spaced at 10' o.c. to promote growth height of 30-40 feet.							
	WF	1	Weigela florida "Red Wine"	Red Prince Weigela Shrub	2-3 ft / Bare root	DECIDUOUS SHRUB	4-6 ft / 3'-4'
	HS	2	Hibiscus syriacus ' Red Heart' / Hibiscus syriacus 'Notwoodone' / Hibiscus syriacus 'JWNWOOD4'	Red Heart Rose of Sharon / Lavender Chiffon Rose of Sharon / Pink Chiffon Rose of Sharon	#3 Container / ---	DECIDUOUS SHRUB	8-12 ft / 6-10 ft
NOTE: Assorted mix of Hibiscus Plants in each grouping.							
	SJ	2	Spiraea nipponica 'Snowmound' / Spiraea Japonica 'Neon Flash' / Spiraea Japonica 'Matgold'	Snowmound Spirea / Neon Flash Spirea / Rainbow Fizz Spirea	#1 container / ---	DECIDUOUS SHRUB	2-7 ft / 3-7 ft
NOTE: Assorted mix of Spirea Plants in each grouping.							
	AA	1 Flat	Perennial Flowers		FLAT / 50 PLANTS / FLAT	Assorted Colors	
NOTE: Assorted mix of Flowering Meadow Plantings							

Required:

d) Do you plan on putting a dumpster that would require a trash receptacle screen on all sides (wall or fence) by the new truck maintenance building? If so, it would need to be a similar material that complements the new building's facade, be placed on a paved surface and be accessible by gates.

e) A sidewalk is required on this side of CR 1000 E.

f) Add material percentages for each facade to your architectural detail submittal and include architectural details for the office on the site, not just the maintenance building.

2) BUILDING

a) None

3) CAPITAL PROJECTS

a) None

4) ECONOMIC DEVELOPMENT

a) None

5) WATER

a) None

6) WASTEWATER

a) This is outside of Brownsburg's Sanitary service area.

b) The Stormwater O&M appears to be the drainage report. A Stormwater O&M will need to be provided indicating the Property owner is responsible for the Stormwater system maintenance.

7) STREET/PUBLIC WORKS

a) Show radiuses at the entrance

b) TR-13 connection to existing street as well as add 02504

c) Check on transportation plan for sidewalks needed and add as necessary.

8) PARKS

a) None

9) FIRE TERRITORY

a) Utility plan does not show any fire hydrants. East end of maintenance building is approximately 300 feet from the front of the property.
IN Fire Code 675 IAC 22-2.5

507.5 Fire hydrant systems.

507.5.1 Where required. Where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road, as measured by an *approved* route around the exterior of the facility or building, on-site fire hydrants and mains shall be provided.

ACTION REQUIRED: Produce exhibit showing compliance with IFC 507.5.1. A private hydrant may be required.

b) Site analysis table on sheet C000 lists 1 building with a square footage of 2080 ft^2. Following sheets show 2 buildings with a total square footage of 3760 ft^2.
675 IAC 12-6-7 (b) (1) Plans shall be sufficiently clear and complete to show in detail that the proposed work will comply with the rules of the commission.

ACTION REQUIRED: Submit corrected sheets

c) Revised plan uploaded on 10/7/25 includes a building at the east end of the property that was not included in the original submission. New building is more than 700 feet from the hydrant shown on CR 1000 E. Please note my previous comment re: private fire main and hydrant. A private hydrant will be required within 400 feet of all points on the exterior of buildings per IFC 507.5.1.

10) POLICE

a) None

11) STORMWATER

a) See attached

12) BROWNSBURG COMMUNITY SCHOOL CORPORATION

a) None

13) HENDRICKS COUNTY SURVEYOR

a) None

14) HENDRICKS COUNTY ENGINEER

a) None

15) COUNTRYMARK

a) None

Please provide a written response to this report addressing each issue and, if necessary, indicate where on the revised plans the modification has been made.

16) VECTREN

a) None

Plan Review Status:		
☐	**Plan is Adequate**	A comprehensive plan review has been completed and it has been determined that the plan satisfies the minimum requirements of the Town of Brownsburg Stormwater Management Ordinance and Construction Standards, and the Construction Stormwater General Permit INRA00000 (Effective 12-18-2021).
☐	**Preliminary Review**	A comprehensive review will not be completed at this time. The plan review authority reserves the right to perform a comprehensive review at a later date, and revisions may be required at that time.
☐	**Conditional Acceptance**	Acceptance of the plan is conditional. The conditional acceptance is contingent upon addressing the issues identified in the comment sections.
☒	**Plan is Deficient**	Significant deficiencies were identified and must be addressed. Refer to the comment sections.

Action:	
☐	**Submit a Notice of Intent:** Submit the Notice of Intent (NOI) online through the IDEM Regulatory ePortal. It is required to upload a copy of this review form when submitting the NOI through the IDEM Regulatory ePortal: (https://stormwater.idem.in.gov/ncore/external/home)
☒	**Do not file a Notice of Intent or commence land-disturbing activities:** Deficiencies must be adequately addressed and an acceptable plan review completed.
☒	**Comments:** Refer to Plan Review Comments Sections of this document.
☒	**Revisions:** Update and submit the revised Construction/Stormwater Pollution Prevention Plan as indicated below.
	☒ Update and submit a complete plan set that addresses plan deficiencies.
	☒ Update and submit a document (narrative and/or plan sheets) that address plan deficiencies.
	☐ Update and submit a complete plan set that addresses plan deficiencies. A comprehensive plan review will not be completed.

Plan Review Information

- *The technical review and comment is intended to evaluate the completeness of the Construction/Stormwater Pollution Prevention Plan for the project. The Plan submitted was not reviewed for the adequacy of engineering design. All measures included in the plan, as well as those recommended in the comments should be evaluated as to their feasibility by a qualified individual with structural measures designed by a qualified engineer. The Plan has not been reviewed for other local, state, or federal permits that may be required to proceed with this project.*
- *Construction activities and unforeseen weather conditions may affect the performance of the erosion and sediment control system, individual measures, or the effectiveness of the plan. The plan must be a flexible document, with provisions to modify or substitute measures as necessary to ensure compliance.*

Priority Site Information:

☐	**Nature and Extent of Construction**	☐	**Close Proximity to Wetlands**
☐	**Close Proximity to Sensitive Area**	☐	**Potential for Direct Runoff to Receiving Waters**
☐	**Steep Topography on Proposed Construction Site**	☒	**Not a Priority Site**

Section A: Construction Plan Elements

Adequate	Deficient	NA	A	*The construction plan elements include general information associated with the project site that are critical for the evaluation of the stormwater pollution prevention plan component. This information includes, but is not limited to an index, resource information, reference maps, grading information, project layout and design, and drainage plan*
☒	☐	☐	**1**	Index of the location of required plan elements in the construction plan
☒	☐	☐	**2**	A vicinity map depicting the project site location in relationship to recognizable local landmarks, towns, and major roads
☒	☐	☐	**3**	Narrative of the nature and purpose of the project
☒	☐	☐	**4**	Latitude and longitude to the nearest fifteen (15) seconds
☒	☐	☐	**5**	Legal description of the project site
☒	☐	☐	**6**	11 X 17-inch plat showing building lot numbers/boundaries and road layout/names
☒	☐	☐	**7**	Boundaries of the one hundred (100) year floodplains, floodway fringes, and floodways
☒	☐	☐	**8**	Land use of all adjacent properties
☒	☐	☐	**9**	Identification of a U.S. EPA approved or established TMDL
☒	☐	☐	**10**	Name(s) of the receiving water(s)
☒	☐	☐	**11**	Identification of discharges to a water on the current 303d list of impaired waters and the pollutant(s) for which it is impaired
☒	☐	☐	**12**	Soil map of the predominant soil types
☒	☐	☐	**13**	Identification and location of all known wetlands, lakes and water courses on or adjacent to the project site (construction plan, existing site layout)
☒	☐	☐	**14**	Identification of any other state or federal water quality permits or authorizations that are required for construction activities– required 50-foot natural buffer
☒	☐	☐	**15**	Identification and delineation of existing cover, including natural buffers
☒	☐	☐	**16**	Existing topography at a contour interval appropriate to indicate drainage patterns
☒	☐	☐	**17**	Location(s) of where run-off enters the project site
☒	☐	☐	**18**	Location(s) of where run-off discharges from the project site prior to land disturbance. Erosion measures required at the discharge point.
☒	☐	☐	**19**	Location of all existing structures on the project site
☒	☐	☐	**20**	Existing permanent retention or detention facilities, including manmade wetlands, designed for the purpose of stormwater management

☒	☐	☐	**21**	Locations where stormwater may be directly discharged into ground water, such as abandoned wells, sinkholes, or karst features
☒	☐	☐	**22**	Size of the project area expressed in acres
☒	☐	☐	**23**	Total expected land disturbance expressed in acres
☒	☐	☐	**24**	Proposed final topography
☒	☐	☐	**25**	Locations and approximate boundaries of all disturbed areas
☒	☐	☐	**26**	Location, size, and dimensions of all stormwater drainage systems, such as culverts, storm sewers, and conveyance channels
☒	☐	☐	**27**	Locations of specific points where stormwater and non-stormwater discharges will leave the project site
☒	☐	☐	**28**	Location of all proposed site improvements, including roads, utilities, lot delineation and identification, proposed structures, and common areas
☒	☐	☐	**29**	Location of all on-site soil stockpiles and borrow areas
☒	☐	☐	**30**	Construction support activities that are expected to be part of the project
☒	☐	☐	**31**	Location of any in-stream activities that are planned for the project including, but not limited to stream crossings and pump arounds

Section A – Comments:

-

Section B: Stormwater Pollution Prevention Plan – Erosion and Sediment Control/Project Site Management				
Adequate	**Deficient**	**NA**	**B**	*The construction component of the Stormwater Pollution Prevention Plan includes stormwater quality measures to address erosion, sedimentation, and other pollutants associated with land disturbance and construction activities. Proper implementation of the plan, maintenance of measures, and administering a self-monitoring program is required to manage the project site to minimize the discharge of sediment and other pollutants. Construction activities and unforeseen weather conditions may affect the performance of the erosion and sediment control system, individual measures, or the effectiveness of the plan. The plan must be a flexible document, with provisions to modify or substitute measures as necessary to ensure compliance.*
☒	☐	☐	**1**	Description of the potential pollutant generating sources and pollutants, including all potential non-stormwater discharges
☒	☐	☐	**2**	Stable construction entrance locations and specifications. Plan to clear tracking of sediments on road. Dust suppression plan.
☐	☒	☐	**3**	Specifications for temporary and permanent stabilization. Include seeding and mulching plan and 70% coverage requirement for final stabilization. Include 7-day stabilization requirement.
☒	☐	☐	**4**	Sediment control measures for concentrated flow areas (sediment basins if used have specific requirements)
☒	☐	☐	**5**	Sediment control measures for sheet flow areas
☐	☐	☒	**6**	Run-off control measures
☐	☒	☐	**7**	Stormwater outlet protection locations and specifications
☐	☐	☒	**8**	Grade stabilization structure locations and specifications
☐	☒	☐	**9**	Dewatering applications and management methods
☐	☐	☒	**10**	Measures utilized for work within waterbodies
☐	☒	☐	**11**	Maintenance guidelines for each proposed temporary stormwater quality measure
☐	☒	☐	**12**	Planned construction sequence describing the relationship between implementation of stormwater quality measures in relation to land disturbance
☐	☐	☒	**13**	Provisions for erosion and sediment control on individual building lots regulated under the proposed project
☒	☐	☐	**14**	Material handling and spill prevention and spill response plan meeting the requirements in 327 IAC 2-6.1

☒	☐	☐	**15**	Material handling and storage procedures associated with construction activity. Management of waste materials and dumpsters for runoff and wind. Concrete washout management. Fueling areas. Equipment washing. Application of pesticides, herbicides, insecticides and fertilizers. Disposal of hazardous waste. Washing of paint or grout applicators.

Section B – Comments:

- General: Per Section 3.3(a)(13), notice shall be posted near the main entrance of the project site containing all documentation listed in Section 3.3(a)(13)(A). Include a note in the plans specifying this requirement.
- B3: Per Town of Brownsburg Construction Standards 02101, prior to seeding, disturbed areas must be graded to final grade and receive a minimum of four (4) inches of topsoil. A note should be added to the Plan Sheets specifying this requirement.
- B3: Include a note that stabilization must be initiated by the end of the seventh day the area is left idle and stabilization shall be completed within 14 days after initiation per the requirements of the Construction Stormwater General Permit.
- B3: Per the CSGP Section 3.4(b), final stabilization of a project site is achieved when all land disturbing activities have been completed and a uniform perennial vegetative cover with a density of seventy percent has been established on all unpaved disturbed areas.
- B7: Per the Town of Brownsburg Construction Standards 02101, Section 2.01(F) Riprap placed for pipe and outfall protection shall be contained in a gabion basket. Please update plans to include gabion baskets for rip rap outlet protection.
- B9: Include a detail and/or specifications for dewatering in the event that it becomes necessary during construction activities It is recommended that a dewatering bag detail be provided, or otherwise note that sediment laden water shall be directed to an appropriate sediment control measure or a series of control measures that minimizes the discharge of the sediment.
- B11: Section B11 of the SWPPP should be in reference to erosion and sediment control measures proposed for use during construction. Provide specific maintenance guidelines in the SWPPP or with the construction details for the erosion control blanket, inlet protection, concrete washout and silt fence.
- B12: Per Town of Brownsburg Construction Standards 01010, a pre-construction meeting must be scheduled with the Town a minimum of 48-hours prior to the start of construction. A note should be added to the plan sheets specifying this requirement.
- B12: Include a note on the plans stating the following: per the IDEM CSGP Section 6.4(a)(9)(B) a notice of termination shall be verified by the local MS4 before submittal to IDEM. The Town of Brownsburg shall be contacted prior to filing of the NOT to verify eligibility for termination of permit coverage.

Section C: Stormwater Pollution Prevention Plan – Post-Construction

Adequate	Deficient	NA	C	*The post-construction component of the Stormwater Pollution Prevention Plan includes the implementation of stormwater quality measures to address pollutants that will be associated with the final project land use. Post-construction stormwater measures should be functional upon completion of the project. Long term functionality of the measures is critical to their performance and should be monitored and maintained.*
☒	☐	☐	**1**	Description of pollutants and their sources associated with the proposed land use
☒	☐	☐	**2**	Description of proposed post-construction stormwater measures including stormwater detention and water quality treatment according to the local ordinance (refer also to separate technical review comments)
☒	☐	☐	**3**	Plan details for each stormwater measure
☒	☐	☐	**4**	Sequence describing stormwater measure implementation
☐	☒	☐	**5**	Maintenance guidelines for proposed post-construction stormwater measures. Operation and Maintenance (O&M) Manual.
☒	☐	☐	**6**	Entity that will be responsible for operation and maintenance of the post-construction stormwater measures

Section C – Comments:

- General: Ensure stormwater measures meet all of the Town of Brownsburg ordinances and standards. Refer to the Stormwater Review Comments.
- O&M Manual: The O&M Manual refers to Hendrick's County and County review officials however the Town of Brownsburg is the regualtory authority. Update throughout.
- O&M Manual: Per the Town of Brownsburg Stormwater Management Ordinance, the O&M manual shall include a site plan that depicts the stormwater runoff flow direction, drainage patterns and the flood routing path of the project site. This information was not provided in the site map; provide accordingly.
- O&M Manual: In one of the site maps provided, clearly callout the location of the bioretention area to be inspected by the owner.
- O&M Manual: The Operation, Maintenance and Inspection checklist provided is for a swale and not a biortention area. Provide a checklist that is applicable to the practice used on this project.
- O&M Manual: The function of a bioretention basin is impacted by the vegetation. Include guidance in the manual on dealing with invasives and how to reseed properly if areas become bare or vegetation needs replaced.

TOWN OF BROWNSBURG STORMWATER/DRAINAGE PLAN REVIEW

CO Comment Originator
CR Comment Respondee

NAME OF PROJECT: Lion's Trucking
DESIGN PACKAGE: Development
DESIGNER: Moench Engineering

		Wessler - Reviewer to complete		Designer to complete	
No.	PAGE/SHEET REFERENCE	CO	COMMENT	CR	RESPONSE
1	Forebay	RS	Per Ch 151.21 C.1.h. The Town does not allow the use of forebays. Refer to Ch 151.23 for WQ guidance.		
2	Easements	RS	The drainage easement around the retention pond appears to overlap into the ROW.		
3	Flood Routing	RS	Evaluate stormwater ponding and overflow path routing for Ch. 151.21 I. Show the ponded areas as hatched on the construction plans with peak elevation listed. Indicate the overland flow path. The flood route conditions assume the storm network is full/clogged and flow must travel overland.		
4	Pipe Cover	RS	Minimum 2 feet cover is required.		
5	Emergency Spillway	RS	The report states that the crest for ES is 867.89 (0.11 ft below TOB). However, the plans show ES crest at 866.58 and TOB at 867.58. Where is the E.S. located - show on the plans.		
6	Inlets	RS	The inlet calcs under 50% clogged conditions do not show depth of ponding at the inlets. Max allowed is 6 inches.		
7	Pond	RS	Will this function as a dry pond? Dry ponds require an underdrain. Refer to the Town's construction detail EW-04 for applicable items to show on the plans for ponds.		
8	Force Main	RS	A new force main appears to be planned along the edge of the pond. Verify that all local and state setback requirements are met.		
9	Concrete Apron	RS	Is this designed to convey stormwater?		
10	Impervious Surface Area	RS	Provide the total amount of impervious surface area in square feet for the completed project on the title sheet of the construction plans. In addition to the total, provide a breakdown of total compacted gravel, total concrete/asphalt and total building footprint (in square feet). This is used for stormwater utility billing.		
11	Adequate outlet	RS	Include analysis of the downstream receiving storm pipe to show it has adequate capacity for the release from the pond.		
12	PreCast Message	RS	All storm grate castings shall be pre-cast with a pollution prevention message.		
13	HGL	RS	Include 10 year HGL calcs in the drainage report showing that the HGL remains below the crown of the pipe.		

TOWN OF BROWNSBURG STORMWATER/DRAINAGE PLAN REVIEW

CO Comment Originator
CR Comment Respondee

NAME OF PROJECT: Lion's Trucking
DESIGN PACKAGE: Development
DESIGNER: **Moench Engineering**

		Wessler - Reviewer to complete		Designer to complete	
No.	PAGE/SHEET REFERENCE	CO	COMMENT	CR	RESPONSE
14	Construction Details	RS	If not using the Town's standard details, verify that all applicable requirements from the Town's standard details are reflected in the details used on the plans. e.g. Missing toewall on the outlet end section detail (minimum 36" for incoming to ponds), missing details required by EW-04, etc.		
15	Report	RS	Must be prepared by licensed P.E. or P.L.S. List who prepared the report.		
16	Detention Sizing	RS	Use the TR-55 method. CN for proposed conditions shall be the next less infiltrating class for soils. e.g. HSG C soil must be HSG D soil in the calculation. Minimum Tc to be used for detention sizing is 30 minutes.		
17	Downspouts/ Sumps	RS	Verify that downspouts (and sumps if applicable) tie directly into the storm sewer system and do not allow overland flow.		
18	Pipe Profile	RS	Include pipe profile on the construction plans. A minimum one tenth drop is required in structures.		

These comments should not be construed as a comprehensive list of comments, and the reviewer may make additional comments based on subsequent submittals

PSDP-23-21

Dear Technical Review Committee,

We are pleased to provide you with our responses to your Vendor Comments sent in an email dated November 6, 2025. The responses provided will follow the same numbering scheme found in the comment email.

1) **Development Services**
   a. A lighting spec sheet can be found on Sheet LT101. A lighting legend in lux can be found here.
   b. The planting schedule found on Sheet L101 shows the required landscaping quantity.
   c. A dumpster is not planned next to the new truck maintenance building.
   d. A sidewalk is shown on sheet C201.
2) **Wastewater**
   a. Noted
   b. O&M Manual has been updated and attached.
3) **Street Department**
   a. Radii have been labeled at entrances per sheet C201.
   b. The plans have been revised to include an acceleration lane and entrance lane. A passing blister was not reasonable due to the intersection west of the entrance to the property.
   c. See Section 1 response d.

4) **Fire Territory**
   a. The drawings have been revised to show a private fire main and hydrant within 400 feet of the building at the east end of the property as per IFC 507.5.1
   b. The site analysis table and following sheets fixed to match.
   c. A private hydrant is shown on sheet C401.
5) **Section A Comments**
   a. No Comments
6) **Section B Comments**
   a. This requirement has been noted in the plans.
   b. A note specifying this requirement has been added.
   c. Stabilization note made.
   d. Noted
   e. Gabion baskets have been added for riprap outlet protection.
   f. Dewatering details have been added.

g. Section B 11 has been updated to be more specific.
h. A note about the pre-construction meeting has been added.
i. The note has been added.

7) <u>Section C Comments</u>

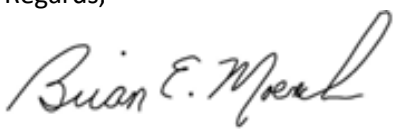

a. See next section.
b. The O&M Manual has been updated accordingly.
c. The noted items have been provided in the O&M Manual.
d. Noted
e. The inspection checklist has been updated.
f. Guidance added.

8) <u>Town of Brownsburg Stormwater/Drainage Plan Review</u>

a. The Water Quality items have been updated. An ADS Arcadia AR8 hydrodynamic separator has been included for water quality measures.
b. This has been addressed in the pond design.
c. Emergency Overflow information can be found in section **<u>4.1 Detention Pond and Outlet Structure</u>** of the TIR.
d. Pipe cover requirement of 2 feet has been met, see **APPENDIX B** for pipe cover calculations.
e. The emergency spillway has been updated. The outlet structure has an opening on the top that conveys 125% of the 100-year storm.
f. All inlets were calculated for 6" of ponding. The calculations can be found in **APPENDIX B**.
g. The pond is a dry pond. An underdrain will be utilized.
h. Verified.
i. No, this is used to support semi-trucks.
j. This has been added to the title sheet.
k. The downstream pipe system has been redesigned to handle on site drainage.
l. Noted
m. Pipe Calculations can be found in **APPENDIX B**.
n. Details have been updated and addressed.
o. Noted
p. Detention sizing method is described in the **Proposed Conditions** section of the Technical Information Report. Hydrographs can be seen in **APPENDIX A** for the relevant storm.
q. Verified
r. A pipe profile has been added.

Please let us know if you have any questions.

Drainage Narrative

1.0 Project Scope

The proposed project involves the development of a truck maintenance facility that will include 42 stalls for truck and trailer parking, a 900 square foot office building (30 ft × 30 ft), and a 2,860 square foot maintenance building (130 ft × 22 ft) located along the southern boundary of the property. In addition, a detention pond will be constructed to manage and control stormwater runoff generated by the site improvements.

The project site is located at 4005 N CR 1000 E, Brownsburg, Indiana 46112. The parcel is not currently subject to zoning restrictions. The proposed development will result in approximately 2 acres of land disturbance. Stormwater from the site will discharge to the existing offsite storm sewer network located along CR 400 N, which ultimately conveys flow to a tributary downstream of the property.

2.0 Rainfall Information

Table 1. Rainfall Intensities (Hendricks County 2016)

Rainfall Intensities for Various Return Periods and Storm Durations						
Duration	*Intensity (Inches/Hour)*					
	Return Period (Years)					
	2	5	10	25	50	100
5 min	5.57	6.7	7.58	8.76	9.68	10.6
10 min	4.35	5.2	5.85	6.7	7.34	7.98
15 min	3.54	4.26	4.8	5.52	6.06	6.61
30 min	2.37	2.92	3.33	3.89	4.33	4.77
1 hr	1.46	1.83	2.12	2.53	2.85	3.19
2 hr	0.851	1.08	1.25	1.51	1.72	1.95
3 hr	0.603	0.762	0.893	1.08	1.24	1.41
6 hr	0.359	0.455	0.535	0.65	0.747	0.853
12 hr	0.211	0.263	0.306	0.368	0.418	0.473
24 hr	0.126	0.155	0.178	0.21	0.236	0.262

Table 2. Rainfall Depths (Hendricks County 2016)

Rainfall Depths for Various Return Periods							
Duration	*Depth (Inches)*						
	Return Period (Years)						
	1	2	5	10	25	50	100
24 Hrs.	2.51	3.02	3.72	4.28	5.04	5.66	6.3

The resulting intensity is then used in the Rational Method equation to determine peak runoff:

$$Q = CiA$$

Rainfall intensity and depth data used in the hydrologic analyses were obtained from the Hendricks County Stormwater Technical Standards Manual (2016). These values form the basis for both Rational Method peak runoff calculations and hydrograph development for the project's watershed, ensuring consistency with county stormwater design requirements.

3.0 Existing Conditions

The project site is currently an undeveloped grassy area with scattered overgrowth. Land use surrounding the parcel includes residential properties to the south, agricultural land and manufactured homes to the west, minor commercial development to the north beyond the highway, and railroad tracks to the east.

The existing watershed area encompasses approximately 3.02 acres, consisting entirely of pervious cover. Under current conditions, stormwater runoff generally drains to the east and south.

Runoff coefficients (C values) were assigned based on land cover characteristics in accordance with the *Hendricks County Stormwater Technical Standards Manual* (Hendricks County 2016). A value of C = 0.20 was applied for pervious land cover. Using the Rational Method, the time of concentration (tc) was calculated to be 52.0 minutes for the site. The corresponding peak flow rates for existing conditions are summarized below:

Table 3. Existing Conditions

Return Period	2-year	5-year	10-year	25-year	50-year	100-year
Runoff	0.979 cfs	1.223 cfs	1.411 cfs	1.676 cfs	1.882 cfs	2.099 cfs

4.0 Proposed Conditions

As outlined in the project scope, the proposed development consists of a truck maintenance facility including 42 stalls for truck and trailer parking, a 900 square foot office building (30 ft × 30 ft), and a 2,860 square foot maintenance building (130 ft × 22 ft).

Under proposed conditions, the total site area remains 3.02 acres, consisting of approximately 1.02 acres of pervious surface, 1.91 acres of impervious asphalt pavement, and 0.09 acres of roof area.

Hydrologic analysis was performed using the Rational Method. The time of concentration (tc) was calculated to be 9 minutes. Runoff coefficients (C values) were assigned based on land cover characteristics consistent with the *Hendricks County Stormwater Technical Standards Manual* (Hendricks County 2016). Values applied include C = 0.20 for pervious surfaces, C = 0.93 for asphalt pavement, and C = 0.95 for roof areas. The weighted C value was calculated as follows:

$$\frac{(1.02\ acres\ \times 0.20) + (1.91\ acres\ \times 0.93) + (0.09\ acres\ \times 0.95)}{3.02\ acres} = 0.68$$

The resulting peak runoff flow rates for the proposed site conditions are summarized below:

Table 4. Proposed Conditions

Return Period	2-year	5-year	10-year	25-year	50-year	100-year
Watershed A	9.293 cfs	11.23 cfs	12.69 cfs	14.63 cfs	16.13 cfs	17.61 cfs

The runoff flowrates increased due to the addition of pervious surface and removal of impervious surface. The percentage increase is as follows:

Table 5. Percentage Increase in Runoff

Return Period	2-year	5-year	10-year	25-year	50-year	100-year
% Increase	849%	818%	799%	773%	757%	739%

Stormwater runoff from the proposed improvements will be conveyed to the northwest corner of the site, where a retention pond will be constructed to provide the required storage volume. The post-development peak discharge was limited by restricting the 0-10 year storms to 0.2 cfs per acre of the site (0.604 cfs) and the 11–100-year storms to 0.4 cfs per acres of the site (1.208 cfs). These values produced more restrictive conditions compared to the proposed 100-year peak flow to the existing 10-year peak flow. This analysis determined a required detention volume of 8,826 cubic feet. To meet this requirement, a 9,522 cubic foot retention pond will be installed in the northeast corner of the site.

4.1 Stormwater Conveyance

Stormwater runoff generated from the proposed improvements will be collected and conveyed to the site's retention facility. The grading plan directs surface runoff by sheet flow and shallow swales to a series of inlets along the eastern and central portions of the property. These inlets are connected by a storm sewer system that conveys flow westward to the retention pond located in the northwest corner of the site.

- Inlet 1: Connects to 290 linear feet (LF) of 18-inch RCP at a 0.37% slope, discharging into Inlet 2.
- Inlet 2: Connects to 165 LF of 24-inch RCP at a 0.50% slope, discharging directly into the retention pond.

Inlet capacity was then checked using the orifice flow equation, incorporating the reduced effective open area (50% of manufacturer-provided open area). This ensures the inlet can maintain adequate capacity under both design flow and partial clogging conditions, in compliance with the requirements of the Manual. The discharge coefficient, C, will be 0.60, gravity acceleration, g, is 32.2 ft/sec2, and ponding height, h is 0.5 ft, and the 10-year flow will be used. The orifice equation is as follows:

Inlet Structure 1:

$$Q = CA\sqrt{2gh}$$

$$5.08\ cfs = (0.6)A\sqrt{2(32.2\ ft/\sec^2)\ 0.5\ ft}$$

$$A = 1.49\ ft^2$$

$$2A = 3.0\ ft^2\ (Clogging\ Condition)$$

Inlet Structure 2 :

$$Q = CA\sqrt{2gh}$$

$$5.69\ cfs = (0.6)A\sqrt{2(32.2\ ft/\sec^2)\ 0.5\ ft}$$

$$A = 1.67\ ft^2$$

$$2A = 3.3\ ft^2\ (Clogging\ Condition)$$

To capture and convey runoff from the site into Inlet Structure 1, a square Neenah Grate Inlet 3287-5 (3.2 square feet of opening area) or equivalent will be installed. To capture and convey runoff from the site into Inlet Structure 2, a square Neenah Grate Inlet 3808-1 (5.2 square feet of opening area) or inlet with 3.3 square foot or greater opening should be installed. Calculations verifying pipe capacity and inlet capture are provided in Appendix B.

A forebay should be installed at the pond inlet for water quality treatment, capturing sediment and floatables before flows enter the main basin. The required volume is 726 cubic feet, with supporting calculations in Appendix B.

4.2 Detention Pond and Outlet Structure

The detention pond is equipped with a multi-stage outlet box designed to restrict discharge per Hendricks County release requirements:

- Low-flow outlet: 4-inch diameter orifice at pond bottom, sized for the 2-year storm (0.604 cfs).
- Intermediate outlet: 5-inch diameter orifice at Elev. 867.00 ft, passing flows up to the 100-year storm (1.208 cfs).
- Overflow weir: Crest at Elev. 867.89 ft (0.11 ft below TOB), conveying emergency flows ≥100-year (17.61 cfs). The required outlet area calculations are as follows:

$$Q = CA\sqrt{2gh}$$

$$17.61\ cfs\ (100\ year\ peak\ flow) = (0.6)A\sqrt{2(32.2\ ft/\sec^2)\ 0.5\ ft}$$

$$A = 10.67\ ft^2$$

The pipe leaving the detention pond is sized to handle this 100-year flow, assuming a slope of 0.30%, a Manning's n of 0.013, the minimum diameter will be determined using Manning's Equation as follows:

$$Q\ (Volumetric\ Flow) = \frac{1.49}{Manning's\ n} * (Area) * (Hydraulic\ Radius)^{2/3}\sqrt{Slope}$$

$$17.61\ cfs = \frac{1.49}{0.013} * \left(\frac{\pi D^2}{4}\right) * (D/4)^{2/3}\sqrt{0.0030}$$

$$D = 27\ inches$$

Under the assumed conditions, the minimum discharge pipe diameter is 27 inches. The outlet pipe network extends west from the detention pond and connects to the existing storm sewer system along CR 400 N. This existing network serves as the only feasible drainage outlet from the property and conveys stormwater offsite toward the unnamed tributary downstream.

The stormwater management system—including inlets, storm sewers, forebay, detention pond, multi-stage outlet structure, and downstream piping—is designed to control post-development flows in compliance with Hendricks County Stormwater Standards.

5.0 Summary

The proposed development at 4005 N CR 1000 E, Brownsburg, Indiana will consist of a truck maintenance facility including 42 truck/trailer parking stalls, a 900 square foot office building, and a 2,860 square foot maintenance building. The project will disturb approximately 2 acres and convert a predominantly pervious 3.02-acre parcel into a mix of impervious asphalt, building roof, and limited vegetated cover. Hydrologic analysis using rainfall data from the Hendricks County Stormwater Technical Standards Manual (2016) indicates a significant increase in runoff under proposed conditions, with the 100-year peak flow rising from 2.10 cfs to 17.61 cfs.

To mitigate this increase, a comprehensive stormwater management system has been designed. Runoff will be collected by inlets and storm sewers, routed through a forebay for pretreatment, and detained within a pond sized to provide 9,522 cubic feet of storage volume. A multi-stage outlet structure will restrict discharges to 0.604 cfs for the 2- through 10-year storms and 1.208 cfs for the 11- through 100-year storms, meeting Hendricks County release rate requirements. The system reduces post-development peak discharge to below pre-development rates, providing both quantity control and water quality treatment.

Appendix C – Water Quality Calculations

Water Quality Calculations

Project Name: Lion's Trucking
Project Job #: 21346

Water Quality Volume

WQv = ((P)(Rv)(A))/12

P= 1" of Rainfall
Rv = Volumetric Flow Rate = 0.05 + 0.009 (I)
I = percent of impervious area
A = Area in acres

Total Site (acres)	3.02	Percent -Impervious Area (%)	66.23
Total Impervious Area (acres)	2	Volumetric Flow Rate	0.65
Prop. Time of Conc. (min)	9.00	Water Quality Volume (ac-ft)	0.16
		Water Quality Volume (ft3)	**7082.13**
*Forebay Volume is included in overall req. volume		Forebay (ac-ft)	0.02
		Forebay (ft3)	**726.00**

Water Quality Curve Number

$$\text{WQ Curve Number} = \frac{1000}{[10+5P+10Qa- 10*(\text{sqrt}(Qa^2+1.25*Qa*P))]}$$

P = 1" (rainfall for water quality storm event)
Qa = runoff volume, in inches = 1" * Rv = Rv (inches)
Rv = volumetric runoff coefficient

WQ Curve Number = 96.22 * Check with CBBEL WQ-CN Graph

Water Quality Runoff Rate TR-20 Method * Design Criteria different for City of Indianapolis

	Input Data	* Indy
Dimensionless Hydrograph:	SCS Type II Distribution	Huff 1st quartile
Curve Number:	96.22	98
Area:	3.02	3.02

LEGAL DESCRIPTION

LEGAL DESCRIPTION:
Per Instrument No. 202121241 SUR filed in the Office of the Recorder in Hendricks County, Indiana, and described as follows:

Addresses and Parcel Numbers:
4005 N C.R. 1000 E., Brownsburg, IN 46112
#32-08-17-365-002.000-016

The following represents a modernized legal description of a tract of land, as described in Instrument #1998-04591 in the Office of the Recorder of Hendricks County, Indiana and being located in the Southwest Quarter of Section 17 and the Northwest Quarter of Section 20 both in Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana. Said tract being more particularly bound and described as follows, to-Wit:

East line of the Southwest quarter of Section 17 as being North 01 degrees 22 minutes 53 seconds West, deed, measured North 01 degrees 00 minutes 22 seconds West and all other bearings being relative thereto.

Beginning at a Hendricks County Aluminum monument found marking the Southwest corner of the Southwest quarter Section 17, Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana; thence running North on and along the West line of the Southwest quarter of Section 17 bearing North 01° 22' 53" West 155.58 feet, deed, and measured North 01° 00' 22" West 155.53 feet to a point on said West line, marking the Northeast corner of the National Hot Rod Association tract as referenced in the caption; thence running East on and along the North line of the National Hot Rod Association bearing North 88° 42' 57" East 546.58 feet, deed, and measured North 89° 10' 00" East a distance of 40.19 feet to a found 5/8" rebar with Kruse Consulting cap affixed and the *Point of Beginning* of this description; thence continuing North 89° 10' 00" East a distance of 508.15 feet to a found 5/8" rebar with Kruse Consulting cap affixed marking the intersection with the Southwesterly Right-of-Way of the CSX Railroad; thence running Southeasterly on and along the CSX Railroad Right-of-Way and traveling into the Northwest quarter of Section 20 bearing South 61° 12' 10" East 366.62 feet, deed, and measured South 60° 46' 15" East a distance of 365.01 feet to a found 5/8" rebar with Gaston cap marking the Northeast corner of Lot 1 in Villa Farms Subdivision, as per plat thereof recorded in Plat Book 3, page 134 in the Office of the Recorder of Hendricks County, Indiana; thence running West on and along the North line of said Lot 1 in Villa Farms Subdivision bearing South 88° 25' 57" West 863.49 feet (plat for Villa Farms shows this line to be 860.54 feet), calculated to be 823.52 feet to a point marking the intersection with the East right-of-way of N. CR. 1000 E; thence North 01° 02' 08" East, on and along said right-of-way, 38.39 feet; thence North 01° 00' 22" East 155.02 feet to the *Point of Beginning*. Containing 2.895 acres, more or less, subject to all easements and rights-of-way of record.

Dedicated Right-of-Way:
Beginning at a Hendricks County Aluminum monument found marking the Southwest corner of the Southwest quarter Section 17, Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana, and the *Point of Beginning* of this description; thence running North on and along the West line of the Southwest quarter of Section 17 bearing North 01° 22' 53" West 155.58 feet, deed, and measured North 01° 00' 22" West 155.53 feet to a point on said West line, marking the Northeast corner of the National Hot Rod Association tract as referenced in the caption; thence running East on and along the North line of the National Hot Rod Association bearing North 88° 42' 57" East, deed, and measured North 89° 10' 00" East a distance of 40,19 feet to a found 5/8" rebar with Kruse Consulting cap affixed, marking the intersection with the east right-of-way line of N. CR 1000 E.; thence South 01° 00' 22" East 155,02 feet on and along said right-of-way; thence South 01° 02' 08" East 38.39 feet on and along said right-of-way, traveling into the Northwest quarter of Section 20; thence South 88° 25' 57" West 40.19 feet to a point on the West line of the Northwest quarter of Section 20; thence North 01° 02' 08" West on and along aforementioned West line, 38.39 feet to the *Point of Beginning* of this Dedicated Right-of-Way description. Containing 0.179 acres, more or less.

SITE NOTES:

HANDICAP RAMP CONSTRUCTION NOTES:

1. ALL HANDICAP RAMPS SHALL MEET THE REQUIREMENTS OF THE AMERICAN DISABILITIES ACT. THE MOST RECENT INDOT STANDARD SPECIFICATIONS AND THE GOVERNING JURISDICTIONS MOST RECENT STANDARDS. CURB SWIPES REQUIRED FOR HANDICAP RAMPS SHALL BE PROVIDED AT TIME OF INITIAL CONSTRUCTION.

2. MINIMUM WIDTH OF CURB RAMP SHALL BE 4 FEET NOT INCLUDING FLARES. MAXIMUM SLOPE OF RAMPS SHALL BE 12:1

3. HANDICAP RAMPS ARE TO BE LOCATED AS SHOWN ON PLANS.

4. TYPE 'E' RAMPS SHALL BE PROVIDED AT THE CENTERLINE OF RADIUS AT ALL CORNERS OF EVERY STREET INTERSECTION WHERE THERE IS AN EXISTING OR PROPOSED SIDEWALK AND CURB. IN CASE OF "T"-INTERSECTION, A TYPE 'C' RAMP SHALL BE PROVIDED ADJACENT TO EACH CORNER RAMP. TYPE 'C' RAMPS ALSO SHALL BE PROVIDED AT WALK LOCATIONS AT MID-BLOCK IN VICINITY OF HOSPITALS, MEDICAL CENTERS OR ATHLETIC STADIUMS. THE USE OF DETAILS CONTRARY TO THOSE SHOWN HEREIN SHALL REQUIRE THE PRIOR WRITTEN APPROVAL OF THE GOVERNING JURISDICTION.

5. SURFACE TEXTURE OF THE RAMP SHALL BE THAT OBTAINED BY A COARSE BROOMING TRANSVERSE TO THE SLOPE OF THE RAMP.

6. RAMPS SHALL BE PROVIDED WHERE THE DRIVEWAY CURB EXTENDS ACROSS THE SIDEWALK.

7. CARE SHALL BE TAKEN TO ASSURE A UNIFORM GRADE ON ALL RAMPS WITH NO BREAKS IN GRADE.

8. DRAINAGE STRUCTURES SHALL NOT BE PLACED IN LINE WITH THE RAMPS EXCEPT WHERE EXISTING DRAINAGE STRUCTURES ARE BEING UTILIZED IN THE NEW CONSTRUCTION. LOCATION OF THE RAMPS SHALL TAKE PRECEDENCE OVER LOCATION OF DRAINAGE STRUCTURES.

9. THE NORMAL GUTTER LINE PROFILE SHALL BE MAINTAINED THROUGH THE AREA OF THE RAMP.

10. EXPANSION JOINTS FOR THE RAMP SHALL BE A MAXIMUM 1/2" WIDE. THE TOP OF THE JOINT FILLER FOR ALL RAMP TYPES SHALL BE FLUSH WITH THE ADJACENT CONCRETE.

11. CROSSWALK AND STOP LINE MARKING, IF USED, SHALL BE LOCATED TO STOP TRAFFIC SHORT OF ALL RAMP CROSSINGS.

12. SLOPE OF RAMP MAY BE WARPED WHEN FILED CONDITIONS WARRANT AND WHEN APPROVED BY THE GOVERNING JURISDICTION.

LOT COVERAGE

	ACRES	PERCENT
ASPHALT	1.845	60%
BUILDINGS	0.086	2.8%
SIDEWALK	0.016	0.5%
PERVIOUS	1.123	36.6%
TOTAL LOT	3.07	100%

SITE NOTES:

GENERAL NOTES:

1. REFER TO THE INDIANA DEPARTMENT OF TRANSPORTATION (INDOT) STANDARD SPECIFICATIONS, LATEST EDITION, FOR BASIC MATERIALS AND CONSTRUCTION METHODS. THE SECTIONS BELOW FOR VARIOUS ITEMS ARE TO CLARIFY THE INTENT OF THE REQUIREMENTS FOR THIS PROJECT. PLEASE NOTE THAT OTHER SECTIONS OF THE INDOT STANDARD SPECIFICATIONS MAY ALSO BE APPLICABLE;

2. ALL RADII SHELL BE 5 FOOT UNLESS NOTED OTHERWISE ON PLANS.

3. CONTRACTOR TO VERIFY EXACT LOCATION AND INVERT OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.

4. STORM SEWER PIPE OF OTHER MATERIAL OR MATERIAL NOT MEETING THESE SPECIFICATIONS SHALL REQUIRE THE PRIOR WRITTEN APPROVAL OF THE ENGINEER.

5. THE CONTRACTOR SHALL SUBMIT INFORMATION TO THE APPROPRIATE JURISDICTIONAL CONTACT SHOWING CONFORMANCE WITH THESE SPECIFICATIONS UPON REQUEST.

PAVEMENT CONSTRUCTION:

1. THE INDIANA DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS, LATEST EDITION, SHALL APPLY TO WORKMANSHIP AND MATERIALS IN CONSTRUCTION OF SUBGRADE, PAVEMENT, CURBS AND WALKS.

A) PREPARE THE SUBGRADE IN ACCORDANCE WITH INDOT SECTION 207. NO TRAFFIC WILL BE PERMITTED ON THE PREPARED SUBGRADE PRIOR TO PAVING.

B) BITUMINOUS PAVEMENT IN ACCORDANCE WITH INDOT SECTION 403.

C) FINISHING EARTH GRADED SHOULDERS, DITCHES AND SLOPES IN ACCORDANCE WITH INDOT SECTION 208.

CONCRETE PAVEMENT AND WALKS:

1. SEE DETAIL FOR TYPE AND DETAILS.

2. CONCRETE SHALL BE READY MIXED PORTLAND CEMENT AND WATER CONFORMING TO ASTM C-150. AGGREGATES SHALL CONFORM TO ASTM C-33. COMPRESSIVE STRENGTH OF CONCRETE AT 28 DAYS SHALL BE 4000 P.S.I. WHERE REQUIRED, REINFORCEMENT SHALL BE WELDED STEEL WIRE FABRIC CONFORMING TO ASTM A-185,

3. ALL EXTERIOR CONCRETE SHALL CONTAIN 6% ± 1% AIR ENTRAINMENT.

APPLICATION:

A) PLACE CONCRETE ONLY ON A MOIST, COMPACT SUBGRADE OR BASE FREE FROM LOOSE MATERIAL. PLACE NO CONCRETE ON MUDDY OR FROZEN SUBGRADE IN ACCORDANCE WITH INDOT SECTION 604 AND 605.

B) CONCRETE SHALL BE DEPOSITED SO AS TO REQUIRE AS LITTLE REHANDLING AS PRACTICAL. WHEN CONCRETE IS TO BE PLACED AT AN ATMOSPHERIC TEMPERATURE OF 35 DEGREES OR LESS, PARAGRAPH 702.10 OF THE INDOT SPECIFICATIONS SHALL APPLY.

C) EXCEPT AS OTHERWISE SPECIFIED, CURE ALL CONCRETE BY ONE OF THE METHODS DESCRIBED IN INDOT SECTION 501.17.

PARKING LOT STRIPING:

1. PAINT MATERIAL SHALL COMPLY WITH FEDERAL SPECIFICATION TT-P-115A FOR TRAFFIC PAINT WITHOUT GLASS SPHERES. (COLOR BY OWNER SELECTION).

2. SUBCONTRACTOR TO PERFORM ALL FIELD LAYOUT WORK NECESSARY TO ACHIEVE STRAIGHT AND TRUE LINES. ASPHALT MUST BE CLEANED WITH POWER BROOM AND HAND BROOM TO REMOVE LOOSE MATERIAL BEFORE STRIPING. THE SUBCONTRACTOR IS TO PROVIDE BARRIERS TO PREVENT MARRING OF LINES BY VEHICLES UNTIL PAINT HAS DRIED. STRIPING PAINT SHALL BE APPLIED AT THE MINIMUM RATE OF ONE GALLON PER 100 SQUARE FEET OF PAINT (BASED ON 39% SOLIDS) AT A WIDTH OF FOUR INCHES.

STREET PAVEMENT NOTES:

1. MATERIALS AND CONSTRUCTION FOR STREETS, WALKS, CURBS AND STORM WATER SEWERS SHALL CONFORM TO THE REQUIREMENTS OF THE INDIANA DEPARTMENT OF TRANSPORTATION "STANDARD SPECIFICATIONS" LATEST PRINTED EDITION UNLESS SHOWN OR NOTED OTHERWISE.

2. PAVEMENT COMPOSITION NOTED ON DETAIL IS THE MINIMUM REQUIREMENT FOR STREET CLASSES 1, 2, 3, 4 AND 5, WITH A GOOD SUB-GRADE SOIL CLASSIFICATION. PAVEMENT COMPOSITION FOR OTHER CLASSES OF STREET SHALL BE DESIGNED WITH CONSIDERATION GIVEN TO THE TRAFFIC VOLUME, SUB-GRADE SOIL EVALUATION AND TYPE OF PAVEMENT MATERIAL TO BE USED.

3. THE SUB-GRADE MUST BE PROOF ROLLED BY THE CONTRACTOR USING A FULLY LOADED TRI-AXLE DUMP TRUCK, MINIMUM LOAD OF 20 TONS

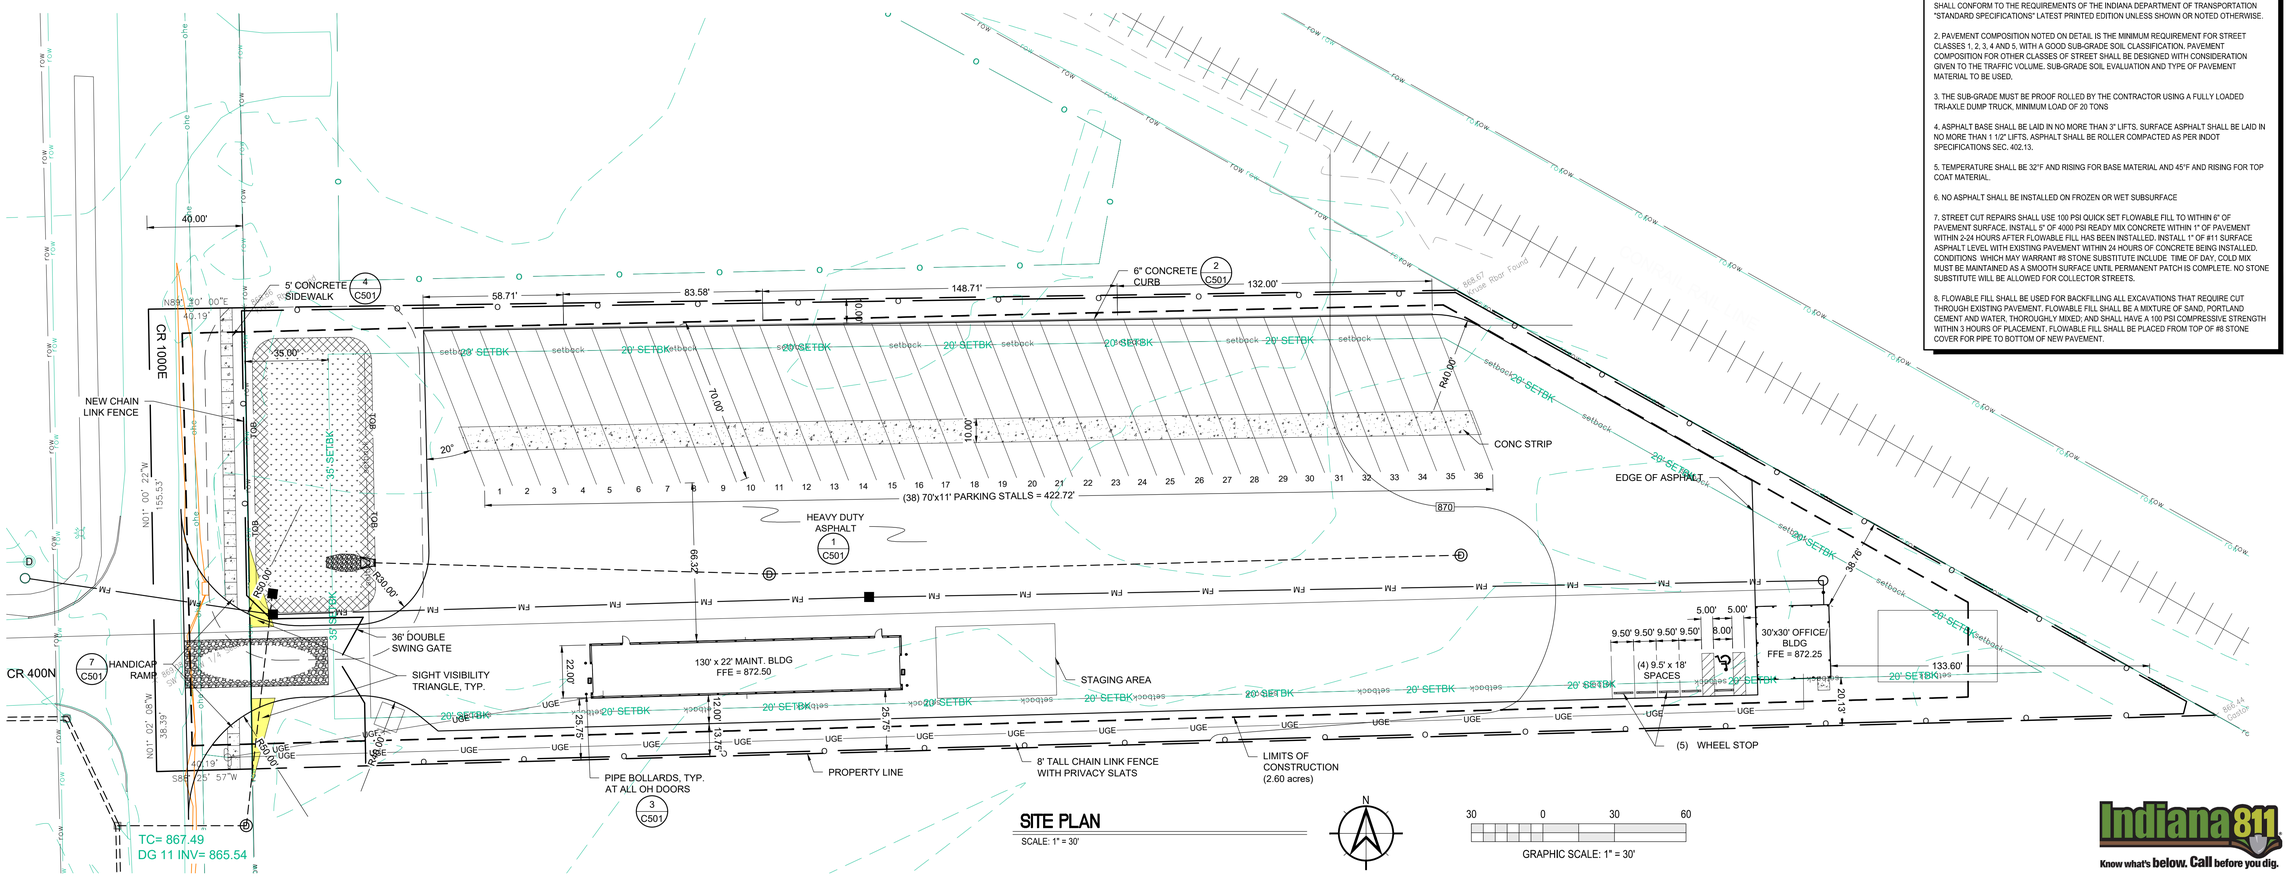

4. ASPHALT BASE SHALL BE LAID IN NO MORE THAN 3" LIFTS. SURFACE ASPHALT SHALL BE LAID IN NO MORE THAN 1 1/2" LIFTS, ASPHALT SHALL BE ROLLER COMPACTED AS PER INDOT SPECIFICATIONS SEC. 402.13.

5. TEMPERATURE SHALL BE 32°F AND RISING FOR BASE MATERIAL AND 45°F AND RISING FOR TOP COAT MATERIAL.

6. NO ASPHALT SHALL BE INSTALLED ON FROZEN OR WET SUBSURFACE

7. STREET CUT REPAIRS SHALL USE 100 PSI QUICK SET FLOWABLE FILL TO WITHIN 6" OF PAVEMENT SURFACE. INSTALL 5" OF 4000 PSI READY MIX CONCRETE WITHIN 1" OF PAVEMENT WITHIN 2-24 HOURS AFTER FLOWABLE FILL HAS BEEN INSTALLED. INSTALL 1" OF #11 SURFACE ASPHALT LEVEL WITH EXISTING PAVEMENT WITHIN 24 HOURS OF CONCRETE BEING INSTALLED. CONDITIONS WHICH MAY WARRANT #8 STONE SUBSTITUTE INCLUDE TIME OF DAY, COLD MIX MUST BE MAINTAINED AS A SMOOTH SURFACE UNTIL PERMANENT PATCH IS COMPLETE. NO STONE SUBSTITUTE WILL BE ALLOWED FOR COLLECTOR STREETS.

8. FLOWABLE FILL SHALL BE USED FOR BACKFILLING ALL EXCAVATIONS THAT REQUIRE CUT THROUGH EXISTING PAVEMENT. FLOWABLE FILL SHALL BE A MIXTURE OF SAND, PORTLAND CEMENT AND WATER, THOROUGHLY MIXED; AND SHALL HAVE A 100 PSI COMPRESSIVE STRENGTH WITHIN 3 HOURS OF PLACEMENT. FLOWABLE FILL SHALL BE PLACED FROM TOP OF #8 STONE COVER FOR PIPE TO BOTTOM OF NEW PAVEMENT.

National Flood Hazard Layer FIRMette

Basemap: USGS National Map: Orthoimagery: Data refreshed October, 2020

Legend

SEE FIS REPORT FOR DETAILED LEGEND AND INDEX MAP FOR FIRM PANEL LAYOUT

- SPECIAL FLOOD HAZARD AREAS: Without Base Flood Elevation (BFE) — Zone A, V, A99; With BFE or Depth — Zone AE, AO, AH, VE, AR; Regulatory Floodway
- OTHER AREAS OF FLOOD HAZARD: 0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile — Zone X; Future Conditions 1% Annual Chance Flood Hazard — Zone X; Area with Reduced Flood Risk due to Levee. See Notes. — Zone X; Area with Flood Risk due to Levee — Zone D
- OTHER AREAS: NO SCREEN — Area of Minimal Flood Hazard — Zone X; Effective LOMRs; Area of Undetermined Flood Hazard — Zone D
- GENERAL STRUCTURES: Channel, Culvert, or Storm Sewer; Levee, Dike, or Floodwall
- OTHER FEATURES: 20.2 Cross Sections with 1% Annual Chance; 17.5 Water Surface Elevation; Coastal Transect; Base Flood Elevation Line (BFE); Limit of Study; Jurisdiction Boundary; Coastal Transect Baseline; Profile Baseline; Hydrographic Feature
- MAP PANELS: Digital Data Available; No Digital Data Available; Unmapped

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/20/2022 at 4:21 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

FLOOD ZONE DESIGNATION:

THIS LOT LIES ENTIRELY IN FLOOD HAZARD ZONE "X" AS SCALES FROM THE FLOOD INSURANCE RATE MAP (FIRM) FOR:

Totals for Area of Interest		**3.3**	**100.0%**

GRADING NOTES:

GENERAL GRADE NOTES:

1. REFER TO THE INDIANA DEPARTMENT OF TRANSPORATION (INDOT) STANDARD SPECIFICATIONS, LATEST EDITION, FOR BASIC MATERIALS AND CONSTRUCTION METHODS. THE SECTION BELOW FOR VARIOUS ITEMS ARE TO CLARIFY THE INTENT OF THE REQUIREMENTS FOR THIS PROJECT, PLEASE NOTE THAT OTHER SECTIONS OF THE INDOT STANDARD SPECIFICATIONS MAY ALSO BE APPLICABLE.

2. FILL MATERIAL SHALL CONSIST OF EARTH OBTAINED FROM CUT AREAS, BORROW PITS OR OTHER APPROVED SOURCES. EARTH SHALL BE FREE FROM ORGANIC MATTER AND OTHER DELETERIOUS SUBSTANCES AND LARGE ROCKS. THE FILL MATERIAL SHALL BE PLACED IN LAYERS NOT TO EXCEED SIX INCHES FOLLOWING COMPACTION. PROPER MOISTURE CONTENT OF FILL MATERICAL WILL BE SUCH TO ACHIEVE SPECIFIED COMPACTION DENSITY. ALL FILL BENEATH PAVED AREAS, FLOOR SLABS AND FURTURE BUILDINGS SHALL BE COMPACTED TO AT LEAST 95% OF THE MAXIMUM DRY DENSITY PER ASTM D-1557, FIELD COMPACTING TEST SHALL BE RUN ON EACH LIFT, IN FILL SECTIONS, AND THE REQUIRED COMPACTION ON EACH LIFT SHALL BE IN ACCORDANCE WITH INDOT SECTION 211.

3. MAXIMUM LAWN SLOPE IS 3:1.

4. THE CONTRATOR SHALL CONTACT ALL UTILITY COMPANIES TO LOCATE MAINS, CONDUITS, SERVICE LINES, ETC, IN THE AFFECTED CONSTRUCTION AREA EXISTING UTILITY STRUCTURES ARE SHOWN HERE IN ACCORDANCE WITH AVAILABLE INFORMATION. THE LOCATION AND PROTECTION OF UTILITY STRUCTURES, THEIR SUPPORT AND MAINTENANCE DURING CONSTRUCTION (IN COOPERATION WITH APPLICABLE UTILITY COMPANY) IS THE EXPRESSED RESPONSIBILITY OF THE CONTRACTOR.

5. ALL SPOT ELEVATIONS ARE TO FINISHED GRADE.

6. ALL EXISTING MANHOLE CASTINGS TO BE ADJUSTED TO FINISH GRADE.

7. COMPACT "B" BORROW BACK FILL REQ'D. OVER ALL UTILITIES IN PAVED AREAS.

REINFORCED CONCRETE PIPE:

1. REINFORCED CONCRETE PIPE SHALL BE CLASS III, IV OR V AS SPECIFIED IN ASTM C-76,

2. REINFORCED ELLIPTICAL CONCRETE PIPE SHALL BE CLASS HE-III OR HE-IV AS SPECIFIED IN ASTM C-507,

3. LIFT HOLES ARE NOT ALLOWED FOR PIPE LESS THAN 24 INCHES IN DIAMETER, A MAXIMUM OF TWO LIFT HOLES ARE ALLOWED FOR PIPE 24 INCHES IN DIAMETER OR LARGER. LIFT HOLES SHALL BE REPAIRED ACCORDING TO MOST RECENT INDOT STANDARD SPECIFICATIONS.

4. FITTINGS AND SPECIALTIES SHALL BE IN ACCORDANCE WITH THE SPECIFICATIONS FOR THE TYPE OF PIPE BEING USED.

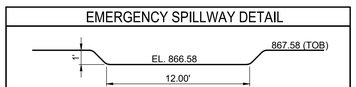

5. EACH PIPE SECTION SHALL BE MARKED WITH DATE OF MANUFACTURE, SIZE AND CLASS OF PIPE, SPECIFICATION DESIGNATION, MANUFACTURER AND PLANT IDENTIFICATION.

6. PIPE SHALL BE FURNISHED WITH A BELL OR GROOVE ON ONE END OF A UNIT OF PIPE AND A SPIGOT OR TONGUE ON THE ADJACENT END OF THE ADJOINING PIPE. ALL JOINTS SHALL HAVE A GROOVE ON THE SPIGOT FOR PLACEMENT OF A RUBBER "O-RING" OR PROFILE GASKET IN ACCORDANCE WITH ASTM C-443. THE GASKET SHALL BE A CONTINUOUS RING WHICH FITS SNUGLY INTO THE ANNULAR SPACE BETWEEN THE OVERLAPPING SURFACES OF THE ASSEMBLED PIPE JOINT.

INSTALLATION SCHEDULE:

CONSTRUCTION PHASE:	CONSTRUCTION SCHEDULE:
PRE-CONSTRUCTION ACTIONS (EVALUATION/PROTECTION OF IMPORTANT SITE CHARACTERISTICS)	BEFORE CONSTRUCTION, EVALUATE, MARK AND PROTECT IMPORTANT TREES AND ASSOCIATED ROOTING ZONES, UNIQUE AREAS (e.g., WETLANDS) TO BE PRESERVED, ON SITE SEPTIC SYSTEM ABSORPTION FIELDS IF APPLICABLE, AND VEGETATION SUITABLE FOR FILTER STRIPS, ESPECIALLY IN PERIMETER AREAS.
CONSTRUCTION ACCESS (CONSTRUCTION ENTRANCES, CONSTRUCTION ROUTES, EQUIPMENT PARKING AREAS)	STABILIZE BARE AREAS IMMEDIATELY WITH GRAVEL AND TEMPORARY VEGETATION AS WORK TAKES PLACE.
SEDIMENT BARRIERS AND TRAPS (BASIN TRAPS, SILT FENCES, OUTLET PROTECTION)	INSTALL PRINCIPAL BASINS AFTER CONSTRUCTION SITE IS ASSESSED. INSTALL ADDITIONAL RUNOFF CONTROL MEASURES DURING GRADING AS NEEDED.
RUNOFF CONVEYANCE SYSTEM (STABILIZED STREAM-BANKS, STORM DRAINS, INLET AND OUTLET PROTECTIONS, WATER QUALITY STRUCTURES)	WHERE NECESSARY, STABILIZE STREAMBANKS AS EARLY AS POSSIBLE. INSTALL PRINCIPLE CONVEYANCE SYSTEM WITH RUNOFF CONTROL MEASURES. INSTALL REMAINDER OF SYSTEM AFTER GRADING.
LAND CLEARING AND GRADING (CUTTING/FILLING/GRADING, DRAINS, SEDIMENT TRAPS, BARRIERS, DIVERSIONS, SURFACE ROUGHENING)	BEGIN MAJOR CLEARING AND GRADING AFTER INSTALLING THE KEY SEDIMENT AND RUNOFF MEASURES. CLEAR BORROW AND DISPOSAL AREAS AS NEEDED. INSTALL ADDITIONAL CONTROL MEASURES AS GRADING PROGRESSES.
SURFACE STABILIZATION (TEMPORARY AND PERMANENT SEEDING, MULCHING, SODDING, RIPRAP)	APPLY TEMPORARY OR PERMANENT STABILIZATION MEASURES IMMEDIATELY ON ALL DISTURBED AREAS WHERE WORK IS DELAYED OR COMPLETED.
BUILDING CONSTRUCTION (BUILDINGS, UTILITIES, PAVING)	INSTALL NECESSARY EROSION AND SEDIMENT CONTROL PRACTICES AS WORK TAKES PLACE.
LANDSCAPING & FINAL STABILIZATION (TOP SOILING, TREES AND SHRUBS, PERMANENT SEEDING, MULCHING, SODDING, RIPRAP)	STABILIZE ALL OPEN AREAS, INCLUDING BORROW AND SPOIL AREAS. REMOVE TEMPORARY CONTROL MEASURES AND STABILIZE.

RESPONSIBLE PARTY FOR EROSION CONTROL

COMPANY: LIONS TRAN INC.
NAME: MALHI KULWINDER
ADDRESS: 7655 E. US HWY 36
AVON, INDIANA 46123
PHONE: 317-989-1580

EROSION CONTROL NOTES:

SOIL EROSION CONTROL SUMMARY:

1. CONTRACTOR SHALL INSTALL SODDING, INLET PROTECTION, AND FILTERS AS SHOWN.

2. MASS GRADE THE SITE (SIDES OF SWALES, MOUNDS AND PONDS TO BE SODDED OR SEEDED AND MULCHED IMMEDIATELY UPON COMPLETION). TEMPORARY SEEDING SHALL BE RECOMMENDED FOR ALL SWALES AND DISTURBED AREAS THAT CANNOT BE FINAL SEEDED WITHIN A TIME PERIOD THAT WILL PREVENT SOIL EROSION. FOR TEMPORARY SEEDING THE CONTRACTOR SHALL UTILIZE A FAST GROWING SEED OF EITHER OATS, ANNUAL RYE GRASS, WHEAT OR RYE DEPENDING UPON TIME OF YEAR. DISTURBED AREAS SHOULD BE KEPT TO A MINIMUM AT ALL TIMES.

3. CONTRACTOR SHALL CONTROL MUD ACCUMULATION ON ALL STREETS SURROUNDING THE PROJECT BY INSTALLING STONE SURFACE AT ALL LOCATIONS WHERE CONSTRUCTION TRAFFIC LEAVES THE SITE. DUST SHALL BE KEPT TO A MINIMUM BY UTILIZING SPRINKLING, CALCIUM CHLORIDE, VEGETATIVE COVER, SPRAY ON ADDITIVES OR OTHER APPROVED METHODS.

4. MAINTAIN ALL FILTERS DURING CONSTRUCTION TO PREVENT ANY BLOCKAGES FROM ACCUMULATED SEDIMENT. ADDITIONAL SEEDING MAY BE REQUIRED DURING CONSTRUCTION AS SPECIFIED BY ENGINEER OR SOIL CONSERVATION SERVICE. RIPRAP SHALL BE PLACED IN AREAS OF HIGH VELOCITY STREAM FLOW (MINIMUM SIZE 1/3 CU.FT.). PAYMENT FOR ADDITIONAL RIPRAP NOT SHOWN ON PLANS AND SEEDING SHALL BE ON A UNIT BASIS.

5. CONTRACTOR SHALL INSTALL ALL STORM SEWER INLET FILTERS AS STORM SEWER SYSTEM IS INSTALLED.

6. ALL PROPOSED STREET AREAS TO BE PAVED AS SOON AS POSSIBLE AFTER SUBGRADE IS PREPARED.

7. CONTRACTOR SHALL REMOVE ALL TEMPORARY EROSION AND SEDIMENT CONTROLS ONLY WHEN THERE IS SUFFICIENT GROWTH OF GROUND COVER TO PREVENT FURTHER EROSION.

8. ALL SWALES SHALL BE SEEDED AND SODDED (AS INDICATED ON THE EROSION AND SEDIMENT CONTROL PLAN) IMMEDIATELY AFTER FINAL GRADING.

9. ALL EROSION CONTROL MEASURES SHALL BE INSTALLED IN ACCORDANCE WITH THE INDIANA HANDBOOK FOR EROSION CONTROL IN DEVELOPING AREAS, MOST RECENT EDITION.

MAINTENANCE:

INSPECT PERIODICALLY, ESPECIALLY AFTER STORM EVENTS, UNTIL THE STAND IS SUCCESSFULLY ESTABLISHED. (CHARACTERISTICS OF A SUCCESSFUL STAND INCLUDE: VIGOROUS DARK GREEN OR BLUISH-GREEN SEEDLINGS; UNIFORM DENSITY WITH NURSE PLANTS, LEGUMES, AND GRASSES WELL INTER-MIXED; GREEN LEAVES; AND THE PERENNIALS REMAINING GREEN THROUGHOUT THE SUMMER, AT LEAST AT THE PLANT BASE.)

PLAN TO ADD FERTILIZER THE FOLLOWING GROWING SEASON ACCORDING TO SOIL TEST RECOMMENDATIONS.

REPAIR DAMAGED, BARE, OR SPARSE AREAS BY FILLING ANY GULLIES, RE-FERTILINZING, OVER- OR RE-SEEDING, AND MULCHING.

IF PLANT COVER IS SPARSE OR PATCHY, REVIEW THE PLANT MATERIALS CHOSEN, SOIL FERTILITY, MOISTURE CONDITION, AND MULCHING AFTER RE-PREPARING THE SEEDBED.

IF VEGETATION FAILS TO GROW, CONSIDER SOIL TESTING TO DETERMINE ACIDITY OR NUTRIENT DEFICIENCY PROBLEMS. (CONTACT YOUR SWCD OR COOPERATIVE EXTENSION OFFICE FOR ASSISTANCE.)

IF ADDITIONAL FERTILIZATION IS NEEDED TO GET A SATISFACTORY STAND, DO SO ACCORDING TO SOIL TEST RECOMMENDATIONS.

EROSION CONTROL NOTES:

PRIOR TO ANY WORK BEING DONE, A TEMPORARY CONSTRUCTION ENTRANCE AND SILT FENCING SHALL BE INSTALLED.

AFTER COMPLETION OF A STORM STRUCTURE, THE CURB INLET PROTECTION SHALL BE INSTALLED IMMEDIATELY.

UPON COMPLETION OF SWALES AND SIDE SLOPES, CONTRACTOR SHALL INSTALL THE EROSION CONTROL BLANKETS.

ALL AREAS NOT DENOTING PERMANENT SEEDING OR FIBER BLANKETS SHALL BE TEMPORARILY SEEDED.

THE EARTHWORK CONTRACTOR IS RESPONSIBLE FOR KEEPING THE EXISTING ROADWAYS CLEAR OF DIRT AND DEBRIS.

ADDITIONAL EROSION CONTROL MEASURES MAY BE REQUIRED BY INSPECTOR AS CONDITIONS WARRANT.

EROSION PROTECTION DURING CONSTRUCTION AND SEEDING:

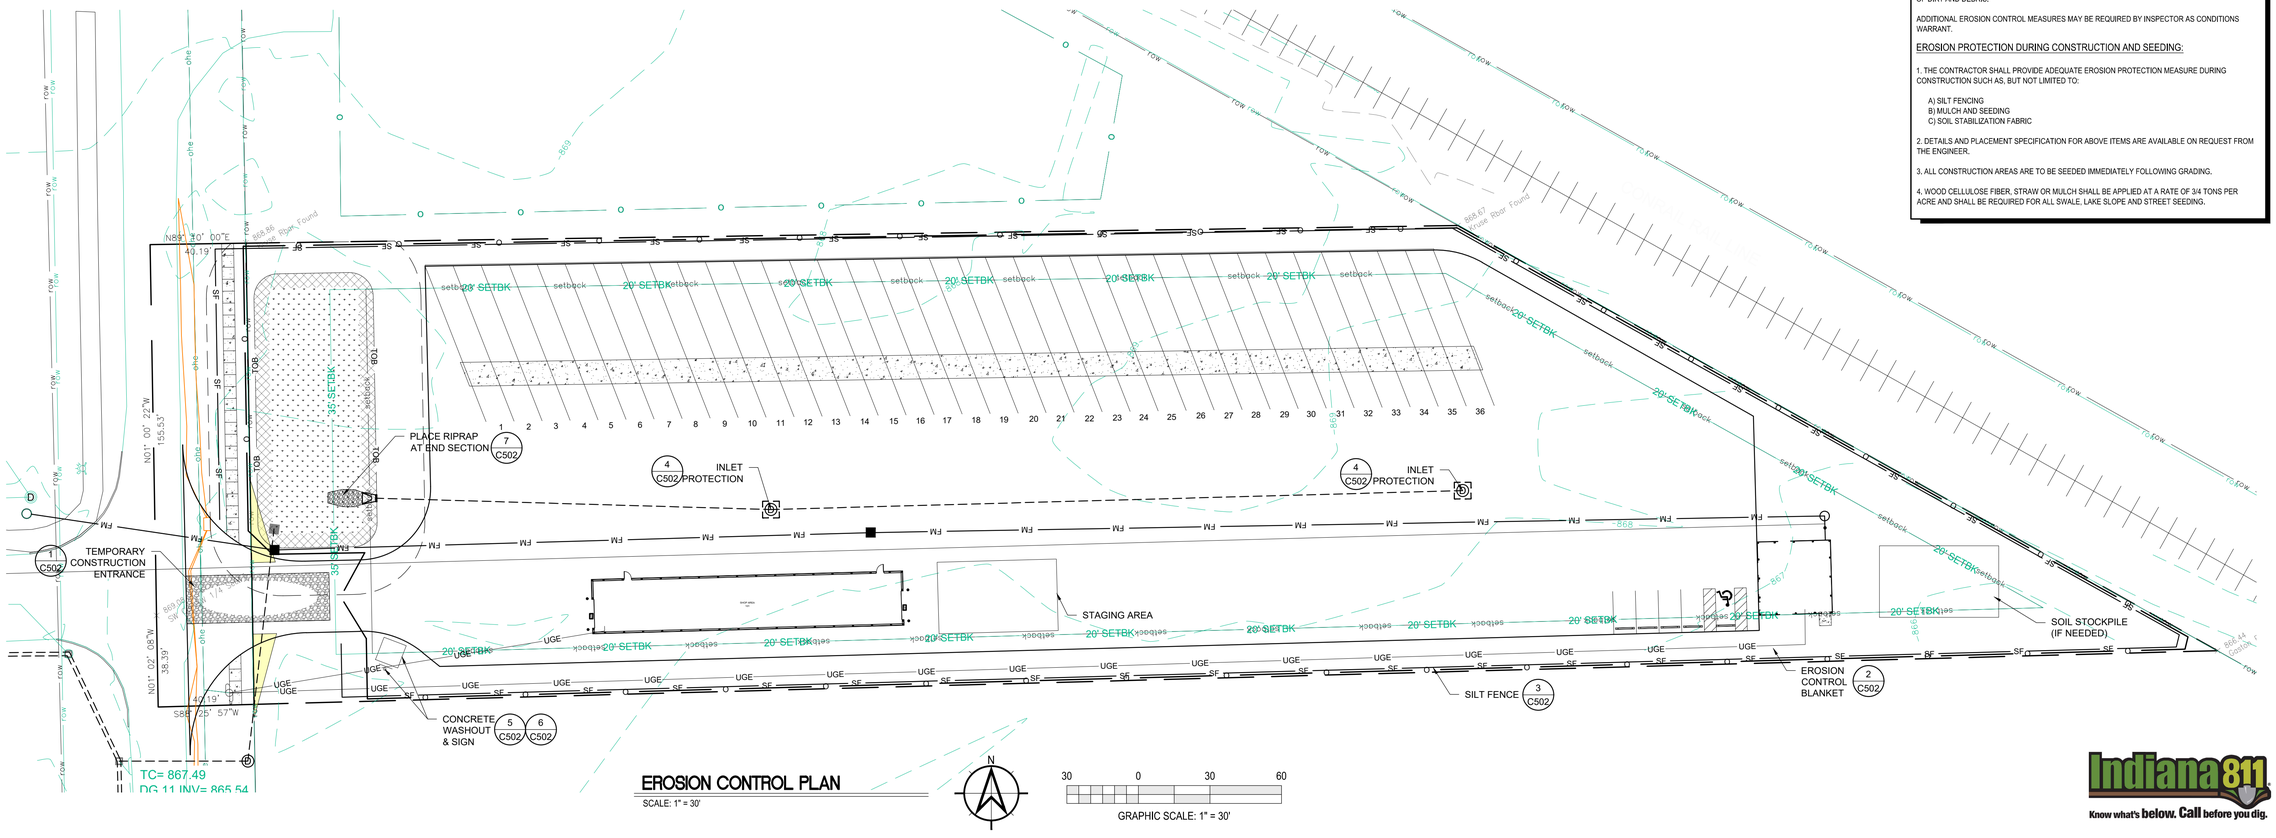

1. THE CONTRACTOR SHALL PROVIDE ADEQUATE EROSION PROTECTION MEASURE DURING CONSTRUCTION SUCH AS, BUT NOT LIMITED TO:

A) SILT FENCING
B) MULCH AND SEEDING
C) SOIL STABILIZATION FABRIC

2. DETAILS AND PLACEMENT SPECIFICATION FOR ABOVE ITEMS ARE AVAILABLE ON REQUEST FROM THE ENGINEER.

3. ALL CONSTRUCTION AREAS ARE TO BE SEEDED IMMEDIATELY FOLLOWING GRADING.

4. WOOD CELLULOSE FIBER, STRAW OR MULCH SHALL BE APPLIED AT A RATE OF 3/4 TONS PER ACRE AND SHALL BE REQUIRED FOR ALL SWALE, LAKE SLOPE AND STREET SEEDING.

NOTES:
"NA" - NON APPLICABLE

Construction Storm Water General Permit Notes Section A

A1 - Index of the location of required plan elements in the construction plan:

An index addressing the required elements within the drawing set is on C000 - Cover Sheet.

A2 - A vicinity map depicting the project site location in relationship to recognizable local landmarks, towns, and major roads:

A map showing the project in relationship to other areas of the county is on C000 - Cover Sheet.

A3 - Narrative of the nature and purpose of the project:

The project consists of the development of a new heavy duty asphalt parking lot with 36 truck and trailer stalls, a 2860 sq. ft. maintenance building, and 900 sq. ft. office building w/ employee parking. The site is located at 4005 North County Road 1000E in Brownsburg, Indiana 46112. Associated with the new improvements will be storm water management system consisting of overland flow, storm inlets, and retention/percolation basin with outlet control. (Shown on C303 - Construction Storm Water General Permit Notes).

A4 - Latitude and Longitude:

The latitude is 39°49'21"N and longitude is 86°20'42.19"W. (Shown on C000 - Cover Sheet)

A5 - Legal description of the project site:

A legal description of the overall parcel is on C201 - Site Plan

A6 - 11 x 17-inch plat showing building lot numbers/boundaries and road layout/names:

An 11x17 in. plan showing the overall property and new improvements is attached to this narrative.

A7 - Boundaries of the one hundred (100) year floodplains, floodway fringes, and floodways:

The 100 year floodway and floodway fringe is on C301 - Grading Plan and is based on best available information from the Indiana Department of Natural Resources.

A8 - Land use of all adjacent properties:

North - Commercial
South - Undeveloped/Woods
East - Railroad/Commercial
West - Residential/Agricultural
(Shown on C303 - Stormwater Pollution Prevention Plan)

A9 - Identification of a U.S. EPA approved or established TMDL:

Site to discharge stormwater into ground via percolation basin or through evaporation. Any dicharge via the emergency spillway will likely evaporate/percolate prior to being received by White Lick Creek (INW01D2_05) which is EPA 303d listed, but has no established TMDL (Shown on C304 - Construction Storm Water General Permit Notes)

A10 - Name(s) of the receiving water(s):

Receiving water is White Lick Creek (INW01D2_05) - (Shown on C303 - Stormwater Pollution Prevention Plan)

A11 - Identification of discharges to a water on the current 303(d) list of impaired waters and the pollutant(s) for which is it impaired:

The impaired condition of White Lick Creek is due to presence of Escherichia Coli (E. coli)
(Noted on C304 - Construction Storm Water General Permit Notes)

A12 - Soils map of the predominate soil types:

The soils on this property are predominantly Brookston Silty Clay Loam-Urban Land Complex and Crosby Silt Loam.
Brookston Silty Clay Loam features wetness as the main limitation affecting use and management of this soil type. Crosby Silt Loam features slow permeability and available water capacity is high with moderate content of organic matter.

Both soils are fair to poor for use as subgrade material as well as shear strength, compaction, and stability, medium to high compressibility, moderate to low shrink-swell potential, subject to frost heave, and seasonal high water table. A soils map is on C301 - Grading Plan.

A13 - Identification and location of all known wetlands, lakes, and water courses on or adjacent to the project site (construction plan, existing site layout)

There are no known water courses on or adjacent to this site.

A14 - Identification on any other state or federal water quality permits or authorizations that are required for construction activities:

This phase of the project scope will not require any additional federal or state water permits as noted on C304 - Construction Storm Water General Permit Notes.

Construction Storm Water General Permit Notes Section A (cont'd)

A15 - Identification and delineation of existing cover, including natural buffers:

The site is almost entirely covered with thick/heavy vegetation and trees with partial remnants of an existing gravel drive. The delineation of the various surface coverage is on C301 - Grading Plan.

A16 - Existing site topography at interval appropriate to indicate drainage patterns:

The existing site topography is largely flat with minor relief at the southeast of the site. The existing and proposed contours are on C301 - Grading Plan.

A17 - Location(s) where run-off enters the project site:

As referenced above, the topography in this area is largely flat resulting in little to no potential for run-off entering the site from adjacent property. The existing contours are on C301 - Grading Plan.

A18 - Location(s) where run-off discharges from the project site prior to land disturbances:

The existing site topography is largely flat with minor relief at the southeast of the site. The existing contours are on C301 - Grading Plan.

A19 - Location(s) of all existing structures on the project site:

The existing site is a vacant lot with no existing structures as depicted on C301 - Grading Plan.

A20 - Existing permanent retention or detention facilities, including manmade wetlands, designed for the purpose of stormwater management:

There are no existing retention facilities on site as depicted on C301 - Grading Plan.

A21 - Locations where storm water may be directly discharged into ground water, such as abandoned wells, sinkholes, or karst features:

There are no locations on property where storm water may directly discharge into the groundwater as illustrated on C301 - Grading Plan.

A22 - Size of the project expressed in acres:

The total project are if 3.07 acres as noted on C000 - Cover Sheet.

A23 - Total expected land disturbance expressed in acres:

The total disturbed area is 2.60 acres as noted on C000 - Cover Sheet.

A24 - Proposed final topography:

The final topography is on C301 - Grading Plan and is illustrated as spot elevations and contours.

A25 - Locations and approximate boundaries of all disturbed areas:

The total disturbed area is 2.60 acres as noted on C000 - Cover Sheet and shown as the Limits of Construction on C201 - Site Plan.

A26 - Locations, size and dimensions of all stormwater drainage systems such as culverts, stormwater sewer, and conveyance channels:

The stormwater is conveyed by overland flow, underground storm pipes, and retention pond. These are shown on C301 - Grading Plan.

A27 - Locations of specific points where stormwater and non-stormwater discharges will leave the project site:

Stormwater discharge from the site will be via an emergency spillway from the retention pond at the east end of the site and sanitary discharge will be via a pump and force main at the west end of the site.(Shown on C301 - Grading Plan & C402 Sanitary Force Main Plan & Profile.

A28 - Location of all proposed site improvements, including roads, utilities, lot delineation and identification, proposed structures, and common areas:

All the surface improvements including buildings, impervious areas, new surface finishes, etc. are on C201 - Site Plan for horizontal notations and C301 - Grading Plan for elevations.

A29- Location of all on-site and off-site soil stockpiles and borrow areas:

The soil storage area will be on site located at the east end of the site (west of the pond). All soil will be placed in the final location or hauled off upon completion of construction as shown on C302 - Erosion Control Plan.

A30- Construction support activities that are expected to be part of the project

Any construction support area will be within the limits of disturbance and used as directed by the contractor. Since they are within the limits of disturbance, there will be no impact sensitive areas.

A31- Location of any on-stream activities that are planned for the project including, but not limited to, stream crossings and pump arounds:

There are no in stream activities associated with this project.

Construction Storm Water General Permit Notes Section B

B1- Description of the potential pollutant generating sources and pollutants, including all potential non-storm water discharges:

1. Concrete Washout Area: Specific concrete washout area shall be established and labeled.
   a) The specific concrete wash out will be in a provided lined roll off box at a specific location near the entrance to the job site.
   b) The lined roll off box will be placed on stable soil with a stone approach.
   c) Once the lined roll off box is full, it will be removed from the site and discarded as clean fill once solid. A new lined roll off box will replace the one removed.
2. Construction Mobile Equipment Fluid
   a) All fueling of equipment will be managed and completed on a stone surface.
   b) Daily observation of all equipment for inspection of leaks or potential leaks of any fluids.
   c) Any observed fluid leaks are to be handled immediately with the equipment being moved to a stable stone surface and placed out of operation until maintenance is completed.
   d) Spill kits are to be utilized once the equipment is moved to the stable stone surface to prevent leakage from penetrating the ground or impacting storm water runoff.
3. Construction Material Waste
   a) All material waste is to be placed in provided roll off boxes as it is generated.
   b) Full roll off boxes are to be removed and properly disposed of in a licensed facility.
   c) No debris is to be stored on the ground surface at any time.
   These items are noted on C303 - Stormwater Pollution Prevention Plan.

B2- Stable construction entrance locations and specifications:

A stable construction entrance consisting of compacted subgrade, filter fabric and #2 stone is to be used for all construction traffic entering / exiting the site. The stone surface is to be maintained with new stone as necessary to maintain a solid drive surface. The location of the temporary construction entrance is shown on C302 for plan view and Sheet C502 for detail.

B3- Specifications for temporary and permanent stabilization:

The provisions for temporary stabilization during construction as well as permanent stabilization are included in the drawing set. The information contains specific stabilization techniques for the conditions of the site as well as timing of installation.

For temporary construction stabilization, it is the Contractor responsibility to maintain the stabilization during the construction duration and until permanent stabilization is installed.

For permanent stabilization, it is expected installation to occur immediately after final grading of the soil surface. Permanent stabilization is to be maintained by the Owner until 75% effective cover is established on the soil surface.
The stabilization is noted on C302 - Erosion Control Plan.

B4- Sediment control measures for concentrated flow areas:

The concentrated flow is protected at the pond inlet with riprap of minimum size being 6 inches and at the emergency spillway with stone dam as shown on C301 - Grading Plan and details on C501 & C502 - Sections and Details.

B5- Sediment control measures for sheet flow areas:

Sediment control for sheet flow is handled at the project perimeter with silt fence. (Shown on C302 - Erosion Control Plan).

B6- Run-off control measures:

Sediment control for sheet flow is handled at the project perimeter with silt fence. (Shown on C302 - Erosion Control Plan).

B7- Stormwater outlet protection location and specifications:

The concentrated flow is protected at the pond outlet with the previously mentioned rock dam as shown on C302 - Erosion Control Plan.

B8- Grade stabilization structure locations and specifications:

The grade on the site is largely flat and remain so post construction. There are no stabilization structures planned for this project as illustrated on C301 - Grading Plan.

B9- Dewatering applications and management methods:

Any dewatering required will be directed to the low area of the site (east) where it can percolate into existing soil. (Noted C303 - Stormwater Pollution Prevention Plan)

B10- Measures utilized for work within waterbodies:

This is not applicable to this project. (Noted C303 - Stormwater Pollution Prevention Plan)

B11- Maintenance guidelines for each proposed stormwater quality measure:

The stormwater quality is by a bioretention pond that is to be cleaned of trash, mowed, trimmed and monitored regularly to maintain proper function of the pond. (C301 - Grading Plan)

B12- Planned construction sequence that describes the implementation of stormwater quality measures in relation to land disturbance:

The construction sequence for installation of the erosion control measures and stormwater pollution prevention devices are detailed on C302 - Erosion Control Plan.

B13- Provisions for erosion and sediment control on individual residential building lots regulated under the proposed project:

Not applicable to this project. (Noted C303 - Stormwater Pollution Prevention Plan)

B14- Material handling and spill prevention and spill response plan meeting the requirements in 327 IAC 2-6.1:

The potential materials on site that could cause a spill response include fuels, petroleum fluids or other liquids as part of the construction equipment on site. If a spill occurs, immediate determination of the extent and emergency response requirements should be determined. Immediate containment of the spill with onsite spill kits should be completed. Once the spill is contained, contact is to be made to the Indiana Dept. of Environmental Mgmt., Office of Land Quality, Emergency Response Section: 1-888-233-7745 for in-state calls (toll free) within two hours of the spill. The contact should include the likelihood of damage to the waterways of the State of Indiana. This information is noted on C303 - Stormwater Pollution Prevention Plan.

B15- Material handling and storage procedures associated with construction activity:

All construction debris and wastes are to be loaded directly into provided roll off boxes for proper disposal off site. In no terms is debris or waste to be stored on site awaiting disposal or burned on property. Liquid wastes such as concrete wash out is to be disposed in the appropriate concrete wash out lined roll off boxes as provided. This includes any mortar/masonry/concrete grout material. Once these containers are full, they are to be removed from the site and disposed of in a licensed facility. Roll off boxes are to be rotated empty for full boxes for the entire project duration.

Construction Storm Water General Permit Notes Section B

C1- Description of pollutants and their sources associated with the proposed land use:

The post construction land use will have potential contaminants such as fuels, oils, grease, tires and other mobile equipment fluids. All materials, including mobile equipment will be stored on impervious surfaces during non-use or operation. (Noted on C303 - Stormwater Pollution Prevention Plan)

C2- Description of proposed post-construction stormwater measures:

The post construction contaminants are minimized by impervious surfaces being directed to a bioretention pond designed to collect sediment and pollutants prior to any discharge that may overtop the emergency spillway. (Noted C303 - Stormwater Pollution Prevention Plan)

C3- Plan details for each stormwater measure:

The post construction stormwater measures is primarily a bioretention pond as shown on C301 - Grading Plan and L101 - Landscape Plan.

C4- Sequence describing stormwater measure implementation:

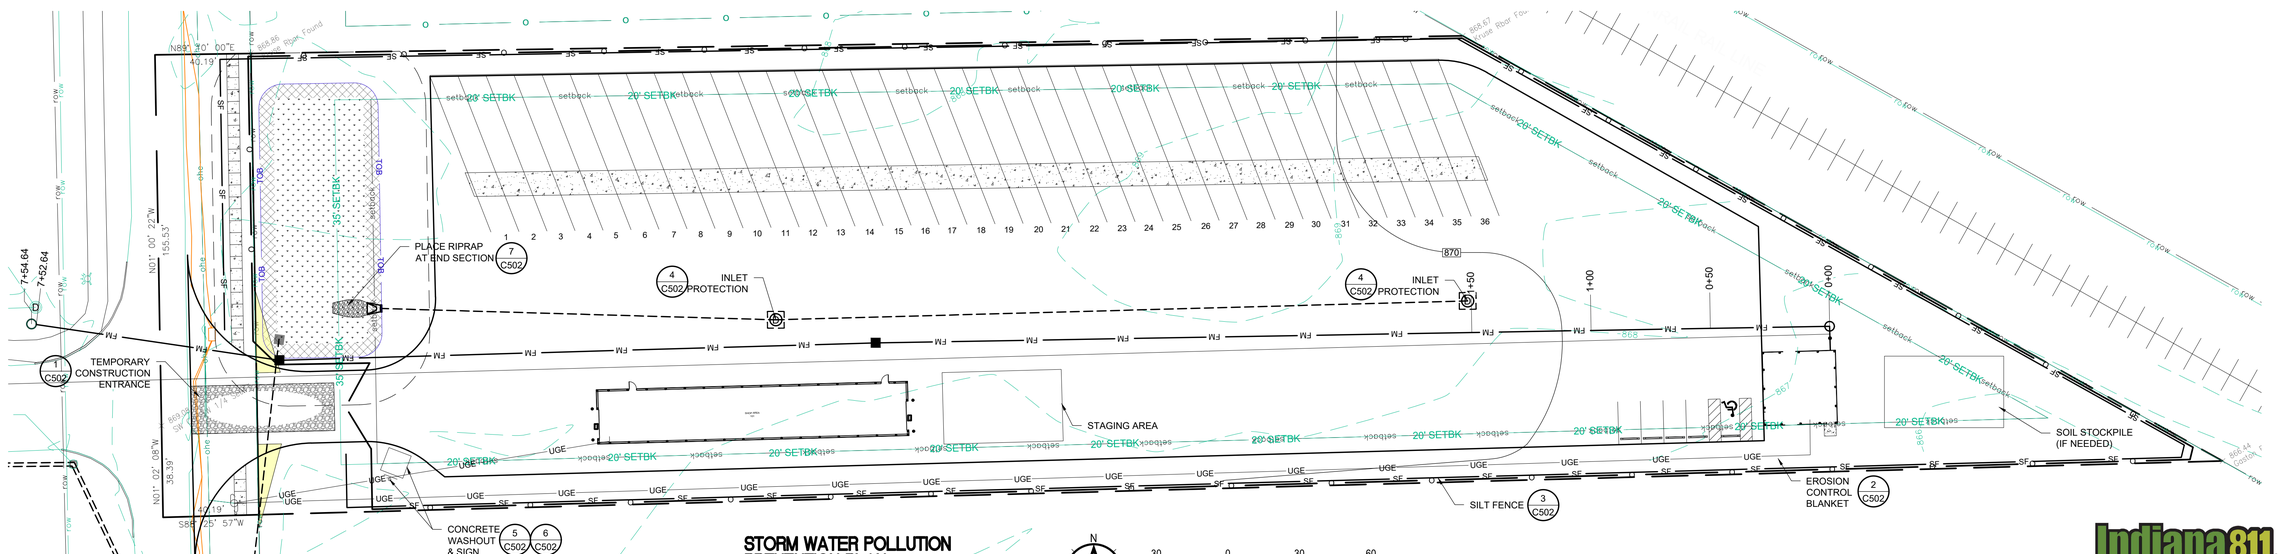

The sequence of installation for the post construction stormwater measure is part of construction sequencing shown C302 - Erosion Control Plan.

C5- Maintenance guidelines for proposed post-construction stormwater measures:

An operations and maintenance manual are part of the submittal information under separate documentation.

C6- Entity that will be responsible for operation and maintenance of the post-construction stormwater measures:

The responsible person for the post construction stormwater measures is the property owner as noted on C302 - Erosion Control Plan.

UTILITY NOTES:

SANITARY GENERAL SPECIFICATIONS:

1. (A) 100 PSI FLOWABLE FILL SHALL BE REQUIRED FOR ROAD CROSSINGS UNDER EXISTING PAVEMENT AND WITHIN FIVE (5) FEET OF THE PAVEMENT EDGE. STREET CUT REPAIRS SHALL USE 100 PSI FLOWABLE FILL TO WITHIN 6" OF PAVEMENT SURFACE. INSTALL 5" OF 4000 PSI READY MIX CONCRETE WITHIN 1" OF PAVEMENT 2-24 HOURS AFTER FLOWABLE FILL HAS BEEN INSTALLED. INSTALL 1" OF #11 SURFACE ASPHALT LEVEL WITH EXISTING PAVEMENT WITHIN 24 HOURS ON CONCRETE INSTALLATION.

(B) FLOWABLE FILL SHALL BE A MIXTURE OF SAND, PORTLAND CEMENT AND WATER, THOROUGHLY MIXED, AND SHALL HAVE 100 PSI COMPRESSIVE STRENGTH WITHIN 3 HOURS OF PLACEMENT. FLOWABLE FILL SHALL BE PLACED FROM TOP OF #8 STONE PIPE COVER TO BOTTOM OF NEW PAVEMENT.

(C) IN LOCATIONS OF NEW DEVELOPMENT, WHERE UTILITIES ARE INSTALLED PRIOR TO ROAD CONSTRUCTION, TRENCH BACKFILL UNDER FUTURE ROAD SHALL BE ENTIRELY #8 CRUSHED STONE FROM MANHOLES.

2. ALL OSHA SAFETY STANDARDS SHALL BE STRICTLY ENFORCED FOR PROTECTION OF WORKERS.

3. NO SEWER SYSTEM CONSTRUCTION MAY BEGIN UNTIL APPROVAL FROM I.D.E.M.

4. ONE SET OF I.D.E.M. APPROVED PLANS SHALL BE ON THE JOB SITE AT ALL TIMES

POLYVINYL CHLORIDE (P.V.C.) PIPE:

1. PIPE DIAMETERS OF 10 INCHES THROUGH 15 INCHES SHALL MEET OR EXCEED ALL THE REQUIREMENTS OF ASTM D-3034, AND SHALL HAVE A MINIMUM CELL CLASSIFICATION OF 12454-C, REFERENCE SHOULD BE MADE TO ASTM D-1784 FOR A SUMMARIZATION OF CELL CLASS PROPERTIES. PIPE DIAMETERS GREATER THAN 15 INCHES SHALL MEET OR EXCEED ALL REQUIREMENTS OF ASTM F-679, AND SHALL HAVE A MINIMUM CELL CLASSIFICATION OF 12454-C, P.V.C. RIBBED SEWER PIPE SHALL MEET OR EXCEED ALL REQUIREMENTS OF ASTM F-794 AND SHALL HAVE A MINIMUM CELLL CLASSIFICATION OF 12454.

2. THE MINIMUM WALL THICKNESS FOR PIPES OF 10 INCHES THROUGH 15 INCHES IN DIAMETER SHALL CONFORM TO SDR-35, TYPE PSM, AS SPECIFIED IN ASTM D-3034. THE MINIMUM WALL THICKNESS FOR PIPE DIAMETERS GREATER THAN 15 INCHES SHALL CONFORM TO T-1 AS SPECIFIED IN ASTM F-679. P.V.C. PIPE SHALL HAVE A MINIMUM PIPE STIFFNESS OF 46 POUNDS PER SQUARE INCH FOR EACH DIAMETER WHEN MEASURED AT FIVE PERCENT DEFLECTION AND TESTED IN ACCORDANCE WITH ASTM D-2412.

3. PIPE JOINTS SHALL HAVE A BELL WALL, GASKET GROOVE AND SPIGOT WHICH IS INTERGRAL WITH THE PIPE. THE ASSEMBLY OF JOINTS SHALL BE IN ACCORDANCE WITH THE PIPE MANUFACTURERS' RECOMMENDATIONS AND ASTM D-3212. NO SOLVENT CEMENT JOINTS SHALL BE ALLOWED. GASKET MATERIAL SHALL BE CONSTRUCTED OF STYRENE BUTADIENE OR BUTYL RUBBER AND MEET THE REQUIREMENTS OF ASTM F-477.

4. EACH PIPE SECTION SHALL BE MARKED WITH THE NAME OF THE MANUFACTURER, TRADEMARK OR TRADEMANE, NOMINAL PIPE SIZE, PRODUCTION / EXTRUSION CODE, MATERIAL AND CELL CLASS DESIGNATION AND ASTM NUMBER.

5. INSTALLATION SHALL BE IN ACCORDANCE WITH ASTM RECOMMENDED PRACTICE D-2321.

SANITARY SEWER NOTES:

1. 10 STATES STANDARDS AND INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT REQUIREMENTS SHALL BE MET OR EXCEEDED FOR ALL DESIGN, MATERIALS AND CONSTRUCTION METHODS.

2. SANITARY SEWER MANHOLES SHALL BE MONOLITHIC PRECAST SECTIONS, INCLUDING THE BOTTOM SECTION. ALL SECTIONS SHALL BE PRECAST CONCRETE IN ACCORDANCE WITH ASTM C-478. ALL MANHOLE INLET CONNECTIONS SHALL BE LOCK JOINT FLEXIBLE SLEEVES CONFORMING TO ASTM C-923. ONLY PRECAST CONCRETE RINGS SHALL BE ALLOWED FOR CASTING RISERS. ALL MANHOLES, GRADE RINGS AND CASTING SHALL BE SEALED TO PREVENT INFILTRATION.

3. MANHOLE INVERTS SHALL BE SHAPED FOR FLOW CHANNELS WITH CONCRETE AND SMOOTHLY FINISHED BY A SEMI CIRCULAR SECTION CONFORMING TO THE INSIDE DIAMETER OF THE CONNECTING SEWERS. NO BRICK, ROCK OR SAND FILLERS WILL BE ALLOWED.

4. ALL MANHOLE COVERS SHALL BE TRAFFIC BEARING, NON-ROCKING DESIGN WITH NON-PENETRATING PICK HOLES.

5. SANITARY SEWERS SHALL BE POLYVINYL CHLORIDE (PVC) SDR 35 MEETING ASTM D3034 SPECIFICATIONS. ALL SEWER MAINS SHALL HAVE A MINIMUM DIAMETER OF 8", ALL PIPE SPECIFIED SHALL SUPPORT ANTICIPATED LOADS.

6. ALL JOINTS SHALL BE PUSH-ON TYPE (SLIP SEAL) OR SOLVENT WELD.

7. BEDDING FOR PVC PIPE SHALL CONFORM TO BEDDING CLASSES I, II OF III, AS DESCRIBED IN ASTM D2321, FLEXIBLE SEWER PIPE INSTALLATION REQUIREMENTS.

UTILITY NOTES (cont'd):

8. ALL SEWER PIPE SHALL BE LAID USING PIPE LASER EQUIPMENT FOR BOTH VERTICAL AND HORIZONTAL ALIGNMENT.

9. MINIMUM ALLOWABLE COVER SHALL BE 5'-0" OVER TOP OF PIPE.

10. ALL SEWER MAINS SHALL BE DEFLECTION TESTED WITH AN 11 POINT, 5% MANDREL AFTER COMPACTED AGGREGATE IS IN PLACE FOR ALL STREETS. FLEXIBLE PIPE WILL BE TESTED AFTER BACKFILL HAS BEEN IN PLACE FOR AT LEAST 30 DAYS. ALL PVC PIPE FAILING THE MANDREL TEST SHALL BE REROUNDED IN PLACE OR AN ALTERNATE METHOD APPROVED BY THE GOVERNING JURISDICTION IF REPAIR REQUIRED, SEWER SHALL BE RETESTED 30 DAYS AFTER REPAIR IS COMPLETE.

11. ALL SEWER MAINS SHALL BE LAMPED AT THE TIME THE MANDREL TEST IS CONDUCTED. ALL MAINS SHALL BE TRUE TO ALIGNMENT AND GRADE.

12. ALL SEWER MAINS AND LATERAL CONNECTIONS SHALL BE AIR TESTED IN ACCORDANCE WITH UNI-BELL UNI-B-6-85. MINIMUM TIME FOR THE AIR TEST SHALL BE FOR A 1.0 PSIG PRESSURE DROP. ALL SECTIONS FAILING AIR TEST SHALL BE REPAIRED AND RETESTED.

13. ALL SERVICE WYE BRANCHES SHALL BE INSTALLED AT THE TIME OF THE SEWER MAIN INSTALLATION. NO DIRECT TAPS WILL BE ALLOWED ON NEW MAIN CONSTRUCTION. NO VERTICAL CONNECTIONS WILL BE ALLOWED.

14. A SEPARATE (6" MINIMUM) SERVICE SHALL BE PROVIDED FOR EACH UNIT SERVED APPROXIMATELY SIX (6) FEET TO THE RIGHT OF THE LOT CENTERLINE. NO WYE'S SHALL BE ALLOWED, INCLUDING CONDOMINIUMS.

15. THE MAXIMUM ALLOWABLE VERTICAL DISTANCE BETWEEN ANY INFLUENT LINE AND THE EFFLUENT MAIN SHALL BE 6' FOR TYPE 'A' AND 'C' MANHOLES. ANY DISTANCE GREATER THAN 6" SHALL REQUIRE A TYPE 'B' MANHOLE.

16. WHERE A SEWER EXTENSION OR IMPROVEMENT CONNECTS TO A EXISTING SEWER OR MANHOLE, IT MUST BE LOCATED IN A STREET, ROAD OR HIGHWAY R/W AND NOT LOCATED IN SUCH A MANNER WHERE IT WILL CUT THROUGH LOTS OR DEVELOPMENTS.

17. ALL EXTENSIONS SHALL BE INSTALLED AT MINIMUM GRADES.

CONCRETE MANHOLE NOTES:

1. ALL MANHOLES SHALL BE NEGATIVE AIRE PRESSURE (VACUUM) TESTED AS PER ASTM C1244-93 STANDARD METHOD.

2. NO MANHOLES SHALL BE MORE THAN 14' FROM BACK OF CURB.

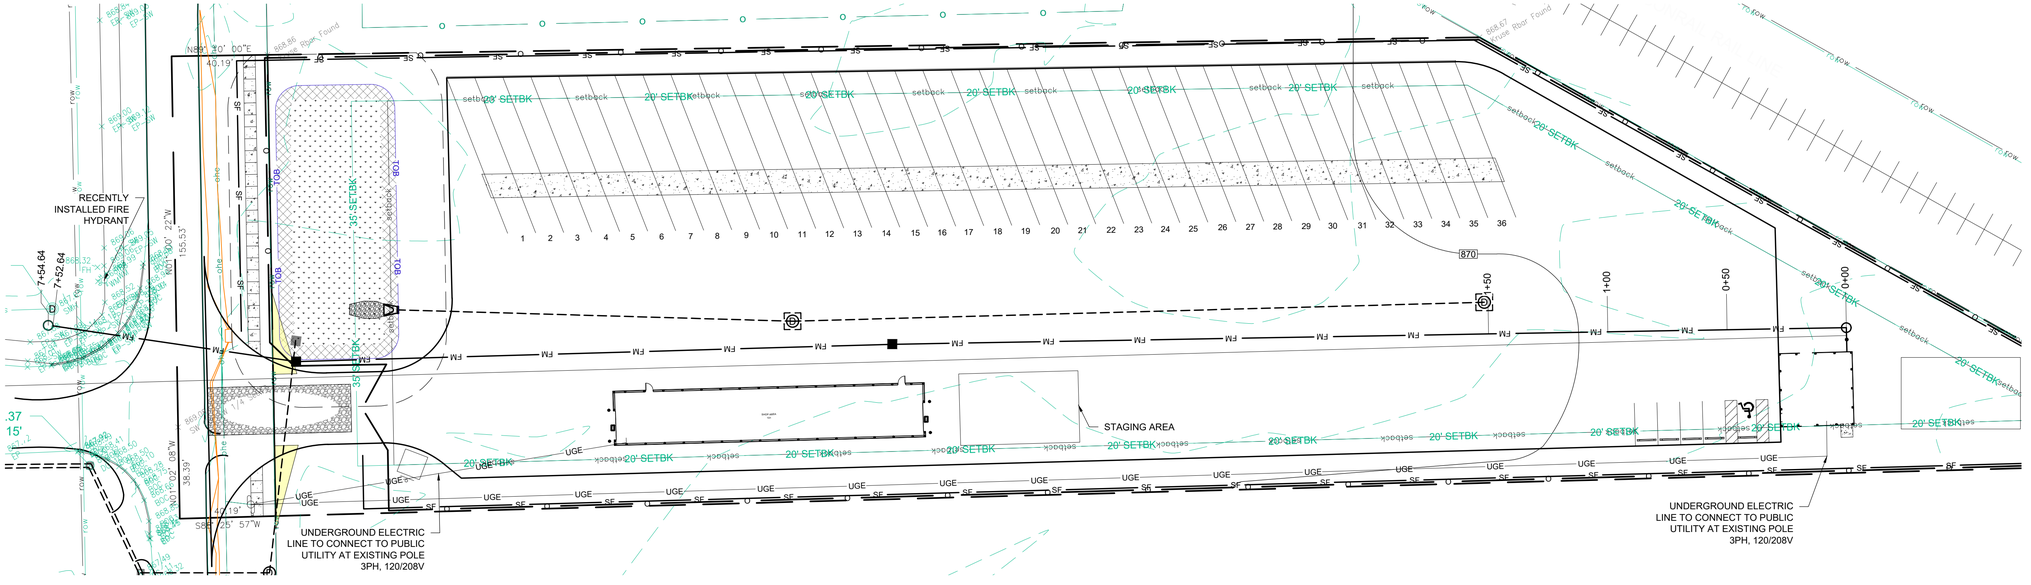

3. NO MANHOLE SHALL BE LOCATED IN ANY BACKYARD OR SIDE YARD. THEY MUST BE LOCATED IN THE FRONT YARD OR FRONT LOT THAT IS FRONTING A STREET.

4. ALL JOINTS IN MANHOLES SHALL BE SEALED TO PREVENT INFILTRATION BY USING A RUBBER 'O-RING' GASKET AND A 1/2" EXTRUDABLE PERFORMED GASKET BETWEEN ALL PRECAST SECTIONS.

5. ANNULAR SPACE AROUND SANITARY SEWER AT POINT OF ENTRANCE INTO THE MANHOLE SHALL BE GROUTED COMPLETELY AROUND SANITARY SEWER, INSIDE AND OUTSIDE TO INSURE SMOOTH TRANSITION.

6. WHEN CONNECTING A NEW SEWER INTO AN EXISTING MANHOLE, THE EXISTING MANHOLE SHALL BE BROUGHT UP TO MEET PRESENT STANDARDS.

7. SECTION JOINTS ON PRECAST CONCRETE MANHOLES SHALL BE SEALED WITH BLACK TAR MASTIC 6" ABOVE AND 6" BELOW JOINT, ON MANHOLE EXTERIOR.

CONNECTION TO EXISTING STREETS
NO SCALE

NOTE:

THIS DETAIL SHALL BE USED FOR CONNECTING TO THE END OF AN EXISTING STREET.

EXISTING PAVEMENT SHALL BE SAW CUT, FULL DEPTH, AT A UNIFORM LOCATION INSIDE OF THE EXISTING EDGE OF PAVEMENT, WHERE THE PAVEMENT IS IN GOOD CONDITION AND WILL PROVIDE AN INTERFACE WITH THE FULL PAVEMENT SECTION LINE AND GRADE, FREE FROM LOOSE, DAMAGED, DETERIORATED OR OTHERWISE COMPROMISED MATERIAL. A MINIMUM OF SIX (6) INCHES FROM THE EXISTING EDGE OF PAVEMENT FOR THE FULL WIDTH OF THE EXISTING PAVEMENT; LOCATION OF SAW-CUT TO BE DETERMINED BY THE TOWN OF BROWNSBURG. THE ENTIRE AREA OF THE PROPOSED INTERFACE SHALL BE EXCAVATED TO THE PROPOSED SUBGRADE ELEVATION. THE SUBGRADE SHALL BE STABILIZED IN ACCORDANCE WITH TOWN OF BROWNSBURG STANDARDS AND SPECIFICATIONS. AFTER THE SUBGRADE HAS BEEN STABILIZED AND APPROVED, EXISTING HMA PAVEMENT WILL BE SURFACE MILLED 10 FEET ALONG THE NEW SAW-CUT END OF PAVEMENT TO PROVIDE A WATER STOP AND SMOOTH TRANSITION TO THE NEW PAVEMENT WHEN THE SURFACE MIX IS APPLIED. THE NEW PAVEMENT SECTION SHALL BE INSTALLED IN ACCORDANCE WITH TOWN STANDARDS AND SPECIFICATIONS.

SECTION 02504 – ADJACENT ROADWAY IMPROVEMENTS

PART 1 - GENERAL

1.01 Roadways adjacent to proposed developments shall conform to the following requirements and standards.

A. Adjacent Roadway Improvements

1. Developers shall be responsible for improvements to the existing roadway(s) that front their property. These improvements shall include, but are not limited to, the following items:
   a. Construction of acceleration lanes, deceleration lanes, and passing blisters for each entrance or street intersection as indicated in the Standard Details.
   b. In order to construct adequate acceleration lanes, deceleration lanes, and passing blisters, right-of-way shall be obtained which has a width consistent with the most current accepted Thoroughfare Plan.
   c. The existing roadway along the development frontage shall be widened to match the width requirements based on the functional classification of the roadway as defined by the Thoroughfare Plan. Once widened, the entire roadway fronting the development shall be resurfaced for consistency.
2. Additional improvements may be required depending on field conditions and as determined by the Town of Brownsburg.

PART 2 - PRODUCTS

DRAWN BY:	JBF
CHECKED BY:	BEM
PROJECT NUMBER:	21346
DATE:	1/13/22
SHEET NUMBER:	C501

ROCK DAM REQUIREMENTS:

1. CONTRIBUTING DRAINAGE AREA: 50 ACRES MAXIMUM

2. DESIGN LIFE: LIMITED TO 3 YRS.

3. SEDIMENT STORAGE: 1,800 CU.FT./ACRE DISTURBED (MINUMUM) MEASURED 1 FT. BELOW SPILLWAY CREST.

4. BASIN SHAPE: MINIMUM 2:1 LENGTH-TO-WIDTH RATIO.

5. BASIN AREA: VARIABLE; THE LARGER THE SURFACE AREA THE GREATER THE TRAPPING EFFICIENCY.

6. DAM CREST HEIGHT: LIMITED TO 8 FT.

7. SPILLWAY CAPACITY: PEAK RUNOFF FROM A 10-YR. FREQUENCY, 24-HR. DURATION STORM EVENT, A MAXIMUM FLOW DEPTH OF 1 FT. AND MINIMUM FREEBOARD OF 1 FT. (ENTIRE LENGTH OF DAM BETWEEN ROCK ABUTMENTS MAY SERVE AS SPILLWAY.)

8. DAM DIMENSIONS: TOP WIDTH, 5 FT. MINIMUM; SIDE SLOPES, 2:1 OR FLATTER UPSTREAM, 3:1 OR FLATTER DOWNSTREAM.

9. EARTH ABUTMENTS: SMOOTH, STABLE, 2:1 OR FLATTER SLOPES.

10. ROCK ABUTMENTS (TO PROTECT EARTH ABUTMENTS): EXTENDED ALONG DOWNSTREAM FACE TO TOE OF DAM AND AT LEAST 1 FT. HIGHER THAN SPILLWAY FACE AT ALL POINTS, 2 FT. ABOVE SPILLWAY CREST, AND 1 FT. THICK, WITH 2:1 OR FLATTER SIDE SLOPES.
11. OUTLET PROTECTION: ROCK APRON, 1-1/2 FT. THICK (MINIMUM), ZERO GRADE, WITH LENGTH EQUAL TO HEIGHT OF DAM OR EXTENDED TO STABLE GRADE, WHICHEVER IS GREATER.

12. ROCK MATERIAL: INDOT REVETMENT RIPRAP.

13. PROTECTION FROM PIPING: GEOTEXTILE FABRIC FOR SEPARATION AND FILTRATION COVERING ENTIRE FOUNDATION, INCLUDING EARTH ABUTMENTS AND APRON.

14. BASIN DE-WATERING: THROUGH A 1 FT. THICK LAYER OF INDOT CA NO. 5 STONE ON UPSTREAM FACE OF THE DAM.

INSTALLATION

SITE PREPARATION:

1. DIVERT RUNOFF FROM UNDISTURBED AREAS AWAY FROM THE ROCK DAM AND BASIN AREA.

2. EXCAVATE THE FOUNDATION FOR THE APRON, USING IT AS A TEMPORARY SEDIMENT BASIN DURING CONSTRUCTION OF THE DAM.

3. CLEAR AND GRUB THE AREA UNDER THE DAM, REMOVING AND PROPERLY DISPOSING OF ALL ROOT MAT, BRUSH, AND OTHER DEBRIS.

4. GRADE THE EARTH ABUTMENTS NO STEEPER THAN 2:1.

DAM AND BASIN CONSTRUCTION

1. EXCAVATE A CUTOFF TRENCH AT THE CENTER LINE OF THE DAM, EXTENDING ALL THE WAY UP THE EARTH ABUTMENTS, AND BACKFILL WITH COMPACTED EARTH FILL.

2. SMOOTH THE DAM FOUNDATION.

3. COVER THE ENTIRE FOUNDATION, INCLUDING BOTH EARTH ABUTMENTS, WITH GEOTEXTILE FABRIC, MAKING SURE THE UPSTREAM STRIPS OVERLAP THE DOWNSTREAM STRIPS AT LEAST 1 FT.

4. CONSTRUCT THE DAM TO PLANNED DIMENSIONS.

5. ONCE THE DAM IS IN PLACE, CLEAR THE SEDIMENT BASIN AREA, PROPERLY DISPOSING OF THE CLEARED MATERIAL.

6. SET A MARKER STAKE TO INDICATE THE CLEANOUT ELEVATION (I.E., POINT AT WHICH THE BASIN IS 50% FULL OF SEDIMENT).

7. DIVERT CONSTRUCTION SITE RUNOFF FLOW INTO THE UPPER END OF THE BASIN USING TEMPORARY DIVERSIONS.

8. STABILIZE ALL DISTURBED AREAS EXCEPT THE LOWER HALF OF THE BASIN.

SAFETY PRECAUTIONS:

1. BECAUSE SEDIMENT BASINS THAT IMPOUND WATER ARE HAZARDOUS, (A) BE SURE SIDE SLOPES ARE 2:1 OR FLATTER, (B) FENCE WITH WARNING SIGNS IF TRESPASSING IS LIKELY, (C) DE-WATER THE BASIN BETWEEN STORM EVENTS, AND (D) FOLLOW ALL STATE AND LOCAL IMPOUNDMENT SITE REQUIREMENTS.

MAINTENANCE

1. INSPECT THE ROCK DAM AND BASIN AFTER EACH STORM EVENT.

2. REMOVE SEDIMENT WHEN IT ACCUMULATES TO HALF THE DESIGN VOLUME (MARKED BY A STAKE).

3. CHECK THE DAM AND ABUTMENTS FOR EROSION, PIPING, OR ROCK DISPLACEMENT, AND REPAIR IMMEDIATELY.

4. IF THE BASIN DOES NOT DRAIN BETWEEN STORMS, REPLACE THE STONE ON THE UPSTREAM FACE OF THE DAM.

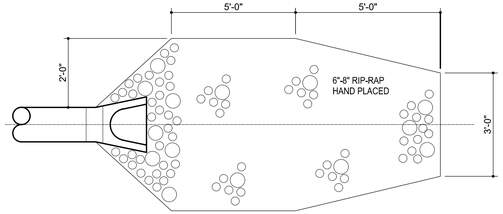

5. IF THE BASIN DRAINS TOO RAPIDLY FOLLOWING A STORM (I.E., LESS THAN 6 HRS.), ADD INDOT CA NO. 5 GRAVEL ON THE UPSTREAM FACE OF THE DAM.

6. ONCE THE CONTRIBUTING ŷŷŷŷŷŷŷŷDRAINAGE AREA HAS BEEN PERMANENTLY STABILIZED, (A) REMOVE WATER AND SEDIMENT FROM THE BASIN;

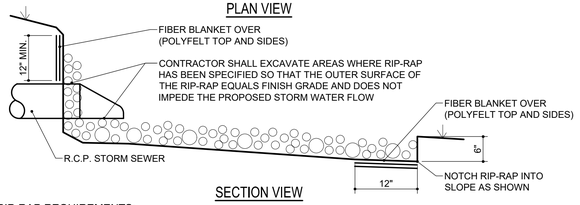

(B) REMOVE THE DAM, DISPOSING OF THE ROCK IN DESIGNATED DISPOSAL AREAS; (C) SMOOTH THE SITE TO BLEND WITH THE SURROUNDING AREA; AND (D) STABILIZE.

COMMON CONCERNS:
FAILURE FROM PIPING ALONG ABUTMENTS-BECAUSE THE FILTER MATERIAL WAS NOT PROPERLY INSTALLED OR THE EARTH ABUTMENTS ARE TOO STEEP. STONE DISPLACEMENT FROM FACE OF DAM-BECAUSE STONE SIZE IS TOO SMALL OR THE FACE IS TOO STEEP. EROSION BELOW DAM BECAUSE THE APRON WAS NOT EXTENDED TO STABLE GRADE. EROSION OF ABUTMENTS DURING SPILLWAY FLOW-BECAUSE THE ROCK ABUTMENT IS NOT HIGH ENOUGH. SEDIMENT CARRIED THROUGH SPILLWAY-BECAUSE THE DRAINAGE AREA IS TOO LARGE; TO SOLVE, DIVERT RUNOFF FROM THE UNDISTURBED AREA AWAY FROM THE BASIN. SEDIMENT LOSS THROUGH DAM-BECAUSE THE LAYER OF AGGREGATE ON THE UPSTREAM FACE IS NOT THICK ENOUGH OR IS TOO COARSE TO RESTRICT FLOW THROUGH THE DAM.

ROCK DAM 8 / C502
NOT TO SCALE

PLAN VIEW

SECTION VIEW

RIP-RAP REQUIREMENTS:

CONTRIBUTING DRAINAGE AREA: 100 ACRES MAXIMUM.

CAPACITY: PEAK RUNOFF FROM 10-YR. FREQUENCY, 24-HR. DURATION STORM EVENT.

APRON: DESIGN DEPENDS ON CHANNEL DEFINITION, BUT IS LONG ENOUGH TO DISSIPATE RUNOFF ENERGY, SET ON ZERO GRADE, STRAIGHT AND ALIGNED WITH THE RECEIVING STREAM. (IF SITE CONDITIONS REQUIRE A CURVE, SET IT NEAR THE UPSTREAM END.)

FOUNDATION: GEOTEXTILE FABRIC FOR STABILIZATION AND FILTRATION OR WELL-GRADED GRAVEL FILTER LAYER AT LEAST 6 IN. THICK.

MATERIAL: HARD, ANGULAR, AND HIGHLY WEATHER-RESISTANT RIPRAP STONE OF 6 - 8 INCHES IN SIZE.

THICKNESS: 12 IN. MINIMUM OR TWO TIMES THE D 50 STONE DIAMETER,wHICHEVER IS GREATER.

INSTALLATION:

1. EXCAVATE THE APRON AREA SUBGRADE BELOW DESIGN ELEVATION TO ALLOW FOR THICKNESS OF THE FILTER (OR GRAVEL LAYER) AND THE RIPRAP. (THIS OVER-EXCAVATION GREATLY INCREASES THE AMOUNT OF SPOIL.)

2. COMPACT ANY FILL USED IN THE SUBGRADE TO THE DENSITY OF THE SURROUNDING UNDISTURBED MATERIAL, AND SMOOTH ENOUGH TO PROTECT FABRIC FROM TEARING.

3. PLACE THE GEOTEXTILE FABRIC (OR GRAVEL LAYER) ON THE COMPACTED AND SMOOTHED FOUNDATION. IF MORE THAN ONE FABRIC PIECE IS NEEDED, THE UPSTREAM PIECE SHOULD OVERLAP THE DOWNSTREAM PIECE BY AT LEAST 1 FT.

4. INSTALL THE RIPRAP TO THE LINES AND ELEVATIONS SHOWN IN THE DESIGN. IF THE CHANNEL IS POORLY DEFINED, THE FINAL CROSS-SECTION SHOULD BE LEVEL OR SLIGHTLY DEPRESSED IN THE MIDDLE; IF WELL DEFINED, THE FILTER (OR GROUND LAYER) AND RIPRAP SHOULD EXTEND TO THE TOP OF THE BANK.

5. IF THE GEOTEXTILE FABRIC TEARS WHEN PLACING TH RIPRAP, REPAIR IMMEDIATELY BY LAYING AND STAPLING A PIECE OF FABRIC OVER THE DAMAGE AREA, OVERLAPPING THE UNDAMAGED AREAS BY AT LEAST 12 INCHES.

6. MAKE SURE THE TOP OF THE RIPRAP APRON IS LEVEL WITH OR SLIGHTLY BELOW THE RECEIVING STREAM. (RIPRAP SHOULD NOT RESTRICT THE CHANNEL OR PRODUCE AN OVERFALL.)

7. BLEND THE RIPRAP SMOOTHLY TO THE SURROUNDING GRADE.

8. STABILIZE ALL DISTURBED AREAS IMMEDIATELY FOLLOWING INSTALLATION.

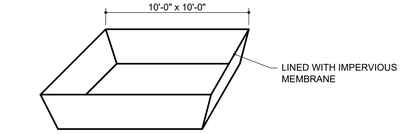

MAINTENANCE:

* INSPECT ROCK CHUTES AFTER STORM EVENTS FOR STONE DISPLACEMENT AND FOR EROSION AT THE SIDES AND ENDS OF THE APRON.
* MAKE NEEDED REPAIRS IMMEDIATELY; USE APPROPRIATE SIZE STONE; AND DO NOT PLACE THEM ABOVE FINISHED GRADE.

COMMON CONCERNS:

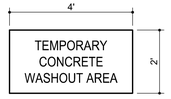

FOUNDATION NOT EXCAVATED DEEP ENOUGH OR WIDE ENOUGH--RIPRAP RESTRICTS THE FLOW CROSS SECTION, RESULTING IN EROSION AROUND THE APRON AND SCOUR HOLES AT THE OUTLET.
RIPRAP APRON ON ZERO GRADE--

GENERAL STAPLE RECOMMENDATIONS

SLOPE GRADIENT

CHANNEL LININGS UTILIZE STAPLE PATTERN "C" WITH ADDITIONAL STAPLES ON SIDE SLOPES.

NOTES:

1. STAPLE PATTERNS APPLY TO ALL NORTH AMERICAN GREEN EROSION BLANKETS.

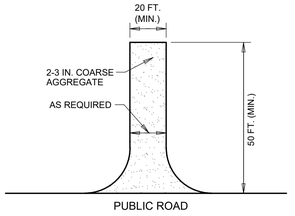

2. STAPLE PATTERNS MAY VARY DEPENDING UPON SOIL TYPE AND AVERAGE ANNUAL RAINFALL.

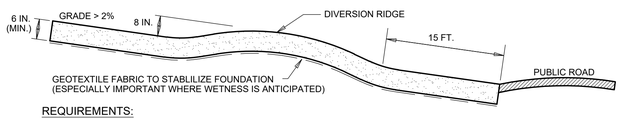

3. AT SLOPE LENGTHS GREATER THAN 300 FEET OR WHERE DRAINAGE OVER LARGE AREAS IS DIRECTED ONTO BLANKETS, STAPLE PATTERN "C" SHOULD BE UTILIZED.

4. CHANNEL LININGS REQUIRE A 2' (MIN.) OVERLAP AT LONGITUDINAL JOINTS AND SIDE SLOPES REQUIRE A 6" (MIN.) OVERLAP. WHERE OVERLAPS OCCUR, THE UPSTREAM BLANKET SHALL OVERLAP THE DOWNSTREAM.

5. NORTH AMERICAN GREEN S150BN TO BE USED FOR EROSION CONTROL BLANKETS.

EROSION CONTROL BLANKET STAPLE PATTERN 2 / C502
NOT TO SCALE

REQUIREMENTS:

Material: 2-3 in. washed stone (INDOT CA No.2) over a stable foundation.

Thickness: 6 in. minimum

Width: 12 ft. minimum or full width of entrance/exit roadway, whichever is greater.

Length: 50 ft. minimum. The length can be shorter for small sites such as for an individual home.

Washing facility (optional): Level area with 3 in washed stone minimum or a commercial rack, and waste water diverted to a sediment trap or basin.

Geotextile fabric underliner: May be used under wet conditions or for soils within a high seasonal water table to provide greater bearing strength.

INSTALLATION:

1. Avoid locating on steep slopes or at curves in public roads.

2. Remove all vegetation and other objectionable material from the foundation area, and grade and crown for positive drainage.

3. If slope towards the road exceeds 2%, construct a 6-8 in.-high water bar (ridge) with 3:1 side slopes across the foundation area about 15 ft. from the entrance to divert runoff away from the road.

4. Install pipe under the pad if needed to maintain proper public road drainage.

5. If wet conditions are anticipated, place geotextile fabric on the graded foundation to improve stability.

6. Place stone to dimensions and grade shown in the erosion control plan, leaving the surface smooth and sloped for drainage.

7. Divert all surface runoff and drainage from the stone pad to a sediment trap or basin.

MAINTENANCE:

* Inspect entrance drive and sediment disposal area weekly and after storm events or heavy use.
* Reshape pad as needed for drainage and runoff control.
* Topdress with clean stone as needed.
* Immediately remove mud and sediment tracked or washed onto public roads by brushing or sweeping. Flushing should only be used if the water is conveyed into a sediment trap or basin.
* Repair any broken road pavement immediately.

COMMON CONCERNS:

Inadequate runoff control--results in sediment washing onto road.
Stone too small, pad too thin, or geotextile fabric absent--results in ruts and a muddy condition as stone is pressed into the soil: add more stone.
Pad too short for heavy construction traffic--extend the pad beyond the 50-ft. length as needed.
Pad not flared sufficiently at road entrance--results in mud being tracked onto the road and possible damage to the road edge: widen stone entrance and repair road damage.
Unstable foundation--use geotextile fabric under th pad and/or improve foundation drainage.

Lithonia Lighting Basics™

Low Profile Emergency Light

EU2L

FEATURES & SPECIFICATIONS

INTENDED USE — Provides a minimum of 90 minutes illumination for the solid wattage upon loss of AC power to meet code required emergency lighting, ideal for applications requiring low profile, emergency light with maximum mounting height.

CONSTRUCTION — The housing is standard white, or optional black, thermoplastic with a compact and low profile design and all-inclusive easy reflector and lens assembly. It is UV stabilized and impact-resistant.

OPTICS — The typical 60-lm of life LED is 70 years. One, 0.72W white LED per lamp head.

ELECTRICAL — Dual-voltage 120/277 standard.

Bi-color LED status indicator for battery condition. (Green-normal, Red-check battery).

One watt x half watts of remote capacity available with NEMA option.

BATTERY: 3.6V maintenance-free, rechargeable, nickel-cadmium.

INSTALLATION — Wall mount and ceiling mount. Surface mount back plate fits most industry-standard size junction boxes and snaps into place.

LISTINGS: CSA certified to meet applicable requirements for UL 924, NFPA 101 (current Life Safety Code), NFPA 70 (NEC), California Energy Commission Title 20 section 1605.3 (B)(2), FCC Title 47, Part 15, Subpart B and EN55, Indoor damp location 32°F to 104°F (-10°C to 40°C) listed standard.

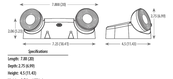

WARRANTY — 5-year limited warranty. This is the sole warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty-terms-and-conditions

NOTE: Actual performance may differ as a result of end-user environment and application.
All values are design or typical values, measured under laboratory conditions at 25 °C.
Specifications subject to change without notice.

† Small Battery Chargers Certified in the CA Title 20 Appliance Efficiency Database.

OLWP

LED Wall Pack

Customize the color temperature and effortlessly automate your wall pack for dusk-to-dawn operation with the CLWP Wall Pack. Featuring switchable CCT (3000K/4000K/5000K) and a selectable photocell, the CLWP Wall Pack is designed to deliver years of maintenance-free general illumination for residential outdoor applications such as driveways, entryways, patios, and other outdoor areas that require consistent and reliable lighting performance.

FEATURES:

- Switchable CCT (3000/4000K)
- Selectable ON/OFF photocell for dusk-to-dawn or switched operation
- Cast aluminum construction for durability
- Impact resistant polycarbonate diffuser

Accessories

Ordered and shipped separately.

EGSSXD U	Anchor bolts (4)	Base cover with bolt caps
EGSSXD SSXDD U	Replacement anchor bolt covers (specify finish) (4)	Emergency test styles

NOTES

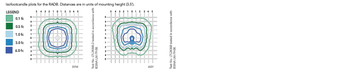

1 ASY only available in SYM distribution.
2 MVOLT fits only two illuminated quadrants shown at higher drive currents to generate similar lumens. 347 and 480 not available with PIR.
3 BTS not available with 30SW or 40SW.
4 PE only available with MVOLT.
5 PE, PIR and PIR1 not available with BTS.
6 ETH1 and PIR only available in full height. Not available with HVG, HVB or HVBL.
7 PIR not available with ETH.
8 Not available with 50K or 5000K.
9 Architectural and custom colors available (additional leadtimes and cost may apply).
10 Not available with 50K, HVB and HVBL. Not available with 5000K.

Photometric Diagrams

To see complete photometric reports or download .ies files for this product, visit Lithonia Lighting's RADEAN Bollard homepage.

Isofootcandle plots for the RADB. Distances are in units of mounting height (0.31).

FEATURES & SPECIFICATIONS

INTENDED USE
The combination illumination and maintenance-free performance of the Radean LED Bollard is ideal for illuminating building entryways, walking paths and pedestrian plazas, as well as any other location requiring a low-mounting-height light source.

CONSTRUCTION
One-piece extruded aluminum shaft with thick side walls for extreme durability and heat dissipation. Shaft is 8.25" (20.96cm) in diameter and 41.5" (105.41cm) high with washers and 0.313" (7.95cm) bolt circle template ensure stability. Overall height is 42" standard.

FINISH
Exterior parts are protected by a zinc-infused super-durable TGIC thermoset powder coating that provides 5 times the amount of zinc required for comparable protection for extension of glow and luster. A tightly controlled multi-stage process ensures a minimum 3-mil thickness for a finish that can withstand the elements without cracking or peeling. Available in both textured and non-textured finishes.

OPTICS
The optical distributions are available: asymmetrical and symmetrical. IP66-sealed LED light engine provides smoothly graduated illumination. Light engines are available in 2700K, 3000K, 3500K, 4000K or 5000K.

ELECTRICAL
Light engine consist of high-efficacy LEDs mounted to metal-core circuit boards to provide long life and consistent performance. 50,000 hours at 25°C (77°F). Class 2 electronic drivers are designed for an expected life of 100,000 hours with >.1% failure rate. Electrical components are mounted on a removable power tray.

LISTINGS
CSA certified to U.S. and Canadian standards. Light engines are IP66-rated. Rated for -40°C minimum ambient. Emergency battery backup rated for -10°C minimum ambient. International Dark-Sky Association (IDA) Fixture Seal of Approval (FSA) is available for all products on this page utilizing 3000K color or less. U.S. Patent No. D912,863.

BUY AMERICAN ACT
This product is assembled in the USA and meets the Buy American(t) government procurement requirements under FAR, DFARS and DOT regulations. Please refer to www.acuitybrands.com/buy-american for additional information.

WARRANTY
5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty-terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application and color.
All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

OLWP

LED Wall Pack

Specifications

INTENDED USE:
The CLWP provides years of maintenance-free general illumination for commercial or residential outdoor applications such as driveways, patios, loading areas and warehouses.

CONSTRUCTION:
Rugged cast aluminum, corrosion-resistant rear housing. Impact resistant polycarbonate front cover/diffuser resists fading and cracking. Driver operates at 120V. Operating temperature -40°C to 40°C.

OPTICS:
High-performance LEDs maintain 70% of light output at 50,000 hours of service. (LED lifespan based on IESNA LM-80-08 results and calculated per IESNA TM-21-11 methodology.). Lenses are engineered for superior lighting distribution, uniformity and fixture spacing. See Lighting Performance Table for specific fixture performance.

INSTALLATION:
Designed for wall mounting more than 4' above the ground. Mounts to a recessed junction box (by others).

LISTINGS:
UL Listed to U.S. and Canadian safety standards for wet locations.

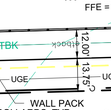

WARRANTY:
5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty-terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application.
All values are design or typical values, measured under laboratory conditions at 25 °C.
Specifications subject to change without notice.

Performance Data

Lumen values are from photometric tests performed in accordance with IESNA LM-79-08. Data is considered to be representative of the configurations shown, within the tolerances allowed by Lighting Facts. Actual performance may differ as a result of end-user environment and application. Actual wattage may differ by +/-10% when operating between 120-480V +/-10%.

*Note: Lumen output varies based on finish. Silver color shown, for black (bronze) or white (bone) photometry, see specific photometric files downloadable from www.acuitybrands.com.

Projected LED Lumen Maintenance

Data references the extrapolated performance projections for the platforms noted in a **25°C ambient**, based on 10,000 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

To calculate L87, use the lumen maintenance factor that corresponds to the desired number of operating hours below. For other ambient temperature conditions, see our Lumen Maintenance Factors table.

	25,000	50,000	75,000	100,000
P1	0.94	0.89	0.85	0.80
P2	0.94	0.89	0.85	0.80
P3	0.94	0.89	0.85	0.80
P4	0.94	0.89	0.85	0.80
P5	0.94	0.89	0.85	0.80

Lumen Ambient Temperature (LAT) Multipliers

Use these factors to determine relative lumen output for average temperatures from 0-40°C (32-104°F).

Ambient	LAT Factor
0	1.04
5	1.04
10	1.03
15	1.02
20	1.01
25	1.00
30	0.99
35	0.98
40	0.97

BMP Site Drawings:

See Appendix

Responsible Party Required Periodic Inspections: See Appendix B for Tabular Inspection Schedule

It is the responsibility of the Responsible Party to inspect the installed infrastructure to determine if it is functioning as designed quarterly and after each major rainfall event.

Town Performed Periodic Inspections:

Town officials shall inspect the storm water improvement system installed annually. Inspections shall be based on the Town of Brownsburg Ordinances. The Responsible Party shall be responsible for the annual inspection fees and subsequent money spent in maintaining the best management practices as determined by the Town's review official.

Required Perform Maintenance:

If determined by the Town's inspection, the Responsible Party must complete any maintenance of the best management practices within the given specified timeframe. If maintenance activities are not completed, then the reserves the right to complete the maintenance activity and back charge the Responsible Party accordingly.

Routine Maintenance:

It is the responsibility of the Responsible Party to maintain the on-site and adjacent offsite drainage infrastructure. The routine maintenance includes mowing the grassy areas to a height between 4 to 6 inches. It is also the responsibility of the Responsible Party to keep all shrubbery and trees from growing in the right-of-way. The area must be kept clean of all litter and debris as well. Regarding soil within the yard area, if standing water is witnessed in excess for 48 hours after a storm event, the soil must be inspected for reasons of preventing absorption and/or decreasing permeability (i.e. compaction, debris, etc.) The soil needs to be tilled and/or inspected if immediate attention doesn't rectify the situation. During tilling of the soil, mindfulness needs to be kept of the sub-surface drains to prevent damage (i.e. removal or crushing). The soil must maintain a minimum permeability value of fc > 0.50 inches per hour. The sufficient proposed replacement soil such as Urban Land Fox Complex, 0 to 2% slope has sufficient permeability qualities to meet standards, if required.

Remedial Maintenance:

The responsibility of maintaining the installed infrastructure is the responsibility of the Responsibility Party. This includes replacing any damaged pipe, concrete structure, curb/gutters, etc. to maintain the function of the infrastructure as originally designed.

Sediment Removal:

Sediment removal from gutter of adjacent curbs.

Statement of Town's Right of Access:

With the location of the access easement, Town officials have the right to enter the property and check the best management practices at their discretion.

Responsible Party for BMP Maintenance:

It is the sole responsibility of the Owner to maintain the best management practices after initial installation. This includes all costs and scheduling associated with the maintenance of BMP. The Owner is required to keep records of all inspection and maintenance activities and will self-certify that inspection and maintenance have been performed according to the Operations and Maintenance Manual, when requested by the city.

PROTECTION AND DEMOLITION NOTES:

TREE REMOVAL AND PROTECTION:

1. TREES SHALL BE REMOVED FROM THE PROJECT ONLY WHERE THE AREA IS TO BE OCCUPIED BY ROAD, SURFACED AREAS, OR DRAINAGE SWALES.

2. TREES SHALL BE REMOVED FROM THE PROJECT SITE WHERE THEY INTERFERE DIRECTLY WITH THE PLACEMENT OF STORM OR SANITARY SEWERS AND THAT SUCH EXCAVATION WILL BE FATAL TO TREES.

3. THE CONTRACTOR SHALL ENDEAVOR TO SAVE AND PROTECT TREES OF VALUE AND WORTH WHICH DO NOT IMPAIR CONSTRUCTION OF IMPROVEMENTS AS DESIGNATED. IN THE EVENT CUT OR FILL EXCEEDS 0.5 FEET OVER THE ROOT AREA, THE DEVELOPER SHALL BE CONSULTED WITH RESPECT TO PROTECTIVE MEASURES TO BE TAKEN, IF ANY, TO PRESERVE SUCH TREES.

4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DETERMINING THE METHOD FOR PROTECTION OF TOPS, TRUNKS AND ROOTS OF EXISTING TREES ON THE PROJECT SITE THAT ARE TO REMAIN. EXISTING TREES SUBJECT TO CONSTRUCTION DAMAGE SHALL BE BOXED, FENCED OR OTHER MATERIAL AND EQUIPMENT SHALL NOT BE STOCKPILED OR STORED WITHIN THE SPREAD OF BRANCHES. BRANCHES WHICH NEED TO BE REMOVED OR ARE BROKEN SHALL BE NEATLY TRIMMED AND SCARS SHALL BE COVERED WITH TREE PAINT.

CLEARING AND GRUBBING:

1. CLEARING AND GRUBBING SHALL CONSIST OF CUTTING, REMOVING AND SATISFACTORY DISPOSING OF ALL TREES, BRUSH, PROJECTING ROOTS, STUMPS, RUBBISH, BROKEN PAVEMENT, BROKEN CONCRETE, FENCING (AS DESIGNATED) AND OTHER MATERIALS ON THE PROJECT SITE AND WITHIN THE BOUNDARY AS SHOWN ON THE CONSTRUCTION DOCUMENTS AND / OR DESIGNATED BY THE CONSTRUCTION LIMITS.

2. ALL "UNSUITABLE MATERIAL" FROM CLEARING OPERATIONS SHALL BE REMOVED TO DISPOSAL AREAS AS DIRECTED BY GENERAL CONTRACTOR.

STRIPPING OF TOPSOIL:

1. THE CONTRACTOR SHALL VERIFY THAT ALL TOPSOIL HAS BEEN REMOVED IN THE AREAS TO BE OCCUPIED BY ROADS, WALKS AND DESIGNATED BUILDING AREAS. TOPSOIL SHALL BE REMOVED TO A DEPTH OF SIX (6) INCHES OR DEEPER, IF NECESSARY, TO REMOVE ORGANIC MATTER WHERE REQUIRED.

2. TOPSOIL SHALL BE KEPT SEPARATED FROM SUITABLE FILL MATERIALS AND SHALL NOT BE USED AS FILL UNDER PAVEMENT, BUILDING AREAS AND / OR FUTURE STRUCTURAL AREAS.

3. TOPSOIL SHALL BE STORED AT A LOCATION WHERE IT DOES NOT INTERFERE WITH CONSTRUCTION OPERATIONS AS DIRECTED BY THE GENERAL CONTRACTOR.

4. TOPSOIL SHALL BE REASONABLY FREE FROM SUBSOIL DEBRIS AND STONES.

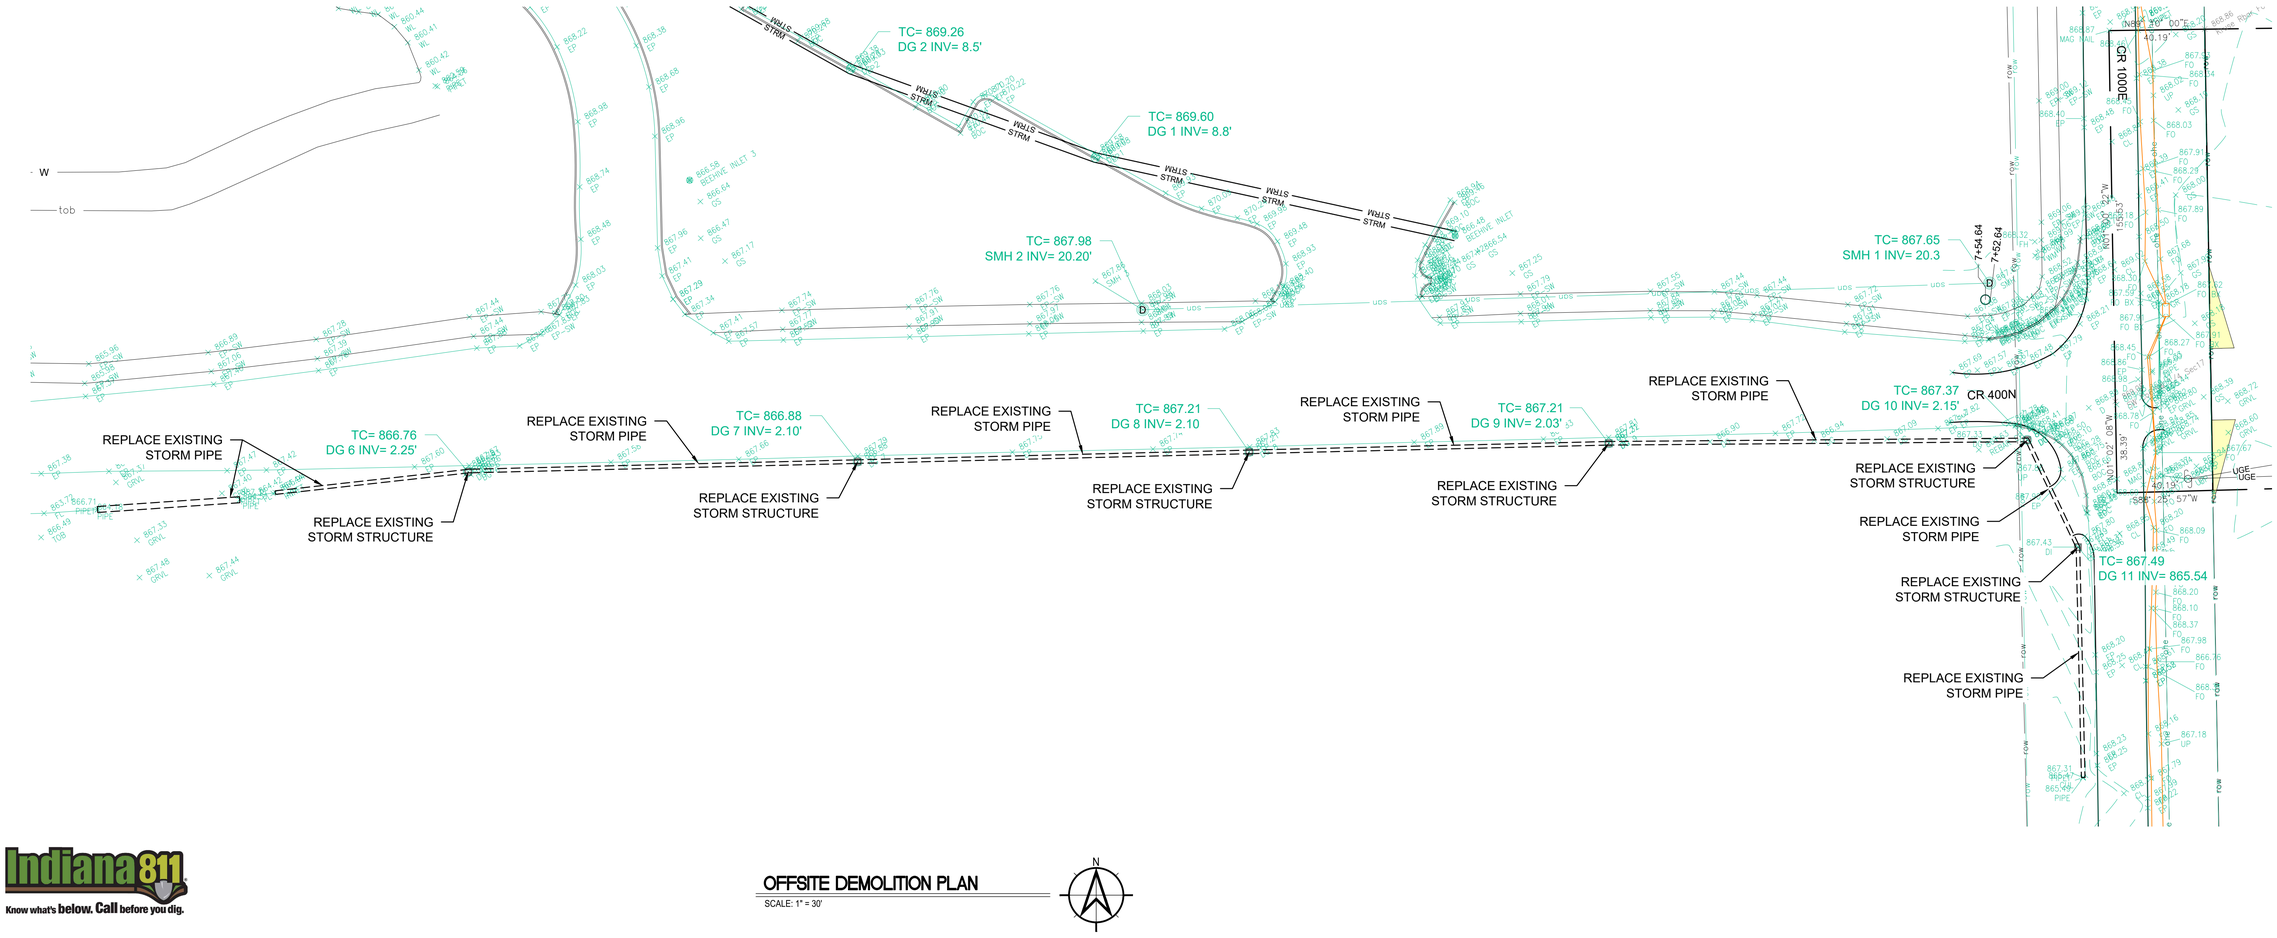

DEMOLITION:

1. ALL MATERIAL AS A RESULT OF THE GENERAL DEMOLITION SHALL BE THE PROPERTY OF THE CONTRACTOR. THE CONTRACTOR'S LUMP SUM BID PRICE FOR THE DEMOLITION SHALL TAKE INTO ACCOUNT THE SALVAGEABLE VALUE OF MATERIALS AND SAID BID PRICE SHALL REFLECT SAID DRAWINGS.

2. THE CONTRACTOR SHALL OBTAIN FROM ALL APPLICABLE GOVERNMENT AUTHORITIES NECESSARY PERMITS REQUIRED. A COPY OF SUCH PERMITS TO BE FURNISHED TO THE OWNER PRIOR TO COMMENCEMENT OF ANY WORK HEREIN.

STONE REMOVAL:

1. EXISTING STONE SURFACE TO BE REMOVED, STOCKPILED AND REDISTRIBUTED AFTER NEW GRADES ARE COMPLETED.

LEGAL DESCRIPTION

LEGAL DESCRIPTION:
Per Instrument No. 202121241 SUR filed in the Office of the Recorder in Hendricks County, Indiana, and described as follows:

Addresses and Parcel Numbers:
4005 N C.R. 1000 E., Brownsburg, IN 46112
#32-08-17-365-002.000-016

The following represents a modernized legal description of a tract of land, as described in Instrument #1998-04591 in the Office of the Recorder of Hendricks County, Indiana and being located in the Southwest Quarter of Section 17 and the Northwest Quarter of Section 20 both in Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana. Said tract being more particularly bound and described as follows, to-Wit:

East line of the Southwest quarter of Section 17 as being North 01 degrees 22 minutes 53 seconds West, deed, measured North 01 degrees 00 minutes 22 seconds West and all other bearings being relative thereto,

Beginning at a Hendricks County Aluminum monument found marking the Southwest corner of the Southwest quarter Section 17, Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana; thence running North on and along the West line of the Southwest quarter of Section 17 bearing North 01° 22' 53" West 155.58 feet, deed, and measured North 01° 00' 22" West 155.53 feet to a point on said West line, marking the Northeast corner of the National Hot Rod Association tract as referenced in the caption; thence running East on and along the North line of the National Hot Rod Association bearing North 88° 42' 57" East 546.58 feet, deed, and measured North 89° 10' 00" East a distance of 40.19 feet to a found 5/8" rebar with Kruse Consulting cap affixed and the *Point of Beginning* of this description; thence continuing North 89° 10' 00" East a distance of 508.15 feet to a found 5/8" rebar with Kruse Consulting cap affixed marking the intersection with the Southwesterly Right-of-Way of the CSX Railroad; thence running Southeasterly on and along the CSX Railroad Right-of-Way and traveling into the Northwest quarter of Section 20 bearing South 61° 12' 10" East 366.62 feet, deed, and measured South 60° 46' 15" East a distance of 365.01 feet to a found 5/8" rebar with Gaston cap marking the Northeast corner of Lot 1 in Villa Farms Subdivision, as per plat thereof recorded in Plat Book 3, page 134 in the Office of the Recorder of Hendricks County, Indiana; thence running West on and along the North line of said Lot 1 in Villa Farms Subdivision bearing South 88° 25' 57" West 863.49 feet (plat for Villa Farms shows this line to be 860.54 feet), calculated to be 823.52 feet to a point marking the intersection with the East right-of-way of N. CR. 1000 E; thence North 01° 02' 08" East, on and along said right-of-way, 38.39 feet; thence North 01° 00' 22" East 155.02 feet to the *Point of Beginning*. Containing 2.895 acres, more or less, subject to all easements and rights-of-way of record.

Dedicated Right-of-Way:
Beginning at a Hendricks County Aluminum monument found marking the Southwest corner of the Southwest quarter Section 17, Township 16 North, Range 2 East of the Second Principal Meridian, Hendricks County, Indiana, and the *Point of Beginning* of this description; thence running North on and along the West line of the Southwest quarter of Section 17 bearing North 01° 22' 53" West 155.58 feet, deed, and measured North 01° 00' 22" West 155.53 feet to a point on said West line, marking the Northeast corner of the National Hot Rod Association tract as referenced in the caption; thence running East on and along the North line of the National Hot Rod Association bearing North 88° 42' 57" East, deed, and measured North 89° 10' 00" East a distance of 40,19 feet to a found 5/8" rebar with Kruse Consulting cap affixed, marking the intersection with the east right-of-way line of N. CR 1000 E.; thence South 01° 00' 22" East 155.02 feet on and along said right-of-way; thence South 01° 02' 08" East 38.39 feet on and along said right-of-way, traveling into the Northwest quarter of Section 20; thence South 88° 25' 57" West 40,19 feet to a point on the West line of the Northwest quarter of Section 20; thence North 01° 02' 08" West on and along aforementioned West line, 38.39 feet to the *Point of Beginning* of this Dedicated Right-of-Way description. Containing 0.179 acres, more or less.

SITE NOTES:

HANDICAP RAMP CONSTRUCTION NOTES:

1. ALL HANDICAP RAMPS SHALL MEET THE REQUIREMENTS OF THE AMERICAN DISABILITIES ACT. THE MOST RECENT INDOT STANDARD SPECIFICATIONS AND THE GOVERNING JURISDICTIONS MOST RECENT STANDARDS. CURB SWIPES REQUIRED FOR HANDICAP RAMPS SHALL BE PROVIDED AT TIME OF INITIAL CONSTRUCTION.

2. MINIMUM WIDTH OF CURB RAMP SHALL BE 4 FEET NOT INCLUDING FLARES. MAXIMUM SLOPE OF RAMPS SHALL BE 12:1

3. HANDICAP RAMPS ARE TO BE LOCATED AS SHOWN ON PLANS.

4. TYPE 'E' RAMPS SHALL BE PROVIDED AT THE CENTERLINE OF RADIUS AT ALL CORNERS OF EVERY STREET INTERSECTION WHERE THERE IS AN EXISTING OR PROPOSED SIDEWALK AND CURB. IN CASE OF "T"-INTERSECTION, A TYPE 'C' RAMP SHALL BE PROVIDED ADJACENT TO EACH CORNER RAMP. TYPE 'C' RAMPS ALSO SHALL BE PROVIDED AT WALK LOCATIONS AT MID-BLOCK IN VICINITY OF HOSPITALS, MEDICAL CENTERS OR ATHLETIC STADIUMS. THE USE OF DETAILS CONTRARY TO THOSE SHOWN HEREIN SHALL REQUIRE THE PRIOR WRITTEN APPROVAL OF THE GOVERNING JURISDICTION.

5. SURFACE TEXTURE OF THE RAMP SHALL BE THAT OBTAINED BY A COARSE BROOMING TRANSVERSE TO THE SLOPE OF THE RAMP.

6. RAMPS SHALL BE PROVIDED WHERE THE DRIVEWAY CURB EXTENDS ACROSS THE SIDEWALK.

7. CARE SHALL BE TAKEN TO ASSURE A UNIFORM GRADE ON ALL RAMPS WITH NO BREAKS IN GRADE.

8. DRAINAGE STRUCTURES SHALL NOT BE PLACED IN LINE WITH THE RAMPS EXCEPT WHERE EXISTING DRAINAGE STRUCTURES ARE BEING UTILIZED IN THE NEW CONSTRUCTION. LOCATION OF THE RAMPS SHALL TAKE PRECEDENCE OVER LOCATION OF DRAINAGE STRUCTURES.

9. THE NORMAL GUTTER LINE PROFILE SHALL BE MAINTAINED THROUGH THE AREA OF THE RAMP.

10. EXPANSION JOINTS FOR THE RAMP SHALL BE A MAXIMUM 1/2" WIDE. THE TOP OF THE JOINT FILLER FOR ALL RAMP TYPES SHALL BE FLUSH WITH THE ADJACENT CONCRETE.

11. CROSSWALK AND STOP LINE MARKING, IF USED, SHALL BE LOCATED TO STOP TRAFFIC SHORT OF ALL RAMP CROSSINGS.

12. SLOPE OF RAMP MAY BE WARPED WHEN FILED CONDITIONS WARRANT AND WHEN APPROVED BY THE GOVERNING JURISDICTION.

LOT COVERAGE

	ACRES	PERCENT
ASPHALT	1.845	60%
BUILDINGS	0.086	2.8%
SIDEWALK	0.016	0.5%
PERVIOUS	1.123	36.6%
TOTAL LOT	3.07	100%

SITE NOTES:

GENERAL NOTES:

1. REFER TO THE INDIANA DEPARTMENT OF TRANSPORTATION (INDOT) STANDARD SPECIFICATIONS, LATEST EDITION, FOR BASIC MATERIALS AND CONSTRUCTION METHODS. THE SECTIONS BELOW FOR VARIOUS ITEMS ARE TO CLARIFY THE INTENT OF THE REQUIREMENTS FOR THIS PROJECT. PLEASE NOTE THAT OTHER SECTIONS OF THE INDOT STANDARD SPECIFICATIONS MAY ALSO BE APPLICABLE;

2. ALL RADII SHELL BE 5 FOOT UNLESS NOTED OTHERWISE ON PLANS.

3. CONTRACTOR TO VERIFY EXACT LOCATION AND INVERT OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.

4. STORM SEWER PIPE OF OTHER MATERIAL OR MATERIAL NOT MEETING THESE SPECIFICATIONS SHALL REQUIRE THE PRIOR WRITTEN APPROVAL OF THE ENGINEER.

5. THE CONTRACTOR SHALL SUBMIT INFORMATION TO THE APPROPRIATE JURISDICTIONAL CONTACT SHOWING CONFORMANCE WITH THESE SPECIFICATIONS UPON REQUEST.

PAVEMENT CONSTRUCTION:

1. THE INDIANA DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS, LATEST EDITION, SHALL APPLY TO WORKMANSHIP AND MATERIALS IN CONSTRUCTION OF SUBGRADE, PAVEMENT, CURBS AND WALKS.

A) PREPARE THE SUBGRADE IN ACCORDANCE WITH INDOT SECTION 207. NO TRAFFIC WILL BE PERMITTED ON THE PREPARED SUBGRADE PRIOR TO PAVING,

B) BITUMINOUS PAVEMENT IN ACCORDANCE WITH INDOT SECTION 403,

C) FINISHING EARTH GRADED SHOULDERS, DITCHES AND SLOPES IN ACCORDANCE WITH INDOT SECTION 208.

CONCRETE PAVEMENT AND WALKS:

1. SEE DETAIL FOR TYPE AND DETAILS.

2. CONCRETE SHALL BE READY MIXED PORTLAND CEMENT AND WATER CONFORMING TO ASTM C-150. AGGREGATES SHALL CONFORM TO ASTM C-33. COMPRESSIVE STRENGTH OF CONCRETE AT 28 DAYS SHALL BE 4000 P.S.I WHERE REQUIRED, REINFORCEMENT SHALL BE WELDED STEEL WIRE FABRIC CONFORMING TO ASTM A-185.

3. ALL EXTERIOR CONCRETE SHALL CONTAIN 6% ± 1% AIR ENTRAINMENT.

APPLICATION:

A) PLACE CONCRETE ONLY ON A MOIST, COMPACT SUBGRADE OR BASE FREE FROM LOOSE MATERIAL. PLACE NO CONCRETE ON MUDDY OR FROZEN SUBGRADE IN ACCORDANCE WITH INDOT SECTION 604 AND 605.

B) CONCRETE SHALL BE DEPOSITED SO AS TO REQUIRE AS LITTLE REHANDLING AS PRACTICAL. WHEN CONCRETE IS TO BE PLACED AT AN ATMOSPHERIC TEMPERATURE OF 35 DEGREES OR LESS, PARAGRAPH 702.10 OF THE INDOT SPECIFICATIONS SHALL APPLY.

C) EXCEPT AS OTHERWISE SPECIFIED, CURE ALL CONCRETE BY ONE OF THE METHODS DESCRIBED IN INDOT SECTION 501.17.

PARKING LOT STRIPING:

1. PAINT MATERIAL SHALL COMPLY WITH FEDERAL SPECIFICATION TT-P-115A FOR TRAFFIC PAINT WITHOUT GLASS SPHERES. (COLOR BY OWNER SELECTION).

2. SUBCONTRACTOR TO PERFORM ALL FIELD LAYOUT WORK NECESSARY TO ACHIEVE STRAIGHT AND TRUE LINES. ASPHALT MUST BE CLEANED WITH POWER BROOM AND HAND BROOM TO REMOVE LOOSE MATERIAL BEFORE STRIPING. THE SUBCONTRACTOR IS TO PROVIDE BARRIERS TO PREVENT MARRING OF LINES BY VEHICLES UNTIL PAINT HAS DRIED. STRIPING PAINT SHALL BE APPLIED AT THE MINIMUM RATE OF ONE GALLON PER 100 SQUARE FEET OF PAINT (BASED ON 39% SOLIDS) AT A WIDTH OF FOUR INCHES.

STREET PAVEMENT NOTES:

1. MATERIALS AND CONSTRUCTION FOR STREETS, WALKS, CURBS AND STORM WATER SEWERS SHALL CONFORM TO THE REQUIREMENTS OF THE INDIANA DEPARTMENT OF TRANSPORTATION "STANDARD SPECIFICATIONS" LATEST PRINTED EDITION UNLESS SHOWN OR NOTED OTHERWISE.

2. PAVEMENT COMPOSITION NOTED ON DETAIL IS THE MINIMUM REQUIREMENT FOR STREET CLASSES 1, 2, 3, 4 AND 5, WITH A GOOD SUB-GRADE SOIL CLASSIFICATION. PAVEMENT COMPOSITION FOR OTHER CLASSES OF STREET SHALL BE DESIGNED WITH CONSIDERATION GIVEN TO THE TRAFFIC VOLUME, SUB-GRADE SOIL EVALUATION AND TYPE OF PAVEMENT MATERIAL TO BE USED.

3. THE SUB-GRADE MUST BE PROOF ROLLED BY THE CONTRACTOR USING A FULLY LOADED TRI-AXLE DUMP TRUCK, MINIMUM LOAD OF 20 TONS

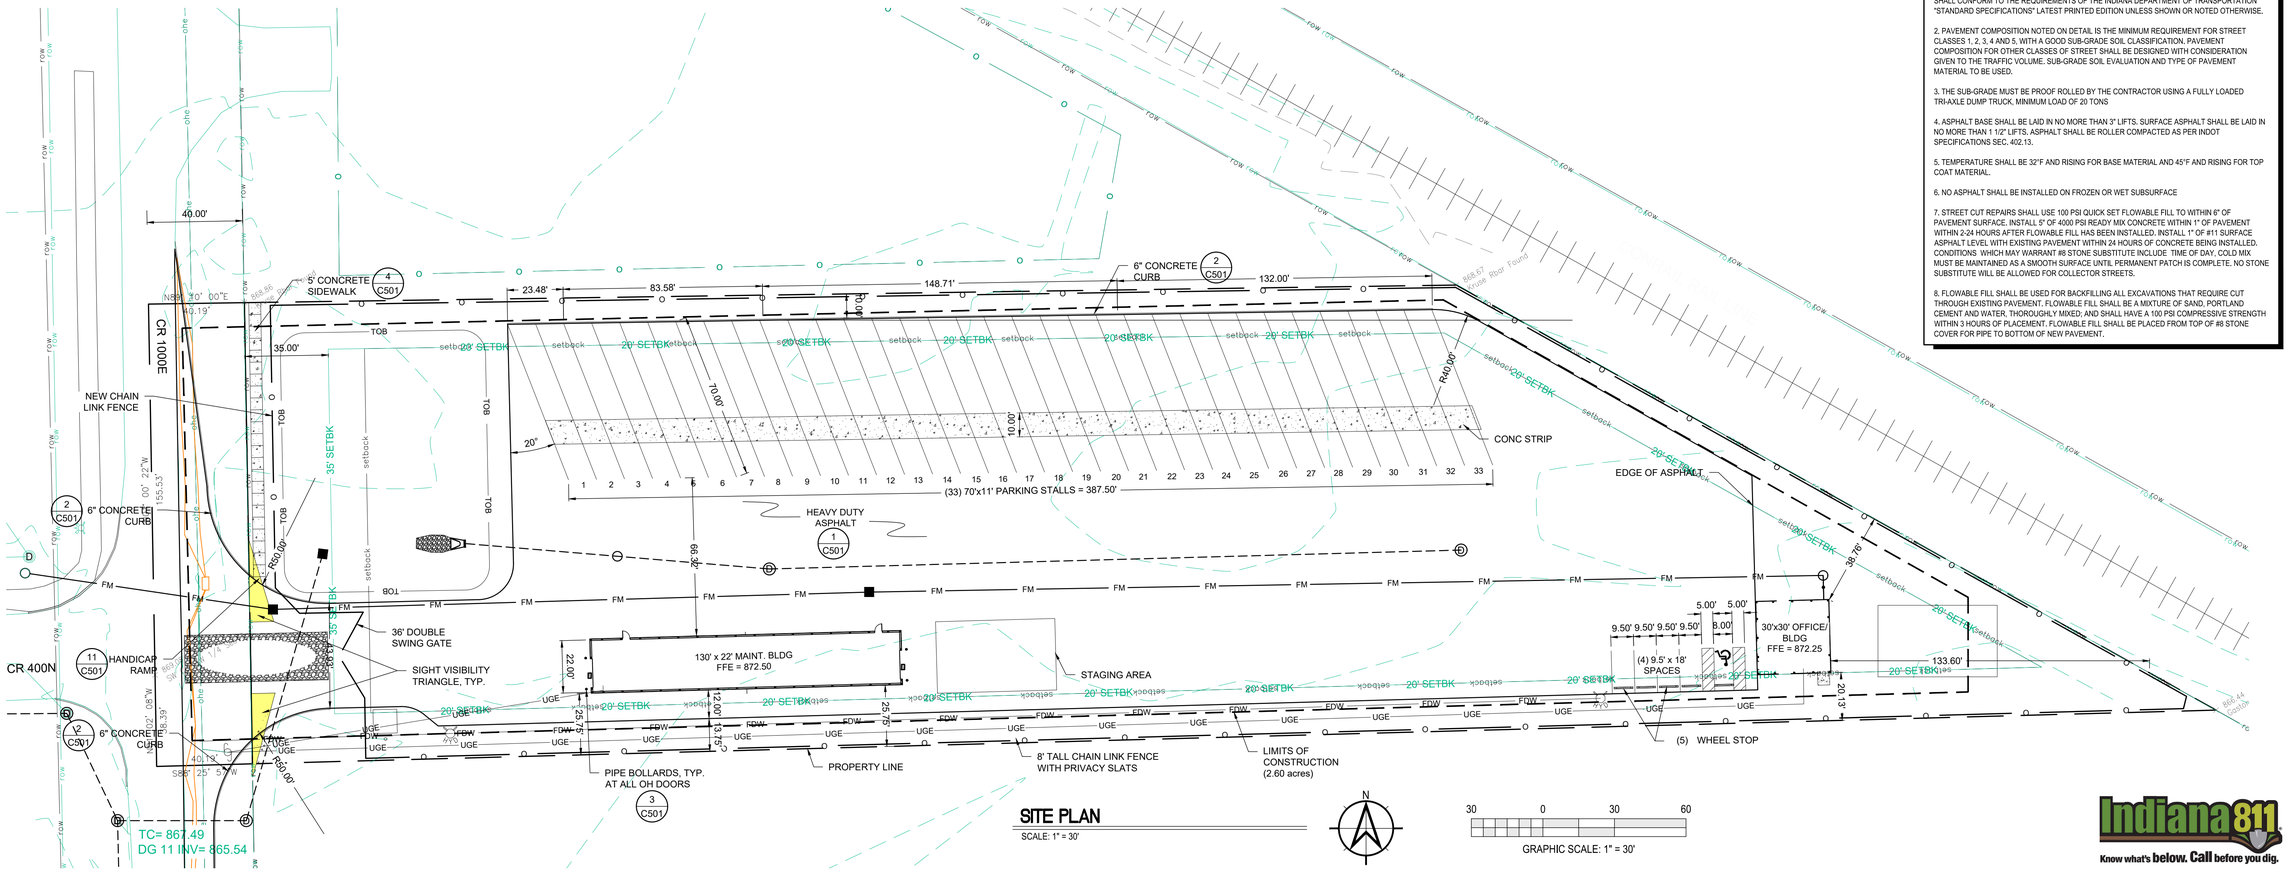

4. ASPHALT BASE SHALL BE LAID IN NO MORE THAN 3" LIFTS. SURFACE ASPHALT SHALL BE LAID IN NO MORE THAN 1 1/2" LIFTS. ASPHALT SHALL BE ROLLER COMPACTED AS PER INDOT SPECIFICATIONS SEC. 402.13..

5. TEMPERATURE SHALL BE 32°F AND RISING FOR BASE MATERIAL AND 45°F AND RISING FOR TOP COAT MATERIAL.

6. NO ASPHALT SHALL BE INSTALLED ON FROZEN OR WET SUBSURFACE

7. STREET CUT REPAIRS SHALL USE 100 PSI QUICK SET FLOWABLE FILL TO WITHIN 6" OF PAVEMENT SURFACE. INSTALL 5" OF 4000 PSI READY MIX CONCRETE WITHIN 1" OF PAVEMENT WITHIN 2-24 HOURS AFTER FLOWABLE FILL HAS BEEN INSTALLED. INSTALL 1" OF #11 SURFACE ASPHALT LEVEL WITH EXISTING PAVEMENT WITHIN 24 HOURS OF CONCRETE BEING INSTALLED. CONDITIONS WHICH MAY WARRANT #8 STONE SUBSTITUTE INCLUDE TIME OF DAY, COLD MIX MUST BE MAINTAINED AS A SMOOTH SURFACE UNTIL PERMANENT PATCH IS COMPLETE. NO STONE SUBSTITUTE WILL BE ALLOWED FOR COLLECTOR STREETS.

8. FLOWABLE FILL SHALL BE USED FOR BACKFILLING ALL EXCAVATIONS THAT REQUIRE CUT THROUGH EXISTING PAVEMENT. FLOWABLE FILL SHALL BE A MIXTURE OF SAND, PORTLAND CEMENT AND WATER, THOROUGHLY MIXED, AND SHALL HAVE A 100 PSI COMPRESSIVE STRENGTH WITHIN 3 HOURS OF PLACEMENT. FLOWABLE FILL SHALL BE PLACED FROM TOP OF #8 STONE COVER FOR PIPE TO BOTTOM OF NEW PAVEMENT.

GRADING NOTES:

GENERAL GRADE NOTES:

1. REFER TO THE INDIANA DEPARTMENT OF TRANSPORATION (INDOT) STANDARD SPECIFICATIONS, LATEST EDITION, FOR BASIC MATERIALS AND CONSTRUCTION METHODS. THE SECTION BELOW FOR VARIOUS ITEMS ARE TO CLARIFY THE INTENT OF THE REQUIREMENTS FOR THIS PROJECT, PLEASE NOTE THAT OTHER SECTIONS OF THE INDOT STANDARD SPECIFICATIONS MAY ALSO BE APPLICABLE.

2. FILL MATERIAL SHALL CONSIST OF EARTH OBTAINED FROM CUT AREAS, BORROW PITS OR OTHER APPROVED SOURCES. EARTH SHALL BE FREE FROM ORGANIC MATTER AND OTHER DELETERIOUS SUBSTANCES AND LARGE ROCKS. THE FILL MATERIAL SHALL BE PLACED IN LAYERS NOT TO EXCEED SIX INCHES FOLLOWING COMPACTION. PROPER MOISTURE CONTENT OF FILL MATERICAL WILL BE SUCH TO ACHIEVE SPECIFIED COMPACTION DENSITY. ALL FILL BENEATH PAVED AREAS, FLOOR SLABS AND FURTURE BUILDINGS SHALL BE COMPACTED TO AT LEAST 95% OF THE MAXIMUM DRY DENSITY PER ASTM D-1557, FIELD COMPACTING TEST SHALL BE RUN ON EACH LIFT, IN FILL SECTIONS, AND THE REQUIRED COMPACTION ON EACH LIFT SHALL BE IN ACCORDANCE WITH INDOT SECTION 211.

3. MAXIMUM LAWN SLOPE IS 3:1.

4. THE CONTRATOR SHALL CONTACT ALL UTILITY COMPANIES TO LOCATE MAINS, CONDUITS, SERVICE LINES, ETC, IN THE AFFECTED CONSTRUCTION AREA EXISTING UTILITY STRUCTURES ARE SHOWN HERE IN ACCORDANCE WITH AVAILABLE INFORMATION. THE LOCATION AND PROTECTION OF UTILITY STRUCTURES, THEIR SUPPORT AND MAINTENANCE DURING CONSTRUCTION (IN COOPERATION WITH APPLICABLE UTILITY COMPANY) IS THE EXPRESSED RESPONSIBILITY OF THE CONTRACTOR.

5. ALL SPOT ELEVATIONS ARE TO FINISHED GRADE.

6. ALL EXISTING MANHOLE CASTINGS TO BE ADJUSTED TO FINISH GRADE.

7. COMPACT "B" BORROW BACK FILL REQ'D. OVER ALL UTILITIES IN PAVED AREAS.

8. DISTURBED AREAS TO BE GRADED TO FINAL GRADE AND RECEIVE A MIN OF 4" TOPSOIL

9. STABILIZATION MUST BE INITIATED BY END OF THE 7TH DAY THE AREA IS LEFT IDLE AND STABILIZATION SHALL BE COMPLETED WITHIN 14 DAYS AFTER INITIATION.

10. FINAL STABILIZATION IS ACHIEVED WHEN ALL LAND DISTURBING ACTIVITIES HAVE BEEN COMPLETED AND A UNIFORM PERENNIAL VEGATATIVE COVER WITH DENSITY OF 70% ON ALL UNPAVED SURFACES.

11. WATER SHOULD BE PUMPED THROUGH BMP AND INTO THE DETENTION POND.

REINFORCED CONCRETE PIPE:

1. REINFORCED CONCRETE PIPE SHALL BE CLASS III, IV OR V AS SPECIFIED IN ASTM C-76.

2. REINFORCED ELLIPTICAL CONCRETE PIPE SHALL BE CLASS HE-III OR HE-IV AS SPECIFIED IN ASTM C-507.

3. LIFT HOLES ARE NOT ALLOWED FOR PIPE LESS THAN 24 INCHES IN DIAMETER. A MAXIMUM OF TWO LIFT HOLES ARE ALLOWED FOR PIPE 24 INCHES IN DIAMETER OR LARGER. LIFT HOLES SHALL BE REPAIRED ACCORDING TO MOST RECENT INDOT STANDARD SPECIFICATIONS.

4. FITTINGS AND SPECIALTIES SHALL BE IN ACCORDANCE WITH THE SPECIFICATIONS FOR THE TYPE OF PIPE BEING USED.

5. EACH PIPE SECTION SHALL BE MARKED WITH DATE OF MANUFACTURE, SIZE AND CLASS OF PIPE, SPECIFICATION DESIGNATION, MANUFACTURER AND PLANT IDENTIFICATION.

6. PIPE SHALL BE FURNISHED WITH A BELL OR GROOVE ON ONE END OF A UNIT OF PIPE AND A SPIGOT OR TONGUE ON THE ADJACENT END OF THE ADJOINING PIPE. ALL JOINTS SHALL HAVE A GROOVE ON THE SPIGOT FOR PLACEMENT OF A RUBBER "O-RING" OR PROFILE GASKET IN ACCORDANCE WITH ASTM C-443. THE GASKET SHALL BE A CONTINUOUS RING WHICH FITS SNUGLY INTO THE ANNULAR SPACE BETWEEN THE OVERLAPPING SURFACES OF THE ASSEMBLED PIPE JOINT.

FLOOD ZONE DESIGNATION:

SEASONAL SOIL PROTECTION CHART

STABILIZATION PRACTICE	JAN.	FEB.	MAR.	APR.	MAY	JUNE	JULY	AUG.	SEPT.	OCT.	NOV.	DEC.
PERMANENT SEEDING		A			*	///	///	///	*//			
DORMANT SEEDING	B										B	
TEMPORARY SEEDING		C	E		*	///	///	///	* D			
SODDING		F**			*	///	///	///	*			
MULCHING	G											

A = KENTUCKY BLUEGRASS 100 LBS/ACRE; CREEPING RED FESCUE 100 LBS/ACRE: PLUS 2 TONS STRAW MULCH/ACRE, OR ADD ANNUAL RYEGRASS 20 LBS/ACRE FERTILIZE AS RECOMMENDED BY SOIL TEST. IF TESTING IS NOT DONE, APPLY 400-600 LBS./ACRE OF 12-12-12 ANALYSIS, OR EQUIVALENT, FERTILIZER.

B = KENTUCKY BLUEGRASS 120 LBS/ACRE; CREEPING RED FESCUE 120 LBS/ACRE: PLUS 2 TONS STRAW MULCH/ACRE, OR ADD ANNUAL RYEGRASS 30 LBS/ACRE FERTILIZE AS RECOMMENDED BY SOIL TEST. IF TESTING IS NOT DONE, APPLY 400-600 LBS./ACRE OF 12-12-12 ANALYSIS, OR EQUIVALENT, FERTILIZER.

C = SPRING OATS 3 BUSHELS/ACRE
FERTILIZE AS RECOMMENDED BY SOIL TEST. IF TESTING IS NOT DONE, APPLY 400-600 LBS./ACRE OF 12-12-12 ANALYSIS, OR EQUIVALENT, FERTILIZER.

D = WHEAT OR RYE 2 BUSHELS/ACRE
FERTILIZE AS RECOMMENDED BY SOIL TEST. IF TESTING IS NOT DONE, APPLY 400-600 LBS./ACRE OF 12-12-12 ANALYSIS, OR EQUIVALENT, FERTILIZER.

E = ANNUAL RYEGRASS 40 LBS/ACRE (1 LB/1000 SQ. FT.)
FERTILIZE AS RECOMMENDED BY SOIL TEST. IF TESTING IS NOT DONE. APPLY 400-600 LBS./ACRE OF 12-12-12 ANALYSIS, OR EQUIVALENT, FERTILIZER.

F = SOD

G = STRAW MULCH 2 TONS/ACRE

* / / / * = IRRIGATION NEEDED DURING JUNE, JULY, AUGUST AND/OR SEPTEMBER ** = IRRIGATION NEEDED FOR 2 WEEKS AFTER SUPPLYING SOD

INSTALLATION SCHEDULE:

CONSTRUCTION PHASE:	CONSTRUCTION SCHEDULE:
PRE-CONSTRUCTION ACTIONS (EVALUATION/PROTECTION OF IMPORTANT SITE CHARACTERISTICS)	BEFORE CONSTRUCTION, EVALUATE, MARK AND PROTECT IMPORTANT TREES AND ASSOCIATED ROOTING ZONES, UNIQUE AREAS (e.g., WETLANDS) TO BE PRESERVED, ON SITE SEPTIC SYSTEM ABSORPTION FIELDS IF APPLICABLE, AND VEGETATION SUITABLE FOR FILTER STRIPS, ESPECIALLY IN PERIMETER AREAS.
CONSTRUCTION ACCESS (CONSTRUCTION ENTRANCES, CONSTRUCTION ROUTES, EQUIPMENT PARKING AREAS)	STABILIZE BARE AREAS IMMEDIATELY WITH GRAVEL AND TEMPORARY VEGETATION AS WORK TAKES PLACE.
SEDIMENT BARRIERS AND TRAPS (BASIN TRAPS, SILT FENCES, OUTLET PROTECTION)	INSTALL PRINCIPAL BASINS AFTER CONSTRUCTION SITE IS ASSESSED. INSTALL ADDITIONAL RUNOFF CONTROL MEASURES DURING GRADING AS NEEDED.
RUNOFF CONVEYANCE SYSTEM (STABILIZED STREAM-BANKS, STORM DRAINS, INLET AND OUTLET PROTECTIONS, WATER QUALITY STRUCTURES)	WHERE NECESSARY, STABILIZE STREAMBANKS AS EARLY AS POSSIBLE. INSTALL PRINCIPLE CONVEYANCE SYSTEM WITH RUNOFF CONTROL MEASURES. INSTALL REMAINDER OF SYSTEM AFTER GRADING.
LAND CLEARING AND GRADING (CUTTING/FILLING/GRADING, DRAINS, SEDIMENT TRAPS, BARRIERS, DIVERSIONS, SURFACE ROUGHENING)	BEGIN MAJOR CLEARING AND GRADING AFTER INSTALLING THE KEY SEDIMENT AND RUNOFF MEASURES. CLEAR BORROW AND DISPOSAL AREAS AS NEEDED. INSTALL ADDITIONAL CONTROL MEASURES AS GRADING PROGRESSES.
SURFACE STABILIZATION (TEMPORARY AND PERMANENT SEEDING, MULCHING, SODDING, RIPRAP)	APPLY TEMPORARY OR PERMANENT STABILIZATION MEASURES IMMEDIATELY ON ALL DISTURBED AREAS WHERE WORK IS DELAYED OR COMPLETED.
BUILDING CONSTRUCTION (BUILDINGS, UTILITIES, PAVING)	INSTALL NECESSARY EROSION AND SEDIMENT CONTROL PRACTICES AS WORK TAKES PLACE.
LANDSCAPING & FINAL STABILIZATION (TOP SOILING, TREES AND SHRUBS, PERMANENT SEEDING, MULCHING, SODDING, RIPRAP)	STABILIZE ALL OPEN AREAS, INCLUDING BORROW AND SPOIL AREAS. REMOVE TEMPORARY CONTROL MEASURES AND STABILIZE.

RESPONSIBLE PARTY FOR EROSION CONTROL

COMPANY: LIONS TRAN INC.
NAME: MALHI KULWINDER
ADDRESS: 7655 E. US HWY 36
AVON, INDIANA 46123
PHONE: 317-989-1580

EROSION CONTROL NOTES:

SOIL EROSION CONTROL SUMMARY:

1. CONTRACTOR SHALL INSTALL SODDING, INLET PROTECTION, AND FILTERS AS SHOWN.

2. MASS GRADE THE SITE (SIDES OF SWALES, MOUNDS AND PONDS TO BE SODDED OR SEEDED AND MULCHED IMMEDIATELY UPON COMPLETION). TEMPORARY SEEDING SHALL BE RECOMMENDED FOR ALL SWALES AND DISTURBED AREAS THAT CANNOT BE FINAL SEEDED WITHIN A TIME PERIOD THAT WILL PREVENT SOIL EROSION, FOR TEMPORARY SEEDING THE CONTRACTOR SHALL UTILIZE A FAST GROWING SEED OF EITHER OATS, ANNUAL RYE GRASS, WHEAT OR RYE DEPENDING UPON TIME OF YEAR. DISTURBED AREAS SHOULD BE KEPT TO A MINIMUM AT ALL TIMES.

3. CONTRACTOR SHALL CONTROL MUD ACCUMULATION ON ALL STREETS SURROUNDING THE PROJECT BY INSTALLING STONE SURFACE AT ALL LOCATIONS WHERE CONSTRUCTION TRAFFIC LEAVES THE SITE. DUST SHALL BE KEPT TO A MINIMUM BY UTILIZING SPRINKLING, CALCIUM CHLORIDE, VEGETATIVE COVER, SPRAY ON ADDITIVES OR OTHER APPROVED METHODS.

4. MAINTAIN ALL FILTERS DURING CONSTRUCTION TO PREVENT ANY BLOCKAGES FROM ACCUMULATED SEDIMENT. ADDITIONAL SEEDING MAY BE REQUIRED DURING CONSTRUCTION AS SPECIFIED BY ENGINEER OR SOIL CONSERVATION SERVICE. RIPRAP SHALL BE PLACED IN AREAS OF HIGH VELOCITY STREAM FLOW (MINIMUM SIZE 1/3 CU.FT.). PAYMENT FOR ADDITIONAL RIPRAP NOT SHOWN ON PLANS AND SEEDING SHALL BE ON A UNIT BASIS.

5. CONTRACTOR SHALL INSTALL ALL STORM SEWER INLET FILTERS AS STORM SEWER SYSTEM IS INSTALLED.

6. ALL PROPOSED STREET AREAS TO BE PAVED AS SOON AS POSSIBLE AFTER SUBGRADE IS PREPARED.

7. CONTRACTOR SHALL REMOVE ALL TEMPORARY EROSION AND SEDIMENT CONTROLS ONLY WHEN THERE IS SUFFICIENT GROWTH OF GROUND COVER TO PREVENT FURTHER EROSION.

8. ALL SWALES SHALL BE SEEDED AND SODDED (AS INDICATED ON THE EROSION AND SEDIMENT CONTROL PLAN) IMMEDIATELY AFTER FINAL GRADING.

9. ALL EROSION CONTROL MEASURES SHALL BE INSTALLED IN ACCORDANCE WITH THE INDIANA HANDBOOK FOR EROSION CONTROL IN DEVELOPING AREAS, MOST RECENT EDITION.

MAINTENANCE:

INSPECT PERIODICALLY, ESPECIALLY AFTER STORM EVENTS, UNTIL THE STAND IS SUCCESSFULLY ESTABLISHED. (CHARACTERISTICS OF A SUCCESSFUL STAND INCLUDE: VIGOROUS DARK GREEN OR BLUISH-GREEN SEEDLINGS; UNIFORM DENSITY WITH NURSE PLANTS, LEGUMES, AND GRASSES WELL INTER-MIXED; GREEN LEAVES; AND THE PERENNIALS REMAINING GREEN THROUGHOUT THE SUMMER, AT LEAST AT THE PLANT BASE.)

PLAN TO ADD FERTILIZER THE FOLLOWING GROWING SEASON ACCORDING TO SOIL TEST RECOMMENDATIONS.

REPAIR DAMAGED, BARE, OR SPARSE AREAS BY FILLING ANY GULLIES, RE-FERTILINZING, OVER- OR RE-SEEDING, AND MULCHING.

IF PLANT COVER IS SPARSE OR PATCHY, REVIEW THE PLANT MATERIALS CHOSEN, SOIL FERTILITY, MOISTURE CONDITION, AND MULCHING AFTER RE-PREPARING THE SEEDBED.

IF VEGETATION FAILS TO GROW, CONSIDER SOIL TESTING TO DETERMINE ACIDITY OR NUTRIENT DEFICIENCY PROBLEMS. (CONTACT YOUR SWCD OR COOPERATIVE EXTENSION OFFICE FOR ASSISTANCE.)

IF ADDITIONAL FERTILIZATION IS NEEDED TO GET A SATISFACTORY STAND, DO SO ACCORDING TO SOIL TEST RECOMMENDATIONS.

EROSION CONTROL NOTES:

PRIOR TO ANY WORK BEING DONE, A TEMPORARY CONSTRUCTION ENTRANCE AND SILT FENCING SHALL BE INSTALLED.

AFTER COMPLETION OF A STORM STRUCTURE, THE CURB INLET PROTECTION SHALL BE INSTALLED IMMEDIATELY.

UPON COMPLETION OF SWALES AND SIDE SLOPES, CONTRACTOR SHALL INSTALL THE EROSION CONTROL BLANKETS.

ALL AREAS NOT DENOTING PERMANENT SEEDING OR FIBER BLANKETS SHALL BE TEMPORARILY SEEDED.

THE EARTHWORK CONTRACTOR IS RESPONSIBLE FOR KEEPING THE EXISTING ROADWAYS CLEAR OF DIRT AND DEBRIS.

ADDITIONAL EROSION CONTROL MEASURES MAY BE REQUIRED BY INSPECTOR AS CONDITIONS WARRANT.

EROSION PROTECTION DURING CONSTRUCTION AND SEEDING:

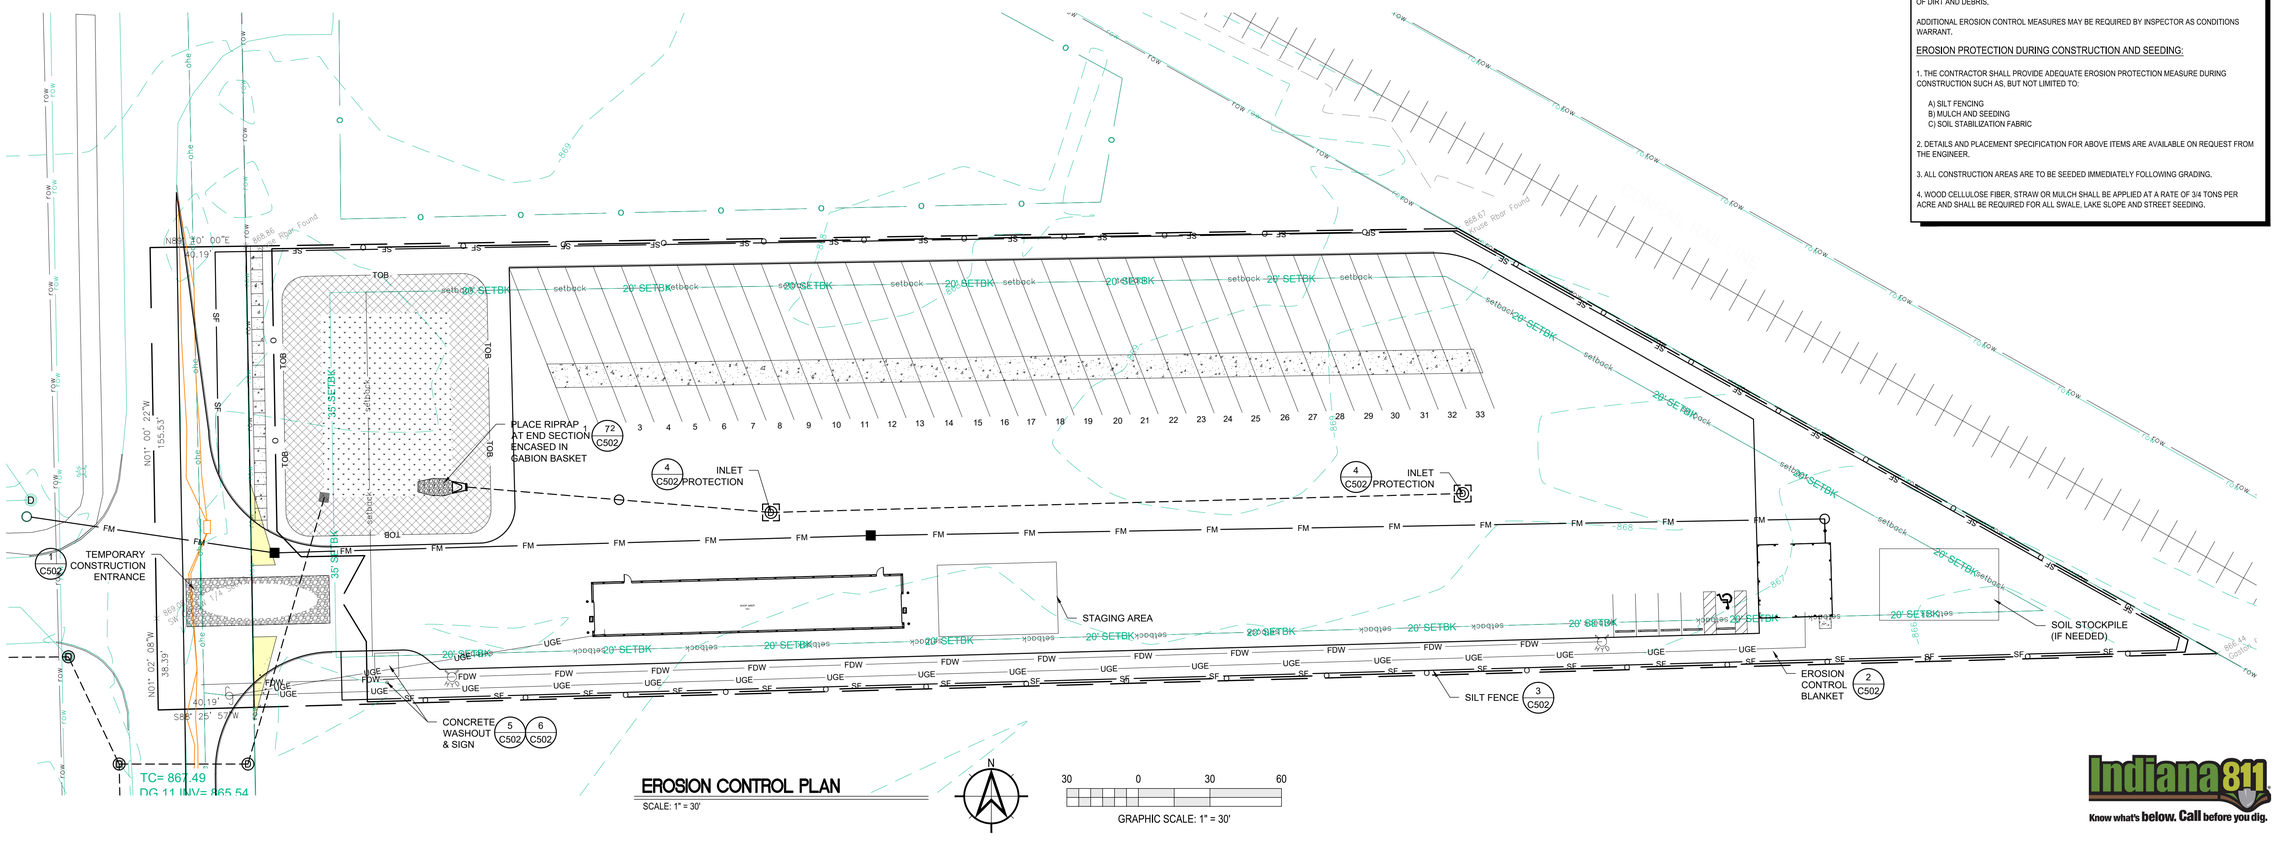

1. THE CONTRACTOR SHALL PROVIDE ADEQUATE EROSION PROTECTION MEASURE DURING CONSTRUCTION SUCH AS, BUT NOT LIMITED TO:

A) SILT FENCING
B) MULCH AND SEEDING
C) SOIL STABILIZATION FABRIC

2. DETAILS AND PLACEMENT SPECIFICATION FOR ABOVE ITEMS ARE AVAILABLE ON REQUEST FROM THE ENGINEER.

3. ALL CONSTRUCTION AREAS ARE TO BE SEEDED IMMEDIATELY FOLLOWING GRADING.

4. WOOD CELLULOSE FIBER, STRAW OR MULCH SHALL BE APPLIED AT A RATE OF 3/4 TONS PER ACRE AND SHALL BE REQUIRED FOR ALL SWALE, LAKE SLOPE AND STREET SEEDING.

NOTES:
"NA" - NON APPLICABLE

Construction Storm Water General Permit Notes Section A

A1 - Index of the location of required plan elements in the construction plan:

An index addressing the required elements within the drawing set is on C000 - Cover Sheet.

A2 - A vicinity map depicting the project site location in relationship to recognizable local landmarks, towns, and major roads:

A map showing the project in relationship to other areas of the county is on C000 - Cover Sheet.

A3 - Narrative of the nature and purpose of the project:

The project consists of the development of a new heavy duty asphalt parking lot with 36 truck and trailer stalls, a 2860 sq. ft. maintenance building, and 900 sq. ft. office building w/ employee parking. The site is located at 4005 North County Road 1000E in Brownsburg, Indiana 46112. Associated with the new improvements will be storm water management system consisting of overland flow, storm inlets, and retention/percolation basin with outlet control. (Shown on C303 - Construction Storm Water General Permit Notes).

A4 - Latitude and Longitude:

The latitude is 39°49'21"N and longitude is 86°20'42.19"W. (Shown on C000 - Cover Sheet)

A5 - Legal description of the project site:

A legal description of the overall parcel is on C201 - Site Plan

A6 - 11 x 17-inch plat showing building lot numbers/boundaries and road layout/names:

An 11x17 in. plan showing the overall property and new improvements is attached to this narrative.

A7 - Boundaries of the one hundred (100) year floodplains, floodway fringes, and floodways:

The 100 year floodway and floodway fringe is on C301 - Grading Plan and is based on best available information from the Indiana Department of Natural Resources.

A8 - Land use of all adjacent properties:

North - Commercial
South - Undeveloped/Woods
East - Railroad/Commercial
West - Residential/Agricultural
(Shown on C303 - Stormwater Pollution Prevention Plan)

A9 - Identification of a U.S. EPA approved or established TMDL:

Site to discharge stormwater into ground via percolation basin or through evaporation. Any dicharge via the emergency spillway will likely evaporate/percolate prior to being received by White Lick Creek (INW01D2_05) which is EPA 303d listed, but has no established TMDL (Shown on C304 - Construction Storm Water General Permit Notes)

A10 - Name(s) of the receiving water(s):

Receiving water is White Lick Creek (INW01D2_05) - (Shown on C303 - Stormwater Pollution Prevention Plan)

A11 - Identification of discharges to a water on the current 303(d) list of impaired waters and the pollutant(s) for which is it impaired:

The impaired condition of White Lick Creek is due to presence of Escherichia Coli (E. coli) (Noted on C304 - Construction Storm Water General Permit Notes)

A12 - Soils map of the predominate soil types:

The soils on this property are predominantly Brookston Silty Clay Loam-Urban Land Complex and Crosby Silt Loam.
Brookston Silty Clay Loam features wetness as the main limitation affecting use and management of this soil type. Crosby Silt Loam features slow permeability and available water capacity is high with moderate content of organic matter.

Both soils are fair to poor for use as subgrade material as well as shear strength, compaction, and stability, medium to high compressibility, moderate to low shrink-swell potential, subject to frost heave, and seasonal high water table. A soils map is on C301 - Grading Plan.

A13 - Identification and location of all known wetlands, lakes, and water courses on or adjacent to the project site (construction plan, existing site layout)

There are no known water courses on or adjacent to this site.

A14 - Identification on any other state or federal water quality permits or authorizations that are required for construction activities:

This phase of the project scope will not require any additional federal or state water permits as noted on C304 - Construction Storm Water General Permit Notes.

Construction Storm Water General Permit Notes Section A (cont'd)

A15 - Identification and delineation of existing cover, including natural buffers:

The site is almost entirely covered with thick/heavy vegetation and trees with partial remnants of an existing gravel drive. The delineation of the various surface coverage is on C301 - Grading Plan.

A16 - Existing site topography at interval appropriate to indicate drainage patterns:

The existing site topography is largely flat with minor relief at the southeast of the site. The existing and proposed contours are on C301 - Grading Plan.

A17 - Location(s) where run-off enters the project site:

As referenced above, the topography in this area is largely flat resulting in little to no potential for run-off entering the site from adjacent property. The existing contours are on C301 - Grading Plan.

A18 - Location(s) where run-off discharges from the project site prior to land disturbances:

The existing site topography is largely flat with minor relief at the southeast of the site. The existing contours are on C301 - Grading Plan.

A19 - Location(s) of all existing structures on the project site:

The existing site is a vacant lot with no existing structures as depicted on C301 - Grading Plan.

A20 - Existing permanent retention or detention facilities, including manmade wetlands, designed for the purpose of stormwater management:

There are no existing retention facilities on site as depicted on C301 - Grading Plan.

A21 - Locations where storm water may be directly discharged into ground water, such as abandoned wells, sinkholes, or karst features:

There are no locations on property where storm water may directly discharge into the groundwater as illustrated on C301 - Grading Plan.

A22 - Size of the project expressed in acres:

The total project are if 3.07 acres as noted on C000 - Cover Sheet.

A23 - Total expected land disturbance expressed in acres:

The total disturbed area is 2.60 acres as noted on C000 - Cover Sheet.

A24 - Proposed final topography:

The final topography is on C301 - Grading Plan and is illustrated as spot elevations and contours.

A25 - Locations and approximate boundaries of all disturbed areas:

The total disturbed area is 2.60 acres as noted on C000 - Cover Sheet and shown as the Limits of Construction on C201 - Site Plan.

A26 - Locations, size and dimensions of all stormwater drainage systems such as culverts, stormwater sewer, and conveyance channels:

The stormwater is conveyed by overland flow, underground storm pipes, and retention pond. These are shown on C301 - Grading Plan.

A27 - Locations of specific points where stormwater and non-stormwater discharges will leave the project site:

Stormwater discharge from the site will be via an emergency spillway from the retention pond at the east end of the site and sanitary discharge will be via a pump and force main at the west end of the site.(Shown on C301 - Grading Plan & C402 Sanitary Force Main Plan & Profile.

A28 - Location of all proposed site improvements, including roads, utilities, lot delineation and identification, proposed structures, and common areas:

All the surface improvements including buildings, impervious areas, new surface finishes, etc. are on C201 - Site Plan for horizontal notations and C301 - Grading Plan for elevations.

A29- Location of all on-site and off-site soil stockpiles and borrow areas:

The soil storage area will be on site located at the east end of the site (west of the pond). All soil will be placed in the final location or hauled off upon completion of construction as shown on C302 - Erosion Control Plan.

A30- Construction support activities that are expected to be part of the project

Any construction support area will be within the limits of disturbance and used as directed by the contractor. Since they are within the limits of disturbance, there will be no impact sensitive areas.

A31- Location of any on-stream activities that are planned for the project including, but not limited to, stream crossings and pump arounds:

There are no in stream activities associated with this project.

Construction Storm Water General Permit Notes Section B

B1- Description of the potential pollutant generating sources and pollutants, including all potential non-storm water discharges:

1. Concrete Washout Area: Specific concrete washout area shall be established and labeled.
   a) The specific concrete wash out will be in a provided lined roll off box at a specific location near the entrance to the job site.
   b) The lined roll off box will be placed on stable soil with a stone approach.
   c) Once the lined roll off box is full, it will be removed from the site and discarded as clean fill once solid. A new lined roll off box will replace the one removed.
2. Construction Mobile Equipment Fluid
   a) All fueling of equipment will be managed and completed on a stone surface.
   b) Daily observation of all equipment for inspection of leaks or potential leaks of any fluids.
   c) Any observed fluid leaks are to be handled immediately with the equipment being moved to a stable stone surface and placed out of operation until maintenance is completed.
   d) Spill kits are to be utilized once the equipment is moved to the stable stone surface to prevent leakage from penetrating the ground or impacting storm water runoff.
3. Construction Material Waste
   a) All material waste is to be placed in provided roll off boxes as it is generated.
   b) Full roll off boxes are to be removed and properly disposed of in a licensed facility.
   c) No debris is to be stored on the ground surface at any time.
   These items are noted on C303 - Stormwater Pollution Prevention Plan.

B2- Stable construction entrance locations and specifications:

A stable construction entrance consisting of compacted subgrade, filter fabric and #2 stone is to be used for all construction traffic entering / exiting the site. The stone surface is to be maintained with new stone as necessary to maintain a solid drive surface. The location of the temporary construction entrance is shown on C302 for plan view and Sheet C502 for detail.

B3- Specifications for temporary and permanent stabilization:

The provisions for temporary stabilization during construction as well as permanent stabilization are included in the drawing set. The information contains specific stabilization techniques for the conditions of the site as well as timing of installation.

For temporary construction stabilization, it is the Contractor responsibility to maintain the stabilization during the construction duration and until permanent stabilization is installed.

For permanent stabilization, it is expected installation to occur immediately after final grading of the soil surface. Permanent stabilization is to be maintained by the Owner until 75% effective cover is established on the soil surface.
The stabilization is noted on C302 - Erosion Control Plan.

B4- Sediment control measures for concentrated flow areas:

The concentrated flow is protected at the pond inlet with riprap of minimum size being 6 inches and at the emergency spillway with stone dam as shown on C301 - Grading Plan and details on C501 & C502 - Sections and Details.

B5- Sediment control measures for sheet flow areas:

Sediment control for sheet flow is handled at the project perimeter with silt fence. (Shown on C302 - Erosion Control Plan).

B6- Run-off control measures:

Sediment control for sheet flow is handled at the project perimeter with silt fence. (Shown on C302 - Erosion Control Plan).

B7- Stormwater outlet protection location and specifications:

The concentrated flow is protected at the pond outlet with the previously mentioned rock dam as shown on C302 - Erosion Control Plan.

B8- Grade stabilization structure locations and specifications:

The grade on the site is largely flat and remain so post construction. There are no stabilization structures planned for this project as illustrated on C301 - Grading Plan.

B9- Dewatering applications and management methods:

Any dewatering required will be directed to the low area of the site (east) where it can percolate into existing soil. (Noted C303 - Stormwater Pollution Prevention Plan)

B10- Measures utilized for work within waterbodies:

This is not applicable to this project. (Noted C303 - Stormwater Pollution Prevention Plan)

B11- Maintenance guidelines for each proposed stormwater quality measure:

The stormwater quality is by a bioretention pond that is to be cleaned of trash, mowed, trimmed and monitored regularly to maintain proper function of the pond. (C301 - Grading Plan)

B12- Planned construction sequence that describes the implementation of stormwater quality measures in relation to land disturbance:

The construction sequence for installation of the erosion control measures and stormwater pollution prevention devices are detailed on C302 - Erosion Control Plan.

B13- Provisions for erosion and sediment control on individual residential building lots regulated under the proposed project:

Not applicable to this project. (Noted C303 - Stormwater Pollution Prevention Plan)

B14- Material handling and spill prevention and spill response plan meeting the requirements in 327 IAC 2-6.1:

The potential materials on site that could cause a spill response include fuels, petroleum fluids or other liquids as part of the construction equipment on site. If a spill occurs, immediate determination of the extent and emergency response requirements should be determined. Immediate containment of the spill with onsite spill kits should be completed. Once the spill is contained, contact is to be made to the Indiana Dept. of Environmental Mgmt., Office of Land Quality, Emergency Response Section: 1-888-233-7745 for in-state calls (toll free) within two hours of the spill. The contact should include the likelihood of damage to the waterways of the State of Indiana. This information is noted on C303 - Stormwater Pollution Prevention Plan.

B15- Material handling and storage procedures associated with construction activity:

All construction debris and wastes are to be loaded directly into provided roll off boxes for proper disposal off site. In no terms is debris or waste to be stored on site awaiting disposal or burned on property. Liquid wastes such as concrete wash out is to be disposed in the appropriate concrete wash out lined roll off boxes as provided. This includes any mortar/masonry/concrete grout material. Once these containers are full, they are to be removed from the site and disposed of in a licensed facility. Roll off boxes are to be rotated empty for full boxes for the entire project duration.

Construction Storm Water General Permit Notes Section B

C1- Description of pollutants and their sources associated with the proposed land use:

The post construction land use will have potential contaminants such as fuels, oils, grease, tires and other mobile equipment fluids. All materials, including mobile equipment will be stored on impervious surfaces during non-use or operation. (Noted on C303 - Stormwater Pollution Prevention Plan)

C2- Description of proposed post-construction stormwater measures:

The post construction contaminants are minimized by impervious surfaces being directed to a bioretention pond designed to collect sediment and pollutants prior to any discharge that may overtop the emergency spillway. (Noted C303 - Stormwater Pollution Prevention Plan)

C3- Plan details for each stormwater measure:

The post construction stormwater measures is primarily a bioretention pond as shown on C301 - Grading Plan and L101 - Landscape Plan.

C4- Sequence describing stormwater measure implementation:

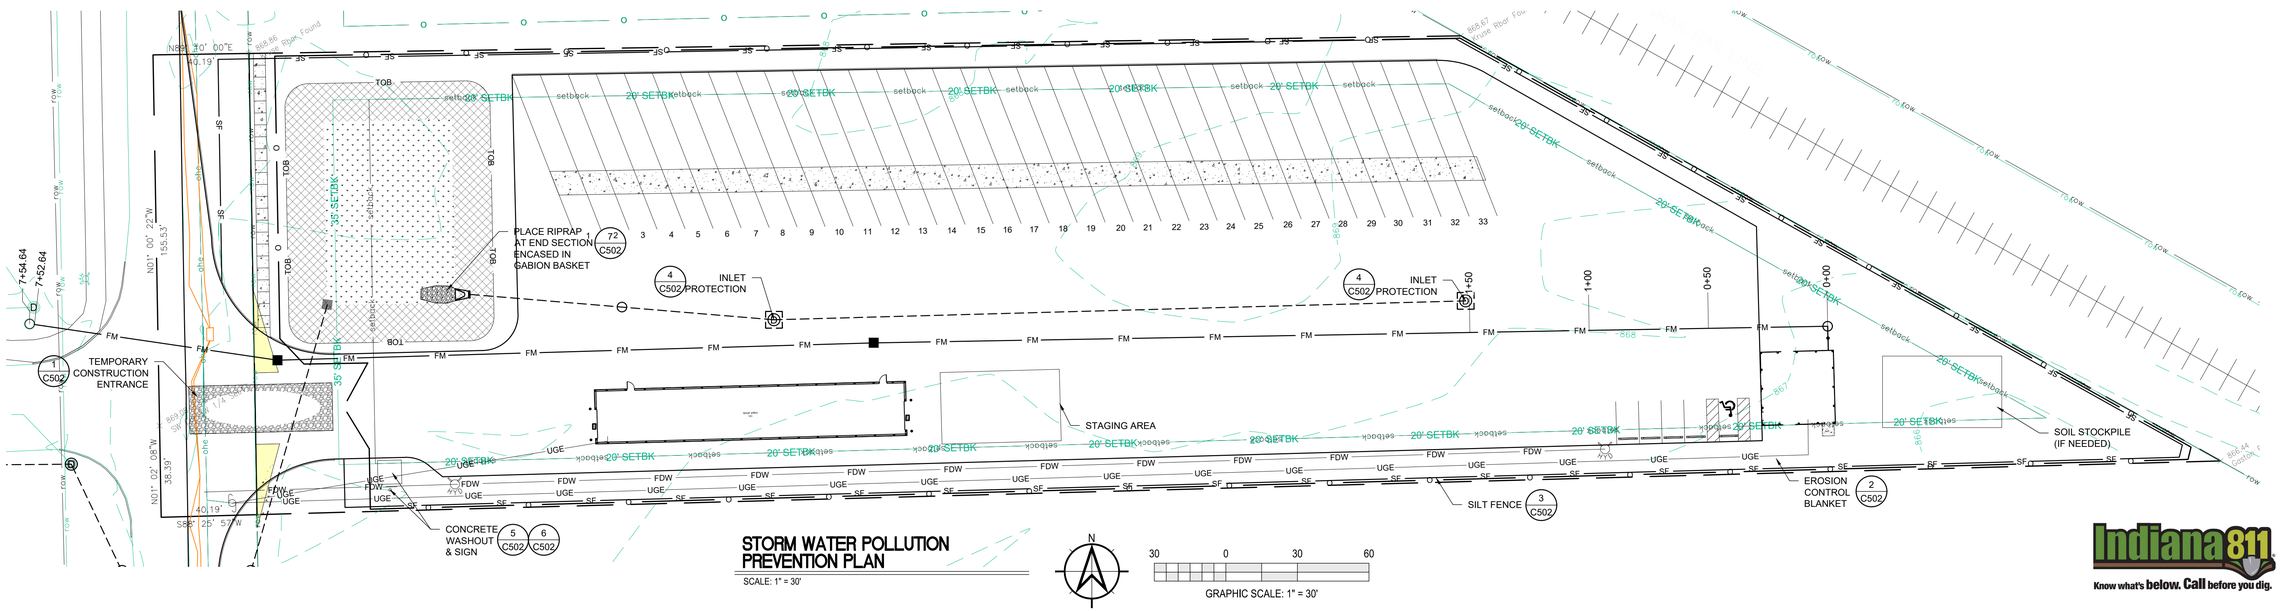

The sequence of installation for the post construction stormwater measure is part of construction sequencing shown C302 - Erosion Control Plan.

C5- Maintenance guidelines for proposed post-construction stormwater measures:

An operations and maintenance manual are part of the submittal information under separate documentation.

C6- Entity that will be responsible for operation and maintenance of the post-construction stormwater measures:

The responsible person for the post construction stormwater measures is the property owner as noted on C302 - Erosion Control Plan.

UTILITY NOTES:

SANITARY GENERAL SPECIFICATIONS:

1. (A) 100 PSI FLOWABLE FILL SHALL BE REQUIRED FOR ROAD CROSSINGS UNDER EXISTING PAVEMENT AND WITHIN FIVE (5) FEET OF THE PAVEMENT EDGE. STREET CUT REPAIRS SHALL USE 100 PSI FLOWABLE FILL TO WITHIN 6" OF PAVEMENT SURFACE. INSTALL 5" OF 4000 PSI READY MIX CONCRETE WITHIN 1" OF PAVEMENT 2-24 HOURS AFTER FLOWABLE FILL HAS BEEN INSTALLED. INSTALL 1" OF #11 SURFACE ASPHALT LEVEL WITH EXISTING PAVEMENT WITHIN 24 HOURS ON CONCRETE INSTALLATION.

(B) FLOWABLE FILL SHALL BE A MIXTURE OF SAND, PORTLAND CEMENT AND WATER, THOROUGHLY MIXED, AND SHALL HAVE 100 PSI COMPRESSIVE STRENGTH WITHIN 3 HOURS OF PLACEMENT. FLOWABLE FILL SHALL BE PLACED FROM TOP OF #8 STONE PIPE COVER TO BOTTOM OF NEW PAVEMENT.

(C) IN LOCATIONS OF NEW DEVELOPMENT, WHERE UTILITIES ARE INSTALLED PRIOR TO ROAD CONSTRUCTION, TRENCH BACKFILL UNDER FUTURE ROAD SHALL BE ENTIRELY #8 CRUSHED STONE FROM MANHOLES.

2. ALL OSHA SAFETY STANDARDS SHALL BE STRICTLY ENFORCED FOR PROTECTION OF WORKERS.

3. NO SEWER SYSTEM CONSTRUCTION MAY BEGIN UNTIL APPROVAL FROM I.D.E.M.

4. ONE SET OF I.D.E.M. APPROVED PLANS SHALL BE ON THE JOB SITE AT ALL TIMES

POLYVINYL CHLORIDE (P.V.C.) PIPE:

1. PIPE DIAMETERS OF 10 INCHES THROUGH 15 INCHES SHALL MEET OR EXCEED ALL THE REQUIREMENTS OF ASTM D-3034, AND SHALL HAVE A MINIMUM CELL CLASSIFICATION OF 12454-C, REFERENCE SHOULD BE MADE TO ASTM D-1784 FOR A SUMMARIZATION OF CELL CLASS PROPERTIES. PIPE DIAMETERS GREATER THAN 15 INCHES SHALL MEET OR EXCEED ALL REQUIREMENTS OF ASTM F-679, AND SHALL HAVE A MINIMUM CELL CLASSIFICATION OF 12454-C. P.V.C. RIBBED SEWER PIPE SHALL MEET OR EXCEED ALL REQUIREMENTS OF ASTM F-794 AND SHALL HAVE A MINIMUM CELLL CLASSIFICATION OF 12454.

2. THE MINIMUM WALL THICKNESS FOR PIPES OF 10 INCHES THROUGH 15 INCHES IN DIAMETER SHALL CONFORM TO SDR-35, TYPE PSM, AS SPECIFIED IN ASTM D-3034. THE MINIMUM WALL THICKNESS FOR PIPE DIAMETERS GREATER THAN 15 INCHES SHALL CONFORM TO T-1 AS SPECIFIED IN ASTM F-679. P.V.C. PIPE SHALL HAVE A MINIMUM PIPE STIFFNESS OF 46 POUNDS PER SQUARE INCH FOR EACH DIAMETER WHEN MEASURED AT FIVE PERCENT DEFLECTION AND TESTED IN ACCORDANCE WITH ASTM D-2412.

3. PIPE JOINTS SHALL HAVE A BELL WALL, GASKET GROOVE AND SPIGOT WHICH IS INTERGRAL WITH THE PIPE. THE ASSEMBLY OF JOINTS SHALL BE IN ACCORDANCE WITH THE PIPE MANUFACTURERS' RECOMMENDATIONS AND ASTM D-3212. NO SOLVENT CEMENT JOINTS SHALL BE ALLOWED. GASKET MATERIAL SHALL BE CONSTRUCTED OF STYRENE BUTADIENE OR BUTYL RUBBER AND MEET THE REQUIREMENTS OF ASTM F-477.

4. EACH PIPE SECTION SHALL BE MARKED WITH THE NAME OF THE MANUFACTURER, TRADEMARK OR TRADEMANE, NOMINAL PIPE SIZE, PRODUCTION / EXTRUSION CODE, MATERIAL AND CELL CLASS DESIGNATION AND ASTM NUMBER.

5. INSTALLATION SHALL BE IN ACCORDANCE WITH ASTM RECOMMENDED PRACTICE D-2321.

SANITARY SEWER NOTES:

1. 10 STATES STANDARDS AND INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT REQUIREMENTS SHALL BE MET OR EXCEEDED FOR ALL DESIGN, MATERIALS AND CONSTRUCTION METHODS.

2. SANITARY SEWER MANHOLES SHALL BE MONOLITHIC PRECAST SECTIONS, INCLUDING THE BOTTOM SECTION. ALL SECTIONS SHALL BE PRECAST CONCRETE IN ACCORDANCE WITH ASTM C-478. ALL MANHOLE INLET CONNECTIONS SHALL BE LOCK JOINT FLEXIBLE SLEEVES CONFORMING TO ASTM C-923. ONLY PRECAST CONCRETE RINGS SHALL BE ALLOWED FOR CASTING RISERS. ALL MANHOLES, GRADE RINGS AND CASTING SHALL BE SEALED TO PREVENT INFILTRATION.

3. MANHOLE INVERTS SHALL BE SHAPED FOR FLOW CHANNELS WITH CONCRETE AND SMOOTHLY FINISHED BY A SEMI CIRCULAR SECTION CONFORMING TO THE INSIDE DIAMETER OF THE CONNECTING SEWERS. NO BRICK, ROCK OR SAND FILLERS WILL BE ALLOWED.

4. ALL MANHOLE COVERS SHALL BE TRAFFIC BEARING, NON-ROCKING DESIGN WITH NON-PENETRATING PICK HOLES.

5. SANITARY SEWERS SHALL BE POLYVINYL CHLORIDE (PVC) SDR 35 MEETING ASTM D3034 SPECIFICATIONS. ALL SEWER MAINS SHALL HAVE A MINIMUM DIAMETER OF 8", ALL PIPE SPECIFIED SHALL SUPPORT ANTICIPATED LOADS.

6. ALL JOINTS SHALL BE PUSH-ON TYPE (SLIP SEAL) OR SOLVENT WELD.

7. BEDDING FOR PVC PIPE SHALL CONFORM TO BEDDING CLASSES I, II OF III, AS DESCRIBED IN ASTM D2321, FLEXIBLE SEWER PIPE INSTALLATION REQUIREMENTS.

UTILITY NOTES (cont'd):

8. ALL SEWER PIPE SHALL BE LAID USING PIPE LASER EQUIPMENT FOR BOTH VERTICAL AND HORIZONTAL ALIGNMENT.

9. MINIMUM ALLOWABLE COVER SHALL BE 5'-0" OVER TOP OF PIPE.

10. ALL SEWER MAINS SHALL BE DEFLECTION TESTED WITH AN 11 POINT, 5% MANDREL AFTER COMPACTED AGGREGATE IS IN PLACE FOR ALL STREETS. FLEXIBLE PIPE WILL BE TESTED AFTER BACKFILL HAS BEEN IN PLACE FOR AT LEAST 30 DAYS. ALL PVC PIPE FAILING THE MANDREL TEST SHALL BE REROUNDED IN PLACE OR AN ALTERNATE METHOD APPROVED BY THE GOVERNING JURISDICTION IF REPAIR REQUIRED, SEWER SHALL BE RETESTED 30 DAYS AFTER REPAIR IS COMPLETE.

11. ALL SEWER MAINS SHALL BE LAMPED AT THE TIME THE MANDREL TEST IS CONDUCTED. ALL MAINS SHALL BE TRUE TO ALIGNMENT AND GRADE.

12. ALL SEWER MAINS AND LATERAL CONNECTIONS SHALL BE AIR TESTED IN ACCORDANCE WITH UNI-BELL UNI-B-6-85. MINIMUM TIME FOR THE AIR TEST SHALL BE FOR A 1.0 PSIG PRESSURE DROP. ALL SECTIONS FAILING AIR TEST SHALL BE REPAIRED AND RETESTED.

13. ALL SERVICE WYE BRANCHES SHALL BE INSTALLED AT THE TIME OF THE SEWER MAIN INSTALLATION. NO DIRECT TAPS WILL BE ALLOWED ON NEW MAIN CONSTRUCTION. NO VERTICAL CONNECTIONS WILL BE ALLOWED.

14. A SEPARATE (6" MINIMUM) SERVICE SHALL BE PROVIDED FOR EACH UNIT SERVED APPROXIMATELY SIX (6) FEET TO THE RIGHT OF THE LOT CENTERLINE. NO WYE'S SHALL BE ALLOWED, INCLUDING CONDOMINIUMS.

15. THE MAXIMUM ALLOWABLE VERTICAL DISTANCE BETWEEN ANY INFLUENT LINE AND THE EFFLUENT MAIN SHALL BE 6' FOR TYPE 'A' AND 'C' MANHOLES. ANY DISTANCE GREATER THAN 6" SHALL REQUIRE A TYPE 'B' MANHOLE.

16. WHERE A SEWER EXTENSION OR IMPROVEMENT CONNECTS TO A EXISTING SEWER OR MANHOLE, IT MUST BE LOCATED IN A STREET, ROAD OR HIGHWAY R/W AND NOT LOCATED IN SUCH A MANNER WHERE IT WILL CUT THROUGH LOTS OR DEVELOPMENTS.

17. ALL EXTENSIONS SHALL BE INSTALLED AT MINIMUM GRADES.

CONCRETE MANHOLE NOTES:

1. ALL MANHOLES SHALL BE NEGATIVE AIRE PRESSURE (VACUUM) TESTED AS PER ASTM C1244-93 STANDARD METHOD.

2. NO MANHOLES SHALL BE MORE THAN 14' FROM BACK OF CURB.

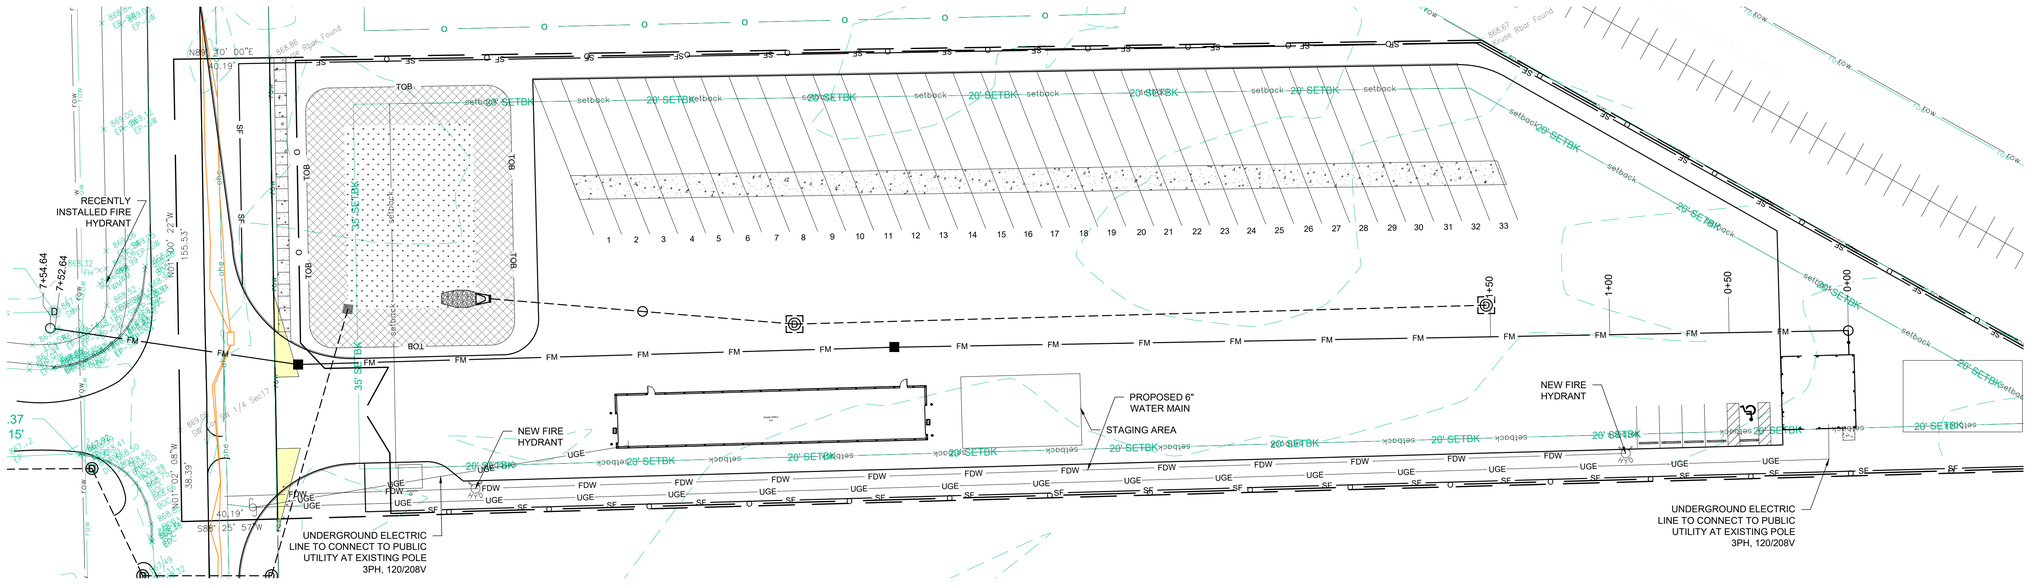

3. NO MANHOLE SHALL BE LOCATED IN ANY BACKYARD OR SIDE YARD. THEY MUST BE LOCATED IN THE FRONT YARD OR FRONT LOT THAT IS FRONTING A STREET.

4. ALL JOINTS IN MANHOLES SHALL BE SEALED TO PREVENT INFILTRATION BY USING A RUBBER 'O-RING' GASKET AND A 1/2" EXTRUDABLE PERFORMED GASKET BETWEEN ALL PRECAST SECTIONS.

5. ANNULAR SPACE AROUND SANITARY SEWER AT POINT OF ENTRANCE INTO THE MANHOLE SHALL BE GROUTED COMPLETELY AROUND SANITARY SEWER, INSIDE AND OUTSIDE TO INSURE SMOOTH TRANSITION.

6. WHEN CONNECTING A NEW SEWER INTO AN EXISTING MANHOLE, THE EXISTING MANHOLE SHALL BE BROUGHT UP TO MEET PRESENT STANDARDS.

7. SECTION JOINTS ON PRECAST CONCRETE MANHOLES SHALL BE SEALED WITH BLACK TAR MASTIC 6" ABOVE AND 6" BELOW JOINT, ON MANHOLE EXTERIOR.

NOTE:

THIS DETAIL SHALL BE USED FOR CONNECTING TO THE END OF AN EXISTING STREET.

EXISTING PAVEMENT SHALL BE SAW CUT, FULL DEPTH, AT A UNIFORM LOCATION INSIDE OF THE EXISTING EDGE OF PAVEMENT, WHERE THE PAVEMENT IS IN GOOD CONDITION AND WILL PROVIDE AN INTERFACE WITH THE FULL PAVEMENT SECTION LINE AND GRADE, FREE FROM LOOSE, DAMAGED, DETERIORATED OR OTHERWISE COMPROMISED MATERIAL. A MINIMUM OF SIX (6) INCHES FROM THE EXISTING EDGE OF PAVEMENT FOR THE FULL WIDTH OF THE EXISTING PAVEMENT; LOCATION OF SAW-CUT TO BE DETERMINED BY THE TOWN OF BROWNSBURG. THE ENTIRE AREA OF THE PROPOSED INTERFACE SHALL BE EXCAVATED TO THE PROPOSED SUBGRADE ELEVATION. THE SUBGRADE SHALL BE STABILIZED IN ACCORDANCE WITH TOWN OF BROWNSBURG STANDARDS AND SPECIFICATIONS. AFTER THE SUBGRADE HAS BEEN STABILIZED AND APPROVED, EXISTING HMA PAVEMENT WILL BE SURFACE MILLED 10 FEET ALONG THE NEW SAW-CUT END OF PAVEMENT TO PROVIDE A MATER STOP AND SMOOTH TRANSITION TO THE NEW PAVEMENT WHEN THE SURFACE MIX IS APPLIED. THE NEW PAVEMENT SECTION SHALL BE INSTALLED IN ACCORDANCE WITH TOWN STANDARDS AND SPECIFICATIONS.

SECTION 02504 – ADJACENT ROADWAY IMPROVEMENTS

PART 1 - GENERAL

1.01 Roadways adjacent to proposed developments shall conform to the following requirements and standards.

A. Adjacent Roadway Improvements

1. Developers shall be responsible for improvements to the existing roadway(s) that front their property. These improvements shall include, but are not limited to, the following items:
   a. Construction of acceleration lanes, deceleration lanes, and passing blisters for each entrance or street intersection as indicated in the Standard Details.
   b. In order to construct adequate acceleration lanes, deceleration lanes, and passing blisters, right-of-way shall be obtained which has a width consistent with the most current accepted Thoroughfare Plan.
   c. The existing roadway along the development frontage shall be widened to match the width requirements based on the functional classification of the roadway as defined by the Thoroughfare Plan. Once widened, the entire roadway fronting the development shall be resurfaced for consistency.
2. Additional improvements may be required depending on field conditions and as determined by the Town of Brownsburg.

ARCADIA AR8PC

PRODUCT SPECIFICATIONS

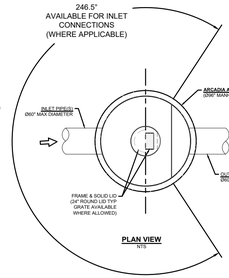

- THE STORMWATER TREATMENT UNIT SHALL BE AN INLINE UNIT CAPABLE OF CONVEYING 100% OF THE DESIGN PEAK FLOW IF PEAK FLOW RATES EXCEED MAXIMUM HYDRAULIC RATE. THE UNIT SHALL BE INSTALLED OFFLINE.
- THE ARCADIA UNIT SHALL BE DESIGNED TO REMOVE AT LEAST 80% OF THE SUSPENDED SOLIDS ON AN ANNUAL AGGREGATE REMOVAL BASIS. SAID REMOVAL SHALL BE BASED ON FULL-SCALE THIRD PARTY VERIFIED TESTING USING OK-110 MEDIA GRADATION OR EQUIVALENT AND 300 MG/L INFLUENT CONCENTRATION. FULL SCALE TESTING SHALL BE PERFORMED PROTOCOL ADOPTED SEDIMENT CAPTURE BASED ON ACTUAL TOTAL MASS COLLECTED BY THE STORMWATER TREATMENT UNIT.

-OR-

THE ARCADIA UNIT SHALL BE DESIGNED TO REMOVE AT LEAST 50% OF TSS USING A MEDIA MIX WITH D50=75 MICRON AND 200 MG/L INFLUENT CONCENTRATION

BEDDING BELOW THE PIPE BARREL 6" MINIMUM	3"	4"	6"

R.C.P. PIPE TRENCH DETAIL
NOT TO SCALE — 8 / C501

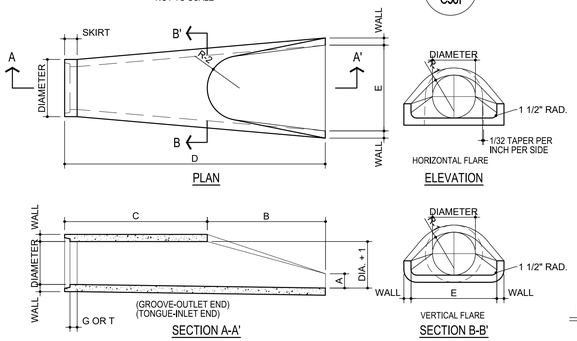

SIDEWALK REQUIREMENTS:
1. CONCRETE FOR SIDEWALKS SHALL MEET THE FOLLOWING SPECIFICATIONS:
   A) 4,000 PSI COMPRESSIVE STRENGTH AT 28 DAYS
   B) 564 LBS. CEMENT PER CUBIC YARD CONCRETE
   C) MAXIMUM WATER CEMENT RATIO: 0.40
   D) AIR CONTENT: 5%~7%
   E) WATER REDUCING ADMIXTURE REQUIRED
2. SIDEWALKS SHALL HAVE A BROOM FINISH WITH TOOLED EDGES AND TOOLED CONTROL JOINTS.
3. CURING COMPOUND EQUAL TO "HYDROCIDE CURING COMPOUND" AS MANUFACTURED BY SONNEBORN, SHALL BE APPLIED TO FINISHED CONCRETE.
4. EXPANSION/CONTRACTION JOINTS SHALL BE INSTALLED AT MAXIMUM OF 50' INTERVALS, AND WHERE CONCRETE WILL ABUT EXISTING WALKS, CURBING, DRIVES, OR OTHER CONCRETE.
5. EXPANSION/CONTRACTION JOINT SHALL BE INSTALLED WITH THREE (3) 1/4" DIA. SMOOTH DOWEL BARS, EACH 12" LONG. DOWEL BARS SHALL HAVE A FULL END CAP ON ONE END. EXPANSION/CONTRACTION JOINT SHALL BE FILLED WITH EXPANSION JOINT FILLER. CONNECTION TO EXISTING WALKS OR SLABS SHALL REQUIRE DRILLING TO INSTALL DOWELS. EPOXY SHALL BE USED TO SET DOWELS IN EXISTING CONCRETE.
6. AT DRIVEWAYS, CONCRETE SHALL BE REINFORCED WITH 6 x 6 x 6/6 WELDED WIRE FABRIC. REINFORCING WELDED WIRE FABRIC SHALL CONFORM TO ASTM 185–73.
7. SIDEWALK THICKNESS IN DRIVEWAY AND APRON BETWEEN SIDEWALK AND CURB SHALL MATCH THE EXISTING CONCRETE DRIVEWAY, THE EQUIVALENT CONCRETE THICKNESS OF THE HMA DRIVEWAY OR SIX (6) INCHES, WHICHEVER IS GREATER.
8. DETAIL IS MEANT TO PROVIDE GUIDANCE ONLY, RAMPS SHALL MEET THE REQUIREMENT OF INDOT STANDARD DRAWINGS E 604–SWDS AND PROWAG.

6	REVISED per TOWN COMMENTS	11/06/25

DRAWN BY:	JBF
CHECKED BY:	BEM
PROJECT NUMBER:	21346
DATE:	1/13/22
SHEET NUMBER:	C501

ROCK DAM REQUIREMENTS:

1. CONTRIBUTING DRAINAGE AREA: 50 ACRES MAXIMUM

2. DESIGN LIFE: LIMITED TO 3 YRS.

3. SEDIMENT STORAGE: 1,800 CU.FT./ACRE DISTURBED (MINUMUM) MEASURED 1 FT. BELOW SPILLWAY CREST.

4. BASIN SHAPE: MINIMUM 2:1 LENGTH-TO-WIDTH RATIO.

5. BASIN AREA: VARIABLE; THE LARGER THE SURFACE AREA THE GREATER THE TRAPPING EFFICIENCY.

6. DAM CREST HEIGHT: LIMITED TO 8 FT.

7. SPILLWAY CAPACITY: PEAK RUNOFF FROM A 10-YR. FREQUENCY, 24-HR. DURATION STORM EVENT, A MAXIMUM FLOW DEPTH OF 1 FT. AND MINIMUM FREEBOARD OF 1 FT. (ENTIRE LENGTH OF DAM BETWEEN ROCK ABUTMENTS MAY SERVE AS SPILLWAY.)

8. DAM DIMENSIONS: TOP WIDTH, 5 FT. MINIMUM; SIDE SLOPES, 2:1 OR FLATTER UPSTREAM, 3:1 OR FLATTER DOWNSTREAM.

9. EARTH ABUTMENTS: SMOOTH, STABLE, 2:1 OR FLATTER SLOPES.

10. ROCK ABUTMENTS (TO PROTECT EARTH ABUTMENTS): EXTENDED ALONG DOWNSTREAM FACE TO TOE OF DAM AND AT LEAST 1 FT. HIGHER THAN SPILLWAY FACE AT ALL POINTS, 2 FT. ABOVE SPILLWAY CREST, AND 1 FT. THICK, WITH 2:1 OR FLATTER SIDE SLOPES.
11. OUTLET PROTECTION: ROCK APRON, 1-1/2 FT. THICK (MINIMUM), ZERO GRADE, WITH LENGTH EQUAL TO HEIGHT OF DAM OR EXTENDED TO STABLE GRADE, WHICHEVER IS GREATER.

12. ROCK MATERIAL: INDOT REVETMENT RIPRAP.

13. PROTECTION FROM PIPING: GEOTEXTILE FABRIC FOR SEPARATION AND FILTRATION COVERING ENTIRE FOUNDATION, INCLUDING EARTH ABUTMENTS AND APRON.

14. BASIN DE-WATERING: THROUGH A 1 FT. THICK LAYER OF INDOT CA NO. 5 STONE ON UPSTREAM FACE OF THE DAM.

INSTALLATION

SITE PREPARATION:

1. DIVERT RUNOFF FROM UNDISTURBED AREAS AWAY FROM THE ROCK DAM AND BASIN AREA.

2. EXCAVATE THE FOUNDATION FOR THE APRON, USING IT AS A TEMPORARY SEDIMENT BASIN DURING CONSTRUCTION OF THE DAM.

3. CLEAR AND GRUB THE AREA UNDER THE DAM, REMOVING AND PROPERLY DISPOSING OF ALL ROOT MAT, BRUSH, AND OTHER DEBRIS.

4. GRADE THE EARTH ABUTMENTS NO STEEPER THAN 2:1.

DAM AND BASIN CONSTRUCTION

1. EXCAVATE A CUTOFF TRENCH AT THE CENTER LINE OF THE DAM, EXTENDING ALL THE WAY UP THE EARTH ABUTMENTS, AND BACKFILL WITH COMPACTED EARTH FILL.

2. SMOOTH THE DAM FOUNDATION.

3. COVER THE ENTIRE FOUNDATION, INCLUDING BOTH EARTH ABUTMENTS, WITH GEOTEXTILE FABRIC, MAKING SURE THE UPSTREAM STRIPS OVERLAP THE DOWNSTREAM STRIPS AT LEAST 1 FT.

4. CONSTRUCT THE DAM TO PLANNED DIMENSIONS.

5. ONCE THE DAM IS IN PLACE, CLEAR THE SEDIMENT BASIN AREA, PROPERLY DISPOSING OF THE CLEARED MATERIAL.

6. SET A MARKER STAKE TO INDICATE THE CLEANOUT ELEVATION (I.E., POINT AT WHICH THE BASIN IS 50% FULL OF SEDIMENT).

7. DIVERT CONSTRUCTION SITE RUNOFF FLOW INTO THE UPPER END OF THE BASIN USING TEMPORARY DIVERSIONS.

8. STABILIZE ALL DISTURBED AREAS EXCEPT THE LOWER HALF OF THE BASIN.

SAFETY PRECAUTIONS:

1. BECAUSE SEDIMENT BASINS THAT IMPOUND WATER ARE HAZARDOUS, (A) BE SURE SIDE SLOPES ARE 2:1 OR FLATTER, (B) FENCE WITH WARNING SIGNS IF TRESPASSING IS LIKELY, (C) DE-WATER THE BASIN BETWEEN STORM EVENTS, AND (D) FOLLOW ALL STATE AND LOCAL IMPOUNDMENT SITE REQUIREMENTS.

MAINTENANCE

1. INSPECT THE ROCK DAM AND BASIN AFTER EACH STORM EVENT.

2. REMOVE SEDIMENT WHEN IT ACCUMULATES TO HALF THE DESIGN VOLUME (MARKED BY A STAKE).

3. CHECK THE DAM AND ABUTMENTS FOR EROSION, PIPING, OR ROCK DISPLACEMENT, AND REPAIR IMMEDIATELY.

4. IF THE BASIN DOES NOT DRAIN BETWEEN STORMS, REPLACE THE STONE ON THE UPSTREAM FACE OF THE DAM.

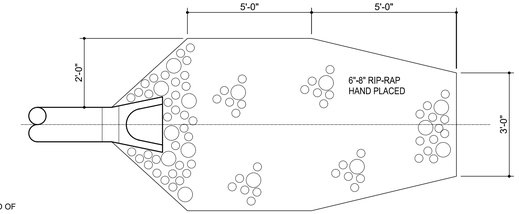

5. IF THE BASIN DRAINS TOO RAPIDLY FOLLOWING A STORM (I.E., LESS THAN 6 HRS.), ADD INDOT CA NO. 5 GRAVEL ON THE UPSTREAM FACE OF THE DAM.

6. ONCE THE CONTRIBUTING ŷŷŷŷŷŷŷŷDRAINAGE AREA HAS BEEN PERMANENTLY STABILIZED, (A) REMOVE WATER AND SEDIMENT FROM THE BASIN;

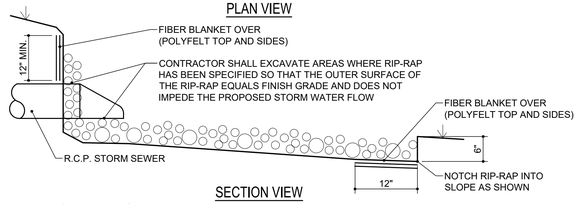

(B) REMOVE THE DAM, DISPOSING OF THE ROCK IN DESIGNATED DISPOSAL AREAS; (C) SMOOTH THE SITE TO BLEND WITH THE SURROUNDING AREA; AND (D) STABILIZE.

COMMON CONCERNS:
FAILURE FROM PIPING ALONG ABUTMENTS-BECAUSE THE FILTER MATERIAL WAS NOT PROPERLY INSTALLED OR THE EARTH ABUTMENTS ARE TOO STEEP. STONE DISPLACEMENT FROM FACE OF DAM-BECAUSE STONE SIZE IS TOO SMALL OR THE FACE IS TOO STEEP. EROSION BELOW DAM BECAUSE THE APRON WAS NOT EXTENDED TO STABLE GRADE. EROSION OF ABUTMENTS DURING SPILLWAY FLOW-BECAUSE THE ROCK ABUTMENT IS NOT HIGH ENOUGH. SEDIMENT CARRIED THROUGH SPILLWAY-BECAUSE THE DRAINAGE AREA IS TOO LARGE; TO SOLVE, DIVERT RUNOFF FROM THE UNDISTURBED AREA AWAY FROM THE BASIN. SEDIMENT LOSS THROUGH DAM-BECAUSE THE LAYER OF AGGREGATE ON THE UPSTREAM FACE IS NOT THICK ENOUGH OR IS TOO COARSE TO RESTRICT FLOW THROUGH THE DAM.

ROCK DAM
NOT TO SCALE — 8 — C502

PLAN VIEW

SECTION VIEW

RIP-RAP REQUIREMENTS:

CONTRIBUTING DRAINAGE AREA: 100 ACRES MAXIMUM.

CAPACITY: PEAK RUNOFF FROM 10-YR. FREQUENCY, 24-HR. DURATION STORM EVENT.

APRON: DESIGN DEPENDS ON CHANNEL DEFINITION, BUT IS LONG ENOUGH TO DISSIPATE RUNOFF ENERGY, SET ON ZERO GRADE, STRAIGHT AND ALIGNED WITH THE RECEIVING STREAM. (IF SITE CONDITIONS REQUIRE A CURVE, SET IT NEAR THE UPSTREAM END.)

FOUNDATION: GEOTEXTILE FABRIC FOR STABILIZATION AND FILTRATION OR WELL-GRADED GRAVEL FILTER LAYER AT LEAST 6 IN. THICK.

MATERIAL: HARD, ANGULAR, AND HIGHLY WEATHER-RESISTANT RIPRAP STONE OF 6 - 8 INCHES IN SIZE.

THICKNESS: 12 IN. MINIMUM OR TWO TIMES THE D 50 STONE DIAMETER,wHICHEVER IS GREATER.

INSTALLATION:

1. EXCAVATE THE APRON AREA SUBGRADE BELOW DESIGN ELEVATION TO ALLOW FOR THICKNESS OF THE FILTER (OR GRAVEL LAYER) AND THE RIPRAP. (THIS OVER-EXCAVATION GREATLY INCREASES THE AMOUNT OF SPOIL.)

2. COMPACT ANY FILL USED IN THE SUBGRADE TO THE DENSITY OF THE SURROUNDING UNDISTURBED MATERIAL, AND SMOOTH ENOUGH TO PROTECT FABRIC FROM TEARING.

3. PLACE THE GEOTEXTILE FABRIC (OR GRAVEL LAYER) ON THE COMPACTED AND SMOOTHED FOUNDATION. IF MORE THAN ONE FABRIC PIECE IS NEEDED, THE UPSTREAM PIECE SHOULD OVERLAP THE DOWNSTREAM PIECE BY AT LEAST 1 FT.

4. INSTALL THE RIPRAP TO THE LINES AND ELEVATIONS SHOWN IN THE DESIGN. IF THE CHANNEL IS POORLY DEFINED, THE FINAL CROSS-SECTION SHOULD BE LEVEL OR SLIGHTLY DEPRESSED IN THE MIDDLE; IF WELL DEFINED, THE FILTER (OR GROUND LAYER) AND RIPRAP SHOULD EXTEND TO THE TOP OF THE BANK.

5. IF THE GEOTEXTILE FABRIC TEARS WHEN PLACING TH RIPRAP, REPAIR IMMEDIATELY BY LAYING AND STAPLING A PIECE OF FABRIC OVER THE DAMAGE AREA, OVERLAPPING THE UNDAMAGED AREAS BY AT LEAST 12 INCHES.

6. MAKE SURE THE TOP OF THE RIPRAP APRON IS LEVEL WITH OR SLIGHTLY BELOW THE RECEIVING STREAM. (RIPRAP SHOULD NOT RESTRICT THE CHANNEL OR PRODUCE AN OVERFALL.)

7. BLEND THE RIPRAP SMOOTHLY TO THE SURROUNDING GRADE.

8. STABILIZE ALL DISTURBED AREAS IMMEDIATELY FOLLOWING INSTALLATION.

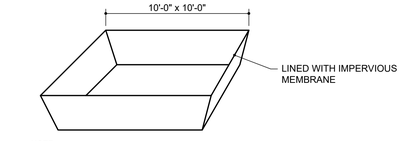

MAINTENANCE:

* INSPECT ROCK CHUTES AFTER STORM EVENTS FOR STONE DISPLACEMENT AND FOR EROSION AT THE SIDES AND ENDS OF THE APRON.
* MAKE NEEDED REPAIRS IMMEDIATELY; USE APPROPRIATE SIZE STONE; AND DO NOT PLACE THEM ABOVE FINISHED GRADE.

COMMON CONCERNS:

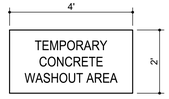

FOUNDATION NOT EXCAVATED DEEP ENOUGH OR WIDE ENOUGH--RIPRAP RESTRICTS THE FLOW CROSS SECTION, RESULTING IN EROSION AROUND THE APRON AND SCOUR HOLES AT THE OUTLET.
RIPRAP APRON ON ZERO GRADE--

GENERAL STAPLE RECOMMENDATIONS

SLOPE GRADIENT

CHANNEL LININGS UTILIZE STAPLE PATTERN "C" WITH ADDITIONAL STAPLES ON SIDE SLOPES.

NOTES:
1. STAPLE PATTERNS APPLY TO ALL NORTH AMERICAN GREEN EROSION BLANKETS.

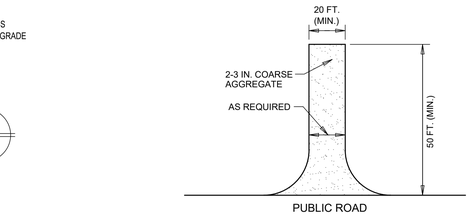

2. STAPLE PATTERNS MAY VARY DEPENDING UPON SOIL TYPE AND AVERAGE ANNUAL RAINFALL.

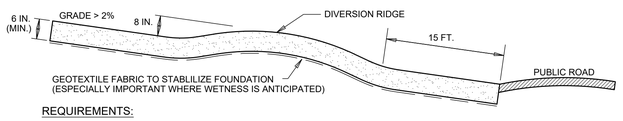

3. AT SLOPE LENGTHS GREATER THAN 300 FEET OR WHERE DRAINAGE OVER LARGE AREAS IS DIRECTED ONTO BLANKETS, STAPLE PATTERN "C" SHOULD BE UTILIZED.

4. CHANNEL LININGS REQUIRE A 2' (MIN.) OVERLAP AT LONGITUDINAL JOINTS AND SIDE SLOPES REQUIRE A 6" (MIN.) OVERLAP. WHERE OVERLAPS OCCUR, THE UPSTREAM BLANKET SHALL OVERLAP THE DOWNSTREAM.

5. NORTH AMERICAN GREEN S150BN TO BE USED FOR EROSION CONTROL BLANKETS.

EROSION CONTROL BLANKET STAPLE PATTERN
NOT TO SCALE — 2 — C502

REQUIREMENTS:

Material: 2-3 in. washed stone (INDOT CA No.2) over a stable foundation.

Thickness: 6 in. minimum

Width: 12 ft. minimum or full width of entrance/exit roadway, whichever is greater.

Length: 50 ft. minimum. The length can be shorter for small sites such as for an individual home.

Washing facility (optional): Level area with 3 in washed stone minimum or a commercial rack, and waste water diverted to a sediment trap or basin.

Geotextile fabric underliner: May be used under wet conditions or for soils within a high seasonal water table to provide greater bearing strength.

INSTALLATION:

1. Avoid locating on steep slopes or at curves in public roads.

2. Remove all vegetation and other objectionable material from the foundation area, and grade and crown for positive drainage.

3. If slope towards the road exceeds 2%, construct a 6-8 in.-high water bar (ridge) with 3:1 side slopes across the foundation area about 15 ft. from the entrance to divert runoff away from the road.

4. Install pipe under the pad if needed to maintain proper public road drainage.

5. If wet conditions are anticipated, place geotextile fabric on the graded foundation to improve stability.

6. Place stone to dimensions and grade shown in the erosion control plan, leaving the surface smooth and sloped for drainage.

7. Divert all surface runoff and drainage from the stone pad to a sediment trap or basin.

MAINTENANCE:

* Inspect entrance drive and sediment disposal area weekly and after storm events or heavy use.
* Reshape pad as needed for drainage and runoff control.
* Topdress with clean stone as needed.
* Immediately remove mud and sediment tracked or washed onto public roads by brushing or sweeping. Flushing should only be used if the water is conveyed into a sediment trap or basin.
* Repair any broken road pavement immediately.

COMMON CONCERNS:

Inadequate runoff control--results in sediment washing onto road.
Stone too small, pad too thin, or geotextile fabric absent--results in ruts and a muddy condition as stone is pressed into the soil: add more stone.
Pad too short for heavy construction traffic--extend the pad beyond the 50-ft. length as needed.
Pad not flared sufficiently at road entrance--results in mud being tracked onto the road and possible damage to the road edge: widen stone entrance and repair road damage.
Unstable foundation--use geotextile fabric under th pad and/or improve foundation drainage.

LITHONIA LIGHTING

Catalog Number:
Notes:
Type:

FEATURES & SPECIFICATIONS

INTENDED USE — Provides a maintenance-free emergency illumination for the rated wattage upon loss of AC power to meet code-required emergency lighting. Ideal for applications requiring low profile, emergency path for fewer mounting heights.

CONSTRUCTION — The housing is standard white, or optional black, thermoplastic with a compact and durable design with all-inclusive being reflector and lens assembly. It is 30% flame rated and impact-resistant.

OPTICS — The typical life of the LED is 10 years. One, 0.37W white LED per lamp head.

ELECTRICAL — Dual-voltage 120/277 standard.

Bi-color LED status indicator for battery condition. (Green-normal, Red-check battery).

One and a half watts of remote capacity available with REM option.

BATTERY: 3.6V maintenance-free, rechargeable, nickel-cadmium.

INSTALLATION — Wall mount and ceiling mount. Surface mount back plate fits most industry-standard size junction boxes and snaps into place.

LISTINGS — UL Listed. Meets all applicable requirements for: UL 924, NFPA 101 (Lumen Life Safety Code), NFPA 70 — NEC (National Electrical Code) Article 700.12F and/or 1600.9 (2012), CEC Title 24, Part 12, Subpart B and 2016 Federal Energy Standard 10FR Pa 1064Y. (10°C to 40°C) listed standard.

WARRANTY — 5 year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

NOTE: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

LED Wall Pack

Customize the color temperature and of effortlessly automate your wall pack for dusk-to-dawn operation with the CLWP Wall Pack. Featuring LatchLight (CT,DD,DE,DDB,DDBXD) and a selectable photocell, the CLWP Wall Pack is designed to deliver years of maintenance-free general illumination for residential outdoor applications such as driveways, entryways, patios, and other outdoor areas that require consistent and reliable lighting performance.

FEATURES:

- Switchable CCT(30/40/50K)
- Selectable ON/OFF photocell for dusk-to-dawn or switched operation
- Cast aluminum construction for durability
- Impact-resistant polycarbonate diffuser

LITHONIA LIGHTING

Specifications

INTENDED USE:
The CLWP provides years of maintenance-free general illumination for commercial or residential outdoor applications such as driveways, patios, loading areas and warehouses.

CONSTRUCTION:
Rugged cast aluminum, corrosion-resistant rear housing. Impact resistant polycarbonate front cover/diffuser resists fading and cracking. Driver operates at 120V. Operating temperature -40°C to 40°C.

OPTICS:
High-performance LEDs maintain 70% of light output at 50,000 hours of service. (LED lifespan based on IESNA LM-80-08 results and calculated per IESNA TM-21-11 methodology.). Lenses are engineered for superior lighting distribution, uniformity and fixture spacing. See Lighting Performance Table for specific fixture performance.

INSTALLATION:
Designed for wall mounting more than 4' above the ground. Mounts to a recessed junction box (by others).

LISTINGS:
UL Listed for U.S. and Canadian safety standards for wet locations.

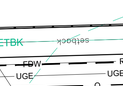

WARRANTY:
5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

Appendix B

Inspection Schedule			
Inspection Frequency	**Maintenance Item**	**Maintenance Follow-up**	**Action Taken**
Annual & Post Major Storm Event		Vegetation	Routine mowing to a minimum 3 in.
		Erosion on Embankment	Erosion Control Measure will be repaired immediately
		Animal Burrows	Burrows should be removed at the time of routine mowing
		Drains Clear & Functioning	Drains shall be inspected to ensure positive drainage
		Leaks or Seeps	Leaks shall be repaired immediately to ensure positive flow
		Slope Protection Failure	Erosion Control Measure will be repaired immediately
		Obstructions	Obstructions shall be removed during routine mowing
Annual & Post Major Storm Event		Outlet Pipe Blocked	Outlet shall be cleared of debris immediately upon finding
		Debris Removed from Trash Guard	Obstructions shall be removed during routine mowing
		Sediment Build-up	Sediment shall be removed at a depth of 2 inches
		Pipe Condition	Pipes shall be inspected and repaired if needed
		Outfall Channel Function	Erosion Control Measure will be repaired immediately
Monthly		Sediment Build-up	Sediment shall be removed at a depth of 2 inches
Monthly	Miscellaneous	Erosion at Outfalls	Erosion Control Measure will be repaired immediately
		Encroachment into Easements	Encroachments shall be removed from all easements
		Complaints from Surrounding Owners	Complaints shall be heard and considered
		Public Hazards	All hazards to public safety shall be removed immediately
Quarterly / Major Storm Event	Impervious Surfaces	Drainage Flow to Collection Point	Remove obstructions
Quarterly / Major Storm Event	Swales	Drainage Flow	Remove obstructions
Quarterly / Major Storm Event	Storm Pipes / Cleanouts	Pipe Blockage	Remove obstructions / Flush

APPENDIX C
BMP CHECKLIST

Pond/Basin Slope Inspection and Maintenance

Date

Lion Trans Inc.

Time / Weather: _____

Precipitation Amount / Site Condition: _____

Inspector Name: _____

Item	Condition when Maintenance is Required	Maintenance Required? (Y/N)	Comments	Expected Maintenance Results	Initials
Trash and Debris	Trash and debris has accumulated in pond.			Trash and debris to be removed from pond.	
Erosion	Erosion of the pond's side slopes and/or scouring of the pond's bottom, that exceeds 6-inches, or where continued erosion is prevalent.			Slope Stabilized using proper erosion control measures and repair methods.	
Bank Stabilization	Bank destabilized by burrowing animal(s).			Remove burrowing animals and repair holes in embankment	
Sediment Accumulation in the Pond Bottom	Sediment accumulations in pond bottom that exceeds the depth of sediment zone.			Sediment removed from pond bottom	
Rip Rap	Vegetative growth on rip rap lined channel or missing rocks and soil is exposed			Remove vegetative growth on rip rap and replace rocks to design specifications	
End Section	End section is blocked / obstructed by trash / debris, sediment or vegetation			Trash, debris, sediment, or vegetation to be removed from end section	
Outlet Structure	Outlet structure is blocked / obstructed by trash, debris, sediment or vegetation			Trash, debris, sediment, or vegetation to be removed from outlet structure	

Additional Comments and Observations	Initials

Arcadia™
Maintenance Guide

One of Arcadia's advantages is the ease of maintenance. Like any system that collects pollutants, the Arcadia hydrodynamic separator must be regularly maintained for continued effectiveness. Maintenance is a simple procedure performed using a vacuum truck or similar equipment. The system is designed to minimize the volume of water lost during routine maintenance, reducing disposal costs.

Contractors can access the pollutants stored in the manhole through the manhole cover. This allows them to gain vacuum hose access to the bottom of the manhole to remove sediment and trash. There is no confined space entry necessary for inspection or maintenance.

The entire maintenance procedure typically takes 2 to 4 hours, depending on the system's size, the amount of captured material, and the vacuum truck's capacity.

Local regulations may apply to the maintenance procedure. Safe and legal disposal of pollutants is the responsibility of the maintenance contractor. Maintenance should be performed only by a qualified contractor.

Inspection and Cleaning Cycle

Periodic inspection is necessary to determine the need for and frequency of maintenance. Inspections should begin as soon as construction is complete and then on an annual basis ongoing. Under normal use, the system will need to be cleaned every 1-3 years.

Sites that have excessive oil, fuel or sediment runoff may shorten the maintenance cycle. Periodic inspection is important.

Determining When to Clean

To determine the sediment depth, the maintenance contractor should lower a stadia rod into the manhole until it reaches the top of the captured sediment. Mark this spot on the rod, then continue pushing the rod through the sediment until it reaches the bottom of the sump. Next, mark the second spot on the rod then compare the two markings to determine the depth of the captured sediment.

Maintenance should occur when the sediment has reached a depth of 18" (450 mm).

AR10	120 (3048)	7931 (30022)	7490 (28354)	4.36 (3.34)	2.18 (1.67)

Maintenance Procedures

1. Remove the manhole cover to provide access to the pollutant storage. Pollutants are stored in the sump, below the unit assembly. Access this area through the access cylinder (larger than 10" (254 mm) diameter for all sizes).
2. Use a vacuum truck or other similar equipment to remove all water, debris, oil and sediment. See Figure 1.
3. Use a high pressure hose to clean the manhole of all remaining sediment and debris. Then, use the vacuum truck to remove the water.
4. Fill the clean manhole with water until the level reaches the invert of the outlet pipe.
5. Replace the manhole cover.
6. Dispose of the polluted water, oil, sediment and trash at an approved facility.
    a. Local regulations prohibit the discharge of solid material into the sanitary system. Check with the local sewer authority for authorization to discharge the liquid.
    b. Some localities treat the pollutants as leachate. Check with local regulators about disposal requirements.
    c. Additional local regulations may apply to the maintenance procedure.

Drainage Narrative

1.0 Project Scope

The proposed project involves the development of a truck maintenance facility that will include 42 stalls for truck and trailer parking, a 900 square foot office building (30 ft × 30 ft), and a 2,860 square foot maintenance building (130 ft × 22 ft) located along the southern boundary of the property. In addition, a detention pond will be constructed to manage and control stormwater runoff generated by the site improvements. The project scope will also include off site drainage improvements along County Road 400 North to accommodate discharge from our property.

The project site is located at 4005 N CR 1000 E, Brownsburg, Indiana 46112. The parcel is not currently subject to zoning restrictions. The proposed development will result in approximately 2 acres of land disturbance. Stormwater from the site will discharge to the existing offsite storm sewer network located along CR 400 N, which ultimately conveys flow to Bullard Creek west of the site.

All stormwater management facilities for the proposed development were designed in accordance with the Town of Brownsburg Stormwater Standards and the Brownsburg Stormwater Management Ordinance. The standards were used to establish allowable post-development release rates, minimum storm durations, detention storage requirements, outlet structure sizing, and downstream conveyance criteria.

2.0 Rainfall Information

Table 1. Rainfall Intensities (Hendricks County 2016)

Rainfall Intensities for Various Return Periods and Storm Durations						
Duration	*Intensity (Inches/Hour)*					
	Return Period (Years)

[1] Precipitation frequency (PF) estimates in this table are based on frequency analysis of partial duration series (PDS).

Numbers in parenthesis are PF estimates at lower and upper bounds of the 90% confidence interval. The probability that precipitation frequency estimates (for a given duration and average recurrence interval) will be greater than the upper bound (or less than the lower bound) is 5%. Estimates at upper bounds are not checked against probable maximum precipitation (PMP) estimates and may be higher than currently valid PMP values.

Please refer to NOAA Atlas 14 document for more information.

Rainfall intensity and depth data used in the hydrologic analyses were obtained from Chapter 2 of the *Hendricks County Stormwater Technical Standards Manual* (2016). These values form the basis for both Rational Method peak runoff calculations and hydrograph development for the project's watershed, ensuring consistency with county stormwater design requirements.

However, per the Brownsburg Stormwater Management Ordinance (2024), storage volumes for detention ponds shall be calculated based on NRCS TR-55 time of concentration and curve number calculation methodologies.

3.0 Existing Conditions

The project site is currently an undeveloped grassy area with scattered overgrowth. Land use surrounding the parcel includes residential properties to the south, warehouse and manufactured homes to the west, minor commercial development to the north beyond the highway, and railroad tracks to the east.

The existing watershed area encompasses 3.02 acres, consisting entirely of pervious cover. Under current conditions, stormwater runoff generally drains to the east and south.

Runoff Curve Numbers (CN) were assigned based on existing land cover conditions in accordance with the Hendricks County Stormwater Technical Standards Manual (2016) and the Brownsburg Stormwater Management Ordinance (2024). A CN value of 84 was used for areas classified as fair-condition grass on Hydrologic Soil Group D soils. For the existing conditions analysis, the critical storm event was identified as the 2-hour storm. Using the Huff First Quartile distribution for the 2-hour duration, the time of concentration (Tc) for the site was calculated to be 47.0 minutes. The corresponding peak flow rates for the existing conditions are summarized below:

Table 3. Existing Conditions

Return Period	2-year	10-year	25-year	100-year
Runoff	1.172 cfs	2.497 cfs	3.430 cfs	5.175 cfs

4.0 Proposed Conditions

As outlined in the project scope, the proposed development consists of a truck maintenance facility including 42 stalls for truck and trailer parking, a 900 square foot office building (30 ft × 30 ft), and a 2,860 square foot maintenance building (130 ft × 22 ft).

Under proposed conditions, the total site area remains 3.02 acres, consisting of approximately 1.02 acres of pervious surface, 1.91 acres of impervious asphalt pavement, and 0.09 acres of roof area.

For the proposed conditions analysis, the critical storm event was identified as the 30-minute storm. Using the Huff First Quartile distribution for the 30-minute duration, the time of concentration (tc) was calculated to be 9.2 minutes. Curve Numbers (CN) were assigned based on land cover characteristics consistent with the Hendricks County Stormwater Technical Standards Manual (2016) and the Brownsburg Stormwater Management Ordinance (2024). Values applied include CN= 84 for land classified as fair condition grass cover hydrologic soil group D, CN = 98 for asphalt pavement and roof areas. The weighted CN value was calculated as follows:

$$\frac{(1.02\ acres\ \times 84) + (1.91\ acres\ \times 98) + (0.09\ acres\ \times 98)}{3.02\ acres} = 93$$

The resulting peak runoff flow rates for the proposed site conditions are summarized below:

Table 4. Proposed Conditions

Return Period	2-year	10-year	25-year	100-year
Runoff	5.733 cfs	9.947 cfs	12.50 cfs	16.74 cfs

The runoff flowrates increased due to the addition of pervious surface and removal of impervious surface. The percentage increase is as follows:

Table 5. Percentage Increase in Runoff

Return Period	2-year	10-year	25-year	100-year
% Increase	389%	298%	264%	223%

Stormwater runoff from the proposed improvements will be conveyed into inlets and piped to the northwest corner of the site, where a retention pond will be constructed to provide the required storage volume.

4.1 Detention Pond and Outlet Structure

The post-development peak discharge was limited by restricting the 0–10-year storm events to a release rate of 0.2 cfs per acre (0.604 cfs for the site) and the 11–100-year storm events to 0.4 cfs per acre (1.208 cfs for the site). These allowable release rates are more restrictive than the proposed 100-year peak inflow when compared to the existing 10-year conditions, ensuring that post-development discharges do not exceed pre-development rates.

In accordance with the Brownsburg Stormwater Management Ordinance detention standards, “The storm duration shall be equal to or greater than the site time of concentration but shall not be less than thirty (30) minutes.” (2024). Therefore, the time of concentration for the proposed conditions was set to 30 minutes, and the maximum required storage was determined to take place during the 6-hour storm. The detention sizing analysis used the 6-hour storm to calculate the required storage volume for the site.

This analysis determined a required detention volume of 33,478 cubic feet. To meet this requirement, a 34,170-cubic-foot retention pond will be constructed in the northwest corner of the site. The detention pond will be equipped with a multi-stage outlet structure designed to limit discharge rates. A summary of the outlet structure components is provided in Table 6, with supporting calculations included in Appendix B.

Table 6. Outlet Structure Summary

Outlet	Bottom	Intermediate	Emergency Overflow
Size	$4"\ Diameter$	$4"\ Diameter$	$3'x\ 3'w/mesh$
Invert El. (ft)	862.66	865.47	867.01
Peak Outflow (cfs)	0.70	1.23	$\geq 20.93\ (125\%\ 100\ year\ peak)$

Per the Town of Brownsburg Stormwater Standards, the minimum allowable orifice diameter is 4 inches; therefore, a 4-inch orifice is utilized for the outlet structure. Due to this minimum size requirement, the resulting discharge rates from the orifice slightly exceed the calculated allowable release rates. However, the post-development discharge rates remain below the corresponding existing peak flow rates.

4.2 On-Site Stormwater Conveyance

Stormwater runoff generated from the proposed improvements will be collected and conveyed to the site's retention facility. The grading plan directs surface runoff by sheet flow and shallow swales to a series of inlets along the eastern and central portions of the property. These inlets are connected by a storm sewer system that conveys flow westward to the retention pond located in the northwest corner of the site.

- Inlet 1: Connects to 290 linear feet (LF) of 18-inch RCP at a 0.30% slope, discharging into Inlet 2.
- Inlet 2: Connects to 64 LF of 24-inch RCP at 0.30% into the Arcadia AR8, which the discharges into 64 LF of 24" RCP at 0.30% into the pond

Inlet capacity was then checked using the orifice flow equation, incorporating the reduced effective open area (50% of manufacturer-provided open area). This ensures the inlet can maintain adequate capacity under both design flow and partial clogging conditions, in compliance with the requirements of the Manual. The discharge coefficient, C, will be 0.60, gravity acceleration, g, is 32.2 ft/sec2, and ponding height, h is 0.5 ft, and the 10-year flow will be used. The orifice equation is as follows:

Inlet Structure 1:

$$Q = CA\sqrt{2gh}$$

$$5.08\ cfs = (0.6)A\sqrt{2(32.2\ ft/\sec^2)\ 0.5\ ft}$$

$$A = 1.49\ ft^2$$

$$2A = 3.0\ ft^2\ (Clogging\ Condition)$$

Inlet Structure 2 :

$$Q = CA\sqrt{2gh}$$

$$5.69\ cfs = (0.6)A\sqrt{2(32.2\ ft/\sec^2)\ 0.5\ ft}$$

$$A = 1.67\ ft^2$$

$$2A = 3.3\ ft^2\ (Clogging\ Condition)$$

To capture and convey runoff from the site into Inlet Structure 1, a square Neenah Grate Inlet 3287-5 (3.2 square feet of opening area) or equivalent will be installed. To capture and convey runoff from the site into Inlet Structure 2, a square Neenah Grate Inlet 3808-1 (5.2 square feet of opening area) or inlet with 3.3 square foot or greater opening should be installed. Calculations verifying pipe capacity and inlet capture are provided in Appendix B.

For water quality treatment, a hydrodynamic separator will be installed downstream of Inlet 2 to remove sediment and floatable pollutants prior to discharge into the detention basin. The required treatment flow rate is 10.70 cfs. An ADS Arcadia ARC8 unit is proposed, as it has a rated flow capacity of 13.48 cfs. Calculations can be found in Appendix C.

4.3 Off Site Drainage Improvements Along CR 400 N

The existing downstream pipe network is not adequate to convey the required discharge from the site and is therefore proposed to be redesigned to accommodate existing flows in addition to 125 percent of the site's 100-year peak discharge.

The pipe conveying flow from the detention pond was sized to safely pass the 100-year design flow under the assumed conditions of a 0.11 percent slope and a Manning's roughness coefficient (n) of 0.013. The minimum required pipe diameter was calculated using Manning's Equation, as shown below:

$$Q\ (Volumetric\ Flow) = \frac{1.49}{Manning's\ n} * (Area) * (Hydraulic\ Radius)^{2/3}\sqrt{Slope}$$

$$20.93\ cfs = \frac{1.49}{0.013} * \left(\frac{\pi D^2}{4}\right) * (D/4)^{2/3}\sqrt{0.0011}$$

$$D = 35.26\ inches$$

Based on this analysis, a 36-inch diameter pipe is required and will be utilized.

The outlet pipe network extends west from the detention pond and connects to the storm sewer system along CR 400 N. This existing network is made up of 18-inch pipe at various slopes. As part of the proposed improvements, the existing downstream pipes will be replaced with 36-inch RCP. Regrading will occur along the full length of the alignment, and existing drainage structures will be upsized to accommodate the larger pipe diameter. A summary of the proposed downstream pipe network is provided in Table 7. Hydraulic calculations accounting for combined offsite flows and proposed site discharge are included in Appendix B.

Table 7. Pipe Network

Location	Length (ft)	Diameter (in)	Grade (%)	Invert Upstream	Invert Downstream
South to INL7	97	12	3.10	865.49	862.47
INL7 TO INL8	50	36	0.12	862.47	862.41
INL8 TO INL9	175	36	0.13	862.41	862.19
INL9 TO INL10	151	36	0.13	862.19	861.99
INL10 TO INL11	164	36	0.14	861.99	861.76
INL11 TO INL12	164	36	0.14	861.76	861.53
INL12 TO INL13	80	36	0.15	861.53	861.41
INL13 TO INL14	75	36	0.16	861.41	861.29
INL14 to Ronald Reagan	268	36	0.16	861.29	860.86

The complete stormwater management system—including inlets, storm sewers, detention pond, multi-stage outlet structure, and downstream piping—has been designed to control post-development runoff in compliance with the Town of Brownsburg Stormwater Standards.

5.0 Summary

The proposed development at 4005 N CR 1000 E, Brownsburg, Indiana will consist of a truck maintenance facility including 42 truck/trailer parking stalls, a 900 square foot office building, and a 2,860 square foot maintenance building. The project will disturb approximately 2 acres and convert a predominantly pervious 3.02-acre parcel into a mix of impervious asphalt, building roof, and limited vegetated cover. Hydrologic analysis using rainfall data from the Hendricks County Stormwater Technical Standards Manual (2016) indicates a significant increase in runoff under proposed conditions, with the 100-year peak flow rising from 2.10 cfs to 17.61 cfs.

To mitigate this increase, a comprehensive stormwater management system has been designed. Runoff will be collected by inlets and storm sewers, routed through a hydrodynamic separator to remove sediment , and detained within a pond sized to provide 34,170 cubic feet of storage volume. A multi-stage outlet structure will restrict discharges using minimum allowable orifice sizes. The system reduces post-development peak discharge to below pre-development rates, providing both quantity control and water quality treatment.

Best Management Practices
For
Storm Water Quality

February 4th, 2026

Owner:

Malhi Kulwinder & Jigna Shah Jtsur

7631 E US Hwy 36

Avon, Indiana 46123

Owner Information:

Name:	Malhi Kulwinder & Jigna Shah Jtsur
Address:	7631 E US Hwy 36 Avon, Indiana 46123
Telephone:	(317) 989-1580
Contact Person:	Jigna Shah Jtsur
Contact Email:	janh505969@gmail.com

BMP Site Drawings:

See Appendix

Responsible Party Required Periodic Inspections: See Appendix B for Tabular Inspection Schedule

It is the responsibility of the Responsible Party to inspect the installed infrastructure to determine if it is functioning as designed quarterly and after each major rainfall event.

Town Performed Periodic Inspections:

Town officials shall inspect the storm water improvement system installed annually. Inspections shall be based on the Town of Brownsburg Ordinances. The Responsible Party shall be responsible for the annual inspection fees and subsequent money spent in maintaining the best management practices as determined by the Town's review official.

Required Perform Maintenance:

If determined by the Town's inspection, the Responsible Party must complete any maintenance of the best management practices within the given specified timeframe. If maintenance activities are not completed, then the reserves the right to complete the maintenance activity and back charge the Responsible Party accordingly.

Routine Maintenance:

It is the responsibility of the Responsible Party to maintain the on-site and adjacent offsite drainage infrastructure. The routine maintenance includes mowing the grassy areas to a height between 4 to 6 inches. It is also the responsibility of the Responsible Party to keep all shrubbery and trees from growing in the right-of-way. The area must be kept clean of all litter and debris as well. Regarding soil within the yard area, if standing water is witnessed in excess for 48 hours after a storm event, the soil must be inspected for reasons of preventing absorption and/or decreasing permeability (i.e. compaction, debris, etc.) The soil needs to be tilled and/or inspected if immediate attention doesn't rectify the situation. During tilling of the soil, mindfulness needs to be kept of the sub-surface drains to prevent damage (i.e. removal or crushing). The soil must maintain a minimum permeability value of fc > 0.50 inches per hour. The sufficient proposed replacement soil such as Urban Land Fox Complex, 0 to 2% slope has sufficient permeability qualities to meet standards, if required. If re-seeding is required, stabilize existing soil and re-seed as necessary using erosion control methods such as straw mats until proper germination takes place. The hydrodynamic separator should be periodically inspected to determine the need for and frequency of maintenance, inspected as soon as construction is complete and then on an annual basis. When maintenance is required, remove all water, debris, oil and sediment using a vacuum truck. Then clean the manhole and fill with water to the invert of the outlet pipe. Volume Control Facilities and BMPs shall be inspected semi-annually and after major storm events exceeding one-half (1.5) inches.

Remedial Maintenance:

The responsibility of maintaining the installed infrastructure is the responsibility of the Responsibility Party. This includes replacing any damaged pipe, concrete structure, curb/gutters, etc. to maintain the function of the infrastructure as originally designed.

Sediment Removal:

Sediment removal from gutter of adjacent curbs.

Statement of Town's Right of Access:

With the location of the access easement, Town officials have the right to enter the property and check the best management practices at their discretion.

Responsible Party for BMP Maintenance:

It is the sole responsibility of the Owner to maintain the best management practices after initial installation. This includes all costs and scheduling associated with the maintenance of BMP. The Owner is required to keep records of all inspection and maintenance activities and will self-certify that inspection and maintenance have been performed according to the Operations and Maintenance Manual, when requested by the city.

GRADING NOTES:

GENERAL GRADE NOTES:

1. REFER TO THE INDIANA DEPARTMENT OF TRANSPORATION (INDOT) STANDARD SPECIFICATIONS, LATEST EDITION, FOR BASIC MATERIALS AND CONSTRUCTION METHODS. THE SECTION BELOW FOR VARIOUS ITEMS ARE TO CLARIFY THE INTENT OF THE REQUIREMENTS FOR THIS PROJECT, PLEASE NOTE THAT OTHER SECTIONS OF THE INDOT STANDARD SPECIFICATIONS MAY ALSO BE APPLICABLE.

2. FILL MATERIAL SHALL CONSIST OF EARTH OBTAINED FROM CUT AREAS, BORROW PITS OR OTHER APPROVED SOURCES. EARTH SHALL BE FREE FROM ORGANIC MATTER AND OTHER DELETERIOUS SUBSTANCES AND LARGE ROCKS. THE FILL MATERIAL SHALL BE PLACED IN LAYERS NOT TO EXCEED SIX INCHES FOLLOWING COMPACTION. PROPER MOISTURE CONTENT OF FILL MATERICAL WILL BE SUCH TO ACHIEVE SPECIFIED COMPACTION DENSITY. ALL FILL BENEATH PAVED AREAS, FLOOR SLABS AND FURTURE BUILDINGS SHALL BE COMPACTED TO AT LEAST 95% OF THE MAXIMUM DRY DENSITY PER ASTM D-1557. FIELD COMPACTING TEST SHALL BE RUN ON EACH LIFT, IN FILL SECTIONS, AND THE REQUIRED COMPACTION ON EACH LIFT SHALL BE IN ACCORDANCE WITH INDOT SECTION 211.

3. MAXIMUM LAWN SLOPE IS 3:1.

4. THE CONTRATOR SHALL CONTACT ALL UTILITY COMPANIES TO LOCATE MAINS, CONDUITS, SERVICE LINES, ETC. IN THE AFFECTED CONSTRUCTION AREA EXISTING UTILITY STRUCTURES ARE SHOWN HERE IN ACCORDANCE WITH AVAILABLE INFORMATION. THE LOCATION AND PROTECTION OF UTILITY STRUCTURES, THEIR SUPPORT AND MAINTENANCE DURING CONSTRUCTION (IN COOPERATION WITH APPLICABLE UTILITY COMPANY) IS THE EXPRESSED RESPONSIBILITY OF THE CONTRACTOR.

5. ALL SPOT ELEVATIONS ARE TO FINISHED GRADE.

6. ALL EXISTING MANHOLE CASTINGS TO BE ADJUSTED TO FINISH GRADE.

7. COMPACT "B" BORROW BACK FILL REQ'D. OVER ALL UTILITIES IN PAVED AREAS.

8. DISTURBED AREAS TO BE GRADED TO FINAL GRADE AND RECEIVE A MIN OF 4" TOPSOIL

9. STABILIZATION MUST BE INITIATED BY END OF THE 7TH DAY THE AREA IS LEFT IDLE AND STABILIZATION SHALL BE COMPLETED WITHIN 14 DAYS AFTER INITIATION.

10. FINAL STABILIZATION IS ACHIEVED WHEN ALL LAND DISTURBING ACTIVITIES HAVE BEEN COMPLETED AND A UNIFORM PERENNIAL VEGATATIVE COVER WITH DENSITY OF 70% ON ALL UNPAVED SURFACES.

11. WATER SHOULD BE PUMPED THROUGH BMP AND INTO THE DETENTION POND.

REINFORCED CONCRETE PIPE:

1. REINFORCED CONCRETE PIPE SHALL BE CLASS III, IV OR V AS SPECIFIED IN ASTM C-76.

2. REINFORCED ELLIPTICAL CONCRETE PIPE SHALL BE CLASS HE-III OR HE-IV AS SPECIFIED IN ASTM C-507.

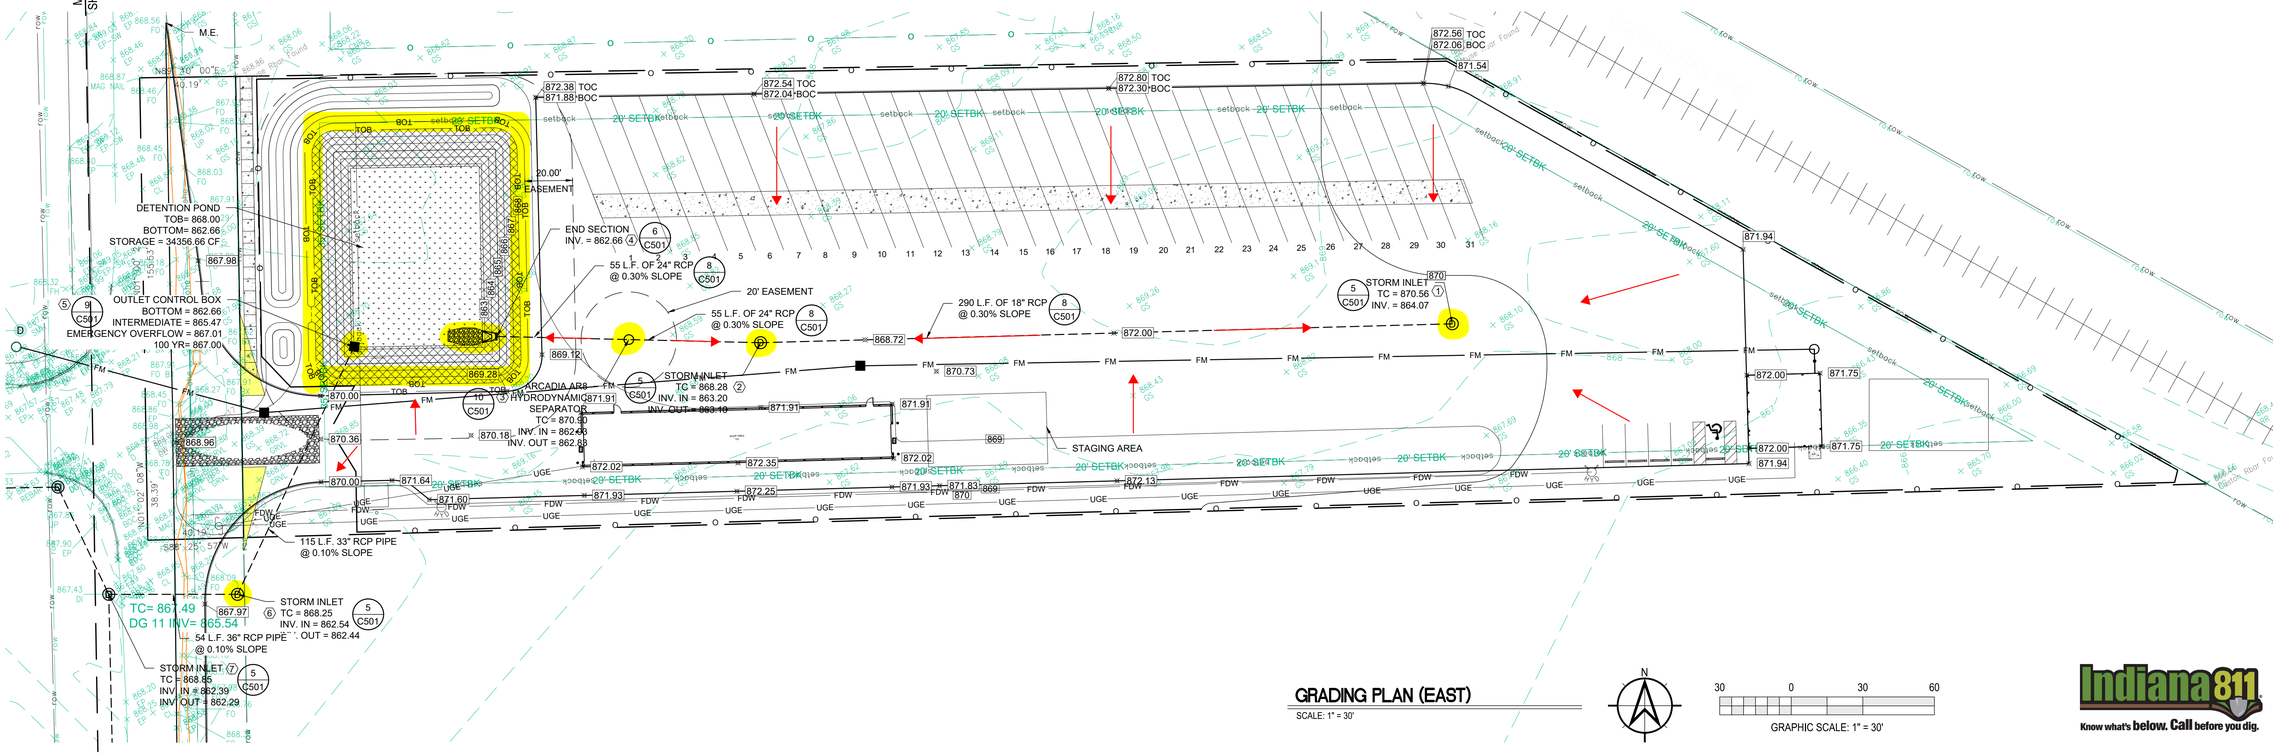

3. LIFT HOLES ARE NOT ALLOWED FOR PIPE LESS THAN 24 INCHES IN DIAMETER. A MAXIMUM OF TWO LIFT HOLES ARE ALLOWED FOR PIPE 24 INCHES IN DIAMETER OR LARGER. LIFT HOLES SHALL BE REPAIRED ACCORDING TO MOST RECENT INDOT STANDARD SPECIFICATIONS.

4. FITTINGS AND SPECIALTIES SHALL BE IN ACCORDANCE WITH THE SPECIFICATIONS FOR THE TYPE OF PIPE BEING USED.

5. EACH PIPE SECTION SHALL BE MARKED WITH DATE OF MANUFACTURE, SIZE AND CLASS OF PIPE, SPECIFICATION DESIGNATION, MANUFACTURER AND PLANT IDENTIFICATION.

6. PIPE SHALL BE FURNISHED WITH A BELL OR GROOVE ON ONE END OF A UNIT OF PIPE AND A SPIGOT OR TONGUE ON THE ADJACENT END OF THE ADJOINING PIPE. ALL JOINTS SHALL HAVE A GROOVE ON THE SPIGOT FOR PLACEMENT OF A RUBBER "O-RING" OR PROFILE GASKET IN ACCORDANCE WITH ASTM C-443. THE GASKET SHALL BE A CONTINUOUS RING WHICH FITS SNUGLY INTO THE ANNULAR SPACE BETWEEN THE OVERLAPPING SURFACES OF THE ASSEMBLED PIPE JOINT.

G = STRAW MULCH 2 TONS/ACRE

* / I / * = IRRIGATION NEEDED DURING JUNE, JULY, AUGUST AND/OR SEPTEMBER ** = IRRIGATION NEEDED FOR 2 WEEKS AFTER SUPPLYING SOD

INSTALLATION SCHEDULE:

CONSTRUCTION PHASE:	CONSTRUCTION SCHEDULE:
PRE-CONSTRUCTION ACTIONS (EVALUATION/PROTECTION OF IMPORTANT SITE CHARACTERISTICS)	BEFORE CONSTRUCTION, EVALUATE, MARK AND PROTECT IMPORTANT TREES AND ASSOCIATED ROOTING ZONES, UNIQUE AREAS (e.g., WETLANDS) TO BE PRESERVED, ON SITE SEPTIC SYSTEM ABSORPTION FIELDS IF APPLICABLE, AND VEGETATION SUITABLE FOR FILTER STRIPS, ESPECIALLY IN PERIMETER AREAS.
CONSTRUCTION ACCESS (CONSTRUCTION ENTRANCES, CONSTRUCTION ROUTES, EQUIPMENT PARKING AREAS)	STABILIZE BARE AREAS IMMEDIATELY WITH GRAVEL AND TEMPORARY VEGETATION AS WORK TAKES PLACE.
SEDIMENT BARRIERS AND TRAPS (BASIN TRAPS, SILT FENCES, OUTLET PROTECTION)	INSTALL PRINCIPAL BASINS AFTER CONSTRUCTION SITE IS ASSESSED. INSTALL ADDITIONAL RUNOFF CONTROL MEASURES DURING GRADING AS NEEDED.
RUNOFF CONVEYANCE SYSTEM (STABILIZED STREAM-BANKS, STORM DRAINS, INLET AND OUTLET PROTECTIONS, WATER QUALITY STRUCTURES)	WHERE NECESSARY, STABILIZE STREAMBANKS AS EARLY AS POSSIBLE. INSTALL PRINCIPLE CONVEYANCE SYSTEM WITH RUNOFF CONTROL MEASURES. INSTALL REMAINDER OF SYSTEM AFTER GRADING.
LAND CLEARING AND GRADING (CUTTING/FILLING/GRADING, DRAINS, SEDIMENT TRAPS, BARRIERS, DIVERSIONS, SURFACE ROUGHENING)	BEGIN MAJOR CLEARING AND GRADING AFTER INSTALLING THE KEY SEDIMENT AND RUNOFF MEASURES. CLEAR BORROW AND DISPOSAL AREAS AS NEEDED. INSTALL ADDITIONAL CONTROL MEASURES AS GRADING PROGRESSES.
SURFACE STABILIZATION (TEMPORARY AND PERMANENT SEEDING, MULCHING, SODDING, RIPRAP)	APPLY TEMPORARY OR PERMANENT STABILIZATION MEASURES IMMEDIATELY ON ALL DISTURBED AREAS WHERE WORK IS DELAYED OR COMPLETED.
BUILDING CONSTRUCTION (BUILDINGS, UTILITIES, PAVING)	INSTALL NECESSARY EROSION AND SEDIMENT CONTROL PRACTICES AS WORK TAKES PLACE.
LANDSCAPING & FINAL STABILIZATION (TOP SOILING, TREES AND SHRUBS, PERMANENT SEEDING, MULCHING, SODDING, RIPRAP)	STABILIZE ALL OPEN AREAS, INCLUDING BORROW AND SPOIL AREAS. REMOVE TEMPORARY CONTROL MEASURES AND STABILIZE.

RESPONSIBLE PARTY FOR EROSION CONTROL

COMPANY: LIONS TRAN INC.
NAME: MALHI KULWINDER
ADDRESS: 7655 E. US HWY 36
AVON, INDIANA 46123
PHONE: 317-989-1580

EROSION CONTROL NOTES:

SOIL EROSION CONTROL SUMMARY:

1. CONTRACTOR SHALL INSTALL SODDING, INLET PROTECTION, AND FILTERS AS SHOWN.

2. MASS GRADE THE SITE (SIDES OF SWALES, MOUNDS AND PONDS TO BE SODDED OR SEEDED AND MULCHED IMMEDIATELY UPON COMPLETION). TEMPORARY SEEDING SHALL BE RECOMMENDED FOR ALL SWALES AND DISTURBED AREAS THAT CANNOT BE FINAL SEEDED WITHIN A TIME PERIOD THAT WILL PREVENT SOIL EROSION, FOR TEMPORARY SEEDING THE CONTRACTOR SHALL UTILIZE A FAST GROWING SEED OF EITHER OATS, ANNUAL RYE GRASS, WHEAT OR RYE DEPENDING UPON TIME OF YEAR. DISTURBED AREAS SHOULD BE KEPT TO A MINIMUM AT ALL TIMES.

3. CONTRACTOR SHALL CONTROL MUD ACCUMULATION ON ALL STREETS SURROUNDING THE PROJECT BY INSTALLING STONE SURFACE AT ALL LOCATIONS WHERE CONSTRUCTION TRAFFIC LEAVES THE SITE. DUST SHALL BE KEPT TO A MINIMUM BY UTILIZING SPRINKLING, CALCIUM CHLORIDE, VEGETATIVE COVER, SPRAY ON ADDITIVES OR OTHER APPROVED METHODS.

4. MAINTAIN ALL FILTERS DURING CONSTRUCTION TO PREVENT ANY BLOCKAGES FROM ACCUMULATED SEDIMENT. ADDITIONAL SEEDING MAY BE REQUIRED DURING CONSTRUCTION AS SPECIFIED BY ENGINEER OR SOIL CONSERVATION SERVICE, RIPRAP SHALL BE PLACED IN AREAS OF HIGH VELOCITY STREAM FLOW (MINIMUM SIZE 1/3 CU.FT.). PAYMENT FOR ADDITIONAL RIPRAP NOT SHOWN ON PLANS AND SEEDING SHALL BE ON A UNIT BASIS.

5. CONTRACTOR SHALL INSTALL ALL STORM SEWER INLET FILTERS AS STORM SEWER SYSTEM IS INSTALLED.

6. ALL PROPOSED STREET AREAS TO BE PAVED AS SOON AS POSSIBLE AFTER SUBGRADE IS PREPARED.

7. CONTRACTOR SHALL REMOVE ALL TEMPORARY EROSION AND SEDIMENT CONTROLS ONLY WHEN THERE IS SUFFICIENT GROWTH OF GROUND COVER TO PREVENT FURTHER EROSION.

8. ALL SWALES SHALL BE SEEDED AND SODDED (AS INDICATED ON THE EROSION AND SEDIMENT CONTROL PLAN) IMMEDIATELY AFTER FINAL GRADING.

9. ALL EROSION CONTROL MEASURES SHALL BE INSTALLED IN ACCORDANCE WITH THE INDIANA HANDBOOK FOR EROSION CONTROL IN DEVELOPING AREAS, MOST RECENT EDITION.

MAINTENANCE:

INSPECT PERIODICALLY, ESPECIALLY AFTER STORM EVENTS, UNTIL THE STAND IS SUCCESSFULLY ESTABLISHED. (CHARACTERISTICS OF A SUCCESSFUL STAND INCLUDE: VIGOROUS DARK GREEN OR BLUISH-GREEN SEEDLINGS; UNIFORM DENSITY WITH NURSE PLANTS, LEGUMES, AND GRASSES WELL INTER-MIXED; GREEN LEAVES; AND THE PERENNIALS REMAINING GREEN THROUGHOUT THE SUMMER, AT LEAST AT THE PLANT BASE.)

PLAN TO ADD FERTILIZER THE FOLLOWING GROWING SEASON ACCORDING TO SOIL TEST RECOMMENDATIONS.

REPAIR DAMAGED, BARE, OR SPARSE AREAS BY FILLING ANY GULLIES, RE-FERTILINZING, OVER- OR RE-SEEDING, AND MULCHING.

IF PLANT COVER IS SPARSE OR PATCHY, REVIEW THE PLANT MATERIALS CHOSEN, SOIL FERTILITY, MOISTURE CONDITION, AND MULCHING AFTER RE-PREPARING THE SEEDBED.

IF VEGETATION FAILS TO GROW, CONSIDER SOIL TESTING TO DETERMINE ACIDITY OR NUTRIENT DEFICIENCY PROBLEMS. (CONTACT YOUR SWCD OR COOPERATIVE EXTENSION OFFICE FOR ASSISTANCE.)

IF ADDITIONAL FERTILIZATION IS NEEDED TO GET A SATISFACTORY STAND, DO SO ACCORDING TO SOIL TEST RECOMMENDATIONS.

EROSION CONTROL NOTES:

PRIOR TO ANY WORK BEING DONE, A TEMPORARY CONSTRUCTION ENTRANCE AND SILT FENCING SHALL BE INSTALLED.

AFTER COMPLETION OF A STORM STRUCTURE, THE CURB INLET PROTECTION SHALL BE INSTALLED IMMEDIATELY.

UPON COMPLETION OF SWALES AND SIDE SLOPES, CONTRACTOR SHALL INSTALL THE EROSION CONTROL BLANKETS.

ALL AREAS NOT DENOTING PERMANENT SEEDING OR FIBER BLANKETS SHALL BE TEMPORARILY SEEDED.

THE EARTHWORK CONTRACTOR IS RESPONSIBLE FOR KEEPING THE EXISTING ROADWAYS CLEAR OF DIRT AND DEBRIS.

ADDITIONAL EROSION CONTROL MEASURES MAY BE REQUIRED BY INSPECTOR AS CONDITIONS WARRANT.

EROSION PROTECTION DURING CONSTRUCTION AND SEEDING:

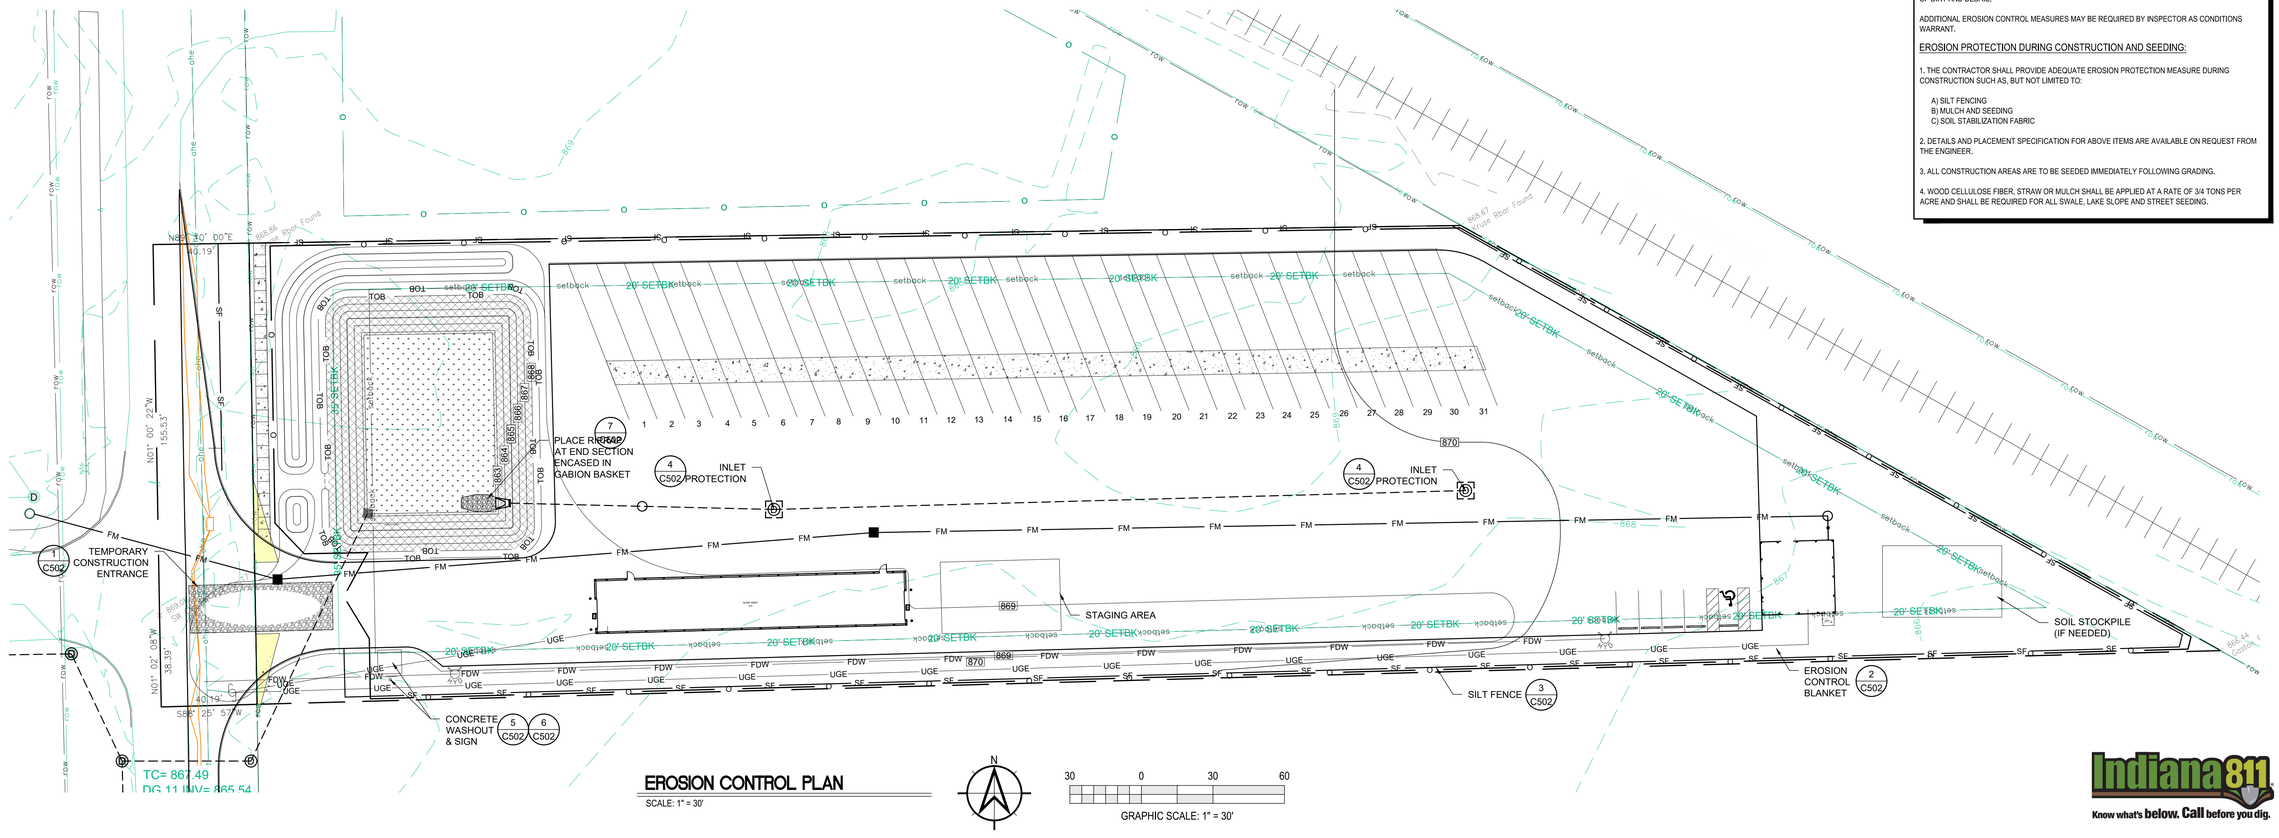

1. THE CONTRACTOR SHALL PROVIDE ADEQUATE EROSION PROTECTION MEASURE DURING CONSTRUCTION SUCH AS, BUT NOT LIMITED TO:

A) SILT FENCING
B) MULCH AND SEEDING
C) SOIL STABILIZATION FABRIC

2. DETAILS AND PLACEMENT SPECIFICATION FOR ABOVE ITEMS ARE AVAILABLE ON REQUEST FROM THE ENGINEER.

3. ALL CONSTRUCTION AREAS ARE TO BE SEEDED IMMEDIATELY FOLLOWING GRADING.

4. WOOD CELLULOSE FIBER, STRAW OR MULCH SHALL BE APPLIED AT A RATE OF 3/4 TONS PER ACRE AND SHALL BE REQUIRED FOR ALL SWALE, LAKE SLOPE AND STREET SEEDING.

Construction Storm Water General Permit Index Sheet

SECTION	TITLE	SHEET
A1	Index of the location of required plan elements in the construction plan	C000
A2	A vicinity map depicting the project site location in relationship to recognizable local landmarks, towns, and major roads	C000
A3	Narrative of the nature and purpose of the project	C303
A4	Latitude and longitude to the nearest fifteen (15) seconds	C000
A5	Legal description of the project site	C201
A6	11x17-inch plat showing building lot numbers/ boundaries and road layout/names	C303
A7	Boundaries of the one hundred (100) year flood plains, floodway fringes, and floodways	C301
A8	Land use of all adjacent properties	C303
A9	Identification of a U.S. EPA approved or established TMDL	C303
A10	Name(s) of the receiving water(s)	C303
A11	Identification of discharges to a water on the current 303(d) list of impaired waters and the pollutant(s) for which it is impaired	C303
A12	Soils map of the predominate soil types	C301
A13	Identification and location of all known wetlands, lakes, and water courses on or adjacent to the project site (construction plan, existing site layout)	C303
A14	Identification of any other state or federal water quality permits or authorizations that are required for construction activities	C303
A15	Identification and delineation of existing cover, including natural buffers	C301
A16	Existing site topography at an interval appropriate to indicate drainage patterns	C301
A17	Location(s) where run-off enters the project site	C301
A18	Location(s) where run-off discharges from the project site prior to land disturbance	C301
A19	Location of all existing structures on the project site	N/A
A20	Existing permanent retention or detention facilities, including manmade wetlands, designed for the purpose of storm water management	N/A
A21	Locations where storm water may be directly discharged into ground water, such as abandoned wells, sinkholes, or karst features	C303
A22	Size of the project area expressed in acres	C000
A23	Total expected land disturbance expressed in acres	C000
A24	Proposed final topography	C301
A25	Locations and approximate boundaries of all disturbed areas	C201
A26	Locations, size, and dimensions of all storm water drainage system such as culverts, storm water sewer, and conveyance channels	C301
A27	Locations of specific points where storm water and non-storm water discharges will leave the project site	C301
A28	Location of all proposed site improvements, including roads, utilities, lot delineation and identification, proposed structures, and common areas	C201
A29	Location of all on-site and off-site soil stockpiles and borrow areas	C302
A30	Construction support activities that are expected to be part of the project	N/A
A31	Location of any in-stream activities that are planned for the project including, but not limited to, stream crossings and pump arounds	N/A
B1	Description of the potential pollutant generating sources and pollutants, including all potential non-storm water discharges	C303
B2	Stable construction entrance locations and specifications	C302
B3	Specifications for temporary and permanent stabilization	C302
B4	Sediment control measures for concentrated flow areas	C301
B5	Sediment control measures for sheet flow areas	C302
B6	Run off control measures	C302
B7	Storm water outlet protection location and specifications	C302/501
B8	Grade stabilization structure locations and specifications	N/A
B9	De-watering applications and management methods	C303
B10	Measures utilized for work within water bodies	N/A
B11	Maintenance guidelines for each proposed storm water quality measure	C303
B12	Planned construction sequence that describes the implementation of storm water quality measures in relation to land disturbance	C303
B13	Provisions for erosion and sediment control on individual residential building lots regulated under the proposed project	N/A
B14	Material handling and spill prevention and spill response plan meeting the requirements in 327 IAC 2-6.1	C303
B15	Material handling and storage procedures associated with construction activity	C303
C1	Description of pollutants and their sources associated with the proposed land use	C303
C2	Description of proposed post-construction storm water measures	C303
C3	Plan details for each storm water measures	C301/501
C4	Sequence describing storm water measure implementation	C303
C5	Maintenance guidelines for proposed post-construction storm water measures	C303
C6	Entity that will be responsible for operation and maintenance of the post-construction storm water measures	C302

NOTES:
"NA" - NON APPLICABLE

Construction Storm Water General Permit Notes Section A

A1 - Index of the location of required plan elements in the construction plan:

An index addressing the required elements within the drawing set is on C000 - Cover Sheet.

A2 - A vicinity map depicting the project site location in relationship to recognizable local landmarks, towns, and major roads:

A map showing the project in relationship to other areas of the county is on C000 - Cover Sheet.

A3 - Narrative of the nature and purpose of the project:

The project consists of the development of a new heavy duty asphalt parking lot with 36 truck and trailer stalls, a 2860 sq. ft. maintenance building, and 900 sq. ft. office building w/ employee parking. The site is located at 4005 North County Road 1000E in Brownsburg, Indiana 46112. Associated with the new improvements will be storm water management system consisting of overland flow, storm inlets, and retention/percolation basin with outlet control. (Shown on C303 - Construction Storm Water General Permit Notes).

A4 - Latitude and Longitude:

The latitude is 39°49'21"N and longitude is 86°20'42.19"W. (Shown on C000 - Cover Sheet)

A5 - Legal description of the project site:

A legal description of the overall parcel is on C201 - Site Plan

A6 - 11 x 17-inch plat showing building lot numbers/boundaries and road layout/names:

An 11x17 in. plan showing the overall property and new improvements is attached to this narrative.

A7 - Boundaries of the one hundred (100) year floodplains, floodway fringes, and floodways:

The 100 year floodway and floodway fringe is on C301 - Grading Plan and is based on best available information from the Indiana Department of Natural Resources.

A8 - Land use of all adjacent properties:

North - Commercial
South - Undeveloped/Woods
East - Railroad/Commercial
West - Residential/Agricultural
(Shown on C303 - Stormwater Pollution Prevention Plan)

A9 - Identification of a U.S. EPA approved or established TMDL:

Site to discharge stormwater into ground via percolation basin or through evaporation. Any dicharge via the emergency spillway will likely evaporate/percolate prior to being received by White Lick Creek (INW01D2_05) which is EPA 303d listed, but has no established TMDL (Shown on C304 - Construction Storm Water General Permit Notes)

A10 - Name(s) of the receiving water(s):

Receiving water is White Lick Creek (INW01D2_05) - (Shown on C303 - Stormwater Pollution Prevention Plan)

A11 - Identification of discharges to a water on the current 303(d) list of impaired waters and the pollutant(s) for which it is impaired:

The impaired condition of White Lick Creek is due to presence of Escherichia Coli (E. coli) (Noted on C304 - Construction Storm Water General Permit Notes)

A12 - Soils map of the predominate soil types:

The soils on this property are predominantly Brookston Silty Clay Loam-Urban Land Complex and Crosby Silt Loam.
Brookston Silty Clay Loam features wetness as the main limitation affecting use and management of this soil type. Crosby Silt Loam features slow permeability and available water capacity is high with moderate content of organic matter.

Both soils are fair to poor for use as subgrade material as well as shear strength, compaction, and stability, medium to high compressibility, moderate to low shrink-swell potential, subject to frost heave, and seasonal high water table. A soils map is on C301 - Grading Plan.

A13 - Identification and location of all known wetlands, lakes, and water courses on or adjacent to the project site (construction plan, existing site layout)

There are no known water courses on or adjacent to this site.

A14 - Identification on any other state or federal water quality permits or authorizations that are required for construction activities:

This phase of the project scope will not require any additional federal or state water permits as noted on C304 - Construction Storm Water General Permit Notes.

Construction Storm Water General Permit Notes Section A (cont'd)

A15 - Identification and delineation of existing cover, including natural buffers:

The site is almost entirely covered with thick/heavy vegetation and trees with partial remnants of an existing gravel drive. The delineation of the various surface coverage is on C301 - Grading Plan.

A16 - Existing site topography at interval appropriate to indicate drainage patterns:

The existing site topography is largely flat with minor relief at the southeast of the site. The existing and proposed contours are on C301 - Grading Plan.

A17 - Location(s) where run-off enters the project site:

As referenced above, the topography in this area is largely flat resulting in little to no potential for run-off entering the site from adjacent property. The existing contours are on C301 - Grading Plan.

A18 - Location(s) where run-off discharges from the project site prior to land disturbances:

The existing site topography is largely flat with minor relief at the southeast of the site. The existing contours are on C301 - Grading Plan.

A19 - Location(s) of all existing structures on the project site:

The existing site is a vacant lot with no existing structures as depicted on C301 - Grading Plan.

A20 - Existing permanent retention or detention facilities, including manmade wetlands, designed for the purpose of stormwater management:

There are no existing retention facilities on site as depicted on C301 - Grading Plan.

A21 - Locations where storm water may be directly discharged into ground water, such as abandoned wells, sinkholes, or karst features:

There are no locations on property where storm water may directly discharge into the groundwater as illustrated on C301 - Grading Plan.

A22 - Size of the project expressed in acres:

The total project are if 3.07 acres as noted on C000 - Cover Sheet.

A23 - Total expected land disturbance expressed in acres:

The total disturbed area is 2.60 acres as noted on C000 - Cover Sheet.

A24 - Proposed final topography:

The final topography is on C301 - Grading Plan and is illustrated as spot elevations and contours.

A25 - Locations and approximate boundaries of all disturbed areas:

The total disturbed area is 2.60 acres as noted on C000 - Cover Sheet and shown as the Limits of Construction on C201 - Site Plan.

A26 - Locations, size and dimensions of all stormwater drainage systems such as culverts, stormwater sewer, and conveyance channels:

The stormwater is conveyed by overland flow, underground storm pipes, and retention pond. These are shown on C301 - Grading Plan.

A27 - Locations of specific points where stormwater and non-stormwater discharges will leave the project site:

Stormwater discharge from the site will be via an emergency spillway from the retention pond at the east end of the site and sanitary discharge will be via a pump and force main at the west end of the site.(Shown on C301 - Grading Plan & C402 Sanitary Force Main Plan & Profile.

A28 - Location of all proposed site improvements, including roads, utilities, lot delineation and identification, proposed structures, and common areas:

All the surface improvements including buildings, impervious areas, new surface finishes, etc. are on C201 - Site Plan for horizontal notations and C301 - Grading Plan for elevations.

A29- Location of all on-site and off-site soil stockpiles and borrow areas:

The soil storage area will be on site located at the east end of the site (west of the pond). All soil will be placed in the final location or hauled off upon completion of construction as shown on C302 - Erosion Control Plan.

A30- Construction support activities that are expected to be part of the project

Any construction support area will be within the limits of disturbance and used as directed by the contractor. Since they are within the limits of disturbance, there will be no impact sensitive areas.

A31- Location of any on-stream activities that are planned for the project including, but not limited to, stream crossings and pump arounds:

There are no in stream activities associated with this project.

Construction Storm Water General Permit Notes Section B

B1- Description of the potential pollutant generating sources and pollutants, including all potential non-storm water discharges:

1. Concrete Washout Area: Specific concrete washout area shall be established and labeled.
   a) The specific concrete wash out will be in a provided lined roll off box at a specific location near the entrance to the job site.
   b) The lined roll off box will be placed on stable soil with a stone approach.
   c) Once the lined roll off box is full, it will be removed from the site and discarded as clean fill once solid. A new lined roll off box will replace the one removed.
2. Construction Mobile Equipment Fluid
   a) All fueling of equipment will be managed and completed on a stone surface.
   b) Daily observation of all equipment for inspection of leaks or potential leaks of any fluids.
   c) Any observed fluid leaks are to be handled immediately with the equipment being moved to a stable stone surface and placed out of operation until maintenance is completed.
   d) Spill kits are to be utilized once the equipment is moved to the stable stone surface to prevent leakage from penetrating the ground or impacting storm water runoff.
3. Construction Material Waste
   a) All material waste is to be placed in provided roll off boxes as it is generated.
   b) Full roll off boxes are to be removed and properly disposed of in a licensed facility.
   c) No debris is to be stored on the ground surface at any time.
   These items are noted on C303 - Stormwater Pollution Prevention Plan.

B2- Stable construction entrance locations and specifications:

A stable construction entrance consisting of compacted subgrade, filter fabric and #2 stone is to be used for all construction traffic entering / exiting the site. The stone surface is to be maintained with new stone as necessary to maintain a solid drive surface. The location of the temporary construction entrance is shown on C302 for plan view and Sheet C502 for detail.

B3- Specifications for temporary and permanent stabilization:

The provisions for temporary stabilization during construction as well as permanent stabilization are included in the drawing set. The information contains specific stabilization techniques for the conditions of the site as well as timing of installation.

For temporary construction stabilization, it is the Contractor responsibility to maintain the stabilization during the construction duration and until permanent stabilization is installed.

For permanent stabilization, it is expected installation to occur immediately after final grading of the soil surface. Permanent stabilization is to be maintained by the Owner until 75% effective cover is established on the soil surface.

The stabilization is noted on C302 - Erosion Control Plan.

B4- Sediment control measures for concentrated flow areas:

The concentrated flow is protected at the pond inlet with riprap of minimum size being 6 inches and at the emergency spillway with stone dam as shown on C301 - Grading Plan and details on C501 & C502 - Sections and Details.

B5- Sediment control measures for sheet flow areas:

Sediment control for sheet flow is handled at the project perimeter with silt fence. (Shown on C302 - Erosion Control Plan).

B6- Run-off control measures:

Sediment control for sheet flow is handled at the project perimeter with silt fence. (Shown on C302 - Erosion Control Plan).

B7- Stormwater outlet protection location and specifications:

The concentrated flow is protected at the pond outlet with the previously mentioned rock dam as shown on C302 - Erosion Control Plan.

B8- Grade stabilization structure locations and specifications:

The grade on the site is largely flat and remain so post construction. There are no stabilization structures planned for this project as illustrated on C301 - Grading Plan.

B9- Dewatering applications and management methods:

Any dewatering required will be directed to the low area of the site (east) where it can percolate into existing soil. The use of sump pumps can be used to dewater where necessary. (Noted C303 - Stormwater Pollution Prevention Plan)

B10- Measures utilized for work within waterbodies:

This is not applicable to this project. (Noted C303 - Stormwater Pollution Prevention Plan)

B11- Maintenance guidelines for each proposed stormwater quality measure:

Silt fence both surrounding the site and at each protected inlet is to be inspected weekly and after storm events. Breaks, tears, or damaged silt fence is to be replaced immediately. Erosion control blankets are to be inspected weekly and after storm events. Damaged areas are to be repaired by re-securing displaced matting, replacing torn areas, and or removing debris to ensure vegetation growth. Concrete washouts are to be inspected daily to ensure there are no tears, structural damage, or leaks. Damaged concrete washouts are to be repaired.

B12- Planned construction sequence that describes the implementation of stormwater quality measures in relation to land disturbance:

The construction sequence for installation of the erosion control measures and stormwater pollution prevention devices are detailed on C302 - Erosion Control Plan. A pre-construction meeting is to be scheduled with the Town of Brownsburg a minimum of 48 hours prior to the start of construction. Per the IDEM CSGP Section 6.4(a)(9)(B) a notice of termination shall be verified by the local MS4 before submittal to IDEM. The town of Brownsburg shall be contacted prior to filing of the Notice of Termination to verify eligibility, for termination of permit coverage.

B13- Provisions for erosion and sediment control on individual residential building lots regulated under the proposed project:

Not applicable to this project. (Noted C303 - Stormwater Pollution Prevention Plan)

B14- Material handling and spill prevention and spill response plan meeting the requirements in 327 IAC 2-6.1:

The potential materials on site that could cause a spill response include fuels, petroleum fluids or other liquids as part of the construction equipment on site. If a spill occurs, immediate determination of the extent and emergency response requirements should be determined. Immediate containment of the spill with onsite spill kits should be completed. Once the spill is contained, contact is to be made to the Indiana Dept. of Environmental Mgmt., Office of Land Quality, Emergency Response Section: 1-888-233-7745 for in-state calls (toll free) within two hours of the spill. The contact should include the likelihood of damage to the waterways of the State of Indiana. This information is noted on C303 - Stormwater Pollution Prevention Plan.

B15- Material handling and storage procedures associated with construction activity:

All construction debris and wastes are to be loaded directly into provided roll off boxes for proper disposal off site. In no terms is debris or waste to be stored on site awaiting disposal or burned on property. Liquid wastes such as concrete wash out is to be disposed in the appropriate concrete wash out lined roll off boxes as provided. This includes any mortar/masonry/concrete grout material. Once these containers are full, they are to be removed from the site and disposed of in a licensed facility. Roll off boxes are to be rotated empty for full boxes for the entire project duration.

Construction Storm Water General Permit Notes Section C

C1- Description of pollutants and their sources associated with the proposed land use:

The post construction land use will have potential contaminants such as fuels, oils, grease, tires and other mobile equipment fluids. All materials, including mobile equipment will be stored on impervious surfaces during non-use or operation. (Noted on C303 - Stormwater Pollution Prevention Plan)

C2- Description of proposed post-construction stormwater measures:

The post construction contaminants are minimized by impervious surfaces being directed to a hydrodynamic separator designed to collect sediment and pollutants prior to entering the bioretention pond. This helps alleviate any debris that may overtop the emergency spillway. (Noted C303 - Stormwater Pollution Prevention Plan)

C3- Plan details for each stormwater measure:

The post construction stormwater measures is primarily a hydrodynamic separator and bioretention pond as shown on C301 - Grading Plan and L101 - Landscape Plan.

C4- Sequence describing stormwater measure implementation:

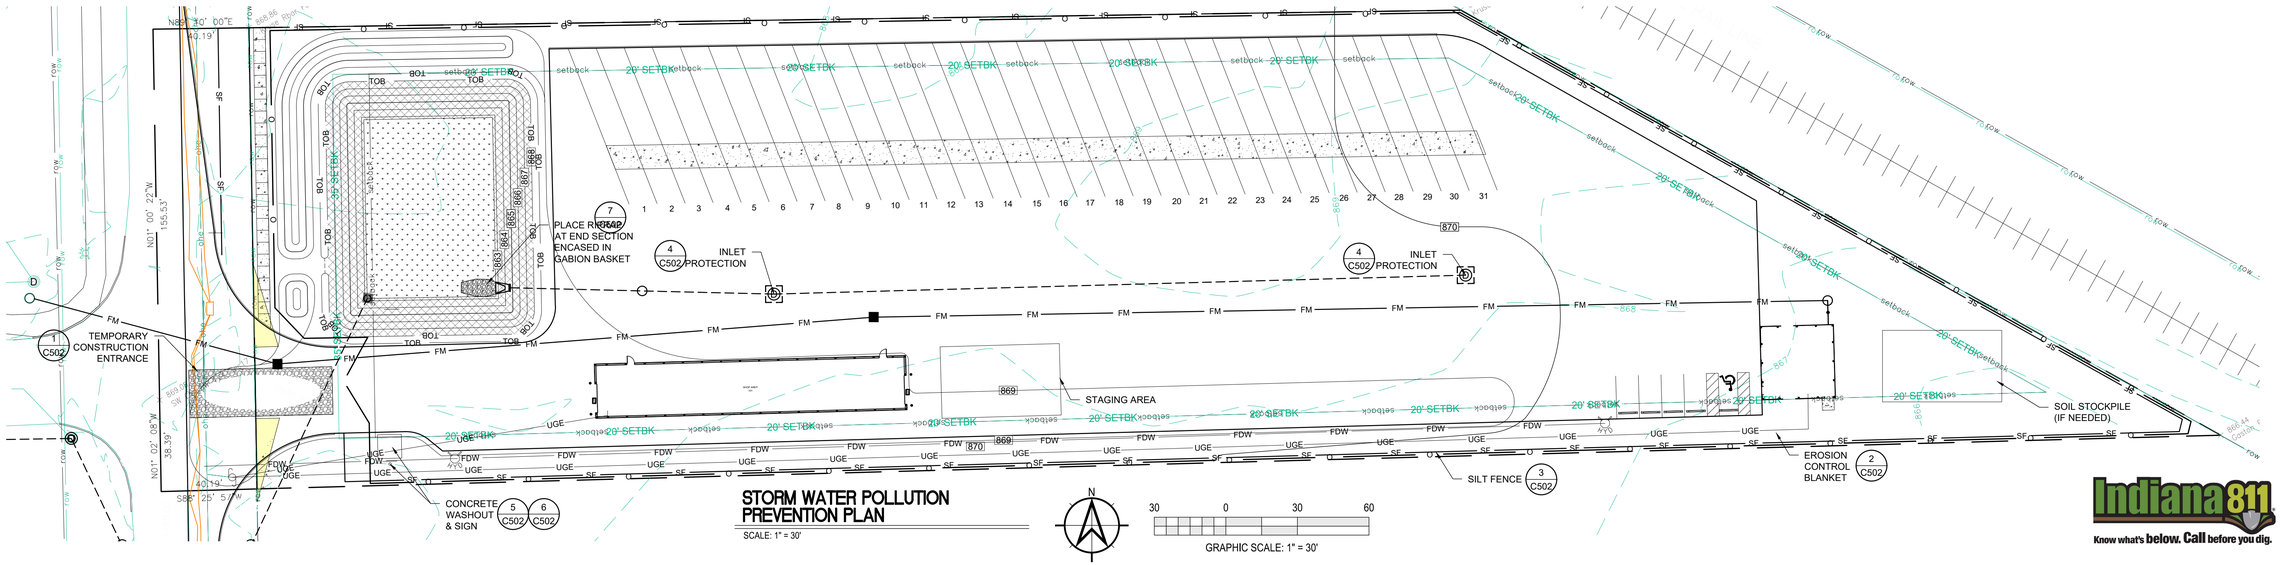

The sequence of installation for the post construction stormwater measure is part of construction sequencing shown C302 - Erosion Control Plan.

C5- Maintenance guidelines for proposed post-construction stormwater measures:

An operations and maintenance manual are part of the submittal information under separate documentation.

C6- Entity that will be responsible for operation and maintenance of the post-construction stormwater measures:

The responsible person for the post construction stormwater measures is the property owner as noted on C302 - Erosion Control Plan.

STORM WATER POLLUTION PREVENTION PLAN

NOTE:

THIS DETAIL SHALL BE USED FOR CONNECTING TO THE END OF AN EXISTING STREET.

EXISTING PAVEMENT SHALL BE SAW CUT, FULL DEPTH, AT A UNIFORM LOCATION INSIDE OF THE EXISTING EDGE OF PAVEMENT, WHERE THE PAVEMENT IS IN GOOD CONDITION AND WILL PROVIDE AN INTERFACE WITH THE FULL PAVEMENT SECTION LINE AND GRADE, FREE FROM LOOSE, DAMAGED, DETERIORATED OR OTHERWISE COMPROMISED MATERIAL. A MINIMUM OF SIX (6) INCHES FROM THE EXISTING EDGE OF PAVEMENT FOR THE FULL WIDTH OF THE EXISTING PAVEMENT; LOCATION OF SAW-CUT TO BE DETERMINED BY THE TOWN OF BROWNSBURG. THE ENTIRE AREA OF THE PROPOSED INTERFACE SHALL BE EXCAVATED TO THE PROPOSED SUBGRADE ELEVATION. THE SUBGRADE SHALL BE STABILIZED IN ACCORDANCE WITH TOWN OF BROWNSBURG STANDARDS AND SPECIFICATIONS. AFTER THE SUBGRADE HAS BEEN STABILIZED AND APPROVED, EXISTING HMA PAVEMENT WILL BE SURFACE MILLED 10 FEET ALONG THE NEW SAW-CUT END OF PAVEMENT TO PROVIDE A MATER STOP AND SMOOTH TRANSITION TO THE NEW PAVEMENT WHEN THE SURFACE MIX IS APPLIED. THE NEW PAVEMENT SECTION SHALL BE INSTALLED IN ACCORDANCE WITH TOWN STANDARDS AND SPECIFICATIONS.

SECTION 02504 – ADJACENT ROADWAY IMPROVEMENTS

PART 1 - GENERAL

1.01 Roadways adjacent to proposed developments shall conform to the following requirements and standards.

A. Adjacent Roadway Improvements

1. Developers shall be responsible for improvements to the existing roadway(s) that front their property. These improvements shall include, but are not limited to, the following items:
   a. Construction of acceleration lanes, deceleration lanes, and passing blisters for each entrance or street intersection as indicated in the Standard Details.
   b. In order to construct adequate acceleration lanes, deceleration lanes, and passing blisters, right-of-way shall be obtained which has a width consistent with the most current accepted Thoroughfare Plan.
   c. The existing roadway along the development frontage shall be widened to match the width requirements based on the functional classification of the roadway as defined by the Thoroughfare Plan. Once widened, the entire roadway fronting the development shall be resurfaced for consistency.
2. Additional improvements may be required depending on field conditions and as determined by the Town of Brownsburg.

DRAWN BY:	JBF
CHECKED BY:	BEM
PROJECT NUMBER:	21346
DATE:	1/13/22
SHEET NUMBER:	C501

ROCK DAM REQUIREMENTS:

1. CONTRIBUTING DRAINAGE AREA: 50 ACRES MAXIMUM

2. DESIGN LIFE: LIMITED TO 3 YRS.

3. SEDIMENT STORAGE: 1,800 CU.FT./ACRE DISTURBED (MINUMUM) MEASURED 1 FT. BELOW SPILLWAY CREST.

4. BASIN SHAPE: MINIMUM 2:1 LENGTH-TO-WIDTH RATIO.

5. BASIN AREA: VARIABLE; THE LARGER THE SURFACE AREA THE GREATER THE TRAPPING EFFICIENCY.

6. DAM CREST HEIGHT: LIMITED TO 8 FT.

7. SPILLWAY CAPACITY: PEAK RUNOFF FROM A 10-YR. FREQUENCY, 24-HR. DURATION STORM EVENT, A MAXIMUM FLOW DEPTH OF 1 FT. AND MINIMUM FREEBOARD OF 1 FT. (ENTIRE LENGTH OF DAM BETWEEN ROCK ABUTMENTS MAY SERVE AS SPILLWAY.)

8. DAM DIMENSIONS: TOP WIDTH, 5 FT. MINIMUM; SIDE SLOPES, 2:1 OR FLATTER UPSTREAM, 3:1 OR FLATTER DOWNSTREAM.

9. EARTH ABUTMENTS: SMOOTH, STABLE, 2:1 OR FLATTER SLOPES.

10. ROCK ABUTMENTS (TO PROTECT EARTH ABUTMENTS): EXTENDED ALONG DOWNSTREAM FACE TO TOE OF DAM AND AT LEAST 1 FT. HIGHER THAN SPILLWAY FACE AT ALL POINTS, 2 FT. ABOVE SPILLWAY CREST, AND 1 FT. THICK, WITH 2:1 OR FLATTER SIDE SLOPES.
11. OUTLET PROTECTION: ROCK APRON, 1-1/2 FT. THICK (MINIMUM), ZERO GRADE, WITH LENGTH EQUAL TO HEIGHT OF DAM OR EXTENDED TO STABLE GRADE, WHICHEVER IS GREATER.

12. ROCK MATERIAL: INDOT REVETMENT RIPRAP.

13. PROTECTION FROM PIPING: GEOTEXTILE FABRIC FOR SEPARATION AND FILTRATION COVERING ENTIRE FOUNDATION, INCLUDING EARTH ABUTMENTS AND APRON.

14. BASIN DE-WATERING: THROUGH A 1 FT. THICK LAYER OF INDOT CA NO. 5 STONE ON UPSTREAM FACE OF THE DAM.

INSTALLATION

SITE PREPARATION:

1. DIVERT RUNOFF FROM UNDISTURBED AREAS AWAY FROM THE ROCK DAM AND BASIN AREA.

2. EXCAVATE THE FOUNDATION FOR THE APRON, USING IT AS A TEMPORARY SEDIMENT BASIN DURING CONSTRUCTION OF THE DAM.

3. CLEAR AND GRUB THE AREA UNDER THE DAM, REMOVING AND PROPERLY DISPOSING OF ALL ROOT MAT, BRUSH, AND OTHER DEBRIS.

4. GRADE THE EARTH ABUTMENTS NO STEEPER THAN 2:1.

DAM AND BASIN CONSTRUCTION

1. EXCAVATE A CUTOFF TRENCH AT THE CENTER LINE OF THE DAM, EXTENDING ALL THE WAY UP THE EARTH ABUTMENTS, AND BACKFILL WITH COMPACTED EARTH FILL.

2. SMOOTH THE DAM FOUNDATION.

3. COVER THE ENTIRE FOUNDATION, INCLUDING BOTH EARTH ABUTMENTS, WITH GEOTEXTILE FABRIC, MAKING SURE THE UPSTREAM STRIPS OVERLAP THE DOWNSTREAM STRIPS AT LEAST 1 FT.

4. CONSTRUCT THE DAM TO PLANNED DIMENSIONS.

5. ONCE THE DAM IS IN PLACE, CLEAR THE SEDIMENT BASIN AREA, PROPERLY DISPOSING OF THE CLEARED MATERIAL.

6. SET A MARKER STAKE TO INDICATE THE CLEANOUT ELEVATION (I.E., POINT AT WHICH THE BASIN IS 50% FULL OF SEDIMENT).

7. DIVERT CONSTRUCTION SITE RUNOFF FLOW INTO THE UPPER END OF THE BASIN USING TEMPORARY DIVERSIONS.

8. STABILIZE ALL DISTURBED AREAS EXCEPT THE LOWER HALF OF THE BASIN.

SAFETY PRECAUTIONS:

1. BECAUSE SEDIMENT BASINS THAT IMPOUND WATER ARE HAZARDOUS, (A) BE SURE SIDE SLOPES ARE 2:1 OR FLATTER, (B) FENCE WITH WARNING SIGNS IF TRESPASSING IS LIKELY, (C) DE-WATER THE BASIN BETWEEN STORM EVENTS, AND (D) FOLLOW ALL STATE AND LOCAL IMPOUNDMENT SITE REQUIREMENTS.

MAINTENANCE

1. INSPECT THE ROCK DAM AND BASIN AFTER EACH STORM EVENT.

2. REMOVE SEDIMENT WHEN IT ACCUMULATES TO HALF THE DESIGN VOLUME (MARKED BY A STAKE).

3. CHECK THE DAM AND ABUTMENTS FOR EROSION, PIPING, OR ROCK DISPLACEMENT, AND REPAIR IMMEDIATELY.

4. IF THE BASIN DOES NOT DRAIN BETWEEN STORMS, REPLACE THE STONE ON THE UPSTREAM FACE OF THE DAM.

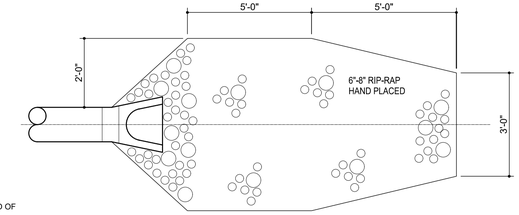

5. IF THE BASIN DRAINS TOO RAPIDLY FOLLOWING A STORM (I.E., LESS THAN 6 HRS.), ADD INDOT CA NO. 5 GRAVEL ON THE UPSTREAM FACE OF THE DAM.

6. ONCE THE CONTRIBUTING ŷŷŷŷŷŷŷŷDRAINAGE AREA HAS BEEN PERMANENTLY STABILIZED, (A) REMOVE WATER AND SEDIMENT FROM THE BASIN;

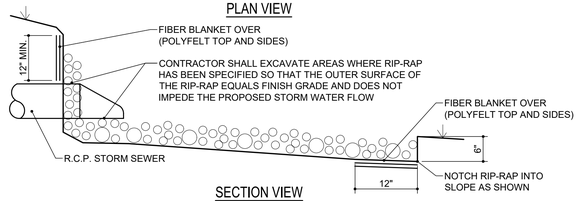

(B) REMOVE THE DAM, DISPOSING OF THE ROCK IN DESIGNATED DISPOSAL AREAS; (C) SMOOTH THE SITE TO BLEND WITH THE SURROUNDING AREA; AND (D) STABILIZE.

COMMON CONCERNS:
FAILURE FROM PIPING ALONG ABUTMENTS-BECAUSE THE FILTER MATERIAL WAS NOT PROPERLY INSTALLED OR THE EARTH ABUTMENTS ARE TOO STEEP. STONE DISPLACEMENT FROM FACE OF DAM-BECAUSE STONE SIZE IS TOO SMALL OR THE FACE IS TOO STEEP. EROSION BELOW DAM BECAUSE THE APRON WAS NOT EXTENDED TO STABLE GRADE. EROSION OF ABUTMENTS DURING SPILLWAY FLOW-BECAUSE THE ROCK ABUTMENT IS NOT HIGH ENOUGH. SEDIMENT CARRIED THROUGH SPILLWAY-BECAUSE THE DRAINAGE AREA IS TOO LARGE; TO SOLVE, DIVERT RUNOFF FROM THE UNDISTURBED AREA AWAY FROM THE BASIN. SEDIMENT LOSS THROUGH DAM-BECAUSE THE LAYER OF AGGREGATE ON THE UPSTREAM FACE IS NOT THICK ENOUGH OR IS TOO COARSE TO RESTRICT FLOW THROUGH THE DAM.

ROCK DAM
NOT TO SCALE — 8 — C502

PLAN VIEW

SECTION VIEW

RIP-RAP REQUIREMENTS:

CONTRIBUTING DRAINAGE AREA: 100 ACRES MAXIMUM.

CAPACITY: PEAK RUNOFF FROM 10-YR. FREQUENCY, 24-HR. DURATION STORM EVENT.

APRON: DESIGN DEPENDS ON CHANNEL DEFINITION, BUT IS LONG ENOUGH TO DISSIPATE RUNOFF ENERGY, SET ON ZERO GRADE, STRAIGHT AND ALIGNED WITH THE RECEIVING STREAM. (IF SITE CONDITIONS REQUIRE A CURVE, SET IT NEAR THE UPSTREAM END.)

FOUNDATION: GEOTEXTILE FABRIC FOR STABILIZATION AND FILTRATION OR WELL-GRADED GRAVEL FILTER LAYER AT LEAST 6 IN. THICK.

MATERIAL: HARD, ANGULAR, AND HIGHLY WEATHER-RESISTANT RIPRAP STONE OF 6 - 8 INCHES IN SIZE.

THICKNESS: 12 IN. MINIMUM OR TWO TIMES THE D 50 STONE DIAMETER,wHICHEVER IS GREATER.

INSTALLATION:

1. EXCAVATE THE APRON AREA SUBGRADE BELOW DESIGN ELEVATION TO ALLOW FOR THICKNESS OF THE FILTER (OR GRAVEL LAYER) AND THE RIPRAP. (THIS OVER-EXCAVATION GREATLY INCREASES THE AMOUNT OF SPOIL.)

2. COMPACT ANY FILL USED IN THE SUBGRADE TO THE DENSITY OF THE SURROUNDING UNDISTURBED MATERIAL, AND SMOOTH ENOUGH TO PROTECT FABRIC FROM TEARING.

3. PLACE THE GEOTEXTILE FABRIC (OR GRAVEL LAYER) ON THE COMPACTED AND SMOOTHED FOUNDATION. IF MORE THAN ONE FABRIC PIECE IS NEEDED, THE UPSTREAM PIECE SHOULD OVERLAP THE DOWNSTREAM PIECE BY AT LEAST 1 FT.

4. INSTALL THE RIPRAP TO THE LINES AND ELEVATIONS SHOWN IN THE DESIGN. IF THE CHANNEL IS POORLY DEFINED, THE FINAL CROSS-SECTION SHOULD BE LEVEL OR SLIGHTLY DEPRESSED IN THE MIDDLE; IF WELL DEFINED, THE FILTER (OR GROUND LAYER) AND RIPRAP SHOULD EXTEND TO THE TOP OF THE BANK.

5. IF THE GEOTEXTILE FABRIC TEARS WHEN PLACING TH RIPRAP, REPAIR IMMEDIATELY BY LAYING AND STAPLING A PIECE OF FABRIC OVER THE DAMAGE AREA, OVERLAPPING THE UNDAMAGED AREAS BY AT LEAST 12 INCHES.

6. MAKE SURE THE TOP OF THE RIPRAP APRON IS LEVEL WITH OR SLIGHTLY BELOW THE RECEIVING STREAM. (RIPRAP SHOULD NOT RESTRICT THE CHANNEL OR PRODUCE AN OVERFALL.)

7. BLEND THE RIPRAP SMOOTHLY TO THE SURROUNDING GRADE.

8. STABILIZE ALL DISTURBED AREAS IMMEDIATELY FOLLOWING INSTALLATION.

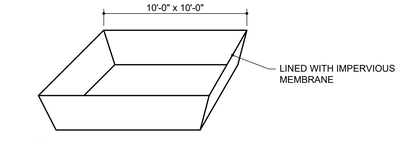

MAINTENANCE:

* INSPECT ROCK CHUTES AFTER STORM EVENTS FOR STONE DISPLACEMENT AND FOR EROSION AT THE SIDES AND ENDS OF THE APRON.
* MAKE NEEDED REPAIRS IMMEDIATELY; USE APPROPRIATE SIZE STONE; AND DO NOT PLACE THEM ABOVE FINISHED GRADE.

COMMON CONCERNS:

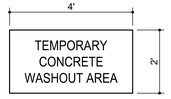

FOUNDATION NOT EXCAVATED DEEP ENOUGH OR WIDE ENOUGH--RIPRAP RESTRICTS THE FLOW CROSS SECTION, RESULTING IN EROSION AROUND THE APRON AND SCOUR HOLES AT THE OUTLET.
RIPRAP APRON ON ZERO GRADE--

1 STAPLE PER SQ. YD. | 1 1/2 STAPLE PER SQ. YD. | 2 STAPLE PER SQ. YD.

GENERAL STAPLE RECOMMENDATIONS

SLOPE GRADIENT

CHANNEL LININGS UTILIZE STAPLE PATTERN "C" WITH ADDITIONAL STAPLES ON SIDE SLOPES.

NOTES:
1. STAPLE PATTERNS APPLY TO ALL NORTH AMERICAN GREEN EROSION BLANKETS.

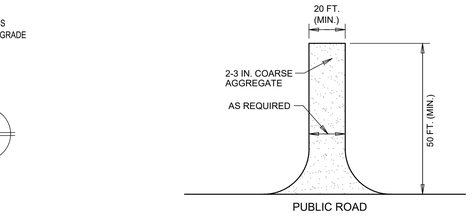

2. STAPLE PATTERNS MAY VARY DEPENDING UPON SOIL TYPE AND AVERAGE ANNUAL RAINFALL.

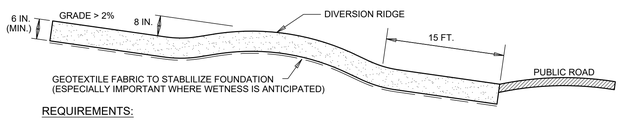

3. AT SLOPE LENGTHS GREATER THAN 300 FEET OR WHERE DRAINAGE OVER LARGE AREAS IS DIRECTED ONTO BLANKETS, STAPLE PATTERN "C" SHOULD BE UTILIZED.

4. CHANNEL LININGS REQUIRE A 2' (MIN.) OVERLAP AT LONGITUDINAL JOINTS AND SIDE SLOPES REQUIRE A 6" (MIN.) OVERLAP. WHERE OVERLAPS OCCUR, THE UPSTREAM BLANKET SHALL OVERLAP THE DOWNSTREAM.

5. NORTH AMERICAN GREEN S150BN TO BE USED FOR EROSION CONTROL BLANKETS.

EROSION CONTROL BLANKET STAPLE PATTERN
NOT TO SCALE — 2 — C502

REQUIREMENTS:

Material: 2-3 in. washed stone (INDOT CA No.2) over a stable foundation.

Thickness: 6 in. minimum

Width: 12 ft. minimum or full width of entrance/exit roadway, whichever is greater.

Length: 50 ft. minimum. The length can be shorter for small sites such as for an individual home.

Washing facility (optional): Level area with 3 in washed stone minimum or a commercial rack, and waste water diverted to a sediment trap or basin.

Geotextile fabric underliner: May be used under wet conditions or for soils within a high seasonal water table to provide greater bearing strength.

INSTALLATION:

1. Avoid locating on steep slopes or at curves in public roads.

2. Remove all vegetation and other objectionable material from the foundation area, and grade and crown for positive drainage.

3. If slope towards the road exceeds 2%, construct a 6-8 in.-high water bar (ridge) with 3:1 side slopes across the foundation area about 15 ft. from the entrance to divert runoff away from the road.

4. Install pipe under the pad if needed to maintain proper public road drainage.

5. If wet conditions are anticipated, place geotextile fabric on the graded foundation to improve stability.

6. Place stone to dimensions and grade shown in the erosion control plan, leaving the surface smooth and sloped for drainage.

7. Divert all surface runoff and drainage from the stone pad to a sediment trap or basin.

MAINTENANCE:

* Inspect entrance drive and sediment disposal area weekly and after storm events or heavy use.
* Reshape pad as needed for drainage and runoff control.
* Topdress with clean stone as needed.
* Immediately remove mud and sediment tracked or washed onto public roads by brushing or sweeping. Flushing should only be used if the water is conveyed into a sediment trap or basin.
* Repair any broken road pavement immediately.

COMMON CONCERNS:

Inadequate runoff control--results in sediment washing onto road.
Stone too small, pad too thin, or geotextile fabric absent--results in ruts and a muddy condition as stone is pressed into the soil: add more stone.
Pad too short for heavy construction traffic--extend the pad beyond the 50-ft. length as needed.
Pad not flared sufficiently at road entrance--results in mud being tracked onto the road and possible damage to the road edge: widen stone entrance and repair road damage.
Unstable foundation--use geotextile fabric under th pad and/or improve foundation drainage.

Annual	Hydrodynamic Separator	Debris, oil, sediment buildup	Remove obstructions and clean manhole. Refill manhole to invert of outlet
Semi-Annually & Post Major Storm Events	Volume Control Facilities	Debris and or sediment buildup	Remove debris and sediment to allow proper flow

APPENDIX C
BMP CHECKLIST

Arcadia™
Maintenance Guide

One of Arcadia's advantages is the ease of maintenance. Like any system that collects pollutants, the Arcadia hydrodynamic separator must be regularly maintained for continued effectiveness. Maintenance is a simple procedure performed using a vacuum truck or similar equipment. The system is designed to minimize the volume of water lost during routine maintenance, reducing disposal costs.

Contractors can access the pollutants stored in the manhole through the manhole cover. This allows them to gain vacuum hose access to the bottom of the manhole to remove sediment and trash. There is no confined space entry necessary for inspection or maintenance.

The entire maintenance procedure typically takes 2 to 4 hours, depending on the system's size, the amount of captured material, and the vacuum truck's capacity.

Local regulations may apply to the maintenance procedure. Safe and legal disposal of pollutants is the responsibility of the maintenance contractor. Maintenance should be performed only by a qualified contractor.

Inspection and Cleaning Cycle

Periodic inspection is necessary to determine the need for and frequency of maintenance. Inspections should begin as soon as construction is complete and then on an annual basis ongoing. Under normal use, the system will need to be cleaned every 1-3 years.

Sites that have excessive oil, fuel or sediment runoff may shorten the maintenance cycle. Periodic inspection is important.

Determining When to Clean

To determine the sediment depth, the maintenance contractor should lower a stadia rod into the manhole until it reaches the top of the captured sediment. Mark this spot on the rod, then continue pushing the rod through the sediment until it reaches the bottom of the sump. Next, mark the second spot on the rod then compare the two markings to determine the depth of the captured sediment.

Maintenance should occur when the sediment has reached a depth of 18" (450 mm).

Maintenance Procedures

1. Remove the manhole cover to provide access to the pollutant storage. Pollutants are stored in the sump, below the unit assembly. Access this area through the access cylinder (larger than 10" (254 mm) diameter for all sizes).
2. Use a vacuum truck or other similar equipment to remove all water, debris, oil and sediment. See Figure 1.
3. Use a high pressure hose to clean the manhole of all remaining sediment and debris. Then, use the vacuum truck to remove the water.
4. Fill the clean manhole with water until the level reaches the invert of the outlet pipe.
5. Replace the manhole cover.
6. Dispose of the polluted water, oil, sediment and trash at an approved facility.
    a. Local regulations prohibit the discharge of solid material into the sanitary system. Check with the local sewer authority for authorization to discharge the liquid.
    b. Some localities treat the pollutants as leachate. Check with local regulators about disposal requirements.
    c. Additional local regulations may apply to the maintenance procedure.

INSPECTION REPORT
POST-CONSTRUCTION STORMWATER MEASURE

Structure Type	Hydrodynamic Separator	Asset ID	
Design Criteria		Location	Coordinates, Driving Directions
This hydrodynamic separator was designed to remove Total Suspended Solids (TSS) from stormwater runoff. The inspection and maintenance of this stormwater device should follow the manufacturer's guidelines and items outlined in this document.		Manufacturer, Model & Serial Number	

Information

Is a Diversion Structure present? ☐ Yes ☐ No

Is there land use upstream with high probability of pollutants? ☐ Yes ☐ No

Can the unit be accessed directly from INDOT right-of-way? ☐ Yes ☐ No

Will traffic control be required for vac truck access? ☐ Yes ☐ No

Inspection Criteria

Maintenance Issues:

Floatables – Does trash/debris buildup cover 100% of the water surface? ☐ Yes ☐ No

Sediment – Does sedimentation buildup exceed 75%? ☐ Yes ☐ No Depth:_____ inches

Visible pollution – Is there an oil sheen, etc.? ☐ Yes ☐ No Depth:_____ inches

Is there staining present on structures, pipes, or pavement? ☐ Yes ☐ No Description:_____.

Is there an odor present? ☐ Yes ☐ No Description:_____.

Is the inflow or outflow point blocked? ☐ Yes ☐ No Description:_____.

Is the Diversion structure blocked? ☐ Yes ☐ No ☐ N/A Description:_____.

Is access to the unit blocked? ☐ Yes ☐ No Description:_____.

Structural Issues:

Is there structural damage to the Manufactured Device? ☐ Yes ☐ No

Is the Manufactured Device casting broken or missing? ☐ Yes ☐ No

Is there structural damage to the Diversion Structure? ☐ Yes ☐ No

INSPECTION REPORT
POST-CONSTRUCTION STORMWATER MEASURE

Structure Type	Hydrodynamic Separator	Asset ID	

Typical Corrective Actions

- **Floatables – Remove floatable trash and debris from unit**
- **Sediment buildup – Remove sediment from unit per manufacture's guidelines**
- **Visible pollution – Remove oil from unit**
- **Inflow and outflow points – Remove blockages**
- **Diversion structure – Remove any blockages, note if device has been installed inline, repair any damages**
- **Inlets and manholes – Repair damages**
- **Maintenance accessibility – Blocked or missing maintenance access**

Inspector Name: _____

Item	Condition when Maintenance is Required	Maintenance Required? (Y/N)	Comments	Expected Maintenance Results	Initials
Trash and Debris	Trash and debris has accumulated in pond.			Trash and debris to be removed from pond.	
Erosion	Erosion of the pond's side slopes and/or scouring of the pond's bottom, that exceeds 6-inches, or where continued erosion is prevalent.			Slope Stabilized using proper erosion control measures and repair methods.	
Bank Stabilization	Bank destabilized by burrowing animal(s).			Remove burrowing animals and repair holes in embankment	
Sediment Accumulation in the Pond Bottom	Sediment accumulations in pond bottom that exceeds the depth of sediment zone.			Sediment removed from pond bottom	
Rip Rap	Vegetative growth on rip rap lined channel or missing rocks and soil is exposed			Remove vegetative growth on rip rap and replace rocks to design specifications	
End Section	End section is blocked / obstructed by trash / debris, sediment or vegetation			Trash, debris, sediment, or vegetation to be removed from end section	
Outlet Structure	Outlet structure is blocked / obstructed by trash, debris, sediment or vegetation			Trash, debris, sediment, or vegetation to be removed from outlet structure

Explanation of Changes from Original DPR:

This landscape plan was previously approved as part of PSDP-24-1, which approved the Quik Trip development plan. Due to changes in the 2025 UDO revision in regard to landscaping requirements, the applicant has requested to submit a revised landscape plan. The changes in the UDO allowed the applicant to modify the number and layout of the plantings, and does require a new approval for the landscape plan only.

Technical Review:

The TECH Review for this project took place on December 18, 2025. Development Services commented that the applicant needed to add an additional ornamental street tree, update the calculation for open space plantings and adjust the number of plantings accordingly, several trees need to be added to parking islands, foundation plantings must be included on the east façade or an equal amount of plantings placed elsewhere on the property, and to ensure that no one species of shrub is over 35% of the total number of shrubs. The Water Department commented that this project is in Citizens Energy Group's water service area. The Wastewater Department commented that the site is outside of Brownsburg's sanitary sewer service area. The Hendricks County Surveyor commented that this does not need Drainage Board approval.

Criteria:

Pursuant to Chapter 8 of the Brownsburg Unified Development Ordinance the Advisory Plan Commission shall make findings of fact on the following criteria:

1) The Development Plan is consistent with the **Comprehensive Plan**.

   Future Land Use Map Link: https://www.brownsburg.org/DocumentCenter/View/1068/2021-Future-Land-Use-Map-PDF

   a) For this criterion, the proposed amendment has no impact. The only change is to the previously approved plans is for landscaping.

      Based on the above information, staff believes this criterion has been met.

2) The Development Plan complies with applicable development requirements and standards of **CHAPTER 2 – ZONING DISTRICTS, CHAPTER 3 – PERMITTED USES,** and/or the PUD Ordinance.

   https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=14

   a) For this criterion, the proposed amendment has no impact. The use of the property is not affected by the change in landscaping.

      Based on the above information, staff believes this criterion has been met.

3) The Development Plan complies with applicable standards found in **CHAPTER 5: SITE DEVELOPMENT** and/or the PUD Ordinance.

   https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=101

   a) For this criterion, the proposed amendment does have an impact. The proposed amendment affects the landscape plan only, and the revised changes do meet Chapter 5 requirements. The changes were primarily related to the number and location of plantings.

      Based on the above information, staff believes this criterion has been met.

4) The Development Plan complies with any **other applicable provisions** of this Ordinance or **Overlay Standards.**

   a) For this criterion, the proposed amendment has no impact.

      Based on the above information, staff believes this criterion has been met.

5) Satisfies any provision related to a development's design as found in **CHAPTER 7 – SUBDIVISION REGULATIONS** and/or the PUD Ordinance.

   https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=168

   a) For this criterion, the proposed amendment has no impact.

      Based on the above information, staff believes this criterion has been met.

6) The Development Plan satisfies the construction requirements of the **Brownsburg Construction Standards and Specifications.**

a) For this criterion, the proposed amendment has no impact. No new tech waivers were requested for this amended landscape plan.

Based on the above information, staff believes this criterion has been met.

Recommendations:

The Advisory Plan Commission may request conditions and commitments related to the project and criteria. Conditions or commitments must be made as part of the motion.

Based on the information provided and the criteria responses, staff recommends a motion to

☐	Approve PSDP-25-11 as presented.
☒	Approve PSDP-25-11 with the following staff conditions: 1. Shrubs are removed from landscape islands and placed elsewhere on site 2. State quantity of foundation plantings relocated and where relocated. 3. The approval of Findings of Fact and Report of Determination. 4. The stamping of the construction plans by the Director.
☐	Deny PSDP-25-11 based on the following criteria:

NOTE: ROOT FLARES TO BE PLANTED AT OR SLIGHTLY ABOVE GRADE
GUY WIRES, HOSE AND STAKES TO BE REMOVED ONE YEAR AFTER PLANTING
SHREDDED HARDWOOD BARK MULCH TO BE BROWN IN COLOR

DECIDUOUS TREE DETAIL

NOT TO SCALE

NOTE: ROOT FLARES TO BE PLANTED AT OR SLIGHTLY ABOVE GRADE
SHREDDED HARDWOOD BARK MULCH TO BE BROWN IN COLOR

SHRUB DETAIL

PLANTING NOTES:

1. IN CASE OF DISCREPANCIES BETWEEN THE PLAN AND THE PLANT LIST, THE PLAN SHALL DICTATE

2. ALL SHRUB AND TREE PLANTING AREAS TO BE COVERED WITH 3" LAYER OF SHREDDED HARDWOOD BARK MULCH THAT IS BROWN IN COLOR.

3. ALL BACKFILL FOR TREE AND SHRUB PLANTINGS SHALL BE FROM EXISTING SOILS. A 5–10–5 ANALYSIS SLOW RELEASE FERTILIZER SHALL BE INCORPORATED INTO BACKFILL AT APPROVED RATES.

4. FINAL PLACEMENT OF PLANT MATERIALS, ETC. SHALL BE APPROVED BY THE LANDSCAPE ARCHITECT PRIOR TO PLANTING OPERATIONS. ALL TREE LOCATIONS SHALL BE MARKED WITH A WOOD STAKE INDICATING VARIETY AND SIZE OF TREE. PLANTING BED LINES SHALL BE MARKED WITH HIGHLY VISIBLE PAINT LINES WITH OCCASIONAL WOOD STAKES FOR REFERENCE. ALL STAKES SHALL BE REMOVED FOLLOWING PLANTING OPERATIONS. LANDSCAPE ARCHITECT RESERVES THE RIGHT TO ADJUST PLANT LOCATIONS ON THE SITE.

5. NO SUBSTITUTIONS OF PLANT MATERIALS WILL BE ALLOWED. IF PLANTS ARE NOT AVAILABLE, THE CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT PRIOR TO BIDDING IN WRITING. PLANTS MAY BE INSPECTED AND APPROVED OR REJECTED ON THE JOB SITE BY THE LANDSCAPE ARCHITECT.

6. ALL PLANTS SHALL MEET OR EXCEED AMERICAN STANDARDS FOR NURSERY STOCK, ANSI Z60.1–2004.

7. PLANTS AND ALL OTHER MATERIALS TO BE STORED ON SITE WILL BE PLACED WHERE THEY WILL NOT CONFLICT WITH CONSTRUCTION OPERATIONS.

8. CONTRACTOR TO OBTAIN AND PAY FOR ALL PERMITS AND FEES THAT MAY BE REQUIRED FOR HIS PORTION OF THE WORK.

9. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT IN WRITING PRIOR TO BID DATE OF ANY PLANTS THEY FEEL MAY NOT SURVIVE IN LOCATIONS AS NOTED ON THE PLANS.

10. ALL LANDSCAPE PLANTINGS TO BE MAINTAINED BY CONTRACTOR FOR 60 DAYS FOLLOWING PLANTING.. GUY WIRES, HOSE AND STAKES TO BE REMOVED ONE YEAR AFTER PLANTING.. MAINTENANCE TO INCLUDE WATERING, WEEDING, CULTIVATING, MULCHING, MOWING, AND ALL OTHER NECESSARY OPERATIONS REQUIRED FOR PROPER ESTABLISHMENT OF PLANTINGS.

11. ALL INSTALLED PLANTINGS SHALL BE APPROPRIATELY WATERED FOR A MINIMUM PERIOD OF ONE YEAR TO ALLOW FOR THEIR ESTABLISHMENT

12. ALL LANDSCAPE PLANTINGS SHALL BE GUARANTEED FOR A PERIOD OF ONE YEAR FOLLOWING FINAL INSPECTION BY LANDSCAPE ARCHITECT. AT END OF THIS PERIOD, PLANT MATERIAL TERMED DEAD OR UNSATISFACTORY BY LANDSCAPE ARCHITECT SHALL BE REPLACED AT NO ADDITIONAL CHARGE BY THE LANDSCAPE CONTRACTOR.

Project Name: Quik Trip Landscape Plan
Record Number: PSDP-25-11
TECH Meeting Date: 12/18/25

The following Technical Review Committee ("TECH") members provided comments for the project as detailed below:

Development Services
- [x] Kevin Tolloty, Senior Planner
- [ ] Lauren Bouslog, Planner I
- [ ] Steve Fletcher, Building Commissioner/Director
- [ ] Frank Wise, Senior Building Inspector

Town Administration
- [ ] Debbie Cook, Town Manager
- [ ]
- [ ] Ethan Pierce, Economic Development Manager

Water Department
- [x] Frank Monts, Superintendent

Wastewater Department
- [x] Kathy Dillon, Water Utilities Director
- [ ]

Street Department
- [ ] Aaron Love, Superintendent
- [ ] Matt Griner, Asst. Superintendent

Parks Department
- [ ] Amber Lane, Director
- [ ]

Fire Territory
- [ ] Paul Hudson, Fire Marshal
- [ ] Jeff Schlageter, Deputy Fire Marshal

Police Department
- [ ] Joe Grimes, Chief
- [ ] Pat Bullock, Captain
- [ ] Bryan Fultz, Major

External Agencies
- [ ] Regan Huff, BCSC
- [x] Dave Gaston, P.S., Hend. Co. Surveyor
- [ ] John Ayers, Hendricks Co. Engineer
- [x] Mary Atkins, Wessler Engineering
- [ ] Angie DeKemper, CountryMark
- [ ] Gerry Jones, Vectren

1) DEVELOPMENT SERVICES

5.10 (D) Street Frontage Landscaping

a) One (1) additional ornamental tree should be shown along Generations Street (four calculated, only three shown on plan).

5.11 (A) On-Site Landscaping

b) Please recalculate the area of open space. Current calculation appears to be from the previous plan for building area. Calculation now refers to total open space instead of building area. Additional plantings will be required.

5.11 (C) Parking Lot Landscaping

c) Please ensure all landscape islands are a minimum of 160 square feet. Label square footage of each island.

d) There should be a total of ten (10) parking lot island trees - one (1) at the end of each row of parking.

5.11 (D) Foundation Plantings

e) There should be a total of 58 foundations plantings - 22 each on the east and west sides, 7 each on the north and south. The north, east, and west sides all have street frontage and would be considered fronts, south is considered a side.

f) A max. of 20% of the 58 plantings may be ornamental grasses (max. of 12). Currently 16 are shown in the plans.

Other Landscape Comments

g) 12 Chokeberry plants are indicated in the landscape schedule but not shown on the plan.

h) No more than one species of shrub may make up over 35% of the total. Currently the number of yew plants is over 35% of the shrubs.

2) BUILDING

a) None

3) CAPITAL PROJECTS

a) None

4) ECONOMIC DEVELOPMENT

a) None

5) WATER

a) None - This is in Citizens Energy Group's water service area

6) WASTEWATER

a) None - Sanitary is outside of Brownsburg service area

Please provide a written response to this report addressing each issue and, if necessary, indicate where on the revised plans the modification has been made.

TOWN OF BROWNSBURG STORMWATER/DRAINAGE PLAN REVIEW

CO Comment Originator
CR Comment Respondee

NAME OF PROJECT: QuikTrip 7263
DESIGN PACKAGE: Development Plan
DESIGNER: Spaceco

		Wessler - Reviewer to complete		Designer to complete	
No.	PAGE/SHEET REFERENCE	CO	COMMENT	CR	RESPONSE
	General	RS	The following comments are for information and planning purposes when preparing development plans. Note that Chapter 151 was updated April 25, 2024.		
1	Storm sewer design	RS	For the future development plan submittal, refer to Ch. 151.21 D. for storm sewer design standards and drainage report requirements.		
2	Flood routing	RS	For development plans, evaluate stormwater ponding and overflow path routing for Ch. 151.21 I.		
3	Drainage Report	RS	Refer to Ch. 151.20.B (2)(f) for drainage report guidelines. Include runoff, storm sewer sizing calculations, etc. when preparing the drainage report.		
4	Post-construction stormwater quality	RS	Refer to Ch. 151.23 for post-construction water quality volume and flow rate requirements. Upstream BMPs are required for ponds/underground detention. An Operation and Maintenance Manual and easements are required for BMPs. (Note: 30 minute minimum Tc for water quality flow rate calculations). For gas stations, additional treatment is required to remove zinc, copper, lead and polyaromatic hydrocarbons.		
5	County approval	RS	Coordinate with the Hendricks County Surveyor to determine if Drainage Board approval is necessary.		
6	Details and specifications	RS	Refer to the Town's Standard Details and Specifications when developing Construction Plans.		
7	Stormwater detention	RS	Detention design requirements follow Chapter 151.21 and Detail EW-04 "Detention/Retention Ponds" in the Town's Standard Details and Specifications. Ordinance revised in April 2024.		
8	Adequate outlet	RS	Ensure that there is an adequate outlet for drainage of stormwater.		
9	Impervious Surface Area	RS	For projects that are not single family homes, please provide the total amount of impervious surface area in square feet for the completed project. In addition to the total, provide a breakdown of total compacted gravel, total concrete/asphalt and total building footprint (in square feet). This is used for stormwater utility billing.		
10	Erosion control and SWPPP	MMT	If the project will disturb 1 acre or more of land then a SWPPP and Construction Stormwater General Permit will be required for the development plan submittal. Refer also to Chapter 151.22 for SWPPP requirements.		

These comments should not be construed as a comprehensive list of comments, and the reviewer may make additional comments based on subsequent submittals

Technical Review Committee
Town of Brownsburg
61 North Green Street
Brownsburg, Indiana 46112

RE: PDSP-25-11 – QuikTrip Landscape Plan

Dear Technical Advisory Committee:

The following is our response to your initial comments from the Technical Review Committee meeting on December 18th, 2025.

DEVELOPMENT SERVICES

5.10 (D) Street Frontage Landscaping
- 1 redbud tree was added along Generations drive.

5.11 (A) On-Site Landscaping
- On site open space area was recalculated and updated accordingly on the chart
- 9 shade trees were added - 3 Green Mountain Sugar Maple and 6 Tulip Tree
- 19 large shrubs were added - 3 Mohawk Viburnum and 16 Oakleaf Hydrangea

5.11 (C) Parking Lot Landscaping
- The square footage of parking lot islands has been added to the plan. There are two under 160 square feet, but the required plantings still fit within this space. These islands have already been constructed in the field and were previously approved.
- There appear to be 9 parking lot islands on the plan. 4 Ginko trees have been added for a total 9 parking lot island trees

5.11 (D) Foundation Plantings
- 26 additional foundation plantings have been added
- 32 plants are shown around the building. The additional 26 have been added to the parking lot islands. The UDO allows flexibility for location depending on the entrances and access requirements around the building.
- 4 ornamental grasses were removed to meet the 20% requirement

Other Landscape comments.

- The chokeberry plants have been updated accordingly
- The amount of yews have been reduced and replaced with lilacs

STORMWATER

The stormwater design was approved under DPR-24-1 that satisfy all these requirements. No changes are proposed to the stormwater system.

Please contact me with any questions or concerns you may have regarding the attached submittal.
Sincerely,

Dillon Reynolds, PE
Senior Project Manager

DECIDUOUS TREE DETAIL

NOT TO SCALE

SHRUB DETAIL

PLANTING NOTES:

1. IN CASE OF DISCREPANCIES BETWEEN THE PLAN AND THE PLANT LIST, THE PLAN SHALL DICTATE

2. ALL SHRUB AND TREE PLANTING AREAS TO BE COVERED WITH 3" LAYER OF SHREDDED HARDWOOD BARK MULCH THAT IS BROWN IN COLOR.

3. ALL BACKFILL FOR TREE AND SHRUB PLANTINGS SHALL BE FROM EXISTING SOILS. A 5–10–5 ANALYSIS SLOW RELEASE FERTILIZER SHALL BE INCORPORATED INTO BACKFILL AT APPROVED RATES.

4. FINAL PLACEMENT OF PLANT MATERIALS, ETC. SHALL BE APPROVED BY THE LANDSCAPE ARCHITECT PRIOR TO PLANTING OPERATIONS. ALL TREE LOCATIONS SHALL BE MARKED WITH A WOOD STAKE INDICATING VARIETY AND SIZE OF TREE. PLANTING BED LINES SHALL BE MARKED WITH HIGHLY VISIBLE PAINT LINES WITH OCCASIONAL WOOD STAKES FOR REFERENCE. ALL STAKES SHALL BE REMOVED FOLLOWING PLANTING OPERATIONS. LANDSCAPE ARCHITECT RESERVES THE RIGHT TO ADJUST PLANT LOCATIONS ON THE SITE.

5. NO SUBSTITUTIONS OF PLANT MATERIALS WILL BE ALLOWED. IF PLANTS ARE NOT AVAILABLE, THE CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT PRIOR TO BIDDING IN WRITING. PLANTS MAY BE INSPECTED AND APPROVED OR REJECTED ON THE JOB SITE BY THE LANDSCAPE ARCHITECT.

6. ALL PLANTS SHALL MEET OR EXCEED AMERICAN STANDARDS FOR NURSERY STOCK, ANSI Z60.1–2004.

7. PLANTS AND ALL OTHER MATERIALS TO BE STORED ON SITE WILL BE PLACED WHERE THEY WILL NOT CONFLICT WITH CONSTRUCTION OPERATIONS.

8. CONTRACTOR TO OBTAIN AND PAY FOR ALL PERMITS AND FEES THAT MAY BE REQUIRED FOR HIS PORTION OF THE WORK.

9. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT IN WRITING PRIOR TO BID DATE OF ANY PLANTS THEY FEEL MAY NOT SURVIVE IN LOCATIONS AS NOTED ON THE PLANS.

10. ALL LANDSCAPE PLANTINGS TO BE MAINTAINED BY CONTRACTOR FOR 60 DAYS FOLLOWING PLANTING.. GUY WIRES, HOSE AND STAKES TO BE REMOVED ONE YEAR AFTER PLANTING.. MAINTENANCE TO INCLUDE WATERING, WEEDING, CULTIVATING, MULCHING, MOWING, AND ALL OTHER NECESSARY OPERATIONS REQUIRED FOR PROPER ESTABLISHMENT OF PLANTINGS.

11. ALL INSTALLED PLANTINGS SHALL BE APPROPRIATELY WATERED FOR A MINIMUM PERIOD OF ONE YEAR TO ALLOW FOR THEIR ESTABLISHMENT

12. ALL LANDSCAPE PLANTINGS SHALL BE GUARANTEED FOR A PERIOD OF ONE YEAR FOLLOWING FINAL INSPECTION BY LANDSCAPE ARCHITECT. AT END OF THIS PERIOD, PLANT MATERIAL TERMED DEAD OR UNSATISFACTORY BY LANDSCAPE ARCHITECT SHALL BE REPLACED AT NO ADDITIONAL CHARGE BY THE LANDSCAPE CONTRACTOR.

☒	Lighting Plan, O&M Manual, Traffic Impact Study, West Wynne Farms PUD and Amendment

Site and Zoning Map:

Project and Site Background:

This project is a new McDonald's, with drive-thru, to be located at the southeast corner of S. Green Street and Northfield Drive. The restaurant will be accessed from Northfield Drive to the north and from a shared access with Christian Bros. to the south, from S. Green Street. The access point from S. Green Street will be moved to the north, straddling the property line between Christian Bros. and the proposed McDonald's.

The parcel is part of the West Wynne Farms PUD, specifically part of Parcel R. The lot was created as part of the Christian Bros. subdivision. No variances or waivers have been filed for this project.

Technical Review:

The TECH review for this project took place on December 18, 2025. Development Services commented that vision clearance triangles need added to the site and landscape plans, the lighting plan needs to be in lux, parking calculations needed to be revised to cite the correct code, building architecture shall be a minimum of 75% masonry or architectural block on each side, there shall be a minimum of 30% fenestration per side, facades over 75 feet must recess or project for a portion of their length, number of landscaping plantings shall be calculated in accordance with the PUD, perimeter parking screening shall include shrubs at a minimum of three feet in height, dumpster enclosure details should be provided, and a multi-use trail shall be included along S. Green Street. Building Services commented that a power line and conduit running through their easement which powers Town of Brownsburg signage. The Water Department commented that the water service provider for this property is Citizens Energy. The Wastewater Department commented Drawing C001 number 22 under utilities section should reference sanitary conforming to west central conservancy requirements and not Town of Brownsburg, and an updated O&M manual should be provided. The Fire Territory commented where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road, as measured by an approved route around the exterior of the facility or building, on-site fire hydrants and mains shall be provided and increases to 600 feet for R-3 and Group U occupancies. The Hendricks County Surveyor noted that this will need to go through the Hendricks County Drainage Board for approval. All stormwater comments submitted by Wessler will need to be addressed as well.

Traffic Study:

A traffic study was completed in conjunction with this and neighboring development. These are the recommendations from CEC (Traffic engineering firm):

- Construct a right-in/right-out only access road connecting the proposed McDonald's restaurant, the adjacent auto repair center currently under construction, and the existing Majestic Road to Northfield Drive. The access road is located approximately 350' east of S Green Street (measured center to center). One (1) lane for ingress and one (1) lane for egress should be provided. The access road should be controlled by a Stop sign on the northbound approach to Northfield Drive.
- Construct an entrance only site access driveway from the Access Road which provides one lane for ingress traffic.

- Construct an exit only site access driveway to the Access Road which provides one (1) lane for egress traffic. The driveway should be controlled by a Stop sign on the site driveway egress approach to the Access Road.
- Construct a full access driveway connecting the proposed McDonald's restaurant to the proposed Christian Brothers Automotive Service Center. The drive should provide one (1) lane for ingress traffic and one (1) lane for egress traffic.
- The proposed site driveways and access roads should be constructed to provide sight triangles that are free of sight obstructions, such as parked vehicles, buildings, walls, hedges, bushes, low growing trees, etc. to maintain a clear line of sight to potential conflicting vehicles.

Criteria:

Pursuant to Chapter 8 of the Brownsburg Unified Development Ordinance the Advisory Plan Commission shall make findings of fact on the following criteria:

1) The Development Plan is consistent with the **Comprehensive Plan**.

   Future Land Use Map Link: https://www.brownsburg.org/DocumentCenter/View/1068/2021-Future-Land-Use-Map-PDF

   a) The Future Land Use Map notes this area as being used for Local Commercial uses. The areas shaded in brown to the east are designated multi-family residential areas, with the yellow areas as single-family residential. Local commercial areas are those envisioned for uses that serve the surrounding neighborhood and Town and of a smaller scale. The existing commercial tenants in this corridor are a little higher intensity than what would be expected of local commercial, and the addition of a fast food restaurant will fit well among those uses.

      It should be noted that this PUD has been in effect since annexation in Brownsburg in 2011, and was found at that time to be in compliance with the comprehensive plan. The proposed use of this property for a fast food restaurant is a permitted use in the West Wynne Farms PUD.

      Based on the above information, staff believes this criterion has been met.

LOCAL COMMERCIAL (From Comprehensive Plan)
Areas designated as local commercial are envisioned for uses that serve the surrounding neighborhood and Town. Uses should be of a scale and intensity considered generally compatible with adjacent and nearby residential. Primary uses for this area include small markets and specialty food shops; dentists and small medical offices; boutique shopping and personal services like salons, barbers, and the like; and small businesses and professional services. Additional uses such as banks or others that provide a service to the neighborhood but may generate more traffic or require accommodations to drive-up services may be a reasonable fit with additional review.

Local Commercial

Corridor Commercial

2) The Development Plan complies with applicable development requirements and standards of **CHAPTER 2 – ZONING DISTRICTS, CHAPTER 3 – PERMITTED USES,** and/or the PUD Ordinance.

   a) The project is part of the West Wynne Farms PUD and a fast food restaurant is permitted by right in the section of the PUD. Proposed building setbacks are over 90 feet for each side, well exceeding the minimum 30' front setback, minimum 10' side setback, and minimum 15' rear setback. The maximum building height is 50 feet, and the proposed building will be just under 19 feet in height. The PUD maximum lot coverage is 50% for structures and 90% for all impervious surfaces. As measured, the proposed project structures are 6.5% lot coverage and 69.2% impervious surfaces.

   Based on the above information, staff believes this criterion has been met.

3) The Development Plan complies with applicable standards found in **CHAPTER 5: SITE DEVELOPMENT** and/or the PUD Ordinance.

   a) *Landscaping*: The total number of plantings did not meet the minimum required calculation from section 9.03 of the PUD ordinance. Additionally, wintercreeper has been flagged as an invasive species and will need replaced. Landscape comments have been received although as of the time of this report, a revised landscape plan has yet to be submitted.

   b) *Lighting*: There is a maximum of 20 lux along the south side, and 5 lux on the east side. Measurements were given in foot candles, and an estimated conversion of numbers to lux did not clearly show this requirement has been met.

c) *Parking*: One parking space is required per two seats. Forty-eight seats are proposed which result in a minimum of 24 spaces. Forty-seven parking spaces are provided.

d) *Vision Clearance Triangle*: Vision Clearance Triangles have will be included on the landscape plans.

e) *Architecture:* A minimum of 75% of the façade (all sides) shall be masonry or architectural block. Revised plans show this has been achieved. There is only a comment regarding fenestration that is currently being resolved.

Comments have been received addressing all Tech Review comments, however, several revised plans are outstanding as of the date of this report. Based on the above information, staff believes this criterion will be met.

4) The Development Plan complies with any **other applicable provisions** of this Ordinance or **Overlay Standards.**

a) No special provisions that relate to the plat are noted for this site.

b) Overlay districts are not applicable to this project.

Based on the above information, staff believes this criterion has been met.

5) Satisfies any provision related to a development's design as found in **CHAPTER 7 – SUBDIVISION REGULATIONS** and/or the PUD Ordinance.

a) The project is primarily subject to the West Wynne Farms PUD, which heavily references the 2013 Zoning Ordinance. Landscape and architectural items have been addressed.

Based on the above information, staff believes this criterion has been met.

6) The Development Plan satisfies the construction requirements of the **Brownsburg Construction Standards and Specifications.**

a) The entrance drive has been moved northward, to the north/south property line between McDonald's and Christian Brothers.

b) The project's stormwater review is still ongoing. Revised plans addressing Tech Review comments have been received and are under review. A waiver for vertical separation has been discussed, but unclear if one has been officially requested.

Based on the above information, staff believes this criterion will be met.

Recommendations:

The Advisory Plan Commission may request conditions and commitments related to the project and criteria. Conditions or commitments must be made as part of the motion.

Based on the information provided and the criteria responses, staff recommends a motion to

☐	Approve PSDP-25-10 as presented.
☒	Approve PSDP-25-10 with the following staff conditions: 1. The approval of Findings of Fact and Report of Determination. 2. The stamping of the construction plans by the Director. 3. The completion of any outstanding TECH comments. 4. The existing access to Christian Brothers from S. Green Street shall be closed upon completion of new Green Street access drive as shown in plans. 5. Approval of stormwater waiver.
☐	Deny PSDP-25-10 based on the following criteria:
☐	Continue PSDP-25-10 to the March 23, 2026 meeting.

SITE PLAN FOR A PROPOSED

McDONALD'S RESTAURANT

NSN45201 (013-1263)

7030 NORTHFIELD DRIVE
BROWNSBURG, INDIANA 46112

DEVELOPMENT NOTES:

1. SITE AREA: 1.56 ACRES
2. SITE ADDRESS: 7030 NORTHFIELD DRIVE, BROWNSBURG, INDIANA 46112
3. PROPERTY ID 14-2-26-61E 154-001
4. EXISTING ZONING: SINGLE FAMILY RESIDENTIAL
   PROPOSED ZONING: PLANNED UNIT DEVELOPMENT (PUD)*
   * NOTE: A) NO DESIGN STANDARDS LISTED FOR "PUD". STANDARDS FOR ZONE C3 COMMERCIAL ARE SUBSTITUTED BELOW.
   B) RECORDED PLAT PC9/52/3ABC SETBACKS DO NOT MATCH/ALIGN WITH ANY COMMERCIAL ZONE LISTED FOR BROWNSBURG.
5. USE: EXISTING USE: VACANT
   PROPOSED USE: RESTAURANT, McDONALD'S
6. BUILDING: 4590 BUILDING
   GROSS BUILDING AREA: 4,180 SQ.FT.
   NET FLOOR AREA: 3,985 SQ.FT.

PROPERTY OWNER: CBH PROPERTIES BROWNSBURG LLC
17725 KATY FREEWAY
HOUSTON, TX, 77094

7. SETBACKS (C-3): FRONT BUILDING SETBACK: 30'
   SIDE BUILDING SETBACK: 0'
   REAR BUILDING SETBACK: 15'
8. MAXIMUM BUILDING HEIGHT: 50'
9. ALL NEW UTILITIES SHALL BE LOCATED UNDERGROUND.
10. ALL NECESSARY UTILITIES (PUBLIC AND PRIVATE) WILL BE AVAILABLE, FUNCTIONING, AND USABLE AT THE TIME ANY STAGE OF THE PROJECT OR THE TOTAL PROJECT IS READY FOR OCCUPANCY.
11. FLOOD ZONE INFORMATION: ACCORDING TO THE FLOOD INSURANCE RATE MAP NO. 18063C0167D, WITH AN EFFECTIVE DATE OF SEPTEMBER 25, 2009, THE INTENDED SUBJECT AREA LIES WITHIN FLOOD ZONE X (UNSHADED), AREAS DETERMINED TO BE OUTSIDE OF THE 0.2% ANNUAL CHANCE FLOODPLAIN.
12. ANY SIGNAGE SHALL BE BY SEPARATE PERMIT.

LEGAL DESCRIPTION (COMMITMENT NO. CTIN2503326)

PARCEL 1:

LOTS 1 AND 2 IN CHRISTIAN BROTHERS AUTOMOTIVE, A REPLAT OF LOT 4, OF MINOR PLAT NO. 4, BEING A SUBDIVISION IN LINCOLN TOWNSHIP, BROWNSBURG, HENDRICKS COUNTY, INDIANA, AS PER PLAT THEREOF RECORDED APRIL 2, 2024, IN PLAT BOOK 9, PAGE 52 AS INSTRUMENT NO. 202405573 IN THE OFFICE OF THE RECORDER OF HENDRICKS COUNTY, INDIANA.

PARCEL 2:

EASEMENT FOR PEDESTRIAN AND VEHICULAR INGRESS AND EGRESS AS GRANTED IN EASEMENT AGREEMENT BY AND BETWEEN GEMINI267 LLC AND SITE SOLUTIONS PROPERTY GROUP, LLC, DATED MARCH 7, 2024, RECORDED MARCH 8, 2024, AS INSTRUMENT NO. 202404131, AND RE-RECORDED AUGUST 2, 2024, AS INSTRUMENT NO. 202413575.

NOTE: PARCEL 1 IN THIS COMMITMENT INCLUDES LOTS 1 AND 2. HOWEVER, THIS SURVEY WAS CONTRACTED FOR ONLY LOT 1.

NOTE: THE FOLLOWING AS-SURVEYED LEGAL DESCRIPTION DESCRIBES THE SAME LAND AS LOT 1 ABOVE.

LOT 1 IN THE PLAT OF CHRISTIAN BROTHERS AUTOMOTIVE AS RECORDED IN INSTRUMENT NUMBER 202405573 IN THE OFFICE OF THE RECORDER OF HENDRICKS COUNTY, INDIANA, BEING A REPLAT OF LOT 4 OF MINOR PLAT NO. 4 AS RECORDED IN PLAT BOOK 9, PAGE 111 IN SAID RECORDER'S OFFICE, AND BEING LOCATED IN THE NORTHWEST QUARTER OF SECTION 26, TOWNSHIP 16 NORTH, RANGE 1 EAST IN LINCOLN TOWNSHIP, TOWN OF BROWNSBURG, HENDRICKS COUNTY, INDIANA, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHEAST CORNER OF SAID LOT 1 THENCE; ALONG THE PERIMETER OF SAID LOT 1 FOR THE FOLLOWING FIVE (5) COURSES: THENCE (1) SOUTH 01 DEGREES 22 MINUTES 23 SECONDS EAST A DISTANCE OF 228.16 FEET; (2) THENCE SOUTH 88 DEGREES 34 MINUTES 01 SECONDS WEST A DISTANCE OF 304.82 FEET; (3) THENCE NORTH 01 DEGREES 17 MINUTES 11 SECONDS WEST A DISTANCE OF 182.33 FEET; (4) THENCE NORTH 44 DEGREES 03 MINUTES 48 SECONDS EAST A DISTANCE OF 61.51 FEET; (5) THENCE NORTH 87 DEGREES 58 MINUTES 06 SECONDS EAST A DISTANCE OF 260.74 FEET TO THE POINT OF BEGINNING, CONTAINING 1.56 ACRES OF LAND, MORE OR LESS.

SURVEY NOTES

1. EXISTING CONDITIONS AS DEPICTED ON THESE PLANS ARE GENERAL AND ILLUSTRATIVE IN NATURE. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO EXAMINE THE SITE AND BE FAMILIAR WITH EXISTING CONDITIONS PRIOR TO BIDDING ON THIS PROJECT. IF CONDITIONS ENCOUNTERED DURING EXAMINATION ARE SIGNIFICANTLY DIFFERENT THAN THOSE SHOWN, THE CONTRACTOR SHALL NOTIFY THE ENGINEER IMMEDIATELY.
2. THE CONTRACTOR AND SUBCONTRACTORS SHALL BE RESPONSIBLE FOR COMPLYING WITH APPLICABLE FEDERAL, STATE AND LOCAL REQUIREMENTS, TOGETHER WITH EXERCISING PRECAUTIONS AT ALL TIMES FOR THE PROTECTION OF PERSONS (INCLUDING EMPLOYEES) AND PROPERTY. IT IS THE SOLE RESPONSIBILITY OF THE CONTRACTOR AND SUBCONTRACTORS TO INITIATE, MAINTAIN AND SUPERVISE ALL SAFETY REQUIREMENTS, PRECAUTIONS AND PROGRAMS IN CONNECTION WITH THE WORK.
3. THE CONTRACTOR SHALL INDEMNIFY AND HOLD HARMLESS THE ENGINEER, OWNER, AND OWNER'S REPRESENTATIVE FOR ANY AND ALL INJURIES AND/OR DAMAGES TO PERSONNEL, EQUIPMENT AND/OR EXISTING FACILITIES OCCURRING IN THE COURSE OF THE DEMOLITION AND CONSTRUCTION DESCRIBED IN THE PLANS AND SPECIFICATIONS.
4. THE CONTRACTOR SHALL COMPLY WITH ALL LOCAL CODES, OBTAIN ALL APPLICABLE PERMITS, AND PAY ALL REQUIRED FEES PRIOR TO BEGINNING WORK.
5. ALL WORK PERFORMED BY THE CONTRACTOR SHALL CONFORM TO THE LATEST REGULATIONS OF THE AMERICANS WITH DISABILITIES ACT. IF DEVIATION FROM THE REQUIREMENTS ARE PROPOSED THE ENGINEER SHALL BE CONTACTED IMMEDIATELY.
6. CONTRACTOR SHALL REFER TO OTHER PLANS WITHIN THIS CONSTRUCTION SET FOR OTHER PERTINENT INFORMATION. IT IS NOT THE ENGINEER'S INTENT THAT ANY SINGLE PLAN SHEET IN THIS SET OF DOCUMENTS FULLY DEPICTS ALL WORK ASSOCIATED WITH THE PROJECT.
8. BEFORE INSTALLATION OF STORM OR SANITARY SEWER, OR OTHER UTILITY, THE CONTRACTOR SHALL VERIFY ALL CROSSINGS, BY EXCAVATION WHERE NECESSARY, AND INFORM THE OWNER AND THE ENGINEER OF ANY CONFLICTS. THE ENGINEER WILL BE HELD HARMLESS IN THE EVENT HE IS NOT NOTIFIED OF DESIGN CONFLICTS PRIOR TO CONSTRUCTION.
9. UNDERGROUND UTILITIES HAVE BEEN PLOTTED FROM AVAILABLE INFORMATION AND THEREFORE THEIR LOCATIONS SHALL BE CONSIDERED APPROXIMATE ONLY. THE VERIFICATION OF THE LOCATION OF ALL UNDERGROUND UTILITIES, EITHER SHOWN OR NOT SHOWN ON THESE PLANS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR, AND SHALL BE LOCATED PRIOR TO ANY GRADING OR CONSTRUCTION OF THE IMPROVEMENTS.

DEMOLITION NOTES

1. CLEARING LIMITS SHALL BE PHYSICALLY MARKED IN THE FIELD.
2. ALL DEMOLITION WASTE AND CONSTRUCTION DEBRIS SHALL BECOME THE PROPERTY OF THE CONTRACTOR UNLESS OTHERWISE DESIGNATED AND SHALL BE REMOVED BY THE CONTRACTOR AND DISPOSED OF OFFSITE IN A STATE APPROVED WASTE SITE AND IN ACCORDANCE WITH ALL LOCAL AND STATE CODES AND PERMIT REQUIREMENTS. TAKE CARE TO PROTECT UTILITIES THAT ARE TO REMAIN. REPAIR DAMAGE ACCORDING TO THE APPROPRIATE UTILITY COMPANY STANDARDS AND AT THE CONTRACTOR'S EXPENSE.
3. ALL UTILITY DISCONNECTION, REMOVAL, RELOCATION, CUTTING, CAPPING AND/OR ABANDONMENT SHALL BE COORDINATED WITH THE APPROPRIATE UTILITY COMPANY / AGENCY. UTILITY CONTACTS ARE LISTED ON THE COVERSHEET.
4. THE BURNING OF CLEARED MATERIAL AND DEBRIS SHALL NOT BE ALLOWED UNLESS CONTRACTOR OBTAINS PRIOR WRITTEN AUTHORIZATION FROM THE LOCAL AUTHORITIES.
5. EROSION AND SEDIMENTATION CONTROL MEASURES AROUND AREAS OF DEMOLITION SHALL BE PROPERLY INSTALLED AND SHALL FUNCTION PROPERLY PRIOR TO INITIALIZATION OF DEMOLITION ACTIVITIES.
6. ASBESTOS OR HAZARDOUS MATERIALS ARE NOT EXPECTED, IF FOUND ON SITE, SUCH MATERIALS SHALL BE REMOVED BY A LICENSED HAZARDOUS MATERIALS CONTRACTOR. CONTRACTOR SHALL NOTIFY OWNER IMMEDIATELY IF HAZARDOUS MATERIALS ARE ENCOUNTERED.
7. CONTRACTOR SHALL ADHERE TO ALL LOCAL, STATE, FEDERAL AND OSHA REGULATIONS DURING ALL DEMOLITION ACTIVITIES.
8. CONTRACTOR SHALL PROTECT ALL CORNER PINS, MONUMENTS, PROPERTY CORNERS AND BENCHMARKS DURING DEMOLITION ACTIVITIES. IF DISTURBED, CONTRACTOR SHALL HAVE DISTURBED ITEMS RESET BY A LICENSED SURVEYOR AT NO ADDITIONAL COST TO THE OWNER.
9. CONTRACTOR SHALL PROTECT ALL EXISTING UTILITIES, STRUCTURES, AND FEATURES TO REMAIN. ANY ITEMS TO REMAIN THAT HAVE BEEN DISTURBED OR DAMAGED AS A RESULT OF CONSTRUCTION SHALL BE REPAIRED OR REPLACED BY THE CONTRACTOR AT CONTRACTOR'S EXPENSE.
10. CONTRACTOR SHALL PROVIDE AND MAINTAIN TRAFFIC CONTROL MEASURES IN ACCORDANCE WITH STATE DEPARTMENT OF TRANSPORTATION REGULATIONS AND AS REQUIRED BY LOCAL AGENCIES WHEN WORKING IN AND/OR ALONG STREETS, ROADS, HIGHWAYS, ETC. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO OBTAIN APPROVAL AND COORDINATE WITH LOCAL AND/OR STATE AGENCIES REGARDING THE NEED, EXTENT AND LIMITATIONS ASSOCIATED WITH INSTALLING AND MAINTAINING TRAFFIC CONTROL MEASURES.
11. PROVIDE NEAT, STRAIGHT, FULL DEPTH, SAW CUTS OF EXISTING PAVEMENT WHERE INDICATED ALONG LIMITS OF PAVEMENT DEMOLITION.
12. ALL UTILITY AND STRUCTURE REMOVAL, RELOCATION, CUTTING, CAPPING AND/OR ABANDONMENT SHALL BE COORDINATED AND PROPERLY DOCUMENTED BY A CERTIFIED PROFESSIONAL, WHEN APPLICABLE, WITH THE APPROPRIATE UTILITY COMPANY, MUNICIPALITY AND/OR AGENCY. DEMOLITION CONTRACTOR SHALL REFER TO ANY ENVIRONMENTAL STUDIES FOR DEMOLITION RECOMMENDATIONS AND GUIDANCE. AVAILABLE ENVIRONMENTAL STUDIES MAY INCLUDE, BUT ARE NOT LIMITED TO: PHASE I ESA, PHASE II, WETLAND AND STREAM DELINEATION AND ASBESTOS SURVEY. ALL APPLICABLE ENVIRONMENTAL STUDIES SHALL BE MADE AVAILABLE UPON REQUEST.
14. NO TREES SHALL BE REMOVED, NOR VEGETATION DISTURBED BEYOND THE LIMITS OF CONSTRUCTION WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE OWNER'S REPRESENTATIVE.
16. ALL PAVEMENT, BASE COURSES, SIDEWALKS, CURBS, BUILDINGS, FOUNDATIONS, ETC., WITHIN THE AREA TO BE DEMOLISHED SHALL BE REMOVED TO FULL DEPTH. EXISTING BASE COURSE MATERIALS MAY BE WORKED INTO THE NEW PAVEMENT OR BUILDING SUBGRADE PROVIDED THAT THE GRADATION, CONSISTENCY, COMPACTION, SUBGRADE CONDITION, ETC., ARE IN ACCORDANCE WITH THE SPECIFICATIONS AND RECOMMENDATIONS OF THE REPORT OF GEOTECHNICAL INVESTIGATION. BASE COURSE MATERIALS SHALL NOT BE WORKED INTO THE SUBGRADE AREAS TO RECEIVE LANDSCAPING.
17. THE CONTRACTOR SHALL USE SUITABLE METHODS TO CONTROL DUST AND DIRT CAUSED BY THE DEMOLITION ACTIVITIES.

LAYOUT NOTES

1. THE CONTRACTOR SHALL CHECK EXISTING GRADES, DIMENSIONS, AND INVERTS IN THE FIELD AND REPORT ANY DISCREPANCIES TO THE OWNER'S REPRESENTATIVE PRIOR TO BEGINNING WORK.
2. THE CONTRACTOR SHALL VERIFY THE EXACT LOCATION OF ALL EXISTING UTILITIES, INCLUDING IRRIGATION LINES. TAKE CARE TO PROTECT UTILITIES THAT ARE TO REMAIN. RELOCATE EXISTING UTILITIES AS INDICATED, OR AS NECESSARY FOR CONSTRUCTION.
3. PROVIDE A SMOOTH TRANSITION BETWEEN EXISTING PAVEMENT AND NEW PAVEMENT. FIELD ADJUSTMENT OF FINAL GRADES MAY BE NECESSARY. INSTALL ALL UTILITIES, INCLUDING IRRIGATION SLEEVING, PRIOR TO INSTALLATION OF PAVED SURFACES.
4. THE CONTRACTOR SHALL PROTECT ALL TREES TO REMAIN.
5. SITE WORK CONCRETE WALKS AND PADS SHALL HAVE A BROOM FINISH TO ALL SURFACES. SITE WORK CONCRETE SHALL BE CLASS "A" (4,000 PSI @ 28 DAYS) UNLESS OTHERWISE NOTED.
6. ALL DAMAGE TO EXISTING PAVEMENT TO REMAIN WHICH RESULTS FROM THE CONTRACTOR'S OPERATIONS SHALL BE REPLACED WITH LIKE MATERIALS AT THE CONTRACTOR'S EXPENSE.
7. SITE DIMENSIONS SHOWN ARE TO THE FACE OF CURB UNLESS OTHERWISE NOTED.
8. CONTRACTOR SHALL MAINTAIN ONE SET OF AS-BUILT / RECORD DRAWINGS ON THE JOB SITE DURING CONSTRUCTION FOR DISTRIBUTION TO THE OWNER AND/OR OWNER'S REPRESENTATIVE UPON COMPLETION.
9. REFER TO THE ARCHITECTURAL DRAWINGS FOR EXACT DIMENSIONS AND LOCATIONS OF UTILITY SERVICE ENTRY LOCATIONS AND PRECISE BUILDING DIMENSIONS. SHOULD SIGNIFICANT DEVIATION EXIST BETWEEN WHAT IS SHOWN HEREIN THE CONTRACTOR SHALL CONTACT THE ENGINEER.
10. THIS SITE LAYOUT IS SPECIFIC TO THE APPROVALS NECESSARY FOR THE CONSTRUCTION IN ACCORDANCE WITH TOWN OF BROWNSBURG STANDARDS. NO CHANGES TO THE SITE LAYOUT ARE ALLOWED WITHOUT THE WRITTEN APPROVAL OF THE ENGINEER. CHANGES MADE TO THE SITE LAYOUT WITHOUT APPROVAL IS SOLELY THE RESPONSIBILITY OF THE CONTRACTOR. CHANGES INCLUDE BUT ARE NOT LIMITED TO, INCREASED IMPERVIOUS PAVEMENT, ADDITION / DELETION OF PARKING SPACES, MOVEMENT OF CURB LINES, CHANGES TO DRAINAGE STRUCTURES AND PATTERNS, LANDSCAPING, ETC.

DRAINAGE NOTES

1. DISTANCES SHOWN ON PIPING ARE HORIZONTAL DISTANCES FROM CENTER OF STRUCTURE TO CENTER OF STRUCTURE, UNLESS OTHERWISE NOTED.
2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE INSTALLATION, INSPECTION, TESTING AND FINAL ACCEPTANCE OF ALL NEW STORMWATER MANAGEMENT FACILITIES CONSTRUCTION. CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE REGULATING AGENCIES CONCERNING INSTALLATION, INSPECTION AND APPROVAL OF THE STORM DRAINAGE SYSTEM CONSTRUCTION.
3. ALL STORMWATER MANAGEMENT FACILITIES, INCLUDING COLLECTION AND CONVEYANCE STRUCTURES SHALL BE INSTALLED IN ACCORDANCE WITH ALL APPLICABLE LOCAL AND STATE CODES AND REGULATIONS.
4. ANY WORK PERFORMED IN THE LOCAL OR STATE RIGHT OF WAYS SHALL BE IN ACCORDANCE WITH THE APPLICABLE LOCAL OR STATE REQUIREMENTS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO OBTAIN THE NECESSARY PERMITS FOR THE WORK, SCHEDULE NECESSARY INSPECTIONS, AND PROVIDE THE NECESSARY TRAFFIC CONTROL MEASURES AND DEVICES, ETC., FOR WORK PERFORMED IN THE RIGHT OF WAYS.

GRADING NOTES

1. CONTRACTOR SHALL ADHERE TO THE EROSION CONTROL PLAN PREPARED FOR THIS PROJECT.
2. REFER TO AND FOLLOW THE RECOMMENDATIONS OF THE GEOTECHNICAL ENGINEERING REPORT PREPARED BY OTHERS.
3. EARTHWORK SHALL INCLUDE CLEARING AND GRUBBING, STRIPPING AND STOCKPILING TOPSOIL, MASS GRADING, EXCAVATION, FILLING, UNDER CUT AND REPLACEMENT, IF REQUIRED, AND COMPACTION.
4. CONTRACTOR TO REFILL UNDERCUT AREAS WITH SUITABLE MATERIAL AND COMPACT AS RECOMMENDED BY THE GEOTECHNICAL ENGINEER.
5. PLACE TOPSOIL OVER THE SUBGRADE OF UNPAVED, DISTURBED AREAS TO A DEPTH INDICATED ON THE LANDSCAPE PLANS.
6. PAVEMENT SLOPES ACROSS ACCESSIBLE PARKING STALLS AND ADJOINING ACCESS AISLES SHALL BE MAXIMUM 2%.
7. NO SLOPE SHALL EXCEED 3:1 (HORIZONTAL:VERTICAL) UNLESS NOTED OTHERWISE.
8. ALL AREAS NOT PAVED SHALL BE STABILIZED IN ACCORDANCE WITH THE EROSION CONTROL PLAN, UNLESS NOTED OTHERWISE.
9. ALL EXCESS SOIL MATERIALS SHALL BECOME THE PROPERTY OF THE CONTRACTOR UNLESS OTHERWISE DESIGNATED SHALL BE REMOVED BY THE CONTRACTOR AND DISPOSED OF OFFSITE AT NO ADDITIONAL COST TO THE OWNER IN ACCORDANCE WITH ALL LOCAL AND STATE CODES AND PERMIT REQUIREMENTS.
10. ALL EVACUATED AREAS BENEATH AND WITHIN TWO FEET OF THE PAVEMENT SHALL BE BACKFILLED WITH GRANULAR MATERIAL AND COMPACTED TO 90% MAXIMUM DENSITY AS DETERMINED BY THE "STANDARD AASHO T-180 COMPACTION TEST" (ASTM D-1557-70). ALL OTHER AREAS MAY BE BACKFILLED WITH EXCAVATED MATERIAL PLACED IN THE 8" MAXIMUM THICKNESS LIFTS, FREE OF FROZEN PARTICLES, AND COMPACTED TO 90% OF MAXIMUM DENSITY AS DETERMINED BY ASTM D-1557-70 OR AS OTHERWISE DETERMINED BY THE GEOTECHNICAL ENGINEER.
11. ALL SOILS TEST SHALL BE VERIFIED BY A GEOTECHNICAL ENGINEER CONCURRENT WITH THE GRADING AND BACKFILLING OPERATIONS.
12. A GEOTECHNICAL ENGINEER SHALL BE EMPLOYED BY THE OWNER AND BE ON SITE DURING GRADING OPERATIONS. ALL SOILS TESTS SHALL BE VERIFIED BY THE GEOTECHNICAL ENGINEER CONCURRENT WITH THE GRADING AND BACK FILLING OPERATIONS.
13. THE GRADING CONTRACTOR SHALL PERFORM A COMPLETE GRADING AND COMPACTION OPERATION AS SHOWN ON THE PLANS, STATED IN THESE NOTES, OR REASONABLY IMPLIED THERE FROM, ALL IN ACCORDANCE WITH THE PLANS AND NOTES AS INTERPRETED BY THE GEOTECHNICAL ENGINEER.
14. ALL AREAS SHALL BE ALLOWED TO DRAIN. ALL LOW POINTS SHALL BE PROVIDED WITH TEMPORARY DITCHES.
15. ANY EXISTING TRASH AND DEBRIS CURRENTLY ON THIS PROPERTY MUST BE REMOVED AND DISPOSED OF OFF-SITE IN AN APPROVED MANNER.
16. SITE PREPARATION INCLUDES THE CLEARANCE OF ALL STUMPS, TREES, BUSHES, SHRUBS, AND WEEDS; THE GRUBBING AND REMOVAL OF ROOTS AND OTHER SURFACE OBSTRUCTIONS FROM THE SITE; AND THE DEMOLITION AND REMOVAL OF ANY MAN-MADE STRUCTURES. THE UNSUITABLE MATERIAL SHALL BE PROPERLY DISPOSED OF OFF-SITE. TOPSOIL AND GRASS IN THE FILL AREAS SHALL BE THOROUGHLY DISCED PRIOR TO THE PLACEMENT OF ANY FILL. THE GEOTECHNICAL ENGINEER SHALL APPROVE THE DISCING OPERATION.
17. TREE CLEARING WILL BE PERFORMED BY THE OWNER IN ADVANCE OF FULL SITE WORK (NOT INCLUDING STUMP GRINDING).
18. COMPACTION EQUIPMENT SHALL CONSIST OF TAMPING ROLLERS, PNEUMATIC-TIRED ROLLERS, VIBRATORY ROLLER, OR HIGH SPEED IMPACT TYPE DRUM ROLLERS ACCEPTABLE TO THE GEOTECHNICAL ENGINEER. THE ROLLER SHALL BE DESIGNED SO AS TO AVOID THE CREATION OF A LAYERED FILL WITHOUT PROPER BLENDING OF SUCCESSIVE FILL LAYERS.
19. THE GEOTECHNICAL ENGINEER SHALL OBSERVE AND TEST THE PLACEMENT OF THE FILL TO VERIFY THAT SPECIFICATIONS ARE MET. A SERIES OF FILL DENSITY TESTS WILL BE DETERMINED ON EACH LIFT OF FILL. INTERIM REPORTS SHOWING FILL QUALITY WILL BE MADE TO THE OWNER AT REGULAR INTERVALS.
20. THE GEOTECHNICAL ENGINEER SHALL NOTIFY THE CONTRACTOR OF REJECTION OF A LIFT OF FILL OR PORTION THEREOF. THE CONTRACTOR SHALL REWORK THE REJECTED PORTION OF FILL AND OBTAIN NOTIFICATION FROM THE GEOTECHNICAL ENGINEER OF ITS ACCEPTANCE PRIOR TO THE PLACEMENT OF ADDITIONAL FILL.
21. ALL AREAS TO RECEIVE FILL SHALL BE SCARIFIED TO A DEPTH OF NOT LESS THAN 6 INCHES AND THEN COMPACTED IN ACCORDANCE WITH THE GEOTECHNICAL REPORT. THE GEOTECHNICAL ENGINEER SHALL BE RESPONSIBLE FOR DETERMINING THE ACCEPTABILITY OF SOILS PLACED. ANY UNACCEPTABLE SOILS PLACED SHALL BE REMOVED AT THE CONTRACTOR'S EXPENSE.
22. THE SEQUENCE OF OPERATION IN THE FILL AREAS WILL BE FILL, COMPACT, VERIFY ACCEPTABLE SOIL DENSITY, AND REPETITION OF THE SEQUENCE. THE ACCEPTABLE MOISTURE CONTENTS DURING THE FILLING OPERATION ARE THOSE AT WHICH SATISFACTORY DRY DENSITIES CAN BE OBTAINED. THE ACCEPTABLE MOISTURE CONTENTS DURING THE FILLING OPERATION IN THE REMAINING AREAS ARE FROM -2 TO +2 PERCENT ABOVE THE OPTIMUM MOISTURE VALUE.
23. THE SURFACE OF THE FILL SHALL BE FINISHED SO THAT IT WILL NOT IMPOUND WATER. IF AT THE END OF A DAYS WORK IT WOULD APPEAR THAT THERE MAY BE RAIN PRIOR TO THE NEXT WORKING DAY, THE SURFACE SHALL BE FINISHED SMOOTH. IF THE SURFACE HAS BEEN FINISHED SMOOTH FOR ANY REASON, IT SHALL BE SCARIFIED BEFORE PROCEEDING WITH THE PLACEMENT OF SUCCEEDING LIFTS. FILL SHALL NOT BE PLACED ON FROZEN GROUND, NOR SHALL FILLING OPERATIONS CONTINUE WHEN THE TEMPERATURE IS SUCH AS TO PERMIT THE LAYER UNDER PLACEMENT TO FREEZE.
24. ALL FILLED PLACES, INCLUDING TRENCH BACKFILLS, UNDER BUILDINGS, PROPOSED STORM & SANITARY SEWER LINES, ETC. SHALL BE COMPACTED TO THE CRITERIA AS SPECIFIED BY THE RECOMMENDATIONS OF THE GEOTECHNICAL REPORT OR BE EQUAL TO THE REQUIREMENTS OF THE CITY OF HUXLEY IF SO ESTABLISHED.
25. ANY CONTAMINATED SOIL ENCOUNTERED DURING EXCAVATION SHALL BE HAULED AND PLACED AS DIRECTED BY THE OWNERS ENVIRONMENTAL ENGINEERING REPRESENTATIVE.

UTILITY NOTES

1. ALL PROPOSED UTILITY LINES AND EXTENSIONS ARE TO BE CONSTRUCTED IN ACCORDANCE WITH THE CORRESPONDING UTILITY'S SPECIFICATIONS. CONTRACTOR SHALL COORDINATE UTILITY DISCONNECTIONS WITH THE APPROPRIATE AGENCY.
2. THE CONTRACTOR IS PARTICULARLY CAUTIONED THAT THE LOCATION AND/OR ELEVATION OF THE EXISTING UTILITIES SHOWN HEREON IS BASED ON TOPOGRAPHIC SURVEYS AND RECORD DRAWINGS. THE CONTRACTOR SHALL NOT RELY UPON THIS INFORMATION AS BEING EXACT OR COMPLETE. SHOULD UNCHARTED UTILITIES BE ENCOUNTERED DURING EXCAVATION OPERATIONS, THE CONTRACTOR SHALL NOTIFY THE ENGINEER AS SOON AS POSSIBLE FOR INSTRUCTIONS. THE CONTRACTOR SHALL CALL THE APPROPRIATE UTILITY COMPANY AT LEAST 48 HOURS PRIOR TO ANY EXCAVATION AND REQUEST FIELD VERIFICATION OF UTILITY LOCATIONS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO RELOCATE EXISTING UTILITIES CONFLICTING WITH IMPROVEMENTS SHOWN HEREON IN ACCORDANCE WITH ALL LOCAL, STATE, AND FEDERAL REGULATIONS GOVERNING SUCH OPERATIONS.
3. THE CONTRACTOR SHALL OBTAIN ALL REQUIRED PERMITS PRIOR TO COMMENCEMENT OF CONSTRUCTION.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING THE SEQUENCING OF CONSTRUCTION FOR ALL UTILITY LINES SO THAT WATER LINES, GAS LINES, AND UNDERGROUND ELECTRIC DO NOT CONFLICT WITH SANITARY SEWERS OR STORM SEWERS. INSTALL UTILITIES PRIOR TO PAVEMENT CONSTRUCTION.
5. ALL TRENCH SPOILS SHALL BECOME THE PROPERTY OF THE CONTRACTOR UNLESS OTHERWISE DESIGNATED. SPOILS SHALL BE REMOVED BY THE CONTRACTOR AND DISPOSED OF OFF SITE AT NO ADDITIONAL COST TO THE OWNER IN ACCORDANCE WITH ALL LOCAL AND STATE CODES AND PERMIT REQUIREMENTS.
6. ADJUST ALL EXISTING UTILITY SURFACE FEATURES INCLUDING BUT NOT LIMITED TO CASTINGS, VALVE BOXES, PEDESTALS, CLEANOUTS, ETC. TO MATCH PROPOSED FINISHED GRADES, UNLESS OTHERWISE INDICATED.
7. THE CONTRACTOR SHALL PROVIDE RECORD DRAWINGS OF ALL IMPROVEMENTS. INCLUDE AT LEAST TWO DIMENSIONS TO EACH VALVE AND MANHOLE FROM KNOWN SITE FEATURES. DRAWINGS SHALL INCLUDE HORIZONTAL AND VERTICAL INFORMATION ON ALL NEW UTILITIES AS WELL AS EXISTING UTILITIES ENCOUNTERED.
8. CONTRACTOR SHALL COORDINATE WITH EACH UTILITY PROVIDER THE INSTALLATION OF UTILITY CONDUITS FOR TELEPHONE, ELECTRIC, GAS, IRRIGATION, AND ETC... CONTRACTOR SHALL PROVIDE ALL MATERIALS AND LABOR FOR THE TRENCHING AND CONDUIT INSTALLATION. COST FOR INSTALLATION AND MATERIALS SHALL BE INCLUDED IN VARIOUS BID ITEMS.
9. ALL DOWNSPOUT COLLECTORS TO BE CONSTRUCTED OF PVC SDR-35 OR SIMILAR, OR AS REQUIRED BY CODE.
10. THE SITE LIGHTING LAYOUT SHOWN HEREON IS BY OTHERS AND IS FOR COORDINATION PURPOSES ONLY. CIVIL & ENVIRONMENTAL CONSULTANTS, INC. HAS NOT PERFORMED A SITE LIGHTING DESIGN FOR THIS PROJECT AND SUCH SHALL NOT BE INFERRED DUE THE ILLUSTRATION OF FIXTURE DESIGNATIONS AND LOCATIONS SHOWN HEREON. PLEASE REFER TO SEPARATE PLANS BY OTHERS FOR DETAILED FIXTURE AND POLE SPECIFICATIONS, ELECTRICAL LAYOUT AND CONTROL SYSTEM DESIGNS AND ANY OTHER SITE LIGHTING ELEMENTS.
11. ALL TRENCH BACKFILLS UNDER PAVED AREAS SHALL BE GRANULAR BACKFILL AND SHALL BE COMPACTED TO 90% OF THE MAXIMUM DENSITY AS DETERMINED BY THE "STANDARD AASHTO T-180 COMPACTION TEST," (A.S.T.M.-D-1557) OR PER GEOTECHNICAL REPORT. ALL OTHER TRENCH BACKFILLS MAY BE EARTH MATERIAL (FREE OF LARGE CLODS OR STONES). ALL TRENCHES ARE TO BE BACK-FILLED ACCORDING TO THE TOWN OF BROWNSBURG STANDARD CONSTRUCTION SPECIFICATIONS.
12. ALL P.V.C. SANITARY SEWER IS TO BE SDR-26 WITH CLEAN 1/2" TO 1" GRANULAR STONE BEDDING UNIFORMLY GRADED. THIS BEDDING SHALL EXTEND FROM 4" BELOW THE PIPE TO THE SPRINGLINE OF THE PIPE. IMMEDIATE BACKFILL OVER PIPE SHALL CONSIST OF SAME SIZE "CLEAN" OR MINUS STONE FROM SPRINGLINE OF PIPE TO 12" ABOVE THE TOP OF PIPE.
13. ALL WATER LINES SHALL BE LAID AT LEAST 10 FEET HORIZONTALLY, FROM ANY SANITARY SEWER, STORM SEWER, OR MANHOLE. 18" VERTICAL CLEARANCE FROM OUTSIDE OF PIPE TO OUTSIDE OF PIPE SHALL BE MAINTAINED WHEREVER WATER LINES MUST CROSS SANITARY SEWERS, LATERALS, OR STORM DRAINS. THE WATER LINE SHALL BE LAID AT SUCH AN ELEVATION THAT THE BOTTOM OF THE WATER LINE IS ABOVE THE TOP OF THE DRAIN OR SEWER. A FULL LENGTH OF WATER PIPE SHALL BE CENTERED OVER THE SEWER LINE TO BE CROSSED SO THAT THE JOINTS WILL BE EQUALLY DISTANT FROM THE SEWER AND AS REMOTE THEREFROM AS POSSIBLE. THIS VERTICAL SEPARATION SHALL BE MAINTAINED FOR THAT PORTION OF THE WATER LINE LOCATED WITHIN 10 FEET HORIZONTALLY, OF ANY SEWER OR DRAIN IT CROSSES.
14. ALL WATER PIPE SHALL CONFORM TO TOWN OF BROWNSBURG SPECIFICATIONS AND C-900 STANDARD SPECIFICATION FOR SEAMLESS COPPER WATER TUBE.
15. WATER LINES, VALVES, SLEEVES, METERS, AND FITTINGS SHALL MEET ALL SPECIFICATIONS AND INSTALLATION REQUIREMENTS OF CITY OF SOUTHAVEN WATER DEPARTMENT. CONTRACTOR TO NOTIFY ALL AFFECTED PROPERTY OWNERS. ANY SHUTTING DOWN OF THE PUBLIC WATER SUPPLY SHALL BE COORDINATED WITH THE WATER COMPANY.
16. BRICK WILL NOT BE USED IN THE CONSTRUCTION OF SANITARY SEWER MANHOLES.
17. GAS, WATER AND OTHER UNDERGROUND UTILITIES SHALL NOT CONFLICT WITH THE DEPTH OR HORIZONTAL LOCATION OF EXISTING OR PROPOSED SANITARY OR STORM SEWERS, INCLUDING HOUSE LATERALS.
18. ALL EXISTING SITE IMPROVEMENTS DISTURBED, DAMAGED OR DESTROYED SHALL BE REPAIRED OR REPLACED TO MATCH PRE-CONSTRUCTION CONDITIONS.
19. HIGH DENSITY POLYETHYLENE PIPE (HDPE) FOR STORM SEWERS SHALL MEET ASHTO M294 OR ASTM F2306.
20. TRACER WIRE IS REQUIRED ON ALL WATER LINES.
21. WATER LINES, VALVES, FITTINGS, AND HYDRANTS SHALL BE INSTALLED, DISINFECTED, PRESSURE TESTED, AND LEAKAGE TESTED IN ACCORDANCE WITH ALL STATE AND LOCAL REQUIREMENTS.
22. CONSTRUCTION AND MATERIALS FOR THE SANITARY SYSTEM SHALL CONFORM TO THE SPECIFICATIONS OF THE INDIANA DEPARTMENT OF ENVIRONMENTAL QUALITY AND THE WEST CENTRAL CONSERVANCY.

Custom Soil Resource Report
Soil Map

Map Scale: 1:809 if printed on A landscape (11" x 8.5") sheet.

N

0 10 20 40 60 Meters

0 35 70 140 210 Feet

Map projection: Web Mercator Corner coordinates: WGS84 Edge tics: UTM Zone 16N WGS84

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Hendricks County, Indiana
Survey Area Data: Version 29, Sep 3, 2025

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Mar 1, 2024—Jul 1, 2024

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

2. PROPOSED UNDERGROUND FIBER OPTIC SERVICE. CONTRACTOR TO COORDINATE WITH UTILITY COMPANY.
3. PROPOSED TRANSFORMER AND CONCRETE PAD PER UTILITY COMPANY SPECIFICATIONS.
4. PROPOSED 6" PVC SDR-36 SANITARY SEWER LATERAL AT MINIMUM 1.04% SLOPE PER WEST CENTRAL CONSERVANCY REQUIREMENTS.
5. PROPOSED SANITARY SEWER CLEANOUT. SEE DETAIL 3/C802.
6. CONTRACTOR TO CONNECT SANITARY LATERAL TO EXISTING SANITARY STUB. INVERT OF STUB ASSUMED TO BE 857.15 (CONTRACTOR TO FIELD VERIFY). CRITICAL CROSSING IMMEDIATELY UPSTREAM, CONTRACTOR TO NOTIFY ENGINEER IMMEDIATELY IF VERIFIED INVERT IS HIGHER THAN ASSUMED.
7. PROPOSED GREASE TRAP. CONTRACTOR TO COORDINATE WITH PLUMBING PLAN.
8. PROPOSED 2" C-900 DOMESTIC WATER SERVICE.
9. PROPOSED WATER SERVICE CONNECTION, TO BE DIRECTIONALLY BORED UNDER S. GREEN STREET. CONTRACTOR TO COORDINATE WITH UTILITY COMPANY.
10. PROPOSED UTILITY BUILDING CONNECTION. REFER TO MEP PLANS FOR EXACT SIZE AND LOCATION.
11. PROPOSED 3/4" PE DOMESTIC WATER SERVICE TO HOSE BIB.
12. PROPOSED 45 DEGREE BEND AND BLOCK.
13. PROPOSED UTILITY CROSSING WITH EXISTING UTILITY. DEPTHS OF EXISTING UTILITIES UNKNOWN, CONTRACTOR TO VERIFY.*
14. CONTRACTOR TO CONNECT WITH TAPPING SLEEVE AND VALVE PER CITIZEN ENERGY GROUP SPECIFICATIONS.
15. PROPOSED DOMESTIC METER FOR 2" WATER SERVICE PER TOWN OF BROWNSBURG SPECIFICATIONS.
16. PROPOSED DOMESTIC METER FOR 1" IRRIGATION SERVICE PER TOWN OF BROWNSBURG SPECIFICATIONS.
17. PROPOSED WATER TEE PER TOWN OF BROWNSBURG STANDARDS.
18. PROPOSED FIRE HYDRANT PER TOWN OF BROWNSBURG STANDARDS AND PER THE REQUIREMENTS OF INDIANA FIRE CODE 507.5.1.
19. ASSUMED CONFLICT BETWEEN PROPOSED STORM AND EXISTING UNDERGROUND ELECTRIC. UNDERGROUND ELECTRIC LINE IS TO BE RELOCATED TO A DEPTH AT LEAST 18" BELOW THE PROPOSED STORM PIPE. COORDINATE RELOCATION WITH DUKE ENERGY.

STORM WATER POLLUTION PREVENTION PLAN (SWPPP) GENERAL NOTES

1. WORK ON THIS SITE INCLUDES THE COMPLETE CONSTRUCTION OF A PROPOSED MCDONALD'S RESTAURANT BUILDING.
2. PROPOSED SITE IMPROVEMENTS INCLUDE EARTHWORK, CURBS, SIDEWALKS, PAVING, UNDERGROUND UTILITIES, SITE LIGHTING, AND LANDSCAPING FOR A MCDONALD'S RESTAURANT. THE PROPOSED DISTURBED AREA IS 1.655 ACRES.
3. THE SITE IS LOCATED AT 7030 NORTHFIELD DRIVE, PROPERTY ID 14-2-26-61E 154-001. EXISTING SOILS ARE CLASSIFIED AS SILTY CLAY LOAM, CLAY LOAM, AND LOAM. ACCORDING TO FEMA FIRM PANEL, MAP NUMBER 18063C0167D, EFFECTIVE DATE SEPTEMBER 25, 2009, THE SITE IS LOCATED IN FLOOD ZONE X, WHICH IS OUTSIDE THE 0.2-1% ANNUAL FLOOD RISK ZONE.
4. THE SITE IS BOUNDED BY NORTHFIELD DRIVE TO THE NORTH, S. GREEN STREET TO THE WEST, TWO PROPERTIES ZONED AS PUD TO THE SOUTH, AND EAST.
5. ON BEHALF OF THE OWNER/PERMITTEE, THE GENERAL CONTRACTOR IS RESPONSIBLE FOR COMPLIANCE WITH THE STORM WATER POLLUTION PREVENTION PLAN (SWPPP).
6. SOIL RELEASED OR LOST DUE TO CONTAINMENT FAILURE SHALL BE IMMEDIATELY CLEANED UP AND DISPOSED OF IN AN APPROVED MANNER. DAMAGED BEST MANAGEMENT PRACTICES (BMPS) SHALL BE REPLACED AND BMP DEFICIENCIES SHALL BE REPAIRED UPON INSPECTION.
7. THE CONTRACTOR SHALL MODIFY THE SWPPP AS REQUIRED TO INCLUDE PERMIT COVERAGE DOCUMENTATION FOR OFF-SITE BORROW, FILL, MATERIAL STORAGE SITES, OR INFORMATION RELATIVE TO HAUL ROUTES, TRUCKS AND EQUIPMENT OR DEWATERING METHODS WHICH ARE USED FOR THIS PROJECT IN ACCORDANCE WITH STATE AND/OR LOCAL JURISDICTIONAL ENTITY REGULATIONS.
8. SOIL SEDIMENT AND EROSION BMPS SHALL BE INSTALLED PRIOR TO START OF ANY CONSTRUCTION AND SHALL BE MAINTAINED AT ALL TIMES UNTIL CONSTRUCTION HAS BEEN COMPLETED. ALL GRASS SHALL BE WELL ESTABLISHED AND/OR PERMANENT EROSION AND SEDIMENTATION BMP MEASURES SHALL BE IN PLACE PRIOR TO THE REMOVAL OF ANY TEMPORARY BMPS. ALL BMP MEASURES SHALL BE INSTALLED TO THE SATISFACTION OF AUTHORITIES HAVING JURISDICTION.
9. THE CONTRACTOR IS TO DESIGNATE A SITE DUMP/WASH AREA PRIOR TO STARTING CONSTRUCTION FOR SUCH PURPOSES AS WASHING OUT CONCRETE TRUCKS AND DUMPING NON-HAZARDOUS WASTE MATERIALS. DUMPING OR DISCHARGE OF ANY WASTE MATERIALS TO ANY SEWERS IS PROHIBITED. HAZARDOUS WASTES ARE TO BE REMOVED OFF SITE AND PROPERLY DISPOSED OF CONSISTENT WITH ALL FEDERAL, STATE AND LOCAL REGULATIONS.
10. LIMITS OF EARTH DISTURBANCE ARE INDICATED ON THE PLANS AND SHALL BE MINIMIZED ON THE SITE. IF REQUIRED, THE CONTRACTOR SHALL LOCATE VEHICLE FUELING AREAS AWAY FROM STORM WATER DRAINAGE FEATURES AND MARK THOSE AREAS ON THE SITE MAP. LEGALLY DISPOSE OF ALL CONSTRUCTION DEBRIS OFF SITE. MINIMIZE DUST ON SITE BY SPRAYING WATER ON DRY AREAS OF THE SITE. THE USE OF PETROLEUM-BASED OR OTHER TOXIC LIQUIDS FOR DUST SUPPRESSION IS PROHIBITED.
11. THE CONTRACTOR SHALL POST AND MAINTAIN SIGN(S) AT A MINIMUM OF ONE (1) CONSTRUCTION ENTRANCE/EXIT LOCATION DESIGNATED BY THE CONTRACTOR, WHERE PROJECT MEETS PAVED COUNTY, STATE, OR FEDERAL HIGHWAYS/ROADS, AND/OR AT OTHER EASILY ACCESSIBLE LOCATION(S) TO ADEQUATELY IDENTIFY THE SITE PRIOR TO COMMENCEMENT OF AND DURING CONSTRUCTION UNTIL REGISTRATION IS PROPERLY TERMINATED. SUCH SIGN SHALL DISPLAY A COPY(IES) OF A COMPLETED APPLICATION(S) FOR PERMIT COVERAGE, NOTICE(S) OF COVERAGE NOTIFYING THE APPLICANT THAT COVERAGE UNDER THE APPLICABLE PERMIT(S) HAS BEEN OBTAINED, THE LOCATION OF THE SWPPP, THE NAME AND PHONE NUMBER OF A CONTACT PERSON RESPONSIBLE FOR SCHEDULING SWPPP VIEWING TIMES AND ANY OTHER STATE OR LOCAL REQUIREMENTS.
12. THE CONTRACTOR SHALL PROVIDE TEMPORARY SANITATION FACILITIES FOR WORKERS AND MAINTAIN FACILITIES DAILY. TRASH CONTAINERS SHALL BE EMPTIED DAILY, OR WHEN FULL. STORE CHEMICALS, PAINTS, SOLVENTS, LUBRICANTS, FERTILIZERS AND OTHER TOXIC MATERIALS IN WEATHERPROOF CONTAINERS. DUMPING OR DISCHARGE OF ANY WASTE MATERIALS TO ANY SEWERS IS PROHIBITED. HAZARDOUS WASTES ARE TO BE REMOVED OFF SITE AND PROPERLY DISPOSED OF CONSISTENT WITH ALL FEDERAL, STATE AND LOCAL REGULATIONS.
13. THE CONTRACTOR SHALL PREPARE, IMPLEMENT, AND MAINTAIN A SPILL PREVENTION, CONTROL AND COUNTERMEASURES (SPCC) PLAN, AS A SEPARATE DOCUMENT OR AS A COMPONENT OF THE SWPPP, FOR ALL TANKS/CONTAINERS STORING ONSITE FUEL, CHEMICALS, OR OTHER POLLUTANTS CONSISTENT WITH THE REQUIREMENTS OF STATE ENVIRONMENTAL PROTECTION AGENCY NPDES RULES. EFFECTIVE MEASURES NECESSARY TO PREVENT SPILLS AND TO CLEAN UP SPILLS OF ANY TOXIC POLLUTANT, AS DOCUMENTED IN THE FACILITY'S SPCC PLAN, SHALL BE FULLY IMPLEMENTED. SOIL CONTAMINATED BY HAZARDOUS SUBSTANCES, PAINTS, FUEL, OR CHEMICAL SPILLS, SHALL BE IMMEDIATELY CLEANED-UP, MANAGED, AND DISPOSED OF IN AN APPROVED MANNER. WHERE POTENTIAL SPILLS CAN OCCUR, MATERIALS HANDLING PROCEDURES SHALL BE SPECIFIED AND PROCEDURES FOR IMMEDIATE CLEANUP/REMEDIATION OF SPILLS SHALL BE DESCRIBED IN THE SPCC PLAN OR EMPLOYEE TRAINING PLANS. THE EQUIPMENT NECESSARY TO IMPLEMENT A CLEANUP SHALL BE MADE AVAILABLE TO FACILITY PERSONNEL. THE PERMITTEE SHALL IMMEDIATELY NOTIFY THE DESIGNATED STATE AND LOCAL GOVERNMENT AGENCIES AFTER BECOMING AWARE OF VISIBLE OIL SEEN IN STORM WATER RUNOFF FROM ITS FACILITY OR IN A WATER OF THE STATE IN THE PROJECT VICINITY AS A RESULT OF ACTIVITIES AT THE SITE. THE CALLER SHOULD BE PREPARED TO REPORT THE NAME, ADDRESS AND TELEPHONE NUMBER OF THE PERSON REPORTING SPILL, THE EXACT LOCATION OF THE SPILL, COMPANY NAME AND LOCATION, THE MATERIAL SPILLED, THE ESTIMATED QUANTITY, THE SOURCE OF SPILL, THE CAUSE OF THE SPILL, THE NEAREST DOWNSTREAM WATER WITH THE POTENTIAL TO RECEIVE THE SPILL, AND THE ACTIONS BEING TAKEN FOR CONTAINMENT AND CLEANUP. ALL SPILLS SHALL BE REPORTED TO THE HENDRICKS COUNTY EMERGENCY MANAGEMENT GROUP (317-745-9229). PETROLEUM PRODUCT SPILLS OF 25 GALLONS OR MORE SHALL BE IMMEDIATELY REPORTED TO THE INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT (IDEM) (1-800-457-8283), OR CALL 911. ALL RELEASES OF HAZARDOUS SUBSTANCES TO THE ENVIRONMENT MUST BE HANDLED PURSUANT TO APPLICABLE LAWS. ALL SPILLS THAT RESULT IN CONTACT WITH WATER OF THE STATE MUST BE REPORTED TO IDEM. ENVIRONMENTAL REGULATIONS REQUIRE THAT ALL RELEASES OF HAZARDOUS SUBSTANCES EXCEEDING REPORTABLE QUANTITIES BE REPORTED TO THE NATIONAL RESPONSE CENTER (800-424-8802). MAKE SURE TO REPORT THESE ITEMS WITHIN 15 MINUTES OF IDENTIFICATION.
14. PRIOR TO ANY EXCAVATION FOR UNDERGROUND UTILITIES, THE CONTRACTOR SHALL EXPOSE AND VERIFY LOCATIONS (HORIZONTAL AND VERTICAL) OF ALL EXISTING UTILITIES INCLUDING BUT NOT LIMITED TO GAS, WATER, AND SANITARY SEWER. ANY CONFLICTS SHALL BE REPORTED IMMEDIATELY TO THE ENGINEER AND THE APPROPRIATE AUTHORITIES.
15. ADDITIONAL EROSION CONTROL MEASURES MAY BE REQUIRED IN THE FIELD BY THE INSPECTOR.
16. ALL EXPOSED AREAS SHALL BE SEEDED AND MULCHED OR OTHERWISE STABILIZED WITHIN 14 CALENDAR DAYS OF FINAL GRADING. SHOULD SOIL DISTURBING ACTIVITIES CEASE IN AN AREA FOR 14 CALENDAR DAYS OR MORE, CONTRACTOR SHALL TEMPORARILY SEED THE AREA OR IMPLEMENT OTHER BEST MANAGEMENT PRACTICES TO ESTABLISH INTERIM STABILIZATION. FOR AREAS EXPECTED TO REMAIN DORMANT FOR 14 DAYS OR MORE, INCLUDING OVER WINTER, APPLY TEMPORARY SEEDING AND MULCHING TO EXPOSED SOIL WITHIN 7 DAYS AFTER END OF WORK IN THE AREA.
17. STORM WATER FROM THIS SITE DISCHARGES TO THROUGH THE EXISTING STORM SEWER SYSTEM INTO THE REGIONAL DETENTION BASIN TO THE SOUTH OF THE PROPERTY.
18. ALL DEMOLITION WASTE AND CONSTRUCTION DEBRIS SHALL BECOME THE PROPERTY OF THE CONTRACTOR UNLESS OTHERWISE DESIGNATED AND SHALL BE REMOVED BY THE CONTRACTOR AND DISPOSED OF OFFSITE IN A STATE APPROVED WASTE SITE AND IN ACCORDANCE WITH ALL LOCAL AND STATE CODES AND PERMIT REQUIREMENTS,
19. ALL CONTAMINATED SOIL MUST BE TREATED AND/OR DISPOSED IN IDEM APPROVED SOLID WASTE MANAGEMENT.

CONSTRUCTION SITE INSPECTION AND MAINTENANCE NOTES

1. ALL SEDIMENT CONTROLS MUST BE INSTALLED PRIOR TO GRADING. SEDIMENT AND EROSION CONTROL MEASURES SHALL BE INSPECTED AT LEAST ONCE EVERY SEVEN (7) CALENDAR DAYS (WEEKLY), AND WITHIN 24 HOURS OF THE END OF A STORM EVENT OF 0.50 INCHES OR GREATER (A RAIN GAUGE MUST BE MAINTAINED ON SITE).
2. ALL MEASURES NEED TO BE MAINTAINED IN GOOD WORKING ORDER. IF A REPAIR IS NECESSARY, IT SHOULD BE INITIATED WITHIN 24 HOURS OF THE INSPECTION REPORT.
3. SILT FENCE AD STRAW BALES NEED TO BE INSPECTED WEEKLY FOR PROPER ANCHORAGE AND LEAKAGE UNDERNEATH. SILT FENCING SHOULD ALSO BE INSPECTED FOR TEARS.
4. BUILT-UP SEDIMENT NEEDS TO BE REMOVED FROM SILT BARRIERS WHEN IT HAS REACHED ½ OF THE HEIGHT OF THE BARRIER. SEDIMENT NEEDS TO BE PLACED IN A STABILIZED SITE TO PREVENT RE-ENTRY INTO THE SAME SITE OR ANOTHER ENTRAPMENT AREA.
5. TEMPORARY AND PERMANENT SEEDING AND PLANTINGS NEED TO BE INSPECTED FOR BARE SPOTS, WASHOUTS AND HEALTHY GROWTH. A PERSON SHOULD BE DESIGNATED TO BE RESPONSIBLE FOR MAINTAINING PLANTED GRASS AREAS UNTIL GROWTH HAS REACHED 1" IN HEIGHT AND THE AREA PLANTED HAS 70% GROUND COVER.
6. CONSTRUCTION ENTRANCE(S): REMOVE LARGE CHUNKS OF MUD-OR CAKED-SOIL FROM CONSTRUCTION-EXIT PAD DAILY TO MINIMIZE SEDIMENT BUILD UP. INSPECT STONE PAD AND SEDIMENT-DISPOSAL AREA WEEKLY AND AFTER STORM EVENTS OR HEAVY USE. RESHAPE PAD AS NEEDED FOR DRAINAGE AND RUNOFF CONTROL. TOP-DRESS WITH CLEAN-SPECIFIED STONE AS NEEDED TO MAINTAIN EFFECTIVENESS OF THE PRACTICE. IMMEDIATELY REMOVE MUD OR SEDIMENT TRACKED OR WASHED ONTO PUBLIC ROAD. REPAIR ANY BROKEN-ROAD PAVEMENT IMMEDIATELY. REMOVE UNNEEDED EXIT-PAD MATERIALS FROM AREAS WHERE PERMANENT VEGETATION WILL BE ESTABLISHED. ANY OTHER CONSTRUCTION INGRESS OR EGRESS TO THE SITE NOT PROPOSED IN THIS PLAN IS PROHIBITED.
7. FABRIC DROP INLET PROTECTION: INSPECT FABRIC AFTER EACH RAINFALL EVENT AND MAKE NEEDED REPAIRS IMMEDIATELY. REMOVE SEDIMENT FROM THE POOL AREA WHEN SEDIMENT HAS REACHED ½ THE FABRIC HEIGHT. TAKE CARE NOT TO DAMAGE OR UNDERCUT THE FABRIC DURING THE SEDIMENT REMOVAL. WHEN THE CONTRIBUTING DRAINAGE AREA HAS BEEN ADEQUATELY STABILIZED, REMOVE ALL MATERIALS AND UNSTABLE SEDIMENT AND DISPOSE OF PROPERLY. FILL THE DISTURBED AREA TO THE GRADE OF THE DROP INLET. STABILIZE DISTURBED AREAS IN ACCORDANCE WITH THE PLANS.
8. SILT FENCES: PERIODICALLY CHECK ALL GRADED AREAS AND THE RELATED EROSION AND SEDIMENT-CONTROL PRACTICES FOR DAMAGE BY EQUIPMENT AND ESPECIALLY AFTER HEAVY RAINFALLS FOR DAMAGE BY RUNOFF. REPAIR SILT FENCES AND OTHER TEMPORARY SEDIMENT CONTROL MEASURES. CLEAN SEDIMENT OUT OF ADJACENT DIVERSIONS AND OTHER STRUCTURES AS NEEDED. REPAIR ANY FAILURES THAT OCCUR IN SURFACE STABILIZATION MEASURES, SUCH AS PLANTINGS.
9. STORM SEWER SYSTEM: INSPECT THE STORM SEWER SYSTEM AFTER EACH STORM EVENT AND AT LEAST ONCE WEEKLY. REMOVE AND PROPERLY DISPOSE OF SEDIMENT TO MAINTAIN FULL FLOW IN STORM SEWER PIPING.
10. ALL SITE INSPECTIONS SHALL BE PERFORMED BY QUALIFIED INSPECTOR, THE INSPECTOR SHALL PROVIDE DOCUMENTATION AFTER EACH INSPECTION TO INCLUDE, AT A MINIMUM, THE FOLLOWING: INSPECTION DATE AND TIME; NAMES, TITLES AND QUALIFICATIONS OF THE INSPECTOR; WEATHER FOR THE PERIOD SINCE THE LAST INSPECTION; WEATHER AND DISCHARGES AT THE TIME OF THE INSPECTION; LOCATIONS OF DISCHARGES AND SEDIMENT OR OTHER POLLUTANTS FROM THE SITE; LOCATIONS OF BMPS THAT NEED TO BE MAINTAINED, THAT FAILED TO OPERATE AS DESIGNED OR FAILED TO PROVIDE ADEQUATE PROTECTION, ADDITIONAL WHERE BMPS AREA NEEDED, AND THE CORRECTIVE ACTIONS TO BE IMPLEMENTED INCLUDING ANY NECESSARY PLAN CHANGES AND IMPLEMENTATION DATES. INSPECTION REPORTS SHALL BE SIGNED AND DATED BY THE INSPECTOR AND KEPT ON FILE AT THE SITE. INSPECTION RECORDS SHALL BE KEPT ON FILE FOR A MINIMUM OF THREE (3) YEARS AFTER NOTICE OF TERMINATION.
11. BMPS THAT REQUIRE REPAIR OR MAINTENANCE SHALL BE REPAIRED PRIOR TO THE NEXT STORM EVENT, OR NO LATER THAN THREE (3) DAYS OF INSPECTION. SEDIMENT PONDS REQUIRING REPAIR OR MAINTENANCE SHALL BE REPAIRED OR CLEANED OUT WITHIN TEN (10) DAYS OF THE INSPECTION.
12. BMPS NOT MEETING THE INTENDED FUNCTION SHALL BE REPLACED WITH A SUITABLE BMP WITHIN THREE (3) DAYS OF THE INSPECTION.
13. MISSING BMPS SHALL BE INSTALLED WITHIN THREE (3) DAYS OF INSPECTION.

DANDY CURB BAG™ SPECIFICATIONS

NOTE: THE DANDY CURB BAG™ WILL BE MANUFACTURED IN THE U.S.A FROM A WOVEN MONOFILAMENT FABRIC THAT MEETS OR EXCEEDS THE FOLLOWING SPECIFICATIONS:

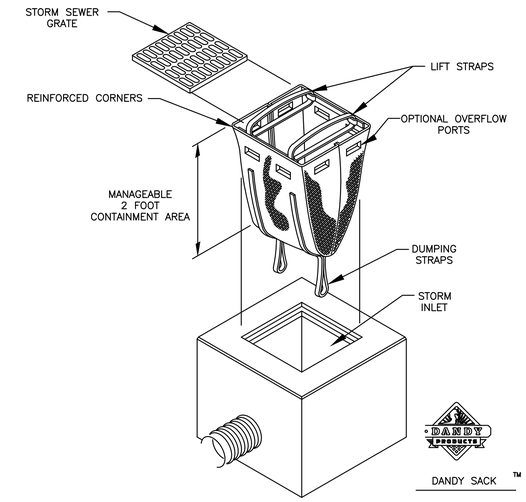

DANDY CURB BAG™ (SAFETY ORANGE)

Mechanical Properties	Test Method	Units	MARV
Grab Tensile Strength	ASTM D 4632	kN (lbs)	1.62 (365) X 0.89 (200)
Grab Tensile Elongation	ASTM D 4632	%	24 X 10
Puncture Strength	ASTM D 4833	kN (lbs)	0.40 (90)
Mullen Burst Strength	ASTM D 3786	kPa (psi)	3097 (450)
Trapezoid Tear Strength	ASTM D 4533	kN (lbs)	0.51 (115) X 0.33 (75)
UV Resistence	ASTM D 4355	%	90
Apparent Opening Size	ASTM D 4751	Mm (US Std Sieve)	0.425 (40)
Flow Rate	ASTM D 4491	l/min/m²(gal/min/ft²)	5207 (145)
Permittivity	ASTM D 4491	Sec⁻¹	2.1

*Note: All Dandy Curb Bags™ can be ordered with our optional oil absorbents

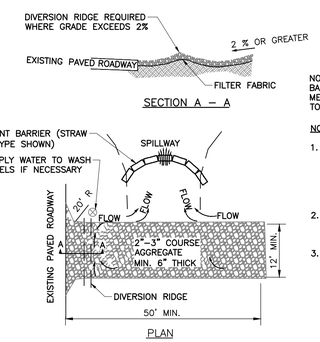

CURB INLET

NOT TO SCALE

STANDARD INLET

1 C901 **INLET PROTECTION DETAILS**
NOT TO SCALE

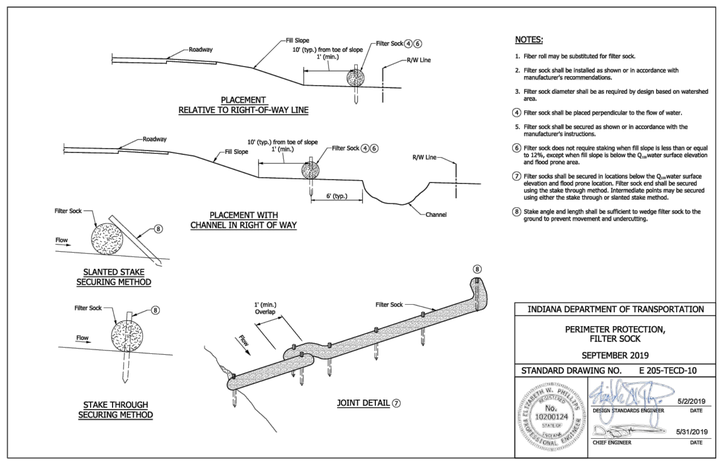

NOTE: USE SANDBAGS, STRAW BALES OR OTHER APPROVED METHODS TO CHANNELIZE RUNOFF TO BASIN AS REQUIRED

NOTES:

1. THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE TOP DRESSING, REPAIR AND/OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT.
2. WHEN NECESSARY, WHEELS SHALL BE CLEANED PRIOR TO ENTRANCE ONTO PUBLIC RIGHT-OF-WAY.
3. WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON AN AREA STABILIZED WITH CRUSHED STONE THAT DRAINS INTO AN APPROVED SEDIMENT TRAP OR SEDIMENT BASIN.

3 C901 **CONSTRUCTION ENTRANCE DETAIL**

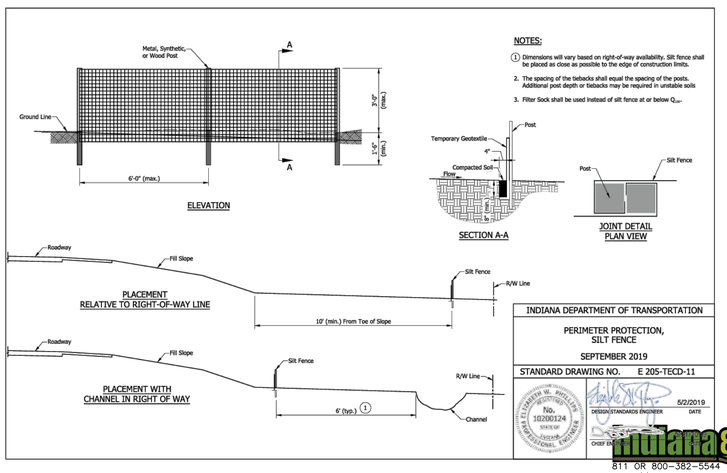

NOTES:

1. Fiber roll may be substituted for filter sock.
2. Filter sock shall be installed as shown or in accordance with manufacturer's recommendations.
3. Filter sock diameter shall be as required by design based on watershed area.
④ Filter sock shall be placed perpendicular to the flow of water.
5. Filter sock shall be secured as shown or in accordance with the manufacturer's instructions.
⑥ Filter sock does not require staking when fill slope is less than or equal to 12%, except when fill slope is below the Q_{10} water surface elevation and flood prone area.
⑦ Filter socks shall be secured in locations below the Q_{10} water surface elevation and flood prone location. Filter sock end shall be secured using the stake through method. Intermediate points may be secured using either the stake through or slanted stake method.
⑧ Stake angle and length shall be sufficient to wedge filter sock to the ground to prevent movement and undercutting.

4 C901 **COMPOSITE FILTER SOCK DETAIL**

NOTES:

① Dimensions will vary based on right-of-way availability. Silt fence shall be placed as close as possible to the edge of construction limits.
2. The spacing of the tiebacks shall equal the spacing of the posts. Additional post depth or tiebacks may be required in unstable soils
3. Filter Sock shall be used instead of silt fence at or below Q_{10}.

PROJECT NO:	355-081
DRAWN BY:	AWM
CHECKED BY:	THA
APPROVED BY:	PTB

DRAWING NO.:
C700
SHEET OF 20

P:\350-000\355-081\-CAD\Dwg\CIVIL\355081-CIV01-C700.dwg[C700 - LANDSCAPE PLAN] 02/16/2026 - 4:38 PM

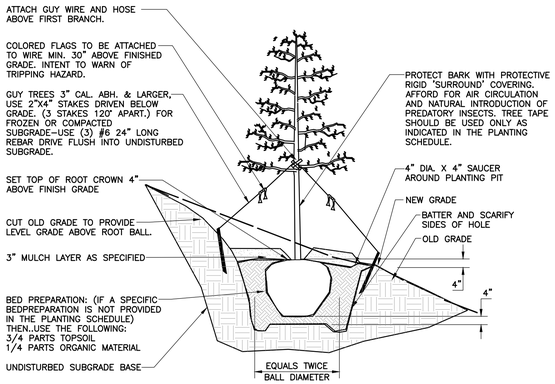

PLANTING NOTES

1. THE QUANTITIES INDICATED ON THE PLANT MATERIALS SCHEDULE ARE PROVIDED FOR THE BENEFIT OF THE LANDSCAPE CONTRACTOR BUT SHOULD NOT BE ASSUMED TO BE CORRECT. THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THE QUANTITIES INDICATED. ANY DISCREPANCIES NOTED SHALL BE BROUGHT TO THE ATTENTION OF THE OWNERS REPRESENTATIVE PRIOR TO INSTALLATION. IN THE EVENT OF A DISCREPANCY, THE DRAWINGS SHALL GOVERN.
2. NO SUBSTITUTIONS AS TO SIZE, TYPE, SPACING, QUANTITY OR QUALITY OF PLANT MATERIAL SHALL BE MADE WITHOUT THE WRITTEN APPROVAL OF THE LANDSCAPE ARCHITECT. CHANGES IN PLANT MATERIAL MAY REQUIRE RE–APPROVAL BY LOCAL AUTHORITIES. CONTRACTOR IS NOT TO SEEK RE–APPROVAL WITHOUT EXPRESS WRITTEN CONSENT OF THE LANDSCAPE ARCHITECT.
3. ALL PLANTS MUST BE NURSERY GROWN, HEALTHY, VIGOROUS, AND FREE FROM ALL PESTS AND DISEASE, BALL AND BURLAP (B&B) OR CONTAINER GROWN AS SPECIFIED IN THE MATERIALS SCHEDULE. ALL PLANTS SHALL CONFORM TO THE AMERICAN STANDARD FOR NURSERY STOCK ANSI Z–60, LATEST EDITION FOR SIZE AND QUALITY.
4. ALL TREES MUST BE STRAIGHT TRUNKED, FULL HEADED, WITH A SINGLE DOMINANT LEADER, AND MEET THE MINIMUM REQUIREMENTS. TREES WITH A "Y" SHAPE ARE NOT ACCEPTABLE.
5. ALL PLANTS ARE SUBJECT TO REVIEW AND APPROVAL BY THE LANDSCAPE ARCHITECT AND OR OWNERS REPRESENTATIVE AT ANY TIME PRIOR TO FINAL ACCEPTANCE.
6. THE DIMENSIONS FOR HEIGHT, SPREAD, AND CALIPER AS SPECIFIED IN THE PLANT MATERIALS SCHEDULE ARE THE MINIMUM DESIRED FOR EACH PLANT. EACH PLANT SHALL BE UNIFORM AND CONSISTENT WITH THE SPECIFICATIONS AS IT PERTAINS TO THE SPECIFICATIONS AND THE INDIVIDUAL SPECIES. ANY PLANT MATERIAL WHICH FAILS THESES SPECIFICATIONS WILL BE REJECTED. THE CONTRACTOR SHALL PROVIDE ACCEPTABLE MATERIAL AT NO ADDITIONAL COST TO THE OWNER. CALIPER SIZE IS NOT TO BE REDUCED. TREES THAT FAIL MINIMUM CALIPER SIZE AS MEASURED IN THE FIELD WILL BE REJECTED AND REPLACEMENTS SHALL BE MADE BY THE CONTRACTOR AT NO ADDITIONAL COST. CALIPER MEASUREMENTS SHALL BE MADE IN ACCORDANCE WITH ANSI STANDARDS.
7. PRIOR TO COMMENCEMENT OF INSTALLATION, THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UTILITIES AND SHALL AVOID DAMAGING UTILITIES DURING INSTALLATION. ANY UTILITIES DAMAGED DURING INSTALLATION SHALL BE REPAIRED BY THE LANDSCAPE CONTRACTOR TO THE SATISFACTION OF THE APPROPRIATE UTILITY COMPANY. ALL REPAIRS SHALL BE AT NO COST TO THE OWNER. NO TREES SHALL BE PLANTED WITHIN 10' OF SITE UTILITY LINES. FIELD ADJUST AS NECESSARY AFTER LANDSCAPE ARCHITECT'S APPROVAL.
8. THE LANDSCAPE CONTRACTOR SHALL FIELD STAKE ALL PLANT LOCATIONS PRIOR TO INSTALLATION. THE LANDSCAPE ARCHITECT SHALL APPROVE ALL STAKED LOCATIONS PRIOR TO INSTALLATION. PLANTS INSTALLED PRIOR TO APPROVAL BY THE LANDSCAPE ARCHITECT ARE SUBJECT TO REJECTION AND/ OR REPLACEMENT AT NO ADDITIONAL COST TO THE OWNER.
9. PRE–EMERGENT HERBICIDES, TREFLAN OR EPTAM, SHALL BE APPLIED TO ALL PLANTING BEDS. APPLY AT MANUFACTURERS RECOMMENDATIONS. HERBICIDES SHALL BE INCORPORATED INTO THE SOIL MIXES.
10. APPLY ROOT STIMULATOR, CONTAINING MICRORHIZZA, TO ALL PLANTS PRIOR TO BACK FILLING. APPLY AT MANUFACTURER'S RECOMMENDATIONS. CONTRACTOR TO SUBMIT SAMPLES OF ROOT STIMULATOR TO THE LANDSCAPE ARCHITECT FOR APPROVAL PRIOR TO USE.
11. ALL DISTURBED AREAS NOT RECEIVING MULCH OR OTHER SPECIFIED IMPROVEMENTS ARE TO BE FINE GRADED TO TRANSITION SMOOTHLY INTO ADJACENT GRADES AND RECEIVE BERMUDA SOD. SEE SOD NOTES BELOW.
12. THE LANDSCAPE CONTRACTOR SHALL COMPLETELY GUARANTEE ALL PLANTINGS FOR A PERIOD OF ONE YEAR BEGINNING UPON THE WRITTEN DATE OF SUBSTANTIAL COMPLETION OF THE PROJECT. ANY PLANTS SUBJECT TO REPLACEMENT SHALL BE MADE AT THE END OF THE WARRANTY PERIOD OR AT TIME AS DETERMINED BY THE OWNERS REPRESENTATIVE. ALL PLANTS MUST BE ALIVE AND HEALTHY FOR REVIEW AND APPROVAL BY LOCAL AUTHORITIES AS APPROPRIATE FOR OCCUPANCY PERMIT.
13. THE LANDSCAPE CONTRACTOR SHALL UTILIZE ON–SITE TOPSOIL AS AVAILABLE FROM THE CONTRACTOR. ALL IMPORTED TOPSOIL SHALL BE APPROVED BY THE OWNERS REPRESENTATIVE PRIOR TO PLACEMENT.
14. EXISTING GRASS TO BE REMOVED, IF PRESENT, AND TOPSOIL TO BE SPREAD SMOOTH AND HAND–RAKED TO REMOVE ALL ROCKS AND DEBRIS LARGER THAT 1 INCH IN DIAMETER PRIOR TO LAYING SOD OR TO BE MULCHED WITH A MINIMUM OF 3 INCHES OF AGED, BROWN HARDWOOD BARK, SUBMIT SAMPLE TO LANDSCAPE ARCHITECT FOR APPROVAL. ALL PLANTING AREAS MUST BE COMPLETELY MULCHED.
15. THE TYPICAL PLANTING SOIL BACKFILL MIX FOR BEDS AND PLANT BACKFILL SHALL CONSIST OF THE FOLLOWING:
    - 2/3 SITE SOIL
    - 1/3 SOIL AMENDMENTS (BY VOLUME AS FOLLOWS)
    - 2 PARTS HUMUS AND OR PEAT
    - 1 PART COARSE RIVER SAND
    - 1 PART STERILIZED COMPOSTED COW MANURE
    - COMMERCIAL FERTILIZER AND LIME AS RECOMMENDED BY THE SOILS TEST REPORT.
    - COMPLETELY BLEND BACKFILL SOIL MIX PRIOR TO PLACEMENT.
18. MULCH SHALL BE BROWN HARDWOOD MULCH WITH NO WEED OR OTHER UNPROCESSED ORGANICS.

LANDSCAPE MAINTENANCE

THE DEVELOPER, ITS SUCCESSOR AND/OR SUBSEQUENT OWNERS AND THEIR AGENTS, SHALL MAINTAIN LANDSCAPING ON THE PROPERTY ON A CONTINUING BASIS FOR THE LIFE OF THE DEVELOPMENT.

1. ALL LANDSCAPING IS SUBJECT TO PERIODIC INSPECTION BY THE PLANNING DIRECTOR OR DESIGNEE. THE CITY MAY CAUSE REMOVAL OF ANY DEAD OR DISEASED TREES, PLANTS AND SHRUBS ON PRIVATE PROPERTY WITHIN THE CITY, WHEN THOSE TREES, PLANTS AND SHRUBS CONSTITUTE A HAZARD TO LIFE AND/OR PROPERTY OR HARBOR INSECTS OR DISEASE WHICH CONSTITUTES A POTENTIAL THREAT TO OTHER TREES, PLANTS OR SHRUBS WITHIN THE CITY. IF THE PLANNING DIRECTOR DETERMINES THAT REMOVAL OF ANY DISEASED TREE, PLANTS OR SHRUBS ARE NECESSARY; THE PLANNING OFFICIAL SHALL PROVIDE THE PROPERTY OWNER WRITTEN NOTICE OF THE REQUIRED MAINTENANCE OR REMOVAL.
2. ALL REQUIRED LANDSCAPING SHALL BE PROVIDED WITH A READILY AVAILABLE AND ACCEPTABLE WATER SUPPLY. UNDERGROUND SPRINKLER SYSTEMS ARE ENCOURAGED FOR ALL REQUIRED STREET YARD LANDSCAPING, PARKING LOT LANDSCAPING, LANDSCAPE BUFFER YARDS, AND LANDSCAPE SCREENING.
3. WARRANTY PERIOD – COMPLETED LANDSCAPING SHALL COMPLY WITH THE APPROVED LANDSCAPE PLAN, INCLUDING THE QUANTITIES, LOCATION, SPECIES, AND SIZE OF PLANTS AND OTHER LANDSCAPE MATERIALS, AND THAT SUCH LANDSCAPING WILL REMAIN IN GOOD CONDITION FREE FROM DEFECTS IN MATERIAL AND/OR WORKMANSHIP DURING THE WARRANTY PERIOD.
   3.1. FOR THE PURPOSE OF THIS SUBSECTION, "WARRANTY PERIOD," MEANS A PERIOD OF ONE YEAR BEGINNING WHEN THE CITY ACCEPTS THE LANDSCAPING AS COMPLETE.
   3.2. DURING THE WARRANTY PERIOD, DEFECTIVE MATERIALS, EQUIPMENT, AND WORKMANSHIP SHALL BE REPAIRED, CORRECTED, OR REPLACED WITHOUT CHARGE OR COST TO THE OWNER. THE CITY MAY AT ANY TIME DURING THE WARRANTY PERIOD INSPECT, PHOTOGRAPH, OR TELEVISE SUCH LANDSCAPING AND SHALL NOTIFY THE DEVELOPER OF ANY NECESSARY REPAIR, CORRECTION, OR REPLACEMENT.

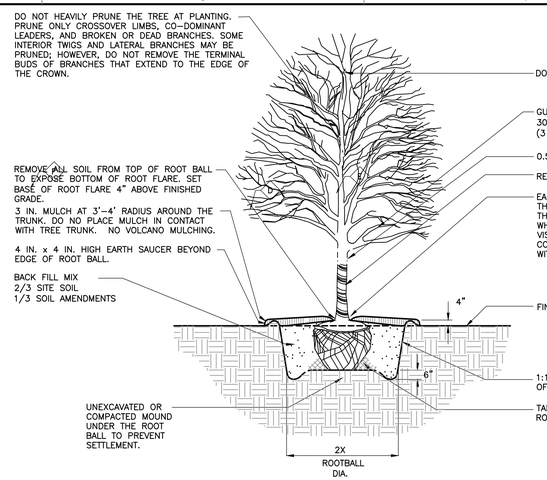

NOTES:

1. PROVIDE POSITIVE DRAINAGE UNDER ALL CIRCUMSTANCES. DRAINAGE SHOULD BE FROM CENTER OF ROOT BALL TO PERIMETER OF ROOT BALL. DO NOT ALLOW PONDING OF WATER UNDER ROOTBALL.
2. IF PLANT IS IN A LARGE PLANT BED MULCH ENTIRE BED. IF PLANT IS A SINGLE PLANTING MULCH TO DRIP LINE OF TREE. MULCH DEPTH TO BE 3".
3. IF PLANT IS CONTAINER GROWN, REMOVE CONTAINER AND USING A SHARP KNIFE MAKE 3 VERTICAL CUTS 1/4" DEEP ON OPPOSITE SIDES OF THE ROOT MASS. IF PLANT IS IN A WIRE BASKET REMOVE PRIOR TO PLANTING.
4. IF ROOTS ARE WRAPPED IN BURLAP, 1ST. PLACE BURLAPPED ROOT BALL INTO THE HOLE. THEN REMOVE BURLAP CAREFUL NOT TO DISTURB OR BREAK THE ROOT BALL.
5. SEE PLANTING SCHEDULE AND SPECIFICATIONS FOR ADDITIONAL INFORMATION/REQUIREMENTS.

DETAIL 1 : TREE ON SLOPE

N.T.S.

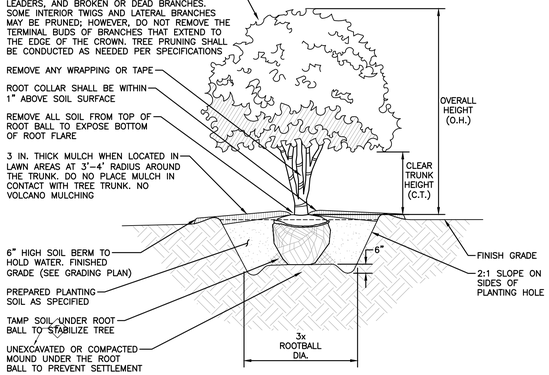

NOTES:

1. TREES ARE NOT TO BE STAKED.
2. PROVIDE POSITIVE DRAINAGE UNDER ALL CIRCUMSTANCES. DRAINAGE SHOULD BE FROM CENTER OF ROOT BALL TO PERIMETER OF ROOT BALL. DO NOT ALLOW PONDING OF WATER UNDER ROOTBALL.
3. REMOVE TOP HALF OF WIRE BASKET AFTER PLACING ROOTBALL IN PLANT PIT.
4. REMOVE ROPE TIES & TOP 1/3 OF BURLAP FROM ROOT BALL AFTER PLANTING.
5. POLYPROPYLENE STRAPS MAY BE SUBSTITUTED IN LIEU OF WIRES, ARBORTIE OR EQUIVALENT.
6. SEE PLANTING SCHEDULE AND PLANTING NOTES FOR ADDITIONAL INFORMATION/REQUIREMENTS.

DETAIL 2 : DECIDUOUS TREE PLANTING DETAIL

N.T.S.

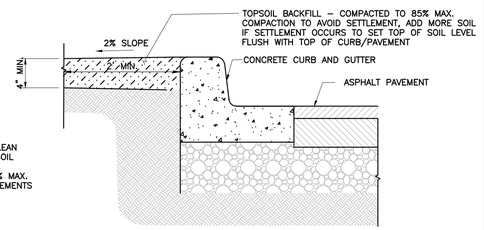

NOTES:

1. TREES SHALL BE STAKED AND GUYED AS DETAILED AND SPECIFIED ONLY IF THE TREE CANNOT STAND ON ITS OWN.
2. PROVIDE POSITIVE DRAINAGE UNDER ALL CIRCUMSTANCES. DRAINAGE SHOULD BE FROM CENTER OF ROOT BALL TO PERIMETER OF ROOT BALL. DO NOT ALLOW PONDING OF WATER UNDER ROOTBALL.
3. SET TREE AT ORIGINAL DEPTH, REMOVE BURLAP, WIRE AND STRAPS (ANYTHING THAT COULD GIRDLE TREE OR RESTRICT ROOT GROWTH) ON UPPER 1/3 OF ROOTBALL. NO SYNTHETIC BURLAP WILL BE ACCEPTED.
4. SEE LANDSCAPE PLANTING NOTES FOR THE TYPE OF MULCH MATERIAL TO USE.
5. BRANCHING HEIGHT PER PLANTING NOTES AND SPECIFICATIONS.
6. SEE PLANTING SCHEDULE AND PLANTING NOTES FOR ADDITIONAL INFORMATION/REQUIREMENTS.

DETAIL 3 : MULTI-TRUNK TREE PLANTING DETAIL

N.T.S.

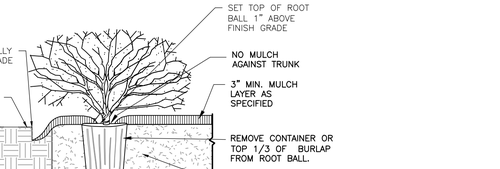

NOTES:

1. SUBGRADE SURFACE TO FREE OF ALL DEBRIS AND CLEAN SOIL FILL. LANDSCAPE ARCHITECT TO APPROVE SUBSOIL CONDITIONS PRIOR TO TOPSOIL PLACEMENT.
2. COMPACT PLANTING SOIL AND SUBSOIL AREAS TO 85% MAX. COMPACTION TO AVOID SETTLEMENT ADJACENT TO PAVEMENTS

DETAIL 4 : TOPSOIL BACKFILL DETAIL

N.T.S.

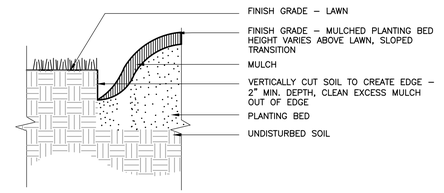

NOTES

1. SEE PLANTING SCHEDULE AND PLANTING NOTES FOR ADDITIONAL INFORMATION/REQUIREMENTS.
2. LIMIT AMOUNT OF PRUNING TO ONLY DEAD OR DAMAGED LIMBS. RETAIN THE NATURAL SHAPE OF SHRUB. IF MORE THAN 1/5 OF TOTAL SHRUB FOLIAGE IS PRUNED, PLANT MAYBE REJECTED.

DETAIL 5 : SHRUB PLANTING DETAIL

N.T.S.

NOTES

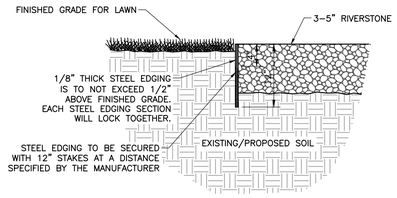

1. INSTALL BED EDGE WHEN MULCHED AREAS ABUT LAWN AREAS UNLESS SPECIFIED FOR STEEL EDGING. DO NOT INSTALL UNTIL LAWN IS ESTABLISHED AND SOIL IS FIRM. RE–MULCH EDGE IF SOIL GETS ON PREVIOUSLY INSTALLED MULCH DURING EDGE INSTALLATION.

DETAIL 6 : PLANTING BED EDGE DETAIL

N.T.S.

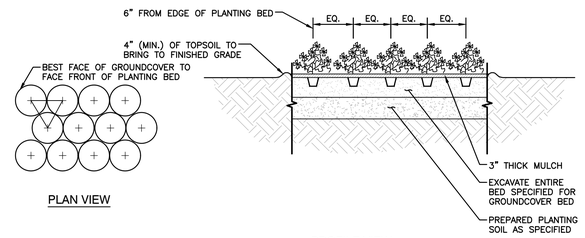

NOTES:

1. STEEL EDGING IS TO BE USED IN ALL AREAS WHERE A STONE IS ADJACENT TO A LAWN AREA, OR WHERE A PLANTING BED ABUTS LAWN AREA.
2. ENSURE THAT ALL UNDERGROUND UTILITIES ARE INSTALLED BELOW THE MAXIMUM DEPTH OF EDGING.
3. TRENCH ALONG DEFINED BED EDGES TO DEPTH SO THAT TOP OF EDGING WILL NOT EXCEED 1/2" ABOVE FINISHED GRADE.
4. INSTALL EDGING WITH STAKE POCKETS ON INSIDE OF BED.
5. A MINIMUM OF 5 STAKES ARE TO BE USED WITH EACH SECTION OF EDGING.
6. BACKFILL BOTH SIDES OF EDGING DURING INSTALLATION LEAVING NO MORE THAN TWO SECTIONS UNSUPPORTED AT ONE TIME. COMPACT BACK FILL ALONG EDGING.
7. SURE–LOC STEEL EDGING OR APPROVED EQUAL.

DETAIL 7 : STEEL EDGING

N.T.S.

PLAN VIEW

PROFILE VIEW

NOTES:

1. WHEN GROUNDCOVERS AND SHRUBS USED IN MASSES ENTIRE BED TO BE AMENDED WITH PLANTING SOIL MIX AS SPECIFIED.
2. SEE PLANT SCHEDULE FOR SPACING.

DETAIL 8 : GROUNDCOVER DETAIL

PROJECT WIND LOAD CRITERIA BASED ON:
ASCE 7-10 WIND SPEEDS (3-SEC PEAK GUST MPH)
50 YEAR MEAN RECURRENCE INTERVAL
ALLOWED EPA 13.6 @ WIND LOAD 90 MPH

Regional Drawing
013-1263

1. THIS LIGHTING DESIGN IS BASED ON INFORMATION SUPPLIED BY OTHERS TO SECURITY LIGHTING SYSTEMS. SITE DETAILS PROVIDED HEREON ARE REPRODUCED ONLY AS A VISUALIZATION AID. FIELD DEVIATIONS MAY SIGNIFICANTLY AFFECT PREDICTED PERFORMANCE. PRIOR TO INSTALLATION, CRITICAL SITE INFORMATION (POLE LOCATIONS, ORIENTATION, MOUNTING HEIGHT, ETC.) SHOULD BE COORDINATED WITH THE CONTRACTOR AND/OR SPECIFIER RESPONSIBLE FOR THE PROJECT.

2. LUMINAIRE DATA IS TESTED TO INDUSTRY STANDARDS UNDER LABORATORY CONDITIONS. OPERATING VOLTAGE AND NORMAL MANUFACTURING TOLERANCES OF LAMP, BALLAST, AND LUMINAIRE MAY AFFECT FIELD RESULTS.

3. CONFORMANCE TO FACILITY CODE AND OTHER LOCAL REQUIREMENTS IS THE RESPONSIBILITY OF THE OWNER AND/OR THE OWNER'S REPRESENTATIVE.

4. THIS LAYOUT MAY NOT MEET TITLE 24 OR LOCAL ENERGY REQUIREMENTS. IF THIS LAYOUT NEEDS TO E COMPLIANT WITH TITLE 24 OR OTHER ENERGY REQUIREMENTS, PLEASE CONSULT FACTORY WITH SPECIFIC DETAILS REGARDING PROJECT REQUIREMENTS SO THAT REVISIONS MAY BE MADE TO THE DRAWING.

1.0 INTRODUCTION

This drainage report was prepared to document the analysis of the pre- and post-developed drainage conditions for the proposed McDonald's drive-through restaurant development to be located in Brownsburg, Hendricks County, Indiana.

Current Owner Information (as of 12/04/2025)
Company: Christian Brothers Automotive Corporation
Address: 17725 Katy Freeway, Suite 200, Houston, TX 77094
Contact: Billy Green Jr, Director of Land Acquisition & Permitting
Email: billy.green@cbac.com
Phone: (281) 675-6192

New Owner Information
Company: McDonald's USA, LLC
Address: 110 N Carpenter Street, Chicago, IL 60607
Contact: Amy Switzer, Area Construction Manager
Email: amy.switzer@us.mcd.com
Phone: (913) 660-2205

The Subject Property consist of a 1.56-acre tract of land that is currently vacant and is part of the West Wynne Farms Planned Development. It is bounded to the north by Northfield Drive and to the west by S. Green Street. To the south exists property zoned commercial, and to the east property that is zoned residential. The Christian Brothers Development to the South of the Subject Property includes a regional detention basin as part of the overall development. This regional basin was designed to treat the storm water quality and quantity for the McDonald's property as outlined in the *Stormwater Narrative For: Christian Brothers Automotive* prepared by Progressive AE dated August 7, 2023, (revised November 2, 2023). See **Figure 3** – Vicinity Map.

The calculations in this report provide an analysis of the pre-developed site conditions, post-developed site conditions, storm sewer drainage areas, and storm sewer calculations for the McDonald's Restaurant development. The post-development stormwater conveyance design shall be in accordance with the *Town of Brownsburg Stormwater Management Ordinance*. For detention storage volume and release rates, refer to *Stormwater Narrative for Christian Brothers Automotive,* prepared by Progressive AE, dated August 7, 2023, (revised November 2, 2023).

2.0 PRE-DEVELOPED CONDITIONS

The subject property is an unoccupied lot consisting of slabs of both asphalt and concrete pavement, a gravel drive, silt fence, and trees. The subject property has minimal topography with a slope averaging ~1%, which slopes from the southeast corner of the property to the northeast and northwest corners. The property does not have an on-site detention system; however, it does have access to the regional detention system located on the Christian Brothers development directly south of the subject property.

The pre-development drainage area used for the stormwater analysis includes 1.563 acres, made up of 0.251 acres of impervious areas and 1.311 acres of pervious open space. See the Pre-Development Drainage Map provided in **Figure 1** for reference.

3.0 POST-DEVELOPED CONDITIONS

The proposed improvements include the demolition of the existing pavement slabs on site and the construction of a new 4,398-square-foot McDonald's restaurant and drive-through, asphalt parking lot and drives, a dumpster pad and enclosure, landscaping, sidewalks, curbs, and gutters. There is a detention system on the property south of the McDonald's site that was designed to encompass the stormwater detention of the subject site as well as the site on which it is located. Based on the *Stormwater Narrative for Christian Brothers Automotive*, prepared by Progressive AE, dated August 7, 2023 (revised November 2, 2023), the existing detention pond on the Christian Brothers Automotive property was designed to treat the McDonald's outparcel for stormwater quality and quantity. The detention basin accounted for the McDonald's outparcel to be 80% impervious, see the *Proposed Stormwater Management Plan* in the *Stormwater Narrative for Christian Brothers Automotive*, prepared by Progressive AE. The proposed McDonald's development has 69.23% impervious area, which is less than the 80% impervious area allocated for the outparcel. Therefore, the proposed McDonald's development meets the allotted detention pond design parameters and will not require any additional stormwater management elements. See the Post-Development Drainage Map provided in **Figure 2** for reference.

4.0 STORMWATER CONVEYANCE ANALYSIS

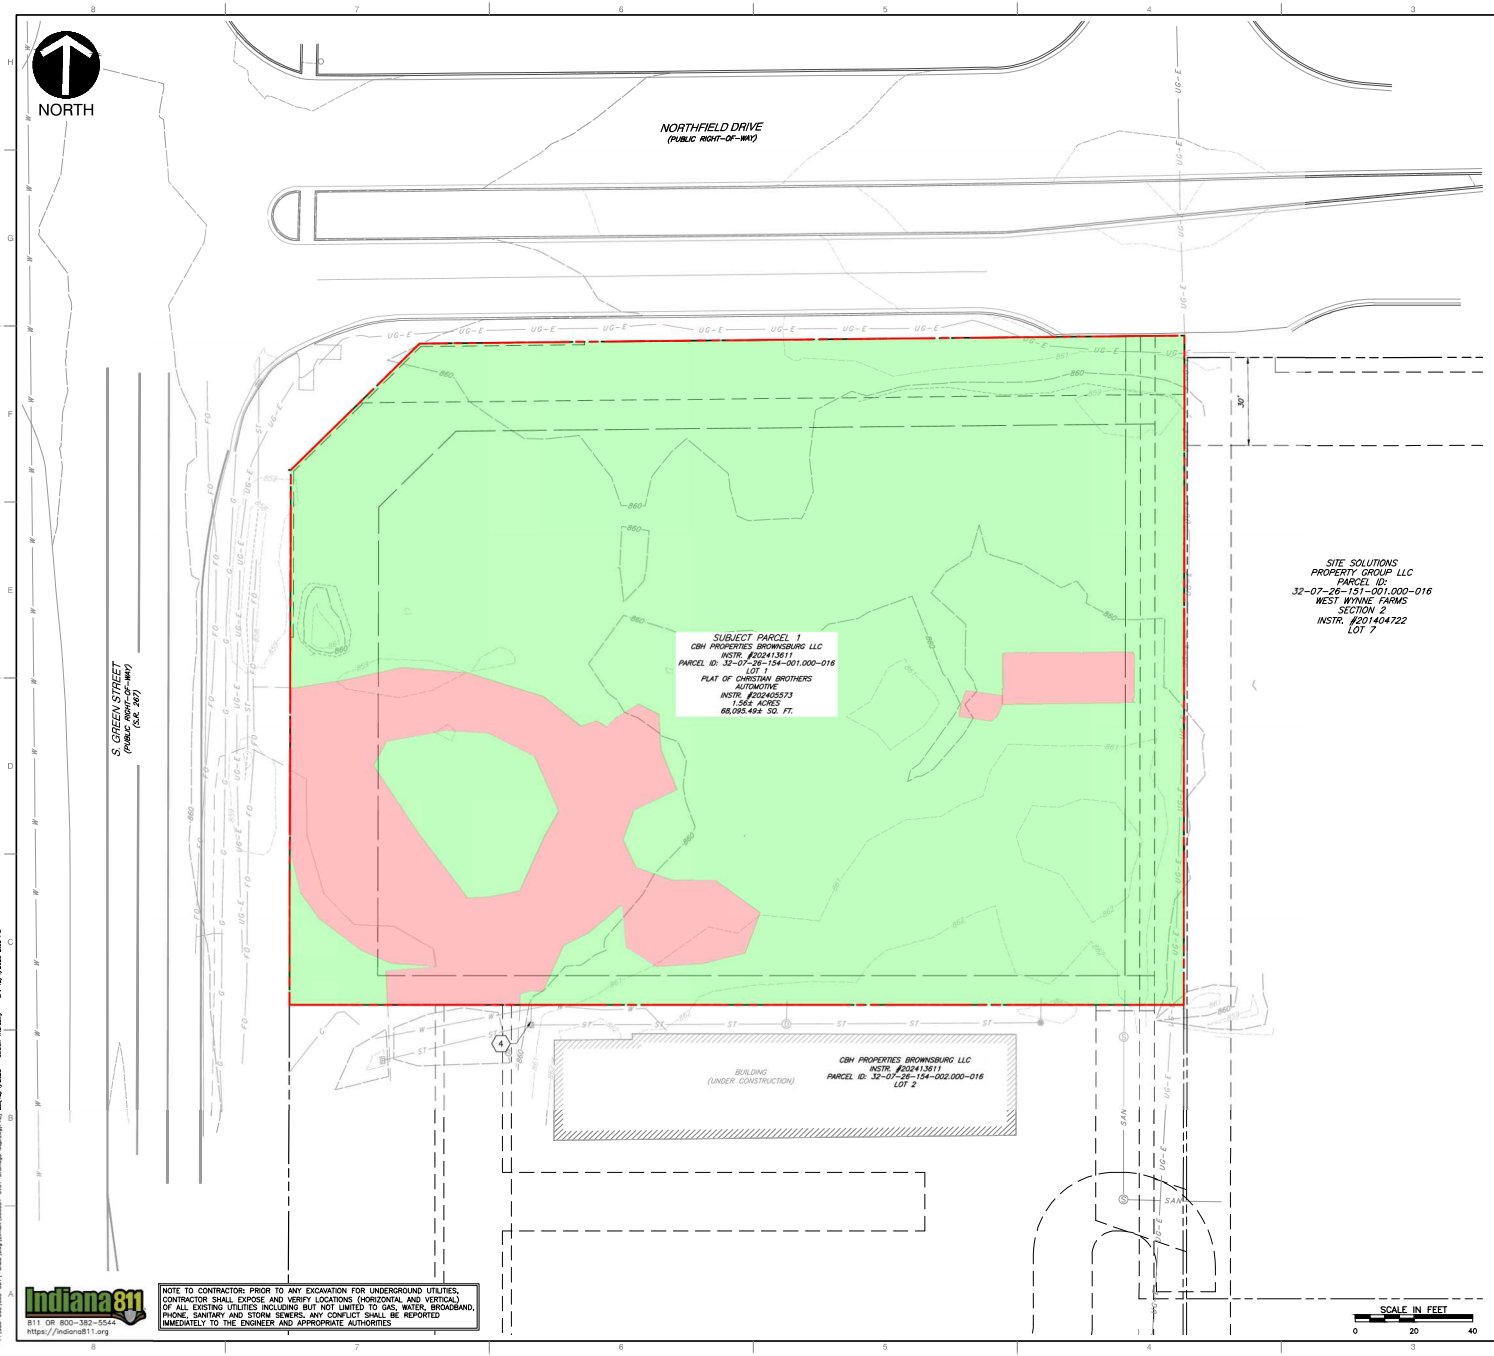

The methods used for the design and analysis of the proposed stormwater conveyance and management system follow the Town of Brownsburg Stormwater Management Ordinance. The design for the storm sewer conveyance system was modeled using Hydraflow Storm Sewers Extension for AutoCAD Civil 3D Version 2020 (by Autodesk Inc.). The analysis of the storm sewer is provided below in **Section 4.1.** CEC is not proposing any new stormwater management facilities because the subject site does not exceed the design limits of the existing detention basin. For the stormwater quality and quantity analysis of the detention basin on the site south of the subject property, see the *Stormwater Narrative for Christian Brothers Automotive* prepared by Progressive AE, dated August 7, 2023, (revised November 2, 2023).

4.1 STORMWATER CONVEYANCE DESIGN

The proposed stormwater conveyance system for the subject site was designed to meet the *Town of Brownsburg Stormwater Management Ordinance* and the *Hendricks County Stormwater Technical Standards Manual*. The system was designed to convey the 10-year storm so that the Hydraulic Grade Line is below the crowns of the pipe system and to contain up to the 100-year storm within the system. The system will be connected to an existing system on the property to the south, upstream of the outlet control structure for the existing detention basin. The time of concentration (Tc) used for the design was 10 minutes, which is based on an industry standard for developed land. The sewer pipes were assigned a Manning's "n" value of 0.012 as per the minimum value stated in the *Town of Brownsburg Stormwater Management Ordinance*. See the Storm Sewer Calculations provided in **Appendices 1 and 2**.

The Subject Property consist of a 1.56-acre tract of land that is currently vacant and is part of the West Wynne Farms Planned Development. It is bounded to the north by Northfield Drive and to the west by S. Green Street. To the south exists property zoned commercial, and to the east property that is zoned residential. The Christian Brothers Development to the South of the Subject Property includes a regional detention basin as part of the overall development. This regional basin was designed to treat the storm water quality and quantity for the McDonald's property as outlined in the *Stormwater Narrative For: Christian Brothers Automotive* prepared by Progressive AE dated August 7, 2023, (revised November 2, 2023). See **Figure 3** – Vicinity Map.

The calculations in this report provide an analysis of the pre-developed site conditions, post-developed site conditions, storm sewer drainage areas, and storm sewer calculations for the

McDonald's Restaurant development. The post-development stormwater conveyance design shall be in accordance with the *Town of Brownsburg Stormwater Management Ordinance*. For detention storage volume and release rates, refer to *Stormwater Narrative for Christian Brothers Automotive,* prepared by Progressive AE, dated August 7, 2023, (revised November 2, 2023).

2.0 PRE-DEVELOPED CONDITIONS

The subject property is an unoccupied lot consisting of slabs of both asphalt and concrete pavement, a gravel drive, silt fence, and trees. The subject property has minimal topography with a slope averaging ~1%, which slopes from the southeast corner of the property to the northeast and northwest corners. The property does not have an on-site detention system; however, it does have access to the regional detention system located on the Christian Brothers development directly south of the subject property.

The pre-development drainage area used for the stormwater analysis includes 1.563 acres, made up of 0.251 acres of impervious areas and 1.311 acres of pervious open space. See the Pre-Development Drainage Map provided in **Figure 1** for reference.

3.0 POST-DEVELOPED CONDITIONS

The proposed improvements include the demolition of the existing pavement slabs on site and the construction of a new 4,398-square-foot McDonald's restaurant and drive-through, asphalt parking lot and drives, a dumpster pad and enclosure, landscaping, sidewalks, curbs, and gutters. There is a detention system on the property south of the McDonald's site that was designed to encompass the stormwater detention of the subject site as well as the site on which it is located. Based on the *Stormwater Narrative for Christian Brothers Automotive*, prepared by Progressive AE, dated August 7, 2023 (revised November 2, 2023), the existing detention pond on the Christian Brothers Automotive property was designed to treat the McDonald's outparcel for stormwater quality and quantity. The detention basin accounted for the McDonald's outparcel to be 80% impervious, see the *Proposed Stormwater Management Plan* in the *Stormwater Narrative for Christian Brothers Automotive*, prepared by Progressive AE. The proposed McDonald's development has 69.23% impervious area, which is less than the 80% impervious area allocated for the outparcel. Therefore, the proposed McDonald's development meets the allotted detention pond design parameters and will not require any additional stormwater management elements. See the Post-Development Drainage Map provided in **Figure 2** for reference.

4.0 STORMWATER CONVEYANCE ANALYSIS

The methods used for the design and analysis of the proposed stormwater conveyance and management system follow the Town of Brownsburg Stormwater Management Ordinance. The design for the storm sewer conveyance system was modeled using Hydraflow Storm Sewers Extension for AutoCAD Civil 3D Version 2020 (by Autodesk Inc.). The analysis of the storm sewer is provided below in **Section 4.1.** CEC is not proposing any new stormwater management facilities because the subject site does not exceed the design limits of the existing detention basin. For the stormwater quality and quantity analysis of the detention basin on the site south of the subject property, see the *Stormwater Narrative for Christian Brothers Automotive* prepared by Progressive AE, dated August 7, 2023, (revised November 2, 2023).

4.1 STORMWATER CONVEYANCE DESIGN

The proposed stormwater conveyance system for the subject site was designed to meet the *Town of Brownsburg Stormwater Management Ordinance* and the *Hendricks County Stormwater Technical Standards Manual*. The system was designed to convey the 10-year storm so that the

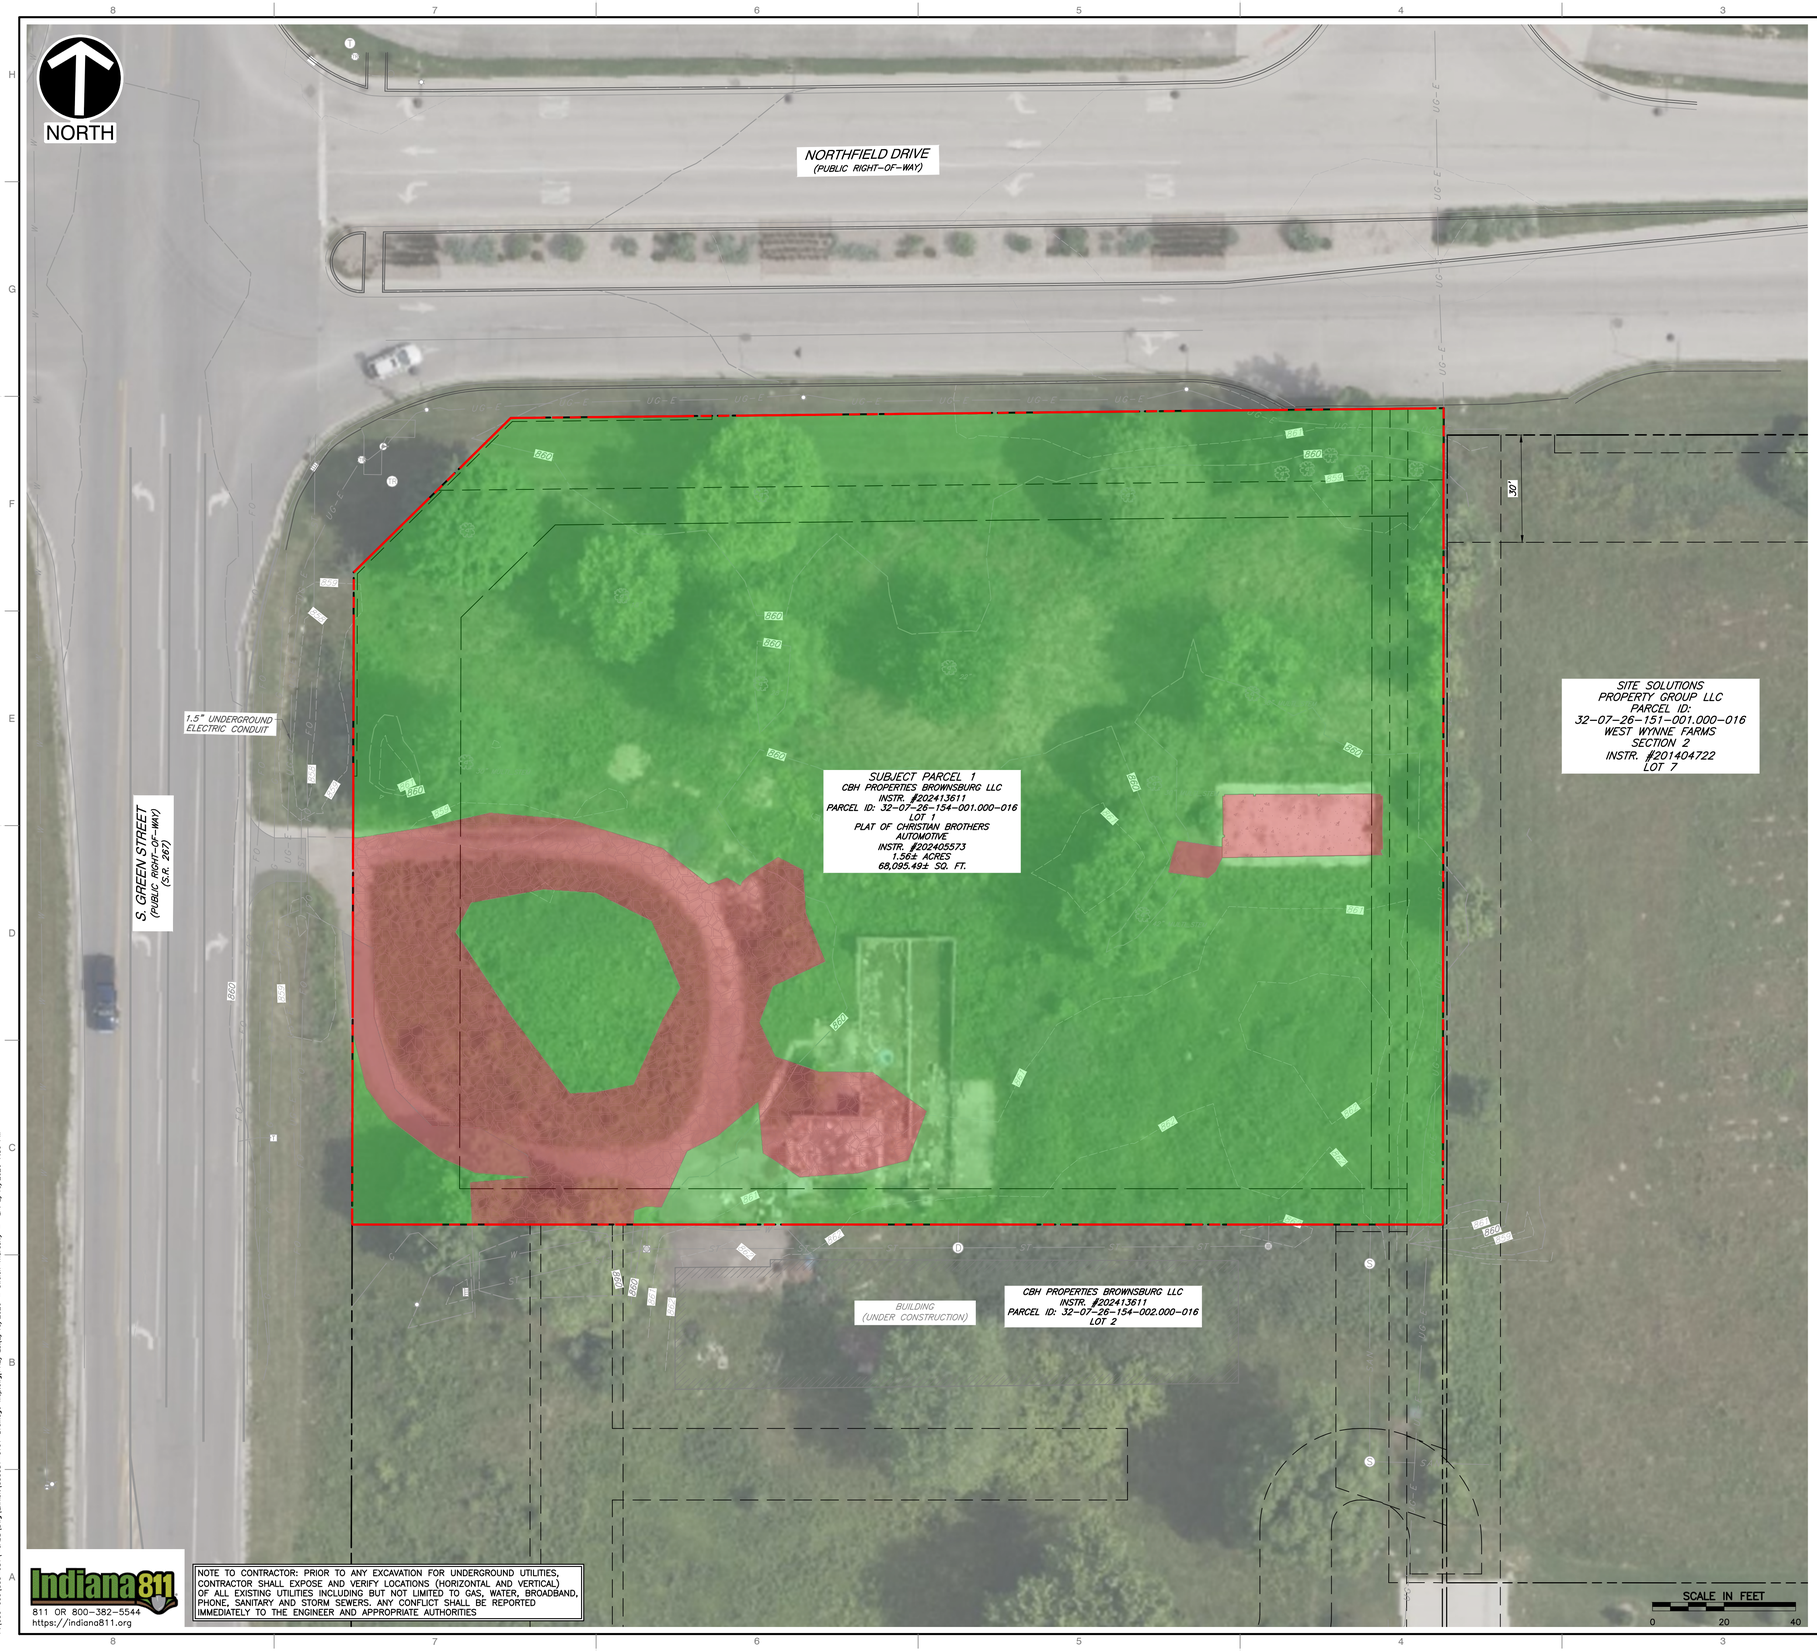

Hydraulic Grade Line is below the crowns of the pipe system and to contain up to the 100-year storm within the system. The system will be connected to an existing system on the property to the south, upstream of the outlet control structure for the existing detention basin. The time of concentration (Tc) used for the design was 10 minutes, which is based on an industry standard for developed land. The sewer pipes were assigned a Manning's "n" value of 0.012 as per the minimum value stated in the *Town of Brownsburg Stormwater Management Ordinance*. See the Storm Sewer Calculations provided in **Appendices 1 and 2**.

4.2 INLET ANALYSIS

The placement and sizing of the proposed inlets, within the proposed storm system, were determined based off the design requirements of the Brownsburg, Indiana Code of Ordinances, Title XV: Land Usage, Chapter 151.21, D3. According to the Code, inlet grate openings shall be designed to pass the 10-year peak flow with 50% of the inlet area clogged and result in a maximum 6-inch ponding depth. The storm conveyance system meets these requirements. Results were recorded for the 10-year event with the full inlet area open, and for the 10-year event with half the inlet length and width used to simulate the 50% clogged inlet area. See **Appendix 3** for the 10-year 0% clogged inlet calculation results and **Appendix 4** for the 10-year 50% clogged inlet calculation results.

FIGURE 1

PRE-DEVELOPMENT DRAINAGE MAP

NOTES

1. SEE SHEET C001 FOR GENERAL NOTES.
2. CONTRACTOR SHALL REFER TO OTHER PLANS WITHIN THIS CONSTRUCTION SET FOR OTHER PERTINENT INFORMATION. IT IS NOT THE ENGINEER'S INTENT THAT ANY SINGLE PLAN SHEET IN THIS SET OF DOCUMENTS FULLY DEPICT ALL WORK ASSOCIATED WITH THE PROJECT.
3. EXISTING SITE INFORMATION/TOPOGRAPHY PREPARED BY CIVIL & ENVIRONMENTAL CONSULTANTS, INC., DATED SEPTEMBER 23, 2025.
4. ALL NEW STORM STRUCTURES ARE TO DISPLAY A PRECAST POLLUTION PREVENTION MESSAGE.
5. ALL DOWNSPOUTS WILL BE DIRECTLY CONNECTED TO THE PROPOSED STORM CONVEYANCE SYSTEM. SEE ARCHITECTURAL PLANS BY OTHERS FOR MORE INFORMATION.

TRAFFIC IMPACT ASSESSMENT
FOR THE PROPOSED
MCDONALD'S RESTAURANT
TOWN OF BROWNSBURG, HENDRICKS, INDIANA

EXECUTIVE SUMMARY

General Overview of the Development

- Development is to occur at southeast corner of the intersection S Green Street and Northfield Dr, in the Town of Brownsburg, Hendricks County, Indiana.
- Development to consist of the construction of the following:
  - 4,300 s.f. fast food restaurant with drive-through.
- Access to the development proposed via the following:
  - A right-in/right-out only access road is to be constructed connecting the proposed McDonald's restaurant, the adjacent auto repair center currently under construction, and the existing Majestic Road to Northfield Drive. The access road is located approximately 350' east of S Green Street (measured center to center).
  - A enter only site access driveway to the proposed access road, approximately 115' south of Northfield Drive (measured center-to-center).
  - An exit only site access driveway to the proposed access road, approximately 250' south Northfield Drive (measured center-to-center).
  - A full access site driveway connecting the proposed McDonald's restaurant to the under construction Christian Brothers Automotive Service Center. A full movement sit driveway to the automotive center is under construction and can be utilized by the proposed McDonald's restaurant.

List of Study Intersections

- S Green Street and Northfield Drive

Trip Generation and Distribution

- Trip generation of the proposed McDonald's Restaurant was determined using rates and equations contained in the Institute of Transportation Engineers (ITE) publication *Trip Generation*, 12th Edition, 2025:
  - Land Use Code 934, *fast-food restaurant with drive-through*, was used to determine the trip generation of the proposed 4,300 s.f. development.
- Anticipated Peak Hour Trip Generation:
  - AM Peak Hour
    - 71 New Primary Trips (36 entering and 35 exiting)
    - 72 Pass-by Trips (37 entering and 35 exiting)
    - 143 total trips (73 entering and 70 existing)

    - PM Peak Hour
        - 61 New Primary Trips (32 entering and 29 exiting)
        - 75 Pass-by Trips (39 entering and 36 exiting)
        - 136 total trips (71 entering and 65 existing)
- Trip distribution for the proposed development was developed based on the existing traffic patterns observed at the intersection of S Green Street and Northfield Drive.

Conclusions/Recommendations

This study has concluded that the construction of the proposed McDonald's Restaurant will have no significant impact on the operation of the adjacent study intersection. Therefore, CEC recommends the following:

- Construct a right-in/right-out only access road connecting the proposed McDonald's restaurant, the adjacent auto repair center currently under construction, and the existing Majestic Road to Northfield Drive. The access road is located approximately 350' east of S Green Street (measured center to center). One (1) lane for ingress and one (1) lane for egress should be provided. The access road should be controlled by a Stop sign on the northbound approach to Northfield Drive.
- Construct a entrance only site access driveway from the Access Road which provides one (1) lane for ingress traffic.
- Construct a exit only site access driveway to the Access Road which provides one (1) lane for egress traffic. The driveway should be controlled by a Stop sign on the site driveway egress approach to the Access Road.
- Construct a full access driveway connecting the proposed McDonald's restaurant to the proposed Christian Brothers Automotive Service Center. The drive should provide one (1) lane for ingress traffic and one (1) lane for egress traffic.
- The proposed site driveways and access roads should be constructed to provide sight triangles that are free of sight obstructions, such as parked vehicles, buildings, walls, hedges, bushes, low growing trees, etc. to maintain a clear line of sight to potential conflicting vehicles.

TRAFFIC IMPACT STUDY
FOR THE PROPOSED
MCDONALD'S RESTAURANT
TOWN OF BROWNSBURG, HENDRICKS COUNTY, INDIANA

Civil & Environmental Consultants, Inc. (CEC) has completed this Traffic Impact Study for the proposed McDonald's Restaurant Development to be located at the southeast corner of the intersection of S Green Street and Northfield Dr, in the Town of Brownsburg, Hendricks County Indiana.

PROJECT DESCRIPTION/DATA COLLECTION/EXISTING ROADWAY DESCRIPTION

PROJECT DESCRIPTION

As shown in Figure 1, the proposed McDonald's Restaurant Development is located at the southeast corner of the intersection of S Green Street and Northfield Drive, on the Town of Brownsburg, Hendricks County, Indiana.

Development to consist of the construction of the following:

- 4,300 s.f. McDonald's Restaurant with drive-through

Access to the development proposed via the following:

- A right-in/right-out only access road is to be constructed connecting the proposed McDonald's restaurant, the adjacent auto repair center currently under construction, and the existing Majestic Road to Northfield Drive. The access road is located approximately 350' east of S Green Street (measured center to center).
- A enter only site access driveway to the proposed access road, approximately 115' south of Northfield Drive (measured center-to-center).
- An exit only site access driveway to the proposed access road, approximately 250' south Northfield Drive (measured center-to-center).
- A full access site driveway connecting the proposed McDonald's restaurant to the under construction Christian Brothers Automotive Service Center. A full movement sit driveway to the automotive center is under construction and can be utilized by the proposed McDonald's restaurant.

A copy of the site plan for the proposed McDonald's Restaurant Development has been included with this report as Figure 2. The following intersection was selected for study:

- S Green Street and Northfield Drive.

DATA COLLECTION

Turning movement counts were performed at the existing study intersection on Wednesday, September 3, 2025, a typical midweek day. - These turning movement counts were performed from 7:00 A.M. to 9:00 A.M. and from 4:00 P.M. to 6:00 P.M., as these time periods were assumed to include the weekday A.M. and weekday P.M. peak hours of traffic within the study area.

The overall peak hours determined from these turning movement count calculations are as follows:

- A.M. Peak Hour – 7:00 A.M. – 8:00 A.M.
- P.M. Peak Hour – 4:15 P.M. – 5:15 P.M.

The existing 2025 peak hour traffic volumes are summarized in Figure 3. Summaries of the traffic volume data collected at each of the existing study intersection has been included in Appendix A to this report.

EXISTING CONDITIONS

A field reconnaissance of the study area was conducted by CEC to obtain information such as roadway widths, roadway grades, and posted speed limits within the environs of the study intersection. A description of the study roadways is as follows:

EXISTING ROADWAYS

S Green Street – At its intersection with Northfield Drive, S Green Street is a state-owned, other principal arterial according to the INDOT roadway functional classification maps. S Green Street is a 2-lane roadway providing one lane of travel in each direction. At its intersection with Northfield Drive, northbound/southbound exclusive left turn lanes and exclusive right turn lanes are provided. The posted speed limit within the study area is 40 miles per hour. Sidewalks and pedestrian accommodations are provided for each approach.

Northfield Drive – At its intersection with S Green Street, Northfield Drive is a median separated local road. Generally, Northfield Drive provides two lanes of travel on the eastern side and one lane of travel on the western side of the intersection in the study area. At its intersection with S Green Street, Northfield Drive provides eastbound/westbound exclusive left turn lanes and an exclusive right turn lane for the westbound approach. The posted speed limit of Northfield Drive is 30 miles per hour to the east and 25 miles per hour to the west. Sidewalks and pedestrian accommodations are provided for each approach.

EXISTING STUDY INTERSECTION

S Green Street and Northfield Drive – The intersection of S Green Street with Northfield Drive is controlled by a fully actuated traffic signal. The northbound/southbound left turn movements have protected/permitted phasing. The eastbound left turn movement provides protected phasing and westbound left turn movement provides protected/permitted phasing. The northbound, southbound, and westbound approaches also provide protected overlap right turn phases.

Signalized pedestrian crossing equipment, crosswalks, and curb ramps are provided for each approach.

EXISTING YEAR 2025 CONDITION CAPACITY CALCULATIONS

Capacity calculations were performed for the study intersection using existing 2025 weekday A.M. and weekday P.M. peak hour volumes and conditions and the methodologies published in the *Highway Capacity Manual*, Seventh Edition, by the Transportation Research Board. This methodology determines how well an intersection, approach to an intersection, or movement at an intersection operates, and assigns to it a Level of Service (LOS) A through F, with LOS A representing the best operating conditions and LOS F, the worst. Detailed definitions of LOS have been included in Appendix B to this report. The study intersection was evaluated using HCS 7th Edition criteria

Synchro version 12 was used for the capacity analysis. Signal timings were determined based on the traffic count video files.

The results of the capacity calculations performed using existing year 2025 weekday A.M. and weekday P.M. peak hour traffic volumes and conditions are presented in Table 1 and Table 2 for the weekday A.M. peak hour and the weekday P.M. peak hour, respectively.

Copies of the capacity calculations are included in Appendix C to this report.

ADDITIONAL TRAFFIC FROM ADJACENT DEVELOPMENTS

To the south of the proposed McDonalds an Automobile Parts and Service Center is currently being constructed with a full movement site access driveway connecting to S Green Street. As part of this develomenbt, a southbound left turn lane is to be provided on S Green Street entering the driveway. As a result, the northbound left turn lane on S Green Street at Northfield Drive will be modified to accommodate this new southbound left turn lane at the driveway. In order to account for trips associated with the auto service center, site trips were projected based upon data published by the Institute of Transportation Engineers (ITE) in their *Trip Generation*, Twelfth Edition, 2025. Land Use Code 943, *Automobile Parts and Service Center*, was used.

The proposed trips for the development have been included in Figure 4 and added to the opening year 2026 no-build and build traffic volumes.

The trip generation for the proposed site is included in Table 4.

OPENING YEAR 2026 NO-BUILD TRAFFIC VOLUMES

Opening year for the proposed development is estimated to be 2026. Therefore, existing 2025 volumes have been projected to year 2026 conditions. An assumed 1.0% linear growth rate was applied. The resultant opening year 2026 peak hour traffic volumes, which include the trips associated with the adjacent auto service center, are summarized in Figure 5.

OPENING YEAR 2026 NO-BUILD CONDITION CAPACITY CALCULATIONS

The results of the capacity calculations performed using Opening Year 2026 No-Build (without development) weekday A.M. and weekday P.M. peak hour traffic volumes and conditions are presented in Table 1 and Table 2 for the weekday A.M. peak hour and the weekday P.M. peak hour, respectively. For analysis purposes, the existing traffic signal observed cycle length was held constant while the phase splits were optimized in the Synchro software.

Copies of the capacity calculations performed using Opening Year 2026 No-Build (without development) weekday A.M. and weekday P.M. peak hour traffic volumes are included in Appendix D to this report.

SITE TRAFFIC GENERATION AND DISTRIBUTION

VEHICULAR TRIP GENERATION

Vehicular trip generation for the proposed McDonald's Restaurant Development was projected based upon data published by the Institute of Transportation Engineers (ITE) in their *Trip Generation*, Twelfth Edition, 2025.

Land Use Code 934, *fast-food restaurant with drive thru*, was used to estimate the trip generation of the proposed 4,300 s.f. development. It should also be noted that not all traffic entering or exiting a site is not necessarily new traffic added to the street system. The actual amount of new traffic is dependent upon the purpose of the trip and the route used from its origin to its destination. Developments such as the proposed restaurant attract a portion of their trips from traffic passing the site on the way from an origin to an ultimate destination. These trip types are classified as pass-by trips which do not add new traffic to the adjacent street system and may be reduced from the total external trips generated by a study site.

Using this methodology, the development can be anticipated to generate the following trips:

- Anticipated Peak Hour Trip Generation:
  - AM Peak Hour
    - 71 New Primary Trips (36 entering and 35 exiting)
    - 72 Pass-by Trips (37 entering and 35 exiting)
    - 143 total trips (73 entering and 70 existing)
  - PM Peak Hour
    - 61 New Primary Trips (32 entering and 29 exiting)
    - 75 Pass-by Trips (39 entering and 36 exiting)
    - 136 total trips (71 entering and 65 existing)

The total site-generated trips for the proposed McDonald's Restaurant Development are summarized in Table 3. Copies of the trip generation calculations are included in Appendix E to this report.

SITE TRAFFIC DISTRIBUTION

Trip distribution for the proposed development was developed based on the existing roadway patterns. Using this methodology, the estimated trip distribution includes approximately 10% of new trips destined to/from the east via the Northfield with S Green Street intersection, 10% of new trips destined to/from the west via the Northfield Drive with S Green Street intersection 40% of the new trips destined to/from the north via the S Green Street with Northfield Drive intersection and 40% of the new trips destined to/from the south via the S Green Street with Northfield Drive.

Pass-by trips were calculated based on the individual peak hour movements past each proposed site access driveway as well as the intersection of S Green Street and Northfield Drive.

The anticipated distribution of new and pass-by trips to be generated by the proposed McDonald's Restaurant Development is presented in Figures 6 & 7.

The forecasted trips to be added to each of the study intersections by the proposed McDonald's Restaurant Development are presented in Figure 8, 9, and 10.

FORECASTED OPENING YEAR 2026 BUILD (WITH DEVELOPMENT) PEAK HOUR TRAFFIC VOLUMES

Opening year 2026 build (with development) traffic volumes at the study intersections were determined by adding the forecasted trips to be added to each of the study intersections by the proposed McDonald's Restaurant Development to the existing year 2026 no-build traffic volumes at each of the study intersections. The resultant forecasted opening year 2026 build (with development) traffic volumes at each of the study intersection are presented in Figure 11.

2026 BUILD CONDITIONS (WITH DEVELOPMENT) CAPACITY CALCULATIONS

The results of the capacity calculations performed using forecasted opening year 2026 build (with development) weekday A.M. and weekday P.M. peak hour volumes and conditions are summarized in Table 1 and Table 2 for the weekday A.M. peak hour and the weekday P.M. peak hour, respectively. The proposed site driveway intersections (build conditions) were analyzed assuming an intersection peak hour factor of .92 and a heavy vehicle percentage of two (2) for new movements. For analysis purposes, the existing traffic signal observed cycle length was held constant while the phase splits were optimized in the Synchro software.

The results of the capacity calculations performed for each of the existing study intersections using forecasted opening year 2026 build (with development) peak hour volumes revealed no significant changes in Level of Service or queue at any of the intersections.

All projected 95th percentile queues are expected to be contained within the existing storage lengths provided. The need for additional auxiliary left turn lanes were not evaluated since a southbound left turn lane on S Green Street will be provided at the access drive.

Copies of the capacity calculations performed using forecasted opening year 2026 build (with development) weekday A.M. and weekday P.M. peak hour traffic volumes are included in Appendix F to this report.

CONCLUSIONS/RECOMMENDATIONS

This study has concluded that the construction of the proposed McDonald's Restaurant Development will have no significant impact on the operation of the adjacent study intersections.

The results of the capacity calculations performed for each of the existing study intersections revealed no decreases in movement/approach Level of Service at any of the existing intersections.

Therefore, CEC recommends the following:

- Construct a right-in/right-out only access road connecting the proposed McDonald's restaurant, the adjacent auto repair center currently under construction, and the existing Majestic Road to Northfield Drive. The access road is located approximately 350' east of S Green Street (measured center to center). One (1) lane for ingress and one (1) lane for egress should be provided. The access road should be controlled by a Stop sign on the northbound approach to Northfield Drive.
- Construct a entrance only site access driveway from the Access Road which provides one (1) lane for ingress traffic.
- Construct a exit only site access driveway to the Access Road which provides one (1) lane for egress traffic. The driveway should be controlled by a Stop sign on the site driveway egress approach to the Access Road.
- Construct a full access driveway connecting the proposed McDonald's restaurant to the proposed Christian Brothers Automotive Service Center. The drive should provide one (1) lane for ingress traffic and one (1) lane for egress traffic.
- The proposed site driveways and access roads should be constructed to provide sight triangles that are free of sight obstructions, such as parked vehicles, buildings, walls, hedges, bushes, low growing trees, etc. to maintain a clear line of sight to potential conflicting vehicles.

A Technical Appendix containing summaries of all counts, analyses and calculations has been included with this report.

APPENDIX B

LEVEL OF SERVICE DEFINITIONS

LEVELS OF SERVICE

Intersection levels of service (LOS) were determined through implementation of the methodology presented in the *Highway Capacity Manual 7th Edition*, published by the Transportation Research Board.

i. Signalized Intersections

An explanation of level of service at signalized intersections is as follows:

This subsection describes the LOS criteria for the motorized vehicle mode. The criteria for the motorized vehicle mode are different from those for other modes. Specifically, the motorized vehicle mode criteria are based on performance measures that are field measurable and perceivable by travelers. The criteria for other modes are based on scores reported by travelers indicating their perception of service quality.

LOS can be characterized for the entire intersection, each intersection approach, and each lane group. Control delay alone is used to characterize LOS for the entire intersection of an approach. Control delay and volume-to-capacity ratio are used to characterize LOS for a lane group. Delay quantifies the increase in travel time due to traffic signal control. It is also a surrogate measure of driver discomfort and fuel consumption. The volume-to-capacity ratio quantifies the degree to which a phases's capacity is utilized by a lane group. The following paragraphs describe each LOS.

LOS A describes operations with a control delay of 10 s/veh or less and a volume-to-capacity ratio no greater than 1.0. This level is typically assigned when the volume-to-capacity ratio is low and either progression is exceptionally favorable or the cycle length is very short. If it is due to favorable progression, most vehicles arrive during the green indication and travel through the intersection without stopping.

LOS B describes operations with control delay between 10 and 20 s/veh and a volume-to-capacity ratio no greater than 1.0. This level is typically assigned when the volume-to-capacity ratio is low and either progression is highly favorable or the cycle length is short. More vehicles stop than with LOS A.

LOS C describes operations with control delay between 20 and 35 s/veh and a volume-to-capacity ratio no greater than 1.0. This level is typically assigned when progression is favorable or the cycle length is moderate. Individual *cycle failures* (i.e., one or more queued vehicles are not able to depart as a result of insufficient capacity during the cycle) may begin to appear at this level. The number of vehicles stopping is significant, although many vehicles still pass through the intersection without stopping.

LOS D describes operations with control delay between 35 and 55 s/veh and a volume-to-capacity ratio no greater than 1.0. This level is typically assigned when the volume-to-capacity ratio is high and either progression is ineffective or the cycle length is long. Many vehicles stop and individual cycle failures are noticeable.

LOS E describes operations with control delay between 55 and 80 s/veh and a volume-to-capacity ratio no greater than 1.0. This level is typically assigned when the volume-to-capacity ratio is high, progression is unfavorable, and the cycle length is long. Individual cycle failures are frequent.

LOS F describes operations with control delay exceeding 80 s/veh or a volume-to-capacity ratio greater than 1.0. This level is typically assigned when the volume-to-capacity ratio is very high, progression is very poor, and the cycle length is long. Most cycles fail to clear the queue.

A lane group can incur a delay less than 80 s/veh when the volume-to-capacity ratio exceeds 1.0. This condition typically occurs when the cycle length is short, the signal progression is favorable, or both. As a result, both the delay and volume-to-capacity ratio are considered when lane group LOS is established. A ratio of 1.0 or more indicates that cycle capacity is fully utilized and represents failure from a capacity perspective (just as delay in excess of 80 s/veh represents failure from a delay perspective).

LOS Criteria: Signalized Intersection

Control Delay (s/veh)	**LOS by Volume-to-Capacity (v/c) Ratio[1]**	
	v/c ≤ 1.0	**v/c > 1.0**
≤ 10	A	F
> 10 – 20	B	F
> 20 – 35	C	F
> 35 – 55	D	F
> 55 – 80	E	F
> 80	F	F

(1) For approach-based and intersectionwide assessments, LOS is defined solely by control delay.

ii. Unsignalized Intersections

The following level-of-service criteria for two-way stop-controlled and all-way stop-controlled intersections differ from the criteria for signalized intersections. The primary reason for this difference is that drivers expect different levels of performance from various kinds of transportation facilities. The expectation is that a signalized intersection is designed to carry higher traffic volumes than an unsignalized intersection. Thus, a higher level of control delay is acceptable at a signalized intersection for the same level of service.

Level of service for two-way stop-controlled (TWSC) intersections and an all-way stop control intersections is determined by the computed or measured control delay. For motor vehicles, LOS is determined for each minor-street movement (or shared movement), as well as the major-street left turns. For TWSC intersections, LOS is not defined for the intersection as a whole or for major –street approaches for three primary reasons: (a) major-street through vehicles are assumed to experience zero delay; (b) the disproportionate number of major-street through vehicles a typical TWSC intersection skews the weighted average of all movements, resulting in a very low overall average delay for all vehicles; and (c) the resulting low delay can mask LOS deficiencies for minor movements.

Level of service for two-way stop control is not defined for the intersection as a whole, while level of service for all-way stop control is defined for the intersection as a whole.

LOS Criteria: Two-Way and All-Way Stop Controlled Intersections

Control Delay (s/veh)	**LOS by Volume-to-Capacity (v/c) Ratio (1)(2)**	
	v/c ≤ 1.0	**v/c > 1.0**
0 – 10	A	F
> 10 – 15	B	F
> 15 – 25	C	F
> 25 – 35	D	F
> 35 – 50	E	F
> 50	F	F

(1) TWSC: The LOS criteria apply to each lane on a given approach and to each approach on the minor street. LOS is not calculated for major-street approaches or for the intersection as a whole.
(2) AWSC: For approaches and intersection wide assessment, LOS is defined solely by control delay.

Ordinance #2013-26
Brownsburg, Indiana
Sept 26, 2013

AN ORDINANCE TO AMEND THE OFFICIAL ZONING MAP OF THE TOWN OF BROWNSBURG FOR PROPERTY LOCATED WITH THE PROPOSED WEST WYNNE FARMS DEVELOPMENT

WHEREAS, Site Solutions Group, LLC. ("Petitioner") of approximately 220 acres of real estate west of South Green Street / SR 267 on the north and south side of CR 300 North and on the north and south side of the proposed Northfield Drive alignment, in the Town of Brownsburg, Lincoln Township, Hendricks County, Indiana, Parcel Numbers 32-07-26-100-007.000-016, 32-07-26-100-006.000-016, 32-07-23-300-015.000-016, 32-07-26-150-002.000-016, 32-07-26-150-003.000-016, 32-07-26-150-004.000-016, 32-07-26-100-003.000-016, 32-07-26-100-004.000-016, 32-07-23-300-014.000-016, 32-07-23-300-013.000-016 ("Property") which real estate is more particularly described on Exhibit 'A' and generally depicted on Exhibit 'B', has filed a petition with the Town to amend the zoning of said real estate to Planned Development (PD) as described in Exhibit 'C'; and

WHEREAS, the Advisory Plan Commission for the Town of Brownsburg ("Commission") has considered said Zoning Map Amendment at public meetings, May 28, 2013, June 24, 2013, July 15, 2013 and on July 22, 2013 and by a vote of its members has made a FAVORABLE RECOMMENDATION that the zoning on the above-described Property be amended, subject to and conditioned upon the following:

1. Pursuant to the petitioner's West Wynne Farms Planned Development (PD) date July 23, 2013 as described in Exhibit 'C'.
2. That the commitments identified in Exhibit 'D' be executed by the owner on the Town's standard written commitment form, and recorded in the Office of the Recorder of Hendricks County, and the same be binding upon the owner and all subsequent owners of the real estate subject to this petition.
3. The recommendations within the Project Synopsis dated June 18, 2013.
4. The recommendations within the Road Improvement Summary date July 18, 2013
5. Site Development Plan Approval will be required pursuant to the applicable Zoning Ordinance regulations in place at the time an application is submitted.
6. Primary and Secondary Plat(s) will be required to subdivide the property pursuant to the Subdivision Control Ordinance of the Town.
7. The approval of the Report of Determination by the Plan Commission.

WHEREAS, the Commission has further found that the amendment does not adversely affect the Comprehensive Plan of the Town of Brownsburg but rather satisfies the current standards, and has been favorably recommended by the Commission to the Town Council;

NOW, THEREFORE, BE IT ORDAINED by the Town Council as follows:

1. The petitioner shall assume and be responsible for payment of all costs incurred in the preparation and filing of all changes in this ordinance which are satisfactory to the Town of Brownsburg;

2. The zoning on the Property, as shown on the Official Zoning Map, shall be amended pursuant to the petitioner's West Wynne Farms Planned Development (PD) date July 23, 2013 as described in Exhibit 'C'.
3. That the commitments identified in Exhibit 'D' be executed by the owner on the Town's standard written commitment form, and recorded in the Office of the Recorder of Hendricks County, and the same be binding upon the owner and all subsequent owners of the real estate subject to this petition.
4. The recommendations within the Project Synopsis dated June 18, 2013.
5. The recommendations within the Road Improvement Summary date July 18, 2013.
6. Site Development Plan Approval will be required pursuant to the applicable Zoning Ordinance regulations in place at the time an application is submitted.
7. Primary and Secondary Plat(s) will be required to subdivide the property pursuant to the Subdivision Control Ordinance of the Town.

PASSED by the Town Council of the Town of Brownsburg, Indiana, this 26th day of September, 2013, by a vote of Five (5) ayes, and Zero (0) nayes.

TOWN OF BROWNSBURG
HENDRICKS COUNTY, INDIANA

By: _____
Gary Hood, President

ATTESTED BY:

_____
Jeanette Brickler, Clerk-Treasurer

This instrument was prepared by Todd A. Barker, AICP, Town of Brownsburg, 61 North Green Street, Brownsburg, Indiana. I affirm, under the penalties for perjury, that I have taken reasonable care to redact each Social Security Number in this document, unless required by law (Jonathan K. Blake).

EXHIBIT 'A'

LEGAL DESCRIPTION

All of the Northeast Quarter and a fractional part of the Southeast Quarter of the Northwest Quarter of Section 26, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, more fully described as follows:

Beginning at a R.R. Spike found marking the Northeast Corner of the Northwest Quarter of Section 26; thence South 00 degrees 00 minutes 00 seconds East (assumed bearing) along the East line of said Northwest Quarter, a distance of 1445.60 feet to an Iron Pipe with I.D. Cap found on the Westerly line of a parcel conveyed to the Indianapolis Water Company as described in Instrument No. 9800003900 of the records on file in the Office of the Hendricks County Recorder, said Westerly line also being the Easterly line of a 75' wide legal drain easement as per a survey by CrossRoad Engineers dated September 15, 1997; thence along said lines for the following six (6) courses: 1) South 55 degrees 36 minutes 57 seconds West a distance of 170.61 feet to an Iron Pipe with I.D. Cap found; 2) South 06 degrees 37 minutes 22 seconds West a distance of 617.30 feet to an Iron Pipe with I.D. Cap found; 3) South 25 degrees 20 minutes 06 seconds West a distance of 191.76 feet to an Iron Pipe with I.D. Cap Found; 4) South 35 degrees 48 minutes 46 seconds West a distance of 210.69 feet to an Iron Pipe with I.D. Cap found; 5) South 47 degrees 52 minutes 57 seconds West a distance of 89.78 feet to an Iron Pipe with I.D. Cap found; 6) South 65 degrees 34 minutes 36 seconds West a distance of 284.88 feet to an Iron Pipe with I.D. Cap found on the South line of the aforesaid Northwest Quarter; thence South 89 degrees 29 minutes 23 seconds West, along said South line, a distance of 598.85 feet to a 3/4" Iron Pipe with I.D. Cap set at the computed Southwest corner of the Southeast Quarter of said Northwest Quarter; Thence North 00 degrees 07 minutes 20 seconds East, along the West line of the East Half of said Northwest Quarter, a distance of 2669.38 feet to a P.K. Nail with I.D. Washer set marking the Northwest corner of the Northeast Quarter of said Northwest Quarter; thence North 89 degrees 25 minutes 51 seconds East, along the North line of said Northwest Quarter and along County Road 300 North, a distance of 1336.52 feet to the place of beginning, containing 74.826 acres, more or less and subject to all highways, rights-of-way and easements. And being subject to a 60' wide utility easement (as recorded in Inst. #9800003901), a 50' wide easement for ingress and egress (as recorded in Inst. #9800003902), a Highway Right-of-Way Agreement (as recorded in Inst. #2003-44818), a 30' wide storm sewer easement (as recorded in Inst. #2003-54107) and being subject to any other easements, rights-of-way or restrictions of record observable.

EXHIBIT 'A' continued

ALSO:

A fractional part of the Southwest Quarter of Section 23, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, more fully described as follows:

Commencing at a R.R. Spike found marking the Southeast corner of the Southwest Quarter of Section 23; thence South 89 degrees 25 minutes 51 seconds West along the South line of said Quarter and along County Road 300 North, a distance of 870.47 feet to a P.K. Nail with I.D. Washer set and the place of beginning; thence continuing South 89 degrees 25 minutes 51 seconds West, along said South line and along said County Road, a distance of 866.60 feet to a P.K. Nail with I.D. Washer set at the Southeast corner of a parcel conveyed to Light Development Corporation as described in Deed Record 328, page 591 of the records on file in the Office of the Hendricks County Recorder; thence North 00 degrees 03 minutes 37 seconds East, along the East line of said parcel and parallel to the West line of the aforesaid Southwest Quarter, a distance of 2308.51 feet to the South line of a parcel conveyed to Terry Tate as described in Deed Record 344, page 767 of the records on file in the Office of the Hendricks County Recorder, said line also being the former Southerly right-of-way line of the CSX Transportation Railroad (for reference, an iron pin was found North 03 degrees 45 minutes 25 seconds West a distance of 0.59 feet); thence South 74 degrees 00 minutes 33 seconds East, along the South line of said parcel a distance of 526.72 feet to a 3/4" Iron Pipe with I.D. Cap set at the Southeast corner of said parcel; thence North 00 degrees 03 minute 37 seconds East, along the East line of said parcel and parallel to the aforesaid West line of the Southwest Quarter, a distance of 103.99 feet to a 3/4" Iron Pipe with I.D. Cap set on the Southerly right-of-way line of the CSX Transportation Railroad; thence South 74 degrees 00 minutes 33 seconds East, along said Southerly right-of-way line, a distance of 369.09 feet to a 3/4" Iron Pipe with I.D. Cap set; thence South 00 degrees 04 minutes 36 seconds East, parallel to the East line of said Southwest Quarter, a distance of 2157.12 feet to the place of beginning, containing 44.101 acres, more or less and subject to all highways, rights-of-way and easements of record.

ALSO:
A fractional part of the Southwest Quarter of Section 23, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, more fully described as follows:

Commencing at a Railroad spike found marking the Southeast corner of the Southwest Quarter of Section 23; thence South 89 degrees 25 minutes 51 seconds West, along the South line of said Quarter and along County Road 300 North a distance of 870.47 feet to a P.K. Nail with I.D.

EXHIBIT 'A' continued

Washer set; thence North 00 degrees 04 minutes 36 seconds West, parallel to the East line of said Quarter a distance of 2261.19 feet to a 3/4" iron pipe with I.D. Cap set on the Northerly right-of-way line of the CSX Transportation Railroad and the place of beginning; thence North 74 degrees 00 minutes 33 seconds West, along said Northerly right-of-way line and the extension thereof (now being the Northerly line of a parcel conveyed to Terry Tate as described in Deed Record 344, page 767 of the records on file in the Office of the Hendricks County Recorder), a distance of 895.54 feet to a 3/4" Iron Pipe with I.D. Cap set; thence North 00 degrees 03 minutes 37 seconds East, parallel to the West line of the Southwest Quarter, a distance of 159.60 feet to a 3/4" Iron Pipe with I.D. Cap set on the North line of the Northwest Quarter of the Southwest Quarter of Section 23 (as established in a survey by MSE Surveying dated December 11, 1991-Jeffrey A. Meyerrose R.L.S. #890003-IN); thence North 89 degrees 16 minutes 50 seconds East, along said North line, a distance of 377.90 feet to the Northwest corner of the Northeast Quarter of said Southwest Quarter (as established in said survey); thence North 89 degrees 30 minutes 26 seconds East, along the North line of the Northeast Quarter of said Southwest Quarter, a distance of 482.32 feet (for reference, an Iron Pin was found North 65 degrees 46 minutes 45 seconds West a distance of 0.54 feet); thence South 00 degrees 04 minutes 36 seconds East, parallel to the aforesaid East line of the Southwest Quarter of Section 23, a distance of 415.20 feet to the place of beginning, containing 5.685 acres, more or less and subject to all highways, rights-of-way and easements of record.

ALSO:
Part of the Northwest quarter of the Northwest quarter of Section 26, Township 16 North, Range 1 East of the Second Principal Meridian in Lincoln Township, Hendricks County, Indiana, more particularly described as follows, to-wit:
Beginning at the Northeast corner of said quarter quarter section; thence South 89 degrees 12 minutes 36 seconds West (assumed bearing) on and along the North line of said quarter quarter section 450.00 feet; thence South 00 degrees 05 minutes 03 seconds East parallel to the East line of said quarter quarter section 817.78 feet; thence South 89 degrees 12 minutes 36 seconds West parallel to the aforesaid North line of said quarter quarter section 527.70 feet; thence South 00 degrees 05 minutes 03 seconds East parallel to the East line of said quarter quarter section 1850.46 feet to a point on the South line of said quarter quarter section; thence North 89 degrees 20 minutes 16 seconds East on and along said South line 977.68 feet to the Southeast corner of said quarter quarter section; thence North 00 degrees 05 minutes 03 seconds West on and along the East line of said quarter quarter section 2670.42 feet to the Point of Beginning. Containing 50.00 acres, more or less.

EXHIBIT 'A' continued

ALSO:
A part of the West half of the Southwest quarter of Section 23, Township 16 North, Range 1 East of the Second Principal Meridian in Hendricks County, Indiana, more particularly described as follows, to-wit:
Beginning at a stone at the Southwest corner of said Section 23; thence South 89 degrees 57 minutes 36 seconds East on and along the South line of said section 935.96 feet; thence North 00 degrees 37 minutes 26 seconds East 1375.48 feet; thence North 88 degrees 41 minutes 54 seconds West 602.89 feet; thence South 01 degree 13 minutes 58 seconds West 211.07 feet; thence North 88 degrees 47 minutes 11 seconds West 330.84 feet to a point on the West line of said Section; thence South 00 degrees 37 minutes 26 seconds West on and along the West line of said section 1184.50 feet to the Point of Beginning. Containing 28.16 acres, more or less.

ALSO:
Lots numbered 2, 3, and 4 in Minor Plat Numbered Four (4) in Lincoln Township, Hendricks County, Indiana, as per plat thereof recorded April 7, 1978, in Plat Book 9, page 111, in the Office of the Recorder of Hendricks County, Indiana.

Exhibit C - Site Plan	41
Exhibit D - Commitments	42

PD Ordinance Purpose and Intent:

West Wynne Farms was originally zoned through Hendricks County in 2007. Since that time, the housing market has changed remarkably. Prior to 2007, Hendricks County experienced rapid growth for approximately twenty (20) years making it the second fastest growing county in the State of Indiana. The rapid decline of the national and local housing market and the economy in general in the years following 2007 are now stabilizing. Not surprisingly, based on its prior success, Hendricks County is one of the first counties to recover economically and begin to develop again.

Since 2007, land use conditions surrounding West Wynne Farms have changed, demanding more appropriate uses within West Wynne Farms than originally planned. Northfield Drive has been constructed west of the development through The Village of Heritage Hill. It has been constructed east of the development, as well. The development of West Wynne Farms will connect Northfield Drive from the southeastern side of Brownsburg through to the west end of Heritage Hill. The completion of Northfield Drive through the southern end of Brownsburg creates greater economic opportunities for Brownsburg with the development of larger scale commercial uses, apartments and empty nester rental villas. The use of the land within West Wynne Farms for these new uses allows for development on smaller parcels of ground, reducing urban sprawl and allowing greater open space and park lands.

Upon completion, the "West Wynne Farms" development shall comprise the following land-uses:

✓ Commercial/Retail/Office	51 acres *
✓ Empty Nester Rental Villas	33 acres *
✓ Apartments	26 acres *
✓ Single Family	63 acres *
✓ Northfield Drive (R.O.W.)	6 acres *
✓ Open Space	46 acres **

* Above acreages are approximate.

** A portion of the open space acreage shall be incorporated within the above described land-uses.

Commercial/Retail/Office

Such uses are designated for development upon "Parcels R and S". It is anticipated that the subject parcels shall evolve and develop as the remainder of the project progresses. Being

situated along the Northfield Drive and State Road 267 corridors, "Parcels R and S" represent effective land use practices when considering the anticipated future urbanization and development of the surrounding area. Providing for such uses within the "West Wynne Farms" development shall allow for the residents within and around West Wynne Farms to shop, conduct business, and to seek various professional services without traveling beyond the immediate area, and thus become less impacting upon infrastructure situated beyond the immediate area.

Apartments

Apartments are a designated to be developed and constructed upon "Parcel Q". The development of apartments reduces urban sprawl and creates greater fiscal opportunities for the Town of Brownsburg.

Empty Nester Villa Rentals

The need for various housing options for empty nesters and senior citizens continues to increase as baby boomers age. The villas are designated to be developed and constructed upon "Parcels O and P".

Single-Family

The single-family district, designated as "Parcel N" shall provide for housing types and market values for the "traditionally" defined or "nuclear" family.

Northfield Drive Right-of-Way

Tracts of land shall be reserved for the extension and construction of Northfield Drive. In consideration of current and future traffic demands, such improvement is essential for the implementation of the "Town of Brownsburg Thoroughfare Plan".

Open Space

Open space situated with-in individual neighborhoods and throughout the overall development shall provide passive and recreational amenities inclusive of pedestrian trails, bike paths, playgrounds within the single family district, and a pool and clubhouse within the apartment complex. Individual associations for the various uses within West Wynne Farms shall manage these amenities. Approximately twelve (12) acres of open space on the south side of the Northfield Drive extension shall be passive recreation. Approximately thirty-four (34) acres of passive and active recreational amenities shall be provided north of County Road 300 North and extending to the B&O Rails to Trails.

Comprehensive Plan

The 2012 Comprehensive Plan contains the following objectives which the amendment of West Wynne Farms will help achieve:

1. "Promote the flexible application of Land Use Plan, accommodating a variety of residential development that is consistent with the Plan but mindful of housing market demands, existing inventory and larger residential trends."

2. "Continue to encourage a mix of housing including owner- and renter- occupied single family detached homes, single family attached homes and multi-family development."

3. "Promote the development of senior housing to expand housing options and encourage older Brownsburg residents to age in place." The subject development will also allow Brownsburg residents to bring their aging parents to the community. Typically, retired senior citizens who are still living independently are a great asset to communities, being active in charitable and civic organizations and programs."

4. "Continue to promote office and employment uses in areas along Northfield Drive and the Ronald Reagan corridors."

5. "Determine the preferred route for the remaining segments of Northfield Drive and take steps necessary, including securing right-of-way, to complete the route encircling the core of Brownsburg."

The proposed changes to West Wynne Farms meets the intent of the PD district in that the development is a medium to large scale development providing for a wide range of uses, including three separate and distinct residential uses which provide a greater tax base to the Town than the mostly single family owner-occupied lots and homes currently permitted. In addition, the proposed changes include a greater amount of commercial development, including a large scale grocery store or similar use. Lastly, due to the decrease in urban sprawl, the amount of open space has nearly doubled providing the opportunity for the Town of Brownsburg to utilize a large portion of the open space for park lands. Because of these proposed changes, West Wynne mitigates monotony.

Lastly, the proposed PD amendment meets the requirements of *IC 36-7-4-1500* et seq. for the reason that the Developer has initiated the text amendment in the proper format and expresses in detailed terms the requirements that apply to each Parcel within the PD; has notified surrounding landowners and published notice of the public hearing according to Indiana law and the procedures adopted by the Brownsburg Plan Commision; the application has been considered by and received a recommendation from the Brownsburg Plan Commission as delegated to said Plan Commission by the Brownsburg Town Council; and thereafter been considered and adopted by the Brownsburg Town Council.

District Intent	Permitted Uses	Special Exception Uses
The purpose of Parcel N is to permit moderate density single-family detached homes on medium sized lots for new development with water and sewer connections	Farm Dwelling (pre-existing structures) Single-Family Dwellings Passive/Active Recreation Areas Day Care in Home Home Occupations as permitted by the Brownsburg Zoning Ordinance (2/1/13)	Assisted Living Facility Education Institution, excluding K-12 Educational Institution, K-12 Religious Places of Worship Non-commercial Recreation Publicly Owned Buildings and Facilities

District Development Standards

1.	Minimum Lot Area:	10,000 square feet
2.	Minimum Lot Width:	70 feet, measured at the building setback.
3.	Minimum Lot Frontage:	40 feet
4.	Maximum Lot Coverage:	40%
5.	Minimum Floor Living Area:	1,500 square feet, single story
		2000 square feet, multi-story
6.	Maximum Height:	
	Primary Structure:	40 feet
	Accessory Structure:	18 feet
7.	Minimum Front Yard Setback:	30 feet (primary and accessory structures)
8.	Minimum Side Yard Setback:	10 feet minimum (primary and accessory structures)
9.	Minimum Rear Yard Setback:	
	Primary Structure:	15 feet
	Accessory Structure:	10 feet
10.	Minimum Distance Between Buildings:	20 feet
11.	Maximum Number of Primary Structures	1

12. Additional Standards

A. Minimum Off-Street Parking and Loading Requirements

Minimum off-street parking and loading requirements shall be as regulated by the Brownsburg Zoning Ordinance adopted February 1, 2013 for the R3 District.

B. Sign Requirements

Sign requirements shall be as regulated by the Brownsburg Zoning Ordinance adopted February 1, 2013 for the R3 District.

C. Landscaping Requirements

Landscaping shall be as regulated in this Ordinance Section 8.

D. Architectural Standards

Architectural requirements shall be as regulated in this Ordinance Section 5.

13. Development standards not specifically addressed herein shall comply with the development standards required in District R3 of the Brownsburg Zoning Ordinance adopted February 1, 2013, including, but not limited to, environmental, fences and walls, and lighting.

District Intent	Permitted Uses	Special Exception Uses
The purpose of Parcels O and P is to permit moderate density multi-family buildings in the form of one story senior/ empty nester apartments with water and sewer connections	Farm Dwelling (pre-existing structures) Multi-Family apartments Passive/Active Recreation Areas Day Care in Home Home Occupations as permitted by the Brownsburg Zoning Ordinance (2/1/13)	Assisted Living Facility Education Institution, excluding K-12 Educational Institution, K-12 Non-commercial Recreation Publicly Owned Buildings and Facilities Group Home Hospital/Emergency Care Facility Nursing Home Religious Places of Worship

District Development Standards

1. Density: 6 dwelling units per acre
2. Maximum Lot Coverage: 60 percent
3. Minimum Living Area: 1200 square feet
4. Maximum Height: 35 feet
5. Minimum Front Yard Setback: 20 feet the edge of pavement on private streets
6. Minimum Rear Yard Setback:

   All Structures: 15 feet
7. Minimum Distance Between Principal Buildings: 20 feet
8. Maximum Number of Buildings Per Lot:

   Parcel O: 20
   Parcel P: 10
9. Additional Standards

   A. Minimum Off-Street Parking and Loading Requirements

      Minimum off-street parking and loading requirements shall be as regulated by the Brownsburg Zoning Ordinance adopted February 1, 2013 for the M2 District.

   B. Sign Requirements

      Sign requirements shall be as regulated by the Brownsburg Zoning Ordinance adopted February 1, 2013 for the M2 District.

   C. Landscaping Requirements

      Landscaping shall be as regulated by the Brownsburg Zoning Ordinance adopted February 1, 2013 for the M2 District.

   D. Architectural Requirements

      Architectural requirements shall be regulated in this Ordinance Chapter 6.

   E. In "Parcel P", no dwelling shall be built east of a parallel line that is 1,295 feet from the west property line (centerline of SR 267) of West Wynne Farms.

10. Development standards not specifically addressed herein shall comply with the development standards required in District M2 of the Brownsburg Zoning Ordinance adopted February 1, 2013, including, but not limited to, environmental, fences and walls, and lighting.

District Intent	Permitted Uses	Special Exception Uses
The purpose of Parcel Q is to permit moderate to high density multi-family buildings with water and sewer connections	Farm Dwelling (pre-existing structures)	Assisted Living Facility
	Multi-Family apartments	Education Institution, excluding K-12
	Garages and carports, detached	Educational Institution , K-12
	Passive/Active Recreation Areas	Religious Places of Worship
	Day Care in Home	Non-commercial Recreation
	Signs, as regulated within this Ordinance	Publicly Owned Buildings and Facilities
	Home Occupations as permitted by the Brownsburg Zoning Ordinance (2/1/13)	

District Development Standards

1. Density — 12 dwelling units per acre
2. Maximum Lot Coverage: — 60 percent
3. Minimum Living Area:
   - One Bedroom: 700 square feet
   - Two Bedroom: 900
   - Average: 1000 square feet
4. Maximum Height:
   - Primary Structures: 50 feet to peak
   - Accessory Structures: 20 feet
5. Minimum Front Yard Setback: — 20 feet from the edge of pavement on private streets
6. Minimum Side Yar Setback: — 15 feet
7. Minimum Rear Yard Setback:
   - Primary Structures: 15 feet
   - Accessory Structures (incl. garages and Carports): 0 feet
8. Minimum Distance Between Principal Buildings: — 20 feet
9. Maximum Number of Buildings Per Lot: — 25 (including primary and accessory structures)
10. *Additional Standards*

F. Minimum Off-Street Parking and Loading Requirements

Minimum off-street parking and loading requirements shall be as regulated by the Brownsburg Zoning Ordinance adopted February 1, 2013 for the M3 District.

G. Sign Requirements

Sign requirements shall be as regulated in this Ordinance Section 12.

H. Landscaping and Buffer Requirements

Landscaping shall be as regulated by the Brownsburg Zoning Ordinance adopted February 1, 2013 for the M3 District and by Commitments recorded _____, 2013 in the Office of the Recorder of Hendricks County, Indiana as Instrument Number _____ and attached to this Ordinance as Exhibit D.

I. Architectural Requirements

Architectural requirements shall be as regulated in this Ordinance Section 6.

11. Development standards not specifically addressed herein shall comply with the development standards required in District M3 of the Brownsburg Zoning Ordinance adopted February 1, 2013, including, but not limited to, environmental, fences and walls, and lighting.

District Intent	Permitted Uses	Special Exception Uses
The purpose of Parcels R and S is to permit low, medium and high intensity commercial uses for new development with more than one principal use or building permitted per lot with water and sewer connections	Farm Dwelling (pre-existing structures) Wind turbine, small Agricultural Roadside Stands Educational Institution Passive/Active Recreation Areas Religious Places of Worship Animal grooming Auction (indoor) Automotive (Type 1) Bakery Bank, ATM, Drive-up Banquet Hall Bar, Tavern, Brew Pub Barber/Beauty Shop Broadcast Studio Car rental Catering service Club or Lodge Coffee shop Coin laundry Computer service Copy center, Printing Delicatessen Design services Donation collection point Dry cleaning, processing Dry cleaning, pick up/drop off Express shipping center Exterminator Funeral home Gas station Hospice care facility Hotel, motel Ice cream shop Media rental Medical clinic Mobile device dealer Nail salon	Wind turbine, large Automotive (Types 2 and 3) Crematory Recycling collection point Transit station (local hub) Contractor Services (Parcel R) Research & Testing Laboratories

District Development Standards

1. Minimum Lot Area: None

2. Minimum Lot Width: 50 feet, measured at the building setback.

3. Maximum Lot Coverage:

   All Structures: 50%

   Impervious Surface: 90%

4. Maximum Height:

   Primary Structures: 50 feet

   Accessory Structure: 20 feet

5. Minimum Front Yard Setback:

   From Subdivision Street: 0 feet (primary and accessory structures)
   From External Street: 30 feet

6. Minimum Side Yard Setback: 10 feet minimum along perimeter
   0 feet along internal property lines

7. Minimum Rear Yard Setback:

   Primary Structure: 15 feet
   Accessory Structure: 10 feet

8. Minimum Distance Between Buildings: 10 feet

9. Maximum Number of Buildings Per Lot: 5

10. Additional Standards

A. Minimum Off-Street Parking and Loading Requirements

Minimum off-street parking and loading requirements shall be as regulated by the Brownsburg Zoning Ordinance adopted February 1, 2013 for District C2.

B. Sign Requirements

Sign requirements shall be as regulated in this Ordinance Section 12.

C. Landscaping Requirements

Landscaping shall be as regulated in this Ordinance Section 9.

D. Architectural Requirements

Architectural requirements shall be as regulated in this Ordinance Section 7.

E. CONTRACTORS SERVICES, WAREHOUSES AND SELF STORAGE

1. Contractor Services, warehouses and self-storage uses shall be permitted in Parcel S only and only as designated on the Land Use Map attached as Exhibit "C".

2. Contractors Services shall be permitted only within the Flex Space, allowing for offices in the front of the unit and warehousing in the rear of the unit

10. Development standards not specifically addressed herein shall comply with the development standards required in District C2 of the Brownsburg Zoning Ordinance adopted February 1, 2013, including, but not limited to, environmental, fences and walls, and lighting.

5.01 PURPOSE

The purpose of the Residential Architectural Commitments is to establish the character, value, look, and style of the single-family detached dwellings for Parcel N.

5.02 GENERAL REQUIREMENTS

Any building, structure or use of land, when erected or expanded upon, shall provide architectural elements within the following provisions of this Section. Builders shall submit for the Developer's review all proposed building elevations with all exterior materials specified.

5.03 DESIGN STANDARDS

All single-family dwellings shall be in accordance with the following standards and specifications:

A. Front elevations shall consist of one of the following:
   1. 100% brick, stone, or cultured stone, excluding windows and doors, up to eight (8') feet in height or equivalent square footage coverage. This requirement may also be met by utilizing a Masonite or wood and/or cement based siding product in lieu of vinyl on 100% of all elevations of the home or building.
   2. 80% brick, stone or cultured stone, excluding windows and doors, up to eight feet (8') in height or equivalent square footage, provided a minimum twenty-four inch (24") wainscot of brick, stone or cultured stone is utilized on the side and rear elevations.
   3. Homes on corner lots shall be considered to have two front elevations.

B. Window grids on all operable non-casement windows on all elevations.

C. Chimney chases must be enclosed.

D. Lighting fixtures required on both sides of garage door.

E. All roof pitches should be 6/12 minimums, exclusive of porches, bump-outs, or dormers.

F. All vinyl siding shall be a minimum 0.044.

G. No homes shall have the same front elevation or exact color scheme within a 3-lot "snapshot" on the same side of the street, or of the home immediately across the street from the center of the 3-lot "snapshot".

H. Minimum two (2)-car garage.

I. All front entry doors must include sidelights or transoms.

J. All operable windows on the front of the home shall have shutters.

K. A concrete patio (80 sq. ft. min.) must be provided at the rear elevation.

L. Asphalt/Fiberglass shingles.

M. Roofs shall extend with "overhangs" a minimum of twelve (12") inches on all sides of the home, except where brick extends to the eave in which there will be an eight (8) inch overhang.

N. In addition, at least three (3) of the items below:
1. Dormers on front elevation roof;
2. Reverse gable or hip roof on front elevation roof;
3. Covered front porch (minimum 16 square feet);
4. Decorative front door surround, trim molding or header;
5. Garage bump-out (minimum 2 feet) with minimum 2 foot setback from garage plane where plane is closer to street than that of the front door;
6. Dimensional "shaped" shingle for entire roof;
7. Accent siding, decorative vents, or accents in gable peak or face on front elevation;
8. Shutters on all windows (on side and rear elevations [in addition to those already required at front elevations]);
9. Keystone or decorative brick or wood surround on one or more windows or doors on front elevation;
10. Bay or "boxed-out" window on front elevation;
11. Decorative trim molding at gutter height on front elevation;
12. Brick full height of front façade including gables;
13. Brick wainscot around sides and rear elevations;
14. Additional wall mounted exterior lights, or post mounted decorative yard lights as approved by covenants.

O. Furthermore, homes with rear and side elevations facing parks, trails, community open space, exterior Town/County/State roadways, or Northfield Drive shall comply with the following (with credit given here only if option not chosen from "additional requirements" above:
1. If at least a four (4') foot Wainscot of brick on rear elevation and a minimum eighty (80 SF) square foot covered or screened porch is provided, pick at least one (1) item as specified below:
a. Finished space "pop-out";
b. Bay Window;
c. Reverse Gable;
d. Dormer;
e. Dormer;
f. Hip Roof;
g. Accent Siding;
h. Shutters on all appropriate windows;
i. Dimensional (shaped) Shingles;
j. Decorative Trim Molding at gutter height;
k. Window Grids;
l. Raised Wood Deck (8' x 10' minimum); deck may be constructed in lieu of required concrete patio.
m. Additional Landscaping of either one (1) 2" caliper shade or ornamental tree, or one four-six (4'-6') tall evergreen tree.

2. If no brick on rear elevation, then a minimum eighty (80 SF) square foot covered or screened porch is required, and pick at least two (2) items as specified below:

   a. Finished space "pop-out";
   b. Bay Window;
   c. Reverse Gable;
   d. Dormer;
   e. Dormer;
   f. Hip Roof;
   g. Accent Siding;
   h. Shutters on all appropriate windows;
   i. Dimensional (shaped) Shingles;
   j. Decorative Trim Molding at gutter height;
   k. Window Grids;
   l. Raised Wood Deck (8' x 10' minimum); deck may be constructed in lieu of required concrete patio.
   m. Additional Landscaping of either one (1) 2" caliper shade or ornamental tree, or one four-six (4'-6') tall evergreen tree.

6.01 PURPOSE

The purpose of the following Architectural Commitments is to establish the character, value, look, and style of the multi-family buildings for Parcels O, P and Q.

6.02 GENERAL REQUIREMENTS

Any building, structure or use of land, when erected or expanded upon, shall provide architectural elements within the following provisions of this Section. The Builders shall submit for the Developers review all proposed building elevations with all exterior materials specified.

6.03 DESIGN STANDARDS

All multi-family buildings shall be in accordance with the following standards and specifications:

A. For Parcel O only the front elevations shall consist of the following:
   i. Front
      1. Minimum 80% brick, stone or cultured stone, excluding windows and doors, up to eight feet (8') in height or equivalent square footage.
   ii. Side
      1. Minimum twenty-four inch (24") wainscot of brick, stone or cultured stone is utilized.
   iii. Rear
      1. Minimum twenty-four inch (24") wainscot of brick, stone or cultured stone is utilized.
   iv. Concrete block is not a permitted exterior finish material.

B. For Parcel P elevations shall consist of the following:
   i. Front
      1. Minimum 80% brick, stone or cultured stone, excluding windows and doors, up to eight feet (8') in height or equivalent square footage,
   ii. Rear
      1. Minimum 80% brick, stone or cultured stone, excluding windows and doors, up to eight feet (8') in height or equivalent square footage is utilized on the rear for elevations for buildings abutting and facing the south property line of Parcel P.
   iii. Southern Façade of the southernmost building along the east property line
      1. Minimum 80% brick, stone or cultured stone, excluding windows and doors, up to eight feet (8') in height or equivalent square footage is utilized on the southernmost elevation of the building abutting and facing the south property line of Parcel P.

iv. All other Side and Rear elevations of other buildings shall not be required to have a brick or stone elevation on the side or rear.

C. Concrete block is not a permitted exterior finish material.

B. For Parcel Q only, the front, side and rear of any building elevation shall consist of the following:

iv. 50% brick, stone, or cultured stone, excluding windows and doors, up to sixteen feet (16') in height or equivalent square footage coverage.

v. Concrete block is not a permitted exterior finish material.

C. Buildings in Parcels O and P shall be limited to one story.

D. Asphalt/Fiberglass shingles or Standing Seam metal roof.

E. Rooftop canopy and telecommunication equipment shall be fully screened on all sides using parapets, penthouse screens or other similar methods, which are integrated into the overall building design.

F. Window grids on all operable non-casement windows on all elevations.

G. Chimney chases must be enclosed.

H. Roof pitches shall be 5/12 minimums, exclusive of porches, bump-outs, and dormers.

I. All vinyl siding shall be a minimum of 0.046 in Parcels O, P and 0.44 in parcel Q.

J. All front entry doors must include sidelights or transoms or a window in the door in Parcels O and P.

K. Windows on the front of the home in Parcels O and P shall have shutters, where applicable.

L. A keystone or decorative brick surround shall be provided on one or more windows or doors on the front elevation when brick is used.

M. All side elevation windows shall be treated by shutters or decorative headers.

N. All utility panels shall be screened or located in an area not visible from a public roadside.

O. Roofs shall extend with "overhangs" a minimum of twelve (12") inches on all sides of the buildings except where brick extends to the eave in which there will be an eight (8) inch overhang.

P. There shall be no accessory structures in Parcels O and P. Accessory structures are permitted in Parcel Q. Accessory structures shall not include mailboxes and trash compactor structures.

7.01 PURPOSE

The purpose of the Commercial/Retail/Office Architectural Commitments is to establish the character, value, look, and style of the Commercial/Retail buildings.

7.02 GENERAL REQUIREMENTS

Any building, structure or use of land, when erected or enlarged upon, shall provide architectural elements within the following provisions of section. Builders and/or developers of individual parcel(s) shall submit for the review and approval by the developer of the overall West Wynne Farms project all proposed building elevations with all exterior materials specified.

7.03 DESIGN STANDARDS

All Commercial/Retail/Office buildings shall be in accordance with the following standards and specifications:

A. The buildings will be a combination of masonry, glass, decorative architectural block and dryvit. Split face Block shall not comprise more than 30% of any façade. Plain concrete block is not a permitted exterior finish material (with exception of loading areas not directly visible from a public street). Highly reflective materials shall be prohibited.

B. Front and side facades for all corner lots shall be of the same materials and similarly detailed.

C. All entrances shall be defined by architectural elements such as pediments, plasters, columns, awnings and other design elements appropriate to the architectural style and details of the building as a whole, or shall project or be recessed by not less than four (4) feet. All entrances shall be covered.

D. The roofs shall be gabled or hip, full or parapet, and shall be clad in wood shingles, slate, asphalt/fiberglass shingles or standing seam metal.

E. Dormers shall be designed with the correct details, proportion and style consistent with the overall building composition and roofed with symmetrical gable, hip or barrel roofs. Belvederes, cupolas, and pergolas are permitted if appropriate to the style, well proportioned, and fully detailed.

F. All vents, attic ventilators, turbines, flues and other roof penetrations shall be *painted* to match the color of the roof or flat black.

G. Rooftop canopy and telecommunication equipment shall be fully screened on all sides using parapets, penthouse screens, or other similar methods, which are integrated into the overall building design.

H. Gutters and downspouts shall be appropriate to, or visually integrated with, the architectural style of the structure.

I. All trash collection facilities shall be masonry enclosed with decorative gates located in discrete but accessible areas.

J. All proposed storage and loading areas shall be screened or hidden. No storage or loading area shall be parallel to State Road #267, County Road 300N or the proposed Northfield Drive.

K. All exterior mechanical equipment shall be screened or hidden. No mechanical equipment shall be permitted parallel to State Road 267, County Road 300S or the proposed Northfield Drive (unless contained in an underground vault, flush with the ground. Said vault shall be screened with landscaping).

L. Exterior sidewalks, steps, and ramps shall be masonry, stone, brick pavers, poured or pre-cast concrete.

M. Parking lots shall be concrete, asphalt paving or brick pavers or any combination thereof with the exception of the warehouses/self storage area. Tempory Stone parking shall be permitted in the warehouse/ self storage area for a period not to exceed two years for phasing purposes only.

N. All proposed plans for the Commercial/Retail/Office parcels shall comply with all current Town, County, and State regulations and approvals, which are de-signed and intended to safeguard the quality of storm water runoff.

O. Height and width ratio requirements shall be as follows:

Width:

1. Facades less than twelve (12) lineal feet long, shall not require any fenestration.
2. Facades greater than twelve (12) lineal feet shall require thirty (30) percent fenestration.
3. Facades greater than seventy-five (75) lineal feet shall incorporate wall plane projections or recesses having a depth of at least three (3) percent of the length of the façade and extending at least twenty (20) percent of the length of the façade. No uninterrupted length of any façade shall exceed seventy-five (75) lineal feet.
4. Facades shall include a repeating pattern with no less than three (3) of the following elements: color change, texture change, material change, fenestration change (windows, doors, openings, etc.), or profile change (turns & projections, etc.).

Height:

1. The height of a building shall not exceed three (3) stories. This measurement shall be from the exterior grade of the building to the mean ridgeline on hip or gabled rooflines.
2. The maximum height of a story shall be thirteen (13) feet clear.
3. The height limit shall not apply to masts, belfries, clock towers, cupolas, chimneys, machine rooms, or similar structures.

8.01 PURPOSE

The purpose of the residential landscape commitments is to establish the character, value, look, and to buffer the single-family attached and detached and multi-family areas from other land uses within the development.

8.02 GENERAL REQUIRMENTS

Any building, structure or use of land, when erected or expanded upon, shall provide landscape design elements within the following provisions of this section. Builders shall submit for the Developer's review all proposed site and development plans having all plant materials and specifications listed

8.03 DESIGN STANDARDS

A. All single-family detached structures and lots shall be in accordance with the following standards and specifications:

1. Where rear lot lines of residential districts abut State Road #267, Northfield Drive, County Road 300 North, a minimum forty (40) foot landscape buffer shall be provided. Said buffer shall include four (4) to six (6) feet high undulating mounds, having 1 of the following type of tree for every 20 lineal feet of buffer area; shade trees measuring a minimum 2-1/2" caliper, ornamental trees measuring a minimum 1-1/2" caliper, and 6-8 feet tall conifers.
2. Where rear lot lines of residential districts abut Open Space(s) and Amenity area(s) measuring a minimum of five (5) acres (excluding Open Space[s] containing retention pond facilities), shade trees measuring a minimum 2-1/2" caliper shall be planted so that a minimum of six (6) trees occur every one hundred (100) lineal feet.
3. Where residential lots that are developed along the perimeter of the development, however do not abut any of the aforementioned roadways, a landscape buffer zone, measuring a minimum ten (10) feet wide, shall be made a part of the residential lot. Such landscape buffers and lots shall be encumbered by a landscape easement, to be made a part of and pursuant to the recording of the final plat and "Covenants and Restrictions". Lots adjoining Wynne Farms along eastern boundary of West Wynne Farms are exempt from this requirement.
4. All residential lots that are developed along the perimeter of the development *shall install* either a shade tree measuring a minimum 2-1/2 inch caliper, or a six (6) foot high conifer in the rear yard. Said plantings shall be installed within the 10' landscape buffer easement, by the builder, with the homeowner/ or HOA assuming responsibility for maintenance after the initial warranty period depending on if it is located on a common area or on a lot.
5. Existing tree(s) to remain, having a caliper of four (4) inches or greater on any lot, shall have snow fencing, or like material, installed at the drip line of the existing tree(s) by the builder for protection during building construction. Maintenance of

tree protection practices shall be the sole responsibility of the builder until ownership of the lot is conveyed to the homeowner.

6. All lots shall be finished graded pursuant to the elevations provided upon the approved plot plan. All front and side yards shall be sodded to the rear side corners of the house.
7. All rear yards shall be finished graded for proper drainage, seeded and hydro-mulched as a minimum.
8. A minimum of two (2) of any combination of the following 2-1/2" caliper shade tree, or 1-1/2" caliper ornamental tree, or evergreen tree, measuring a minimum of six (6) feet in height, shall be planted in the front yard.
9. Foundation landscaping in front yards shall include a minimum of ten (10) deciduous and/or evergreen shrubs at twenty-four (24) inches high. All foundation landscaping shall be placed within a natural mulch bed.
10. All mailboxes shall be of common post design, box size, and color, as approved by the Developer.

B. All single-family attached homes shall be in accordance with the following standards and specifications:

1. Landscaping shall be installed when the parcel is being developed with for sale units.
2. All lots shall be finished graded pursuant to the elevations provided upon the approved plot plan. All front and side yards shall be sodded to the rear side corners of the structure.
3. All rear yards shall be finished graded for proper drainage, seeded and hydro mulched as a minimum.
4. A minimum of one (1) 2-1/2" caliper shade tree, or one (1) 1-1/2" caliper ornamental tree, or one (1) evergreen tree, measuring a minimum of six (6) feet in height, shall be planted in the front yard of each building.
5. Foundation landscaping in front yards shall include a minimum of ten (10) deciduous and/or evergreen shrubs at twenty-four (24) inches high. All foundation landscaping shall be placed within a natural mulch bed.
6. All mailboxes shall be of common post design, box size, color, and location, as approved by the Developer.

Where rear yards meet between internal neighborhoods (parcels), a minimum of one (1) 2-1/2" caliper shade tree or one (1) 6' tall conifer shall be planted by the builder within ten (10') feet of the rear property line. Such landscape buffers and lots shall be encumbered by a landscape easement, to be made a part of and pursuant to the recording of the final plat and "Declaration of Covenants, Conditions, and Restrictions". The homeowner and or the HOA in the event it is common area or in a buffer landscaped easement shall be responsible for maintaining said tree(s) after the initial warranty period.

9.01 PURPOSE

The purpose of the commercial/retail/office landscape commitments is to establish the character, value, look, and to buffer of the commercial/retail/office parcels from other land uses within the development.

9.02 GENERAL REQUIRMENTS

Any building, structure or use of land, when erected or enlarged upon, shall provide landscape design elements within the following provisions of this section. Builders shall submit for the Developer's review all proposed site and development plans having all plant materials and specifications listed.

9.03 DESIGN STANDARDS

A. All commercial/retail/office development shall be in accordance with the following standards and specifications except for parking:

1. Landscaping shall have any combination of materials selected from Section 9.03.B. which equals or exceeds a Unit Value of 5.0 for each one-hundred (100) lineal feet of property along the external limits of the real estate contained within this ordinance, provided that at least 10% of the Unit Value shall be derived from deciduous shade trees ("overstory"), or deciduous ornamental trees ("understory"), and at least 75% of the Unit Value shall be derived from evergreen trees, evergreen shrubs – narrow spread, or earthen mounds.
2. Parking lots shall include landscape islands every thirty (30) parking spaces, a minimum of ten (10') feet in width and the length of a parking space. If parking spaces are nose to nose, the island shall be the length of two spaces.
3. All parking lanes shall begin and end with a landscape island the length of two (2) spaces end-to-end, and a measuring a minimum of ten (10') feet in width.
4. Parking islands shall include a minimum of two (2) 2-1/2" caliper shade tree with turf or a mulch material that is complimentary to the building(s) color scheme.
5. Perimeter parking screening will be provided and shall include shrubs at a minimum of 3 feet in height that forms an opaque screen and visual barrier within 2 years of planting. The unit value for perimeter parking screening may count toward the overall unit value required in 9.03.A.1.

B. Unit Values (minimum sizes at time of planting)

1.	Deciduous Shade/Overstory Tree – 2 ½" Caliper	0.75
2.	Evergreen Tree – 9' Tall	0.75
3.	Deciduous Ornamental/Understory Tree – 1 ½" Caliper	0.50
4.	Evergreen Tree – 6' Tall	0.50
5.	Evergreen Shrub with Narrow Spread – 4' Tall	0.25
6.	Hedge Plant – 24" to 30" Spread	0.05
7.	Earthen Mound – 3' Tall	0.50
8.	Earthen Mound – 6' Tall	1.00
9.	Earthen Mound – 9' Tall	1.50

10.01 PURPOSE

The purpose of this section is to provide standards and specifications applicable to the construction of streets, alleyways, sidewalks, and pedestrian walkways within West Wynne Farms.

10.02 DESIGN STANDARDS

All streets internal to West Wynne Farms shall be designed and constructed pursuant to the standards and specifications contained in the Brownsburg Subdivision Control Ordinance effective 1/01/2004. Additionally, the following standards are permitted:

A. Stamped or colored asphalt and/or concrete shall be allowed at intersections, entries, and pedestrian crosswalks. All maintenance of streets involving colored asphalt or concrete, which are dedicated to the public, shall remain with the public entity accepting the subject improvement. The public entity accepting and maintaining those streets, which have been approved and containing decorative paving materials, shall have the inherent right to remove and replace such areas with non-decorative materials.

B. Subsurface drains (SSD) shall be installed under concrete curbs pursuant to the standards and specifications of the governing jurisdiction at the time of platting. All residential lots shall be permitted to receive a lateral from the SSD to allow for sump pump and downspout connection discharge. Private streets with an inverted crown section shall have sub-surface drains located in the low areas of the street along the centerline or low spot and not beneath the curbs or a continuous sub-surface line.

C. Developer has the option to delay placing the surface coat of asphalt streets with-in each phase until an eighty (80) percent build-out is achieved, or within three (3) years following the recording date of the final plat, whichever occurs sooner, provided that an acceptable surety is posted to guaranty such improvement and an acceptable binder course with adequate sealer is utilized and approved by the Town of Brownsburg Street Department.

D. Reverse curves with less than one-hundred (100) feet of tangency shall be permitted.

E. Roadways shall be permitted to intersect along horizontal curves provided that the intersecting roadway centerline is external and radial to the opposing curve.

F. The developer has the option of posting Performance Bonds and Maintenance Bonds, or other forms of sureties, in accordance with the standards established in the Town of Brownsburg Subdivision Control Ordinance.

G. Roadways within Parcels O, P and Q shall be private roads constructed to the thickness standards of the Town of Brownsburg or equivalent structural strength, and a width of twenty-four feet (24').

H. The streets and public rights-of-way within Parcels O, P and Q shall be privately owned and maintained by the property owner. The streets and rights-of-way may become publicly owned and maintained only upon the express written consent of the governmental body having jurisdiction.

I. Five (5) foot wide concrete sidewalks shall be installed along interior and exterior roads. In some locations, an eight (8) foot wide asphalt trail may be constructed in lieu of the aforementioned concrete sidewalk.

10.03 STREET SIGNS.

At the Developer's discretion, custom signage may be substituted for standard street signage as specified in the "Brownsburg Sub-division Control Ordinance"; provided, that such custom signage is approved by the Street Department and Planning and Building Department of the Town of Brownsburg, shall be installed at the Developer's expense, and maintained by the owner of or an authorized management organization for the parcel(s) in which such signage is placed.

11.01 PURPOSE

The purpose of the open space and amenities within the development is to enhance the overall preservation of native grounds, create active and passive areas for recreational enjoyment, and to serve as buffers between various land use types.

11.02 PARCEL M

The purpose of "Parcel M" is to create passive and/or active open space and parklands which the Developer shall have the option of donating/dedicating to the Town of Brownsburg for public use.

11.03 GENERAL COMMITMENTS

A. All playground equipment shall meet International Play Equipment Manufacturers Association (IPEMA) certification and the U.S. Consumer Product Safety Performance Specifications. In addition, all structures shall meet ADA (American Disabilities Act) guidelines.
B. Playground surfacing materials shall comport to the cushioning standards of the Consumer Product Safety Commission.
C. All parks, trails, and open space shall be maintained and insured by a Homeowners Association, to be established through the establishment of appropriate covenants and restrictions.
D. All multi-use paths shall either be asphalt or concrete constructed to a minimum width of eight (8) feet.
E. Multi-use paths along State Road 267 and Northfield Drive shall conform to the standards of the Town of Brownsburg's adopted Greenways Plan.
F. Total area designated for open space shall not be less than 25% of the total West Wynne Farms acreage.

11.04 DESIGN STANDARDS FOR PARCEL N.

In its sole discretion, the Developer may choose to incorporate relatively small amenities to serve the recreational needs of residents which shall be owned and maintained by the Homeowners Association. These areas shall contain a minimum of three (3) of the following options:

1. Pavilion;
2. "Tot-lot" consisting of a multi-use play structure(s);
3. Bench seating;
4. Bicycle rack(s);
5. Water feature (e.g. fountain, reflecting pool);
6. Shuffleboard court(s);
7. Quarter- to half-scale basketball court (court size determined by overall parklet design area and layout);

8. Landscaping within parklets shall consist of no fewer than twelve (12) shade trees at 1-1/2" caliper and nine (9) conifers at 5 feet minimum height.

The amenities shall be completed within six (6) months of the issuance of a building permit for fifty (50) houses.

11.05 DESIGN STANDARDS FOR PARCEL Q:

Within six (6) months of the issuance of a building permit for the sixth building , the Developer, or the Builder, shall have completed the development of five (5) of the following:

A Minimum 2,000 SF pool and bathhouse facility;
B. Parking lot;
C. Tennis court(s);
D. Quarter- to full-scale basketball court(s);
E. Neighborhood-scale pavilion;
F. Bicycle rack(s);
G. Neighborhood-scale playground with multi-use structure(s);
H. Picnic tables;
I. Grilling station;
J. Landscaping, consisting of no fewer than twenty-four (24) shade trees at 1-1/2" caliper and twenty-four (24) evergreen trees at 5' minimum height.

11.06 ADDITIONAL OPEN SPACE: Approximately twelve (12) acres on the south side of Northfield Drive, as designate on the site map, shall remain as passive open/green space and Developer shall have the option to deed it to an entity for public use.

12.01 PURPOSE

The purpose of the signage regulations is to encourage the effective use of signs as a means of communication within the development; to maintain and enhance the aesthetic environment, and to enhance the development's ability to attract sources of economic development and growth; to improve pedestrian and traffic safety; to minimize the possible adverse effect of signs on nearby public and private property; and to enable fair and consistent enforcement of the restrictions contained herein.

12.02 APPLICABILITY EFFECT

A sign may be erected, placed, established, painted, created, or maintained within the development provided such facility is in strict conformance with the standards, procedures, exemptions, and other requirements of this contained herein.

12.03 PERMITS REQUIRED

A. Signs requiring a permit under the provisions of this Ordinance shall secure such approval prior to the construction, placement, erection, or modification of an existing sign, pursuant to, and in accordance with, the requirements of the Brownsburg Zoning Ordinance.

B. No sign permit of any kind shall be issued for an existing or proposed sign unless such sign is consistent with the requirements of all applicable ordinances.

12.04 EXEMPT SIGNS

A. Signs designated as "exempt" within the Brownsburg Zoning Ordinance shall be relieved from any obligation to obtain an Improvement Location Permit (ILP), provided said signs comply with all applicable provisions contained here-in.

12.05 ON-PREMISE SIGNS: COMMERCIAL/RETAIL

The following signage is permitted within Parcels R and S:

A. Permitted Commercial/Retail/Office signs: No single business establishment or tenant shall be permitted to have more than three (3) of the signs identified in paragraphs numbered 1,3,4,5,6,10, and 11 of this section.

1. Wall-mounted or Painted Signs:
   a. External streets (C.R. 300 North, State Road #267, and Northfield Drive), the area of the signboard shall not exceed a maximum size of one (1) square foot

per two (2) lineal feet of building frontage, nor exceed a maximum of one hundred (100) square feet.

b. Internal streets (i.e. all streets and parking areas not defined as "external streets"), the area of the signboard shall be calculated using the same 1:2 ratio, provided that any business with less than fifty (50) feet of frontage shall be permitted up to twenty-five (25) square feet of signboard.
c. Limited to two (2) signs per business establishment and no more than one (1) sign per façade.
d. Wall signs may be illuminated only during operating hours of business.
e. Wall-mounted signs along the external streets and adjacent residential areas shall not be internally illuminated, except where those external streets abut or front along other commercial parcels.
f. Applied letters may be substituted for wall-mounted signs, if constructed of wood, metal, or stone. Applied plastic letters shall not be permitted; however, translucent inserts may be used as an accent material.

2. Building Directory Signs:
   a. Such sign(s) shall be mounted on the wall adjacent to the entrance.
   b. Such signage shall project outward from the wall to which it is attached; however, such projection shall not exceed six (6) inches.
   c. The area of the signboard shall not exceed twelve (12) square feet.

3. Projecting Signs:
   a. The signboard shall not exceed an area of eight (8) square feet unless a corner sign, which shall not exceed an area of nine (9) square feet.
   b. The height of the top edge of the signboard shall not exceed (i) the height of the wall from which the sign projects, if attached to a single story building, (ii) the height of the sill or bottom of any second story window, if attached to a multi-story building and not a corner sign, or (iii) 50% of the distance between the building cornice or roof line and the sill or bottom of any second-story window if a corner sign located on a multi-story building.
   c. The distance from the building wall to the signboard shall not exceed six (6) inches.
   d. The width of the signboard shall not exceed four (4) feet.
   e. Limited to one sign for each ground floor business establishment.

4. Window and/or door signs shall not exceed 30% of the window or door area.
5. Awning signs shall not exceed twelve (12) square feet in area
6. Freestanding Signs: provided that the following standards are met:
   a. Signs shall be set back a minimum of ten (10) feet from the property line.
   b. The area of the signboard shall not exceed thirty (30) square feet.
   c. The height of the top of the signboard, or of any posts, brackets, or other supporting elements shall not exceed six (6) feet from the ground.

d. The signboard shall be architecturally compatible with the style, composition, materials, colors, and details of the building.

e. The signboard may be illuminated, but not after 11.00 PM, unless the business establishment is open later than 11:00 PM, at which time it shall not be illuminated after closing.

f. Limited to two (2) signs per building, and no more than one (1) sign per façade.

7. Incidental Signs shall be allowed for each entrance, shall not be illuminated, and shall not exceed four (4) square feet.
8. Directional Signs: may be either freestanding or wall-mounted on the rear façade or barrier (wall or fence), but shall be unlit and limited to four (4) square feet in area.
9. Eatery Signs: restaurants and cafes shall be allowed one (1) of the following additional signs:
   a. A wall-mounted display featuring the actual menu as used at the dining table, to be contained within a shallow wood or metal case, and clearly visible trough a glass front. The display case shall be attached to the building wall, next to the main entrance, at a height of approximately five (5) feet, shall not exceed a total area of two (2) square feet, and may be illuminated.

   b. Sandwich board signs, as follows:

      i) The area of the signboard, single-sided, shall not exceed five (5) square feet.
      ii) The signboard shall be constructed of wood, chalkboard, and/or finished metal.
      iii) Letters can be painted or handwritten.
      iv) The sign shall be located within four (4) feet of the main entrance to the business and its location shall not interfere with pedestrian and/or vehicular circulation.
      v) The information displayed shall be limited to daily specials and hours of operation.
      vi) The sign shall be removed at the end of the business day.
10. Historically Appropriate Illuminated Signs: (to the type of business conducted) sign area shall not exceed six (6) square feet.
11. Pylon Monument Signs:
   a. Size:
      i. Commercial/office centers less than 25,000 building square feet in size shall be permitted one pylon monument sign per center, which shall be no greater than nine (9) feet in height and have no more than sixty (60) square feet of sign area per face;
      ii. Commercial/office center which range in size from 25,000 building square feet to less than sixty thousand (60,000) building square feet shall be permitted one pylon monument sign per center, which shall be no greater than fifteen (15) feet in height and have no more than one hundred and twenty (120) square feet of sign area per face;
      iii. Commercial/office centers greater than sixty thousand (60,000) building square feet shall be permitted one pylon monument sign per center,

which shall be no greater than twenty-five (25) feet in height and have no more than two hundred and fifty (250) square feet of sign area per face;

iv. Commercial/office monument signs shall have a minimum base height of six (6) inches and a minimum cap height of two (2) inches. Total aggregate sign cap and base height shall not exceed six (6) feet; and

v. Sign caps and bases shall not be used for display or advertising purposes

b. Entrance Signs:

i. In addition to a pylon monument sign, a commercial/office center shall be permitted one (1) entrance sign per point of ingress; and

ii. Commercial/office center entrance signs shall be limited to a maximum of six (6) feet in height, a sign area of thirty (30) square feet per sign face, and shall not contain tenant information.

c. Setbacks:

i. All signs shall conform to the side and rear yard setback requirements for structures as set forth in this PD Ordinance; and

ii. Signs shall have a minimum front yard or right-of-way setback requirement of five (5) feet from a property line or right-of-way.

B. Permitted Other Temporary Signs for a period of not more than two years:

1. Project Identification Signs:

d. The design of the sign shall be consistent with the development's architectural character.

b. The maximum area per sign shall not exceed seventy-five (75) square feet.

c. The area surrounding the sign shall be appropriately landscaped.

d. The sign may be externally illuminated.

e. The sign shall not exceed fifteen (15) feet in height.

f. Matching signs, which border either side of one entrance, shall be treated as one sign, but both sign faces shall be used to calculate the total sign area.

2. Construction Signs for each street frontage of a lot, upon which construction of any structure is in progress, shall be permitted provided the following standards are met:

a. The maximum sign area shall be thirty-two (32) square feet.

b. The maximum height of each sign shall be eight (8) feet.

c. The sign shall not be illuminated.

d. The sign shall be removed within seven (7) days after occupancy occurs for the intended use of the building.

e. Sign copy shall be limited to identification of the building, architects, engineers, contractors, and other persons involved with the construction, but shall not include any advertising or product other than a rendering of the building being constructed.

3. Promotional Signs:

a. Signs depicting the site plan of a district, parcel, or sub-parcel assuming completion of development in accordance with the development plan, and indicating the location within the real estate of the person viewing the sign, provided the following standards are met:

i) The maximum size for each subject area sign shall be thirty-two (32) square feet.

ii) The maximum height shall be eight (8) feet.

iii) The sign may be externally illuminated until 11:00 PM each night.

iv) Promotional Signs shall be removed from a subject area when 95% of the lots or commercial space in that subject area has been sold.

b. Signs containing a rendering of one or more buildings expected to be constructed on a lot or portion of the real estate, provided the following standards are met:
   i) The maximum size for each subject area sign shall be forty (40) square feet.
   ii) The maximum height shall be eight (8) feet.
   iii) The sign may be externally illuminated until 11:00 PM each night.
   iv) One sign shall be permitted for each street frontage of the lot or portion of real estate upon which construction of the depicted building is contemplated.
   v) The sign shall be removed not later than thirty-six (36) months following installation thereof unless construction of the building has commenced prior to that date and, if construction commences, the sign shall be removed within seven (7) days after occupancy occurs for the intended use of the building.

4. Real Estate Sales and Leasing Signs: provided the following standards are met:
   a. Maximum sign area shall be twenty (20) square feet.
   b. The height of the sign shall not exceed eight (8) feet.
   c. Limited to one sign for each street frontage of the lot, with no more than two (2) sign faces per sign.
   d. The sign shall not be illuminated.
   e. Signs shall be removed within seven (7) days after the date the unit is leased, sold, or occupied.
   f. When 80% of the Commercial Center is sold or occupied, real estate signs are limited to a ground sign, a wall sign, or a window sign of six (6) square feet or less.

12.06 SIGNS: SINGLE FAMILY FOR PARCEL N

The following signage is permitted in the Single Family parcels of the Development:

All signage as permitted under the Brownsburg Zoning Ordinance for District R3.

12.07 SIGNS: MULTI- FAMILY FOR PARCELS O, P and Q

The following signage is permitted in the Multi-Family parcels of the Development:

All signage as permitted under the Brownsburg Zoning Ordinance for District M2 for Parcels O and P.

All signage as permitted under the Brownsburg Zoning Ordinance for District M3 for Parcels Q.

12.08 GENERAL REGULATIONS

A. Design Standards: signs affixed to the exterior of a building shall be architecturally compatible with the style, composition, materials, colors, and details of the building, as well as with other signs used on the building.

B. Premises identification:

1. The assigned premises identification of a building shall be displayed in such a manner so that the numeral can readily be seen from the street. Identification shall be displayed on the building, on or near the main entrance door, or displayed on a mailbox near the street in such a manner as they identify its corresponding building. If the mailboxes for several different buildings are grouped together, or if the location of individual mailboxes are not clearly associated with their respective buildings, then identification shall also be displayed on the building.
2. Any dwelling or commercial building that abuts an alley or secondary access that could be uses by motor vehicles must not only display the premises identification on the front, but shall also display its premises identification visible from the alternate access to the property.
3. When numeral representing premises identification are removed or become illegible, such numeral shall be renewed or replaced by the owner or occupant of the building.

C. Sign Maintenance: all signs and sign structures shall be kept and maintained in good repair and in a safe condition.

D. Sign Proximity: no sign shall be permitted to be placed on any wall, fence, or standard unless fronting a thoroughfare, alley, or rear lane, or unless located in a side yard that fronts a thoroughfare, alley, or rear lane.

12.09 GENERAL PERMIT PROCEDURES

General permit procedures shall comply with the current Brownsburg Zoning Ordinance.

13.01 INTERPRETATION OF TERMS OR WORDS

For purposes of this Ordinance, certain terms or words are defined, and the words or terms used shall be interpreted as follows:

The word "person" includes a firm, association, organization, partnership, trust, company, corporation or other legal entity, as well as an individual;

The present tense includes the future tense, the singular number includes the plural, and the plural number includes the singular;

The word "shall" is a mandatory requirement, the word "may" is a permissive requirement, and the word "should" is a preferred requirement;

The words "used" or "occupied" include the words "intended, designed, constructed, converted, altered or arranged to be used or occupied"; and

The word "lot" includes the words "plot, tract or parcel."

13.02 DEFINITIONS

All definitions within this PD shall comply with the Brownsburg Zoning Ordinance adopted February 1, 2013.

13.03 ENFORCEMENT

Enforcement of this Ordinance shall comply with the terms of enforcement contained within the Brownsburg Zoning Ordinance adopted February 1, 2013.

All of the Northeast Quarter and a fractional part of the Southeast Quarter of the Northwest Quarter of Section 26, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, more fully described as follows:

Beginning at a R.R. Spike found marking the Northeast Corner of the Northwest Quarter of Section 26; thence South 00 degrees 00 minutes 00 seconds East (assumed bearing) along the East line of said Northwest Quarter, a distance of 1445.60 feet to an Iron Pipe with I.D. Cap found on the Westerly line of a parcel conveyed to the Indianapolis Water Company as described in Instrument No. 9800003900 of the records on file in the Office of the Hendricks County Recorder, said Westerly line also being the Easterly line of a 75' wide legal drain easement as per a survey by CrossRoad Engineers dated September 15, 1997; thence along said lines for the following six (6) courses: 1) South 55 degrees 36 minutes 57 seconds West a distance of 170.61 feet to an Iron Pipe with I.D. Cap found; 2) South 06 degrees 37 minutes 22 seconds West a distance of 617.30 feet to an Iron Pipe with I.D. Cap found; 3) South 25 degrees 20 minutes 06 seconds West a distance of 191.76 feet to an Iron Pipe with I.D. Cap Found; 4) South 35 degrees 48 minutes 46 seconds West a distance of 210.69 feet to an Iron Pipe with I.D. Cap found; 5) South 47 degrees 52 minutes 57 seconds West a distance of 89.78 feet to an Iron Pipe with I.D. Cap found; 6) South 65 degrees 34 minutes 36 seconds West a distance of 284.88 feet to an Iron Pipe with I.D. Cap found on the South line of the aforesaid Northwest Quarter; thence South 89 degrees 29 minutes 23 seconds West, along said South line, a distance of 598.85 feet to a 3/4" Iron Pipe with I.D. Cap set at the computed Southwest corner of the Southeast Quarter of said Northwest Quarter; Thence North 00 degrees 07 minutes 20 seconds East, along the West line of the East Half of said Northwest Quarter, a distance of 2669.38 feet to a P.K. Nail with I.D. Washer set marking the Northwest corner of the Northeast Quarter of said Northwest Quarter; thence North 89 degrees 25 minutes 51 seconds East, along the North line of said Northwest Quarter and along County Road 300 North, a distance of 1336.52 feet to the place of beginning, containing 74.826 acres, more or less and subject to all highways, rights-of-way and easements. And being subject to a 60' wide utility easement (as recorded in Inst. #9800003901), a 50' wide easement for ingress and egress (as recorded in Inst. #9800003902), a Highway Right-of-Way Agreement (as recorded in Inst. #2003-44818), a 30' wide storm sewer easement (as recorded in Inst. #2003-54107) and being subject to any other easements, rights-of-way or restrictions of record observable.

ALSO:

A fractional part of the Southwest Quarter of Section 23, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, more fully described as follows:

Commencing at a R.R. Spike found marking the Southeast corner of the Southwest Quarter of Section 23; thence South 89 degrees 25 minutes 51 seconds West along the South line of said Quarter and along County Road 300 North, a distance of 870.47 feet to a P.K. Nail with I.D. Washer set and the place of

beginning; thence continuing South 89 degrees 25 minutes 51 seconds West, along said South line and along said County Road, a distance of 866.60 feet to a P.K. Nail with I.D. Washer set at the Southeast corner of a parcel conveyed to Light Development Corporation as described in Deed Record 328, page 591 of the records on file in the Office of the Hendricks County Recorder; thence North 00 degrees 03 minutes 37 seconds East, along the East line of said parcel and parallel to the West line of the aforesaid Southwest Quarter, a distance of 2308.51 feet to the South line of a parcel conveyed to Terry Tate as described in Deed Record 344, page 767 of the records on file in the Office of the Hendricks County Recorder, said line also being the former Southerly right-of-way line of the CSX Transportation Railroad (for reference, an iron pin was found North 03 degrees 45 minutes 25 seconds West a distance of 0.59 feet); thence South 74 degrees 00 minutes 33 seconds East, along the South line of said parcel a distance of 526.72 feet to a 3/4" Iron Pipe with I.D. Cap set at the Southeast corner of said parcel; thence North 00 degrees 03 minute 37 seconds East, along the East line of said parcel and parallel to the aforesaid West line of the Southwest Quarter, a distance of 103.99 feet to a 3/4" Iron Pipe with I.D. Cap set on the Southerly right-of-way line of the CSX Transportation Railroad; thence South 74 degrees 00 minutes 33 seconds East, along said Southerly right-of-way line, a distance of 369.09 feet to a 3/4" Iron Pipe with I.D. Cap set; thence South 00 degrees 04 minutes 36 seconds East, parallel to the East line of said Southwest Quarter, a distance of 2157.12 feet to the place of beginning, containing 44.101 acres, more or less and subject to all highways, rights-of-way and easements of record.

ALSO:

A fractional part of the Southwest Quarter of Section 23, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, more fully described as follows:

Commencing at a Railroad spike found marking the Southeast corner of the Southwest Quarter of Section 23; thence South 89 degrees 25 minutes 51 seconds West, along the South line of said Quarter and along County Road 300 North a distance of 870.47 feet to a P.K. Nail with I.D. Washer set; thence North 00 degrees 04 minutes 36 seconds West, parallel to the East line of said Quarter a distance of 2261.19 feet to a 3/4" iron pipe with I.D. Cap set on the Northerly right-of-way line of the CSX Transportation Railroad and the place of beginning; thence North 74 degrees 00 minutes 33 seconds West, along said Northerly right-of-way line and the extension thereof (now being the Northerly line of a parcel conveyed to Terry Tate as described in Deed Record 344, page 767 of the records on file in the Office of the Hendricks County Recorder), a distance of 895.54 feet to a 3/4" Iron Pipe with I.D. Cap set; thence North 00 degrees 03 minutes 37 seconds East, parallel to the West line of the Southwest Quarter, a distance of 159.60 feet to a 3/4" Iron Pipe with I.D. Cap set on the North line of the Northwest Quarter of the Southwest Quarter of Section 23 (as established in a survey by MSE Surveying dated December 11, 1991-Jeffrey A. Meyerrose R.L.S. #890003-IN); thence North 89 degrees 16 minutes 50 seconds East, along said North line, a distance of 377.90 feet to the Northwest corner of the Northeast Quarter of said Southwest Quarter (as established in said survey); thence North 89 degrees 30 minutes 26 seconds East, along the North line of the Northeast

Quarter of said Southwest Quarter, a distance of 482.32 feet (for reference, an Iron Pin was found North 65 degrees 46 minutes 45 seconds West a distance of 0.54 feet); thence South 00 degrees 04 minutes 36 seconds East, parallel to the aforesaid East line of the Southwest Quarter of Section 23, a distance of 415.20 feet to the place of beginning, containing 5.685 acres, more or less and subject to all highways, rights-of-way and easements of record.

ALSO:

Part of the Northwest quarter of the Northwest quarter of Section 26, Township 16 North, Range 1 East of the Second Principal Meridian in Lincoln Township, Hendricks County, Indiana, more particularly described as follows, to-wit:

Beginning at the Northeast corner of said quarter quarter section; thence South 89 degrees 12 minutes 36 seconds West (assumed bearing) on and along the North line of said quarter quarter section 450.00 feet; thence South 00 degrees 05 minutes 03 seconds East parallel to the East line of said quarter quarter section 817.78 feet; thence South 89 degrees 12 minutes 36 seconds West parallel to the aforesaid North line of said quarter quarter section 527.70 feet; thence South 00 degrees 05 minutes 03 seconds East parallel to the East line of said quarter quarter section 1850.46 feet to a point on the South line of said quarter quarter section; thence North 89 degrees 20 minutes 16 seconds East on and along said South line 977.68 feet to the Southeast corner of said quarter quarter section; thence North 00 degrees 05 minutes 03 seconds West on and along the East line of said quarter quarter section 2670.42 feet to the Point of Beginning. Containing 50.00 acres, more or less.

ALSO:

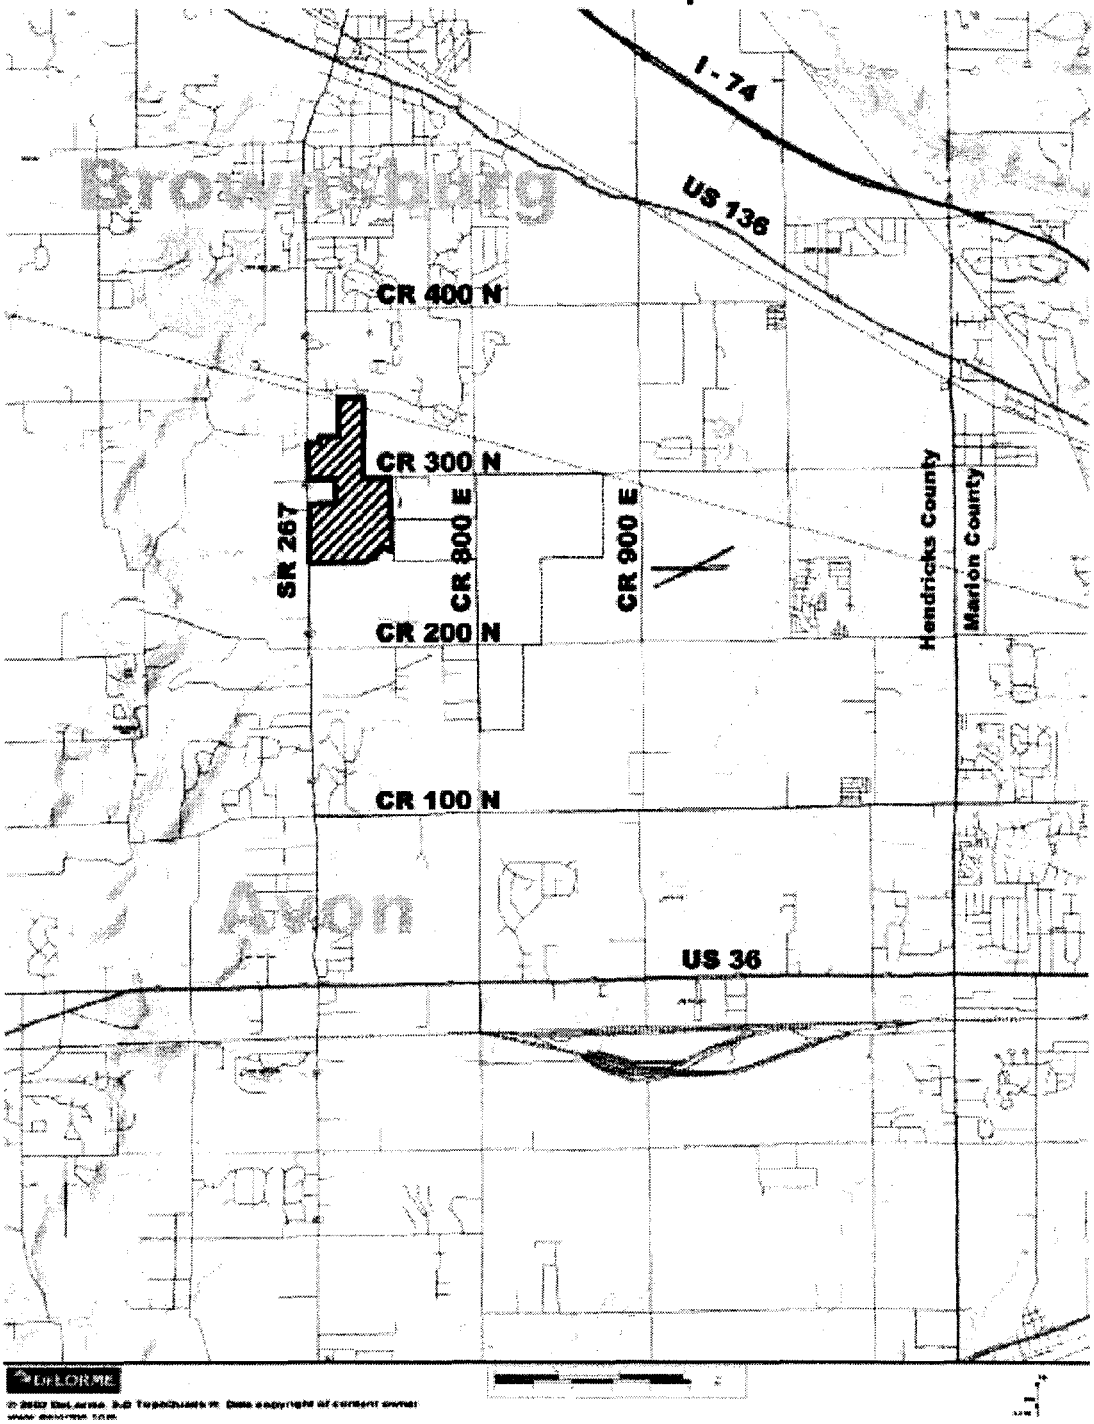

A part of the West half of the Southwest quarter of Section 23, Township 16 North, Range 1 East of the Second Principal Meridian in Hendricks County, Indiana, more particularly described as follows, to-wit:

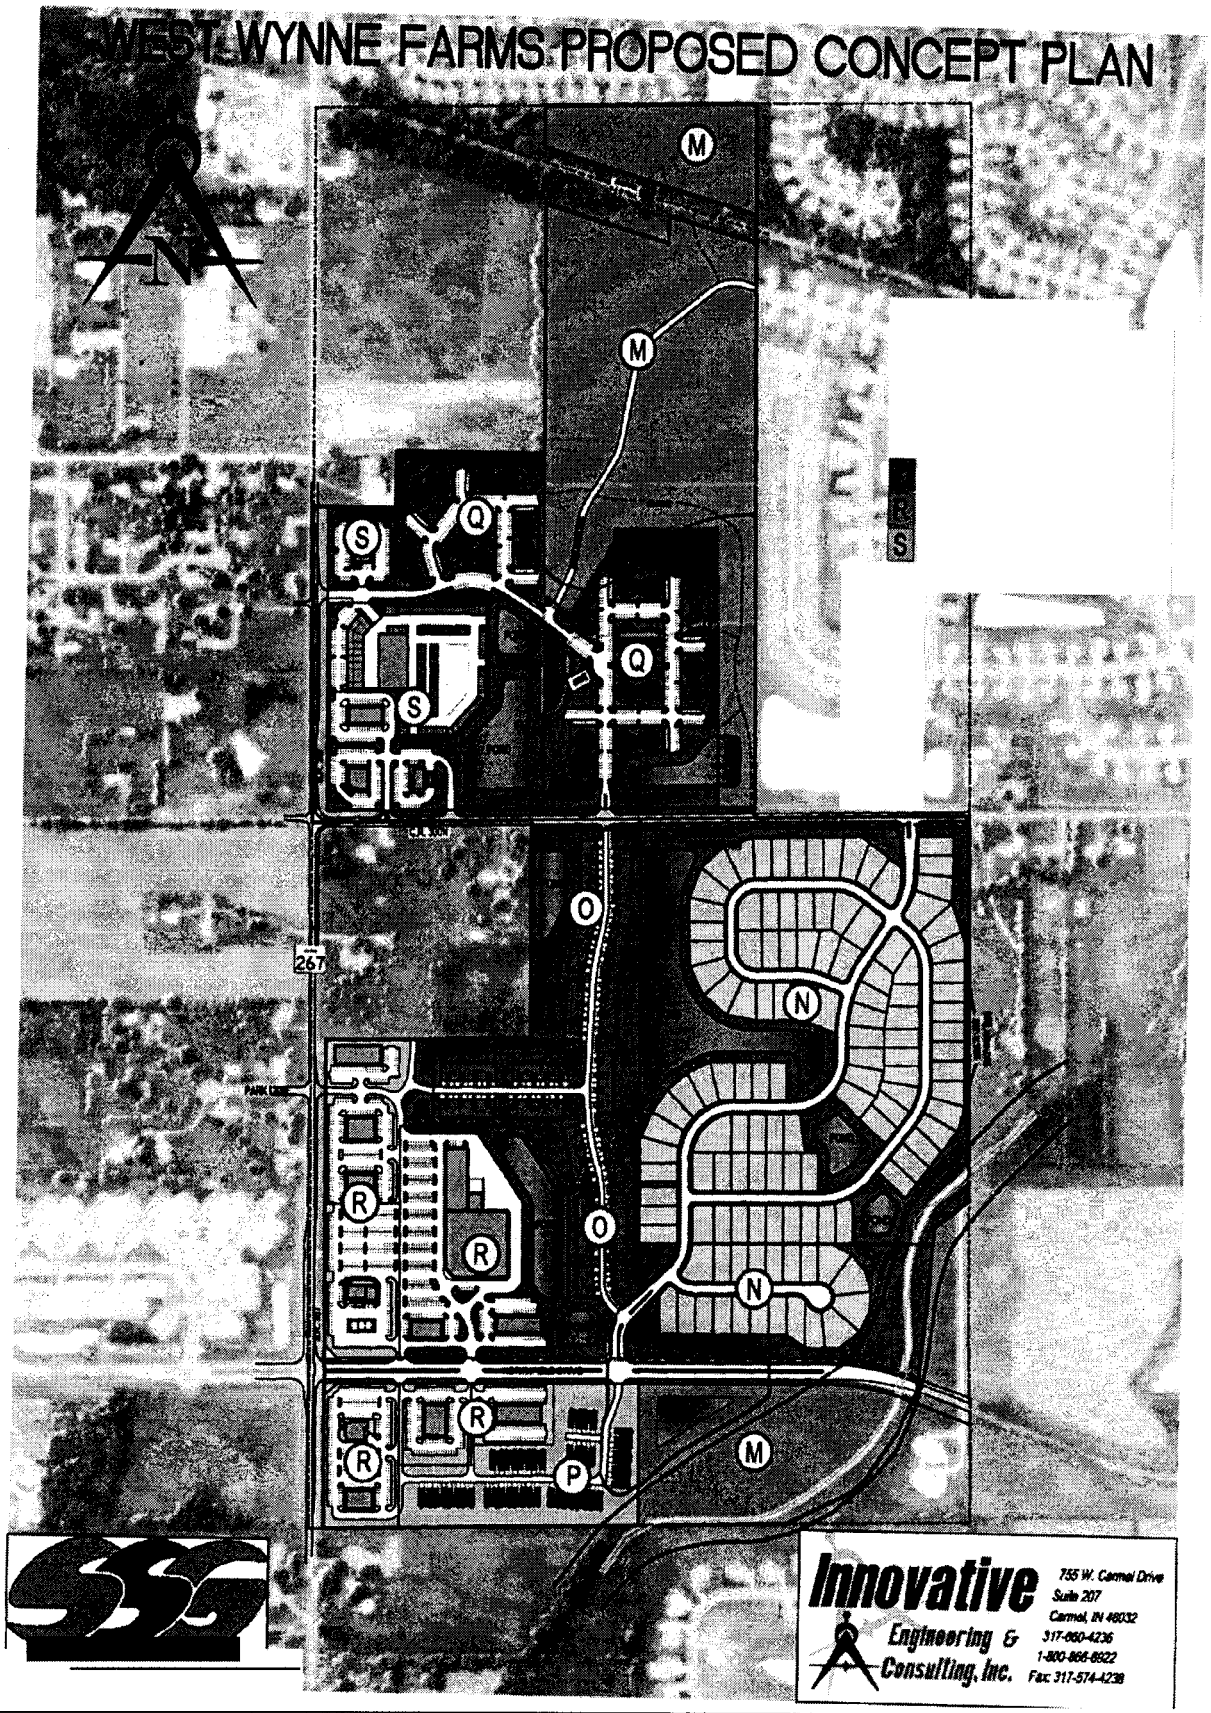

Beginning at a stone at the Southwest corner of said Section 23; thence South 89 degrees 57 minutes 36 seconds East on and along the South line of said section 935.96 feet; thence North 00 degrees 37 minutes 26 seconds East 1375.48 feet; thence North 88 degrees 41 minutes 54 seconds West 602.89 feet; thence South 01 degree 13 minutes 58 seconds West 211.07 feet; thence North 88 degrees 47 minutes 11 seconds West 330.84 feet to a point on the West line of said Section; thence South 00 degrees 37 minutes 26 seconds West on and along the West line of said section 1184.50 feet to the Point of Beginning. Containing 28.16 acres, more or less.

ALSO:

Lots numbered 2, 3, and 4 in Minor Plat Numbered Four (4) in Lincoln Township, Hendricks County, Indiana, as per plat thereof recorded April 7, 1978, in Plat Book 9, page 111, in the Office of the Recorder of Hendricks County, Indiana.

DEVELOPER COMMITMENTS

COMMITMENTS CONCERNING THE USE OR DEVELOPMENT OF REAL ESTATE

TOWN OF BROWNSBURG, INDIANA

Pursuant to Ind. Code 36-7-4-1015, the Owner of the real estate located in the Town of Brownsburg, Hendricks County, Indiana, which is described below, makes the following COMMITMENTS concerning the use and development of that parcel of real estate:

Owner of Record/Representative: Site Solutions Group, LLC, Developer

Parcel/Deed Information: 1993-16265
201305908
199921842
197812781
200538775
201123379
200707410
200810712

Legal Description: *See Exhibit "A"*

Statement of COMMITMENTS:

1. "Guerrettaz Buffer"(see exhibit "B" of previous Commitments in the Development Commitment Recording Form recorded April 24, 2007 as Instrument Number 200700010243 in the office of the Recorder of Hendricks County, Indiana): the developer shall maintain a minimum seventy (70) foot wide landscaped buffer yard consisting of a three (3) rail white PVC fence with a minimum of Five (5) Evergreen Plantings at least six (6) feet in height per every one hundred (100) foot of buffer yard length along the boundary of Parcel O adjacent to the former Guerrettaz, now Weaver, property. The foregoing shall be installed prior to the paving of streets in Parcel O.

2. "Musselman Buffer"(see exhibit "C" of previous Commitments in the Development Commitment Recording Form recorded April 24, 2007 as Instrument Number 200700010243 in the office of the Recorder of Hendricks County, Indiana): the developer shall maintain a minimum fifty (50) feet wide landscaped buffer yard consisting of a four (4) foot high mound with a minimum of Seven (7) Evergreen Plantings at least six (6) feet in height per every one

hundred (100) feet of buffer yard along the boundary of Parcels Q and S which are adjacent to the Scutt and Musselman properties. In addition, a six (6) foot high wooden shadow box privacy fence shall be installed along the top of the four (4) foot mound continuously along the entire length of the buffer yard. The foregoing shall be installed prior to the paving of streets in Parcels Q and S as each Q and S develop. The developer shall also install and maintain a minimum twenty (20) feet wide landscaped buffer yard consisting of a minimum of Five (5) Evergreen Plantings at least six (6) feet in height per every one hundred (100) feet of buffer yard along the boundary of Parcel M adjacent to the Musselman property. In addition, a six (6) feet high wooden shadow box privacy fence shall be installed along the entire length of the buffer yard adjacent to the Musselman property. The foregoing shall be installed prior to the paving of streets in M.

3. "Altmeyer Buffer" (see previous Commitments in the Development Commitment Recording Form recorded April 24, 2007 as Instrument Number 200700010243 in the office of the Recorder of Hendricks County, Indiana) shall be installed between the commercially zoned land in Parcel R and the Altmeyer property line with a Unit Value of 5. The buffer yard shall be twenty-five (25) feet in width and shall be installed prior to the paving of streets in Parcel R. In addition, the developer shall maintain a minimum twenty-five (25) feet wide landscaped buffer yard consisting of a three (3) to four (4) feet high undulating mound with a minimum of Five (5) Evergreen Plantings at least six (6) feet in height per every one hundred (100) feet of buffer yard along the northern boundary of Parcel R and adjacent to the property now owned by Gray. In addition, the developer shall maintain a minimum twenty-five (25) feet wide landscaped buffer yard consisting a minimum of Five (5) Evergreen Plantings at least six (6) feet in height per every one hundred (100) feet of buffer yard along the southern and eastern boundary of Parcel P and adjacent to the property now owned by Altmeyer.

4. Parcel Q: In the area along the east property line and adjacent to the existing Bersot Subdivision, the developer shall maintain a minimum of fifty (50) feet wide Tree preservation area within the existing wooded area of the site, and south of the woods for a distance of two hundred (200) feet, the developer shall maintain a minimum thirty (30) feet wide landscaped buffer yard consisting of a four (4) feet high mound with a minimum of Seven (7) Evergreen Plantings at least six (6) feet in height per every one hundred (100) feet of buffer yard length. In addition, a six (6) feet high wooden shadow box privacy fence shall be installed along the top of the four (4) feet mound continuously along the entire two hundred (200) feet length of the buffer yard.

5. Traffic Impact Agreement: The developer and future owners of the various parcels within the proposed development agree to construct, at their cost, the acceleration and deceleration lanes and road widening along State Road 267 and/or County Road 300 North along the frontage of their respective parcels at the time of the development of each parcel, excluding Northfield Drive, as recommended in the Traffic impact report from VS Engineering

dated June 19, 2013. In addition, to fund other intersection improvements in the immediate vicinity if West Wynne Farms, additional widening of State Road 267/Green Street and constructing additional turn lanes (5 lanes total) on Northfield Drive, the future developer and future owners of Parcels O, P, R and S agree to contribute a total amount of, and not to exceed, Three Hundred Twenty-four Thousand and no/100 dollars ($324,000.00) to the Town of Brownsburg, calculated as follows. A total of One Hundred Fifty Thousand and no/100 dollars ($150,000.00) (as previously agreed to be paid as cited in exhibit "D" of previous Commitments in the Development Commitment Recording Form recorded April 24, 2007 as Instrument Number 200700010243 in the office of the Recorder of Hendricks County, Indiana) of the contribution shall be collected from the outlot commercial owners in Parcel R consisting of 12.5 acres (4 acres currently owned by Jim White; 4 acres currently owned by Chester Blake; 4.5 acres currently owned by Burton). The contribution shall be paid at the time of application for a building permit fee for the respective acreages on a per acre basis of property of $12,000 per acre. Additionally, One Hundred Seventy-Four Thousand and no/100 dollars ($174,000.00) shall be contributed by the developer(s) of parcels O and P at a rate of One Thousand and no/100 dollars ($1,000) per unit at time of applying for a building permit for each building. These funds will be utilized by the Town of Brownsburg for intersection improvements in the immediate vicinity of West Wynne Farms, the widening of State Road 267/Green Street and construction the five (5) lanes of Northfield Drive to be constructed south of Parcels R, O and N and north of Parcel P including the acceleration and deceleration lanes for intersections G and H as recommended in the Traffic Impact study by VS Engineering dated June 19, 2013. If a signal is determined to be required at a future date at Intersection H as recommended in the VS Engineering report, the cost of this signal shall be the responsibility of the owner of the large retail parcel located in Parcel R on the north side of Northfield Drive.

6. The developer commits to obtain a building permit for the development of a Commercial use in either Parcel R or S before fifty percent (50%) of the residential developments, Parcels N, O, P and Q, (as measured by number of permits issued) occurs.

7. The 5.7 acres located in Parcel M north of the B and O Trail; 27.5 acres located in Parcel M south of the B and O Trail; and approximately 12 acres located south of Parcel N and south of Future Northfield Drive shall remain as passive and/or active open/green space and the Developer shall have the option to deed it to an entity for public use.

8. In the area south of Northfield Drive, no dwelling shall be built east of a parallel line that is 1,295 feet from the west property line (centerline of SR 267) of West Wynne Farms. The existing north/south tree line in Parcel P will remain. The common east /west tree line between Woodcreek , Altmeyer and West Wynne Farms will remain in Parcels R, P and M.

9. A prohibition against storage sheds and out-buildings will be added to Declaration of Covenants, Conditions, and Restrictions.

10. Drainage: The Developers of each subject parcel shall be required to comply with all local Town of Brownsburg and applicable County drainage requirements. The Developer shall agree to work with the Town of Brownsburg to design specific parcels within the overall project to comply with "Building Green" development standards.

The foregoing Commitments are in addition to the previous Commitments in the Development Commitment Recording Form recorded April 24, 2007 as Instrument Number 200700010243 in the office of the Recorder of Hendricks County, Indiana. In the event of any conflict between these commitments dated _____, 2013 and recorded _____, 2013 and the commitments recorded April 24, 2007, the Commitments recorded April 24, 2007 shall prevail.

These COMMITMENTS shall run with the land, be binding on the Owner, subsequent owners of the real estate and other persons acquiring interest therein. These COMMITMENTS may be modified or terminated by a decision of the Advisory Plan Commission, made at a public hearing after notice has been given pursuant to the Advisory Plan Commission Rules of Procedure.

COMMITMENTS contained in this instrument shall be effective upon the approval of the petition PCMA-3-13-1136 West Wynne Farms and shall continue in effect until modified or terminated by the Advisory Plan Commission.

These COMMITMENTS may be enforced jointly or severally by:

(1) The Town of Brownsburg, Advisory Plan Commission

(2) Owners of all parcels of ground adjoining the real estate to a depth of two (2) ownerships, but not exceeding six-hundred-sixty (660) feet from the perimeter of the real estate, and all owners of real estate within the area included in the petition who were not petitioners for approval; and

(3) Owners of homes within Woodcreek Commons, Woodcreek Farms, and the Reserve at Woodcreek.

The Undersigned hereby authorizes the Advisory Plan Commission to record this COMMITMENT form in the Office of the Recorder of Hendricks County, Indiana, upon final approval of petition PCMA-3-13-1136 West Wynne Farms.

IN WITNESS WHEREOF, owner has executed this instrument this _____ day of _____, 2013.

DEVELOPER COMMITMENTS

EXHIBIT "A"
Legal Description

All of the Northeast Quarter and a fractional part of the Southeast Quarter of the Northwest Quarter of Section 26, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, more fully described as follows:

Beginning at a R.R. Spike found marking the Northeast Corner of the Northwest Quarter of Section 26; thence South 00 degrees 00 minutes 00 seconds East (assumed bearing) along the East line of said Northwest Quarter, a distance of 1445.60 feet to an Iron Pipe with I.D. Cap found on the Westerly line of a parcel conveyed to the Indianapolis Water Company as described in Instrument No. 9800003900 of the records on file in the Office of the Hendricks County Recorder, said Westerly line also being the Easterly line of a 75' wide legal drain easement as per a survey by CrossRoad Engineers dated September 15, 1997; thence along said lines for the following six (6) courses: 1) South 55 degrees 36 minutes 57 seconds West a distance of 170.61 feet to an Iron Pipe with I.D. Cap found; 2) South 06 degrees 37 minutes 22 seconds West a distance of 617.30 feet to an Iron Pipe with I.D. Cap found; 3) South 25 degrees 20 minutes 06 seconds West a distance of 191.76 feet to an Iron Pipe with I.D. Cap Found; 4) South 35 degrees 48 minutes 46 seconds West a distance of 210.69 feet to an Iron Pipe with I.D. Cap found; 5) South 47 degrees 52 minutes 57 seconds West a distance of 89.78 feet to an Iron Pipe with I.D. Cap found; 6) South 65 degrees 34 minutes 36 seconds West a distance of 284.88 feet to an Iron Pipe with I.D. Cap found on the South line of the aforesaid Northwest Quarter; thence South 89 degrees 29 minutes 23 seconds West, along said South line, a distance of 598.85 feet to a 3/4" Iron Pipe with I.D. Cap set at the computed Southwest corner of the Southeast Quarter of said Northwest Quarter; Thence North 00 degrees 07 minutes 20 seconds East, along the West line of the East Half of said Northwest Quarter, a distance of 2669.38 feet to a P.K. Nail with I.D. Washer set marking the Northwest corner of the Northeast Quarter of said Northwest Quarter; thence North 89 degrees 25 minutes 51 seconds East, along the North line of said Northwest Quarter and along County Road 300 North, a distance of 1336.52 feet to the place of beginning, containing 74.826 acres, more or less and subject to all highways, rights-of-way and easements. And being subject to a 60' wide utility easement (as recorded in Inst. #9800003901), a 50' wide easement for ingress and egress (as recorded in Inst. #9800003902), a Highway Right-of-Way Agreement (as recorded in Inst. #2003-44818), a 30' wide storm sewer easement (as recorded in Inst. #2003-54107) and being subject to any other easements, rights-of-way or restrictions of record observable.

ALSO:
A fractional part of the Southwest Quarter of Section 23, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, more fully described as follows:

Commencing at a R.R. Spike found marking the Southeast corner of the Southwest Quarter of Section 23; thence South 89 degrees 25 minutes 51 seconds West along the South line of said Quarter and along County Road 300 North, a distance of 870.47 feet to a P.K. Nail with I.D. Washer set and the place of beginning; thence continuing South 89 degrees 25 minutes 51 seconds West, along said South line and along said County Road, a distance of 866.60 feet to a P.K. Nail with I.D. Washer set at the Southeast corner of a parcel conveyed to Light Development Corporation as described in Deed Record 328, page 591

Beginning at a stone at the Southwest corner of said Section 23; thence South 89 degrees 57 minutes 36 seconds East on and along the South line of said section 935.96 feet; thence North 00 degrees 37 minutes 26 seconds East 1375.48 feet; thence North 88 degrees 41 minutes 54 seconds West 602.89 feet; thence South 01 degree 13 minutes 58 seconds West 211.07 feet; thence North 88 degrees 47 minutes 11 seconds West 330.84 feet to a point on the West line of said Section; thence South 00 degrees 37 minutes 26 seconds West on and along the West line of said section 1184.50 feet to the Point of Beginning. Containing 28.16 acres, more or less.

ALSO:
Lots numbered 2, 3, and 4 in Minor Plat Numbered Four (4) in Lincoln Township, Hendricks County, Indiana, as per plat thereof recorded April 7, 1978, in Plat Book 9, page 111, in the Office of the Recorder of Hendricks County, Indiana.

Ordinance 2015-08
Brownsburg, Indiana
Apr. 9, 2015

AN ORDINANCE TO AMEND THE WEST WYNNE FARMS DEVELOPMENT COMMITMENTS IN ORDINANCE 2013-26; AND MORE SPECIFICALLY WITH REGARD TO MODIFICATIONS TO ARCHITECTURAL COMMITMENTS FOR PARCELS R & S

WHEREAS, Site Solutions Group, LLC (the "Developer") previously filed an amendment to the West Wynne Farms Planned Development (PD), for approximately 220 acres of real estate east of South Green Street (State Road 267) on the north and south side of County Road 300 North and on the north and south side of South Northfield Drive, in the Town of Brownsburg, Lincoln Township, Hendricks County, Indiana, inclusive of Parcel Numbers 32-07-23-306-004.000-016; 32-07-23-306-005.000-016; 32-07-23-306-003.000-016; 32-07-26-105-002.000-016; 32-07-26-1 05-003.000-016; 32-07-26-1 05-004.000-016; 32-07-26-1 05-005.000-016; 32-07-26-105-006.000-016; 32-07-26-151-001.000-016; 32-07-26-150-002.000-016; 32-07-26-152-001.000-016; 32-07-26-105-004.000-016; and 32-07-26-151-002.000-016 (the "Real Estate") more particularly described on Exhibit 'A' and generally depicted on Exhibit 'B'; and

WHEREAS, the Town Council did approve Ordinance 2013-26, the West Wynne Farms Zoning Map Amendment, on September 26, 2013; and

WHEREAS, the Town Council did amend Ordinance 2013-26, the West Wynne Farms Zoning Map Amendment, by Ordinance 2014-11 on August 28, 2014; and

WHEREAS, on January 15, 2015 the Developer did file a Commitment Amendment Application with the Advisory Plan Commission to amend Section 7.03 A. "Architectural Commitments: Design Standards" of the West Wynne Farms Planned Development as adopted by Ordinance 2013-26; and

WHEREAS, the Development Services Staff prepared a Project Synopsis regarding Case # PCMA-01-15-1271 | West Wynne Farms Architecture Commit. Amendment - Parcels R and S dated February 17, 2015; and

WHEREAS, the Advisory Plan Commission for the Town of Brownsburg (the "Commission") has considered the proposed commitment amendments at a public meeting on February 23, 2015; and by a

vote of its members has made a FAVORABLE RECOMMENDATION that the 7.03 A. "Architectural Commitments: Design Standards" of the West Wynne Farms Plan Development Ordinance be revised as follows:

All Commercial/Retail/Office buildings shall be in accordance with the following standards and specifications:

A1. All structures within Parcels R & S excluding self-storage structures in Parcel-S.

1. Acceptable exterior façade materials shall include masonry, glass, architectural block, decorative metal, Exterior Insulation Finishing System (EIFS), concrete or other similar materials. However, a minimum of seventy-five percent (75%) of the structure's exterior façade, excluding doors and windows, shall be comprised of masonry or architectural block.
   a. Integrally colored, smooth faced, concrete block or other similar materials shall be a permitted exterior façade material in loading areas not directly or indirectly visible from public view or internal streets.

   b. Non-Integrally colored, smooth faced, concrete block or other similar materials shall not be a permitted exterior façade material.

A2. Self-Storage structures within Parcel-S

1. Acceptable façade materials shall include masonry, architectural block, decorative metal (e.g. with a finish appearance of stucco), Exterior Insulation Finishing System (EIFS), concrete or other similar materials.

   a. Decorative metal or Exterior Insulation Façade System (EIFS) shall not comprise more than seventy-one percent (71%) of any façade except as follows:

      i. Self-storage structure façades, interior to the self-storage facility may be comprised of one hundred percent (100%) decorative metal or Exterior Insulation Finishing System (EIFS) in areas not directly or indirectly visible from public view or internal streets.

   b. Split faced block shall not comprise more than thirty-one percent (31%) of any façade.

WHEREAS, the Commission has found that the amendments do not adversely affect the Comprehensive Plan of the Town of Brownsburg but rather satisfies the current standards, and has been favorably recommended by the Commission to the Town Council;

NOW, THEREFORE, BE IT ORDAINED by the Town Council as follows:

(1) The above recitals are incorporated herein, by reference, as though set forth fully herein below.

(2) The Developer shall assume and be responsible for payment of all costs incurred in the preparation and filing of all changes in this ordinance which are satisfactory to the Town of Brownsburg.

(3) This amendment shall be subject to the Advisory Plan Commission Report of Determination as depicted on Exhibit 'C'.

PASSED, by the Town Council of the Town of Brownsburg, Indiana, this 9th day of April, 2015, by a vote of four (4) ayes, and ZERO (0) nays.

Advisory Plan Commission's Report of Determination

TOWN OF
Brownsburg
ADVISORY PLAN COMMISSION

DOCKET NO.
PCMA-01-15-1271
IN THE MATTER OF:
West Wynne Farms Architecture Commit. Amendment - Parcels R and S

REPORT OF DETERMINATION

The Advisory Plan Commission (the "Commission") received a request, pursuant to I.C. 36-7-4-602(c), to amend to amend the Official Zoning Map of the Town of Brownsburg for the property located in West Wynne Farms- Parcels R and S, Parcel No(s) 32-07-23-306-004.000-016; 32-07-23-306-005.000-016; 32-07-23-306-003.000-016; 32-07-26-105-002.000-016; 32-07-26-1 05-003.000-016; 32-07-26-1 05-004.000-016; 32-07-26-1 05-005.000-016; 32-07-26-105-006.000-016; 32-07-26-151-001.000-016; 32-07-26-150-002.000-016; 32-07-26-152-001.000-016; 32-07-26-105-004.000-016; and 32-07-26-151-002.000-016 This petition is a request to amend the text of the Planned Development (PD) ordinance as it relates to the architectural commitments of the Amazon Storage Facility and future projects located in parcels "R & S". Thereafter, the Commission held a public hearing on February 23, 2015 for Docket No. PCMA-01-15-1271, West Wynne Farms Architecture Commit. Amendment - Parcels R and S.

This Report of Determination is based, in whole or in part, on the Applicant's Commitment Amendment Application, submitted on January 15, 2015, and the same is hereby incorporated herein, by reference.

Staff prepared a Project Synopsis, dated February 17, 2015, and the same is hereby incorporated herein, by reference.

After hearing a presentation from Town Staff, the Commission voted 7 In-Favor/ 0 Opposed / 0 Abstained to forward a **FAVORABLE RECOMMENDATION** to the Town Council to amend the Official Zoning Map of the Town of Brownsburg, pursuant to the request, subject to and conditioned upon the following:

(1) That the proposed language read as follows:

§7.03 Design Standards

All Commercial/Retail/Office buildings shall be in accordance with the following standards and specifications:

A1. All structures within Parcels R & S excluding self-storage structures in Parcel-S.

1. Acceptable exterior façade materials shall include masonry, glass, architectural block, decorative metal, Exterior Insulation Finishing System (EIFS), concrete or other similar materials. However, a minimum of seventy-five percent (75%) of the structure's exterior façade, excluding doors and windows, shall be comprised of masonry or architectural block.
    a. Integrally colored, smooth faced, concrete block or other similar materials shall be a permitted exterior façade material in loading areas not directly or indirectly visible from public view or internal streets.
    b. Non-Integrally colored, smooth faced, concrete block or other similar materials shall not be a permitted exterior façade material.

A2. Self-Storage structures within Parcel-S

1. Acceptable façade materials shall include masonry, architectural block, decorative metal (e.g. with a finish appearance of stucco), Exterior Insulation Finishing System (EIFS), concrete or other similar materials.

Exhibit – C
Advisory Plan Commission's
Report of Determination – *continued*

DOCKET NO.
PCMA-01-15-1271
IN THE MATTER OF:
West Wynne Farms Architecture Commit.
Amendment - Parcels R and S

a. Decorative metal or Exterior Insulation Façade System (EIFS) shall not comprise more than seventy-one percent (71%) of any façade except as follows:
    i. Self-storage structure façades, interior to the self-storage facility may be comprised of one hundred percent (100%) decorative metal or Exterior Insulation Finishing System (EIFS) in areas not directly or indirectly visible from public view or internal streets.
b. Split faced block shall not comprise more than thirty-one percent (31%) of any façade.

(2) The approval of the Report of Determination by the Plan Commission.

The Commission took the following into consideration when making their recommendation on this above referenced proposal:

(1) The Brownsburg Comprehensive Plan;
(2) Current conditions and the character of current structures and uses in each district;
(3) The most desirable use for which the land in each district is adapted;
(4) The conservation of property values throughout the jurisdiction; and
(5) Responsible development and growth.

1) DEVELOPMENT SERVICES

Lighting

a) Please convert the measurements from foot candles to lux

   i) 5 lux maximum along east side, 20 lux maximum along south

Parking

b) Parking calculation is based on the 2013 UDO, 1 parking space per 2 seats, please revise

c) Will there be bicycle parking/racks? If so, please show on plans

Architecture

d) Exterior façade shall be a minimum of 75% masonry or architectural block

e) Please indicate the percentage of fenestration on each façade (minimum 30%)

f) Facades shall project/recess a minimum of 3% of the length of the façade, extending at least 20% of the length of the façade, for facades over 75 feet in length

g) Facades shall include a repeating pattern with no less than 3 of the following elements: color change, texture change, material change, fenestration change, or profile change

Landscaping

h) Wintercreeper is considered an invasive species and will need replaced

i) Please show vision triangle on plan

j) In accordance with the chart in Section 9.03 (B), there shall be a value equivalent or greater than 50, for all landscaping on site

i) At least 10% of the unit value shall be deciduous shade trees

ii) At least 75% of the unit value shall be evergreen trees, evergreen shrubs, or earthen mounds

B.	Unit Values (minimum sizes at time of planting)	
1.	Deciduous Shade/Overstory Tree – 2 ½" Caliper	0.75
2.	Evergreen Tree – 9' Tall	0.75
3.	Deciduous Ornamental/Understory Tree – 1 ½" Caliper	0.50
4.	Evergreen Tree – 6' Tall	0.50
5.	Evergreen Shrub with Narrow Spread – 4' Tall	0.25
6.	Hedge Plant – 24" to 30" Spread	0.05
7.	Earthen Mound – 3' Tall	0.50
8.	Earthen Mound – 6' Tall	1.00
9.	Earthen Mound – 9' Tall	1.50

k) Parking islands shall contain a minimum of two 2½ -inch caliper shade trees, with turf or mulch complimentary to the building color scheme

l) Perimeter parking screening shall include shrubs at a minimum of 3 feet in height

i) Unit value for perimeter shrubs may be counted toward overall unit value

Fencing/Screening

m) Please provide details on the dumpster enclosure

n) Will there be any visible mechanical units/coolers (ground or roof)?

General

o) A multi-use trail should be shown along S. Green Street instead of a sidewalk

2) BUILDING

a) Care should be taken working anywhere in the right way on Green Street and Northfield Drive. A powerline and conduit running through that easement powers Town of Brownsburg signage on Green Street to the south. Power line is in one and a half inch conduit. Please note this on site plans.

3) CAPITAL PROJECTS

a) None

4) ECONOMIC DEVELOPMENT

a) None

5) WATER

a) None - This is in Citizens Energy Group's water service area

6) WASTEWATER

a) Drawing C001 number 22 under utilities section should reference sanitary conforming to west central conservancy requirements and not Town of Brownsburg.

b) Clarify who is responsible for the private stormwater infrastructure operation and maintenance. Property owner? Possibly an updated stormwater operation and maintenance manual is needed. The uploaded document for this item seems to be more of a drainage system study/report

7) STREET/PUBLIC WORKS

a) None

8) PARKS

a) None

9) FIRE TERRITORY

a) This site will require installation of a fire hydrant to meet the requirements of IN Fire Code 507.5.1

507.5.1 Where required. Where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road, as measured by an approved route around the exterior of the facility or building, on-site fire hydrants and mains shall be provided.

i) For Group R-3 and Group U occupancies, the distance requirement shall be 600 feet (183 m).

ii) For buildings equipped throughout with an approved automatic sprinkler system installed in accordance with Section 903.3.1.1 or 903.3.1.2, the distance requirement shall be 600 feet (183 m).

10) POLICE

a) None

11) STORMWATER

a) See attached

12) BROWNSBURG COMMUNITY SCHOOL CORPORATION

a) None

13) **HENDRICKS COUNTY SURVEYOR**

a) This project will need to go through the Hendricks County Drainage Board approval process.

14) **HENDRICKS COUNTY ENGINEER**

a) None

15) **COUNTRYMARK**

a) None

16) **VECTREN**

a) None

Please provide a written response to this report addressing each issue and, if necessary, indicate where on the revised plans the modification has been made.

TOWN OF BROWNSBURG STORMWATER/DRAINAGE PLAN REVIEW

CO Comment Originator
CR Comment Respondee

NAME OF PROJECT: McDonalds
DESIGN PACKAGE: Development
DESIGNER: Civil & Environmental Consultants

		Wessler - Reviewer to complete		Designer to complete	
No.	PAGE/SHEET REFERENCE	CO	COMMENT	CR	RESPONSE
1	Storm Structures	RS	A one tenth drop is required in all storm structures		
2	Flood Routing	RS	Refer to Ch. 151.21 I. for flood routing requirements. Show hatching, peak elevations, and flow path on plans. MFPG for structures is to be at least one foot above the localized peak ponding elevation.		
3	Inlet Grates	RS	The Town requires a precast pollution prevention message.		
4	Pipe Cover	RS	Pipe cover is to be a minimum of 2 feet. If this cannot be met, provide engineering justification, including protections for loading and frost heave, in the drainage report.		
5	Soil Survey Map	RS	This is required to be shown on the construction plans.		
6	Inlet Calcs	RS	Refer to Ch 151.21 D.3. for inlet calculation requirements. Include calculations for 50% clogged conditions in the report.		
7	Vertical Separation	RS	18" vertical separation is required between storm infrastructure and other utilities. The proposed sanitary line at catch basin 102 appears to only have 1.27 feet of separation according to the label in the profile.		
8	Downspouts/ Sumps	RS	Verify that downspouts (and sumps if applicable) will be directly connected to the storm pipe, no overland flow.		
9	Materials Staging	RS	Show on the plans where materials storage/staging will occur.		

These comments should not be construed as a comprehensive list of comments, and the reviewer may make additional comments based on subsequent submittals

Phone: 317-788-4551 **Cell Phone:** **Email:** MaryA@wesslerengineering.com

Plan Review Status:		
☐	**Plan is Adequate**	A comprehensive plan review has been completed and it has been determined that the plan satisfies the minimum requirements of the Town of Brownsburg Stormwater Management Ordinance and Construction Standards, and the Construction Stormwater General Permit INRA00000 (Effective 12-18-2021).
☐	**Preliminary Review**	A comprehensive review will not be completed at this time. The plan review authority reserves the right to perform a comprehensive review at a later date, and revisions may be required at that time.
☐	**Conditional Acceptance**	Acceptance of the plan is conditional. The conditional acceptance is contingent upon addressing the issues identified in the comment sections.
☒	**Plan is Deficient**	Significant deficiencies were identified and must be addressed. Refer to the comment sections.

Action:	
☐	**Submit a Notice of Intent:** Submit the Notice of Intent (NOI) online through the IDEM Regulatory ePortal. It is required to upload a copy of this review form when submitting the NOI through the IDEM Regulatory ePortal: (https://stormwater.idem.in.gov/ncore/external/home)
☒	**Do not file a Notice of Intent or commence land-disturbing activities:** Deficiencies must be adequately addressed and an acceptable plan review completed.
☒	**Comments:** Refer to Plan Review Comments Sections of this document.
☒	**Revisions:** Update and submit the revised Construction/Stormwater Pollution Prevention Plan as indicated below.
	☒ Update and submit a complete plan set that addresses plan deficiencies.
	☐ Update and submit a document (narrative and/or plan sheets) that address plan deficiencies.
	☐ Update and submit a complete plan set that addresses plan deficiencies. A comprehensive plan review will not be completed.

Plan Review Information

- *The technical review and comment is intended to evaluate the completeness of the Construction/Stormwater Pollution Prevention Plan for the project. The Plan submitted was not reviewed for the adequacy of engineering design. All measures included in the plan, as well as those recommended in the comments should be evaluated as to their feasibility by a qualified individual with structural measures designed by a qualified engineer. The Plan has not been reviewed for other local, state, or federal permits that may be required to proceed with this project.*
- *Construction activities and unforeseen weather conditions may affect the performance of the erosion and sediment control system, individual measures, or the effectiveness of the plan. The plan must be a flexible document, with provisions to modify or substitute measures as necessary to ensure compliance.*

Priority Site Information:

☐	**Nature and Extent of Construction**	☐	**Close Proximity to Wetlands**
☐	**Close Proximity to Sensitive Area**	☐	**Potential for Direct Runoff to Receiving Waters**
☐	**Steep Topography on Proposed Construction Site**	☐	**Not a Priority Site**

Section A: Construction Plan Elements

Adequate	Deficient	NA	A	*The construction plan elements include general information associated with the project site that are critical for the evaluation of the stormwater pollution prevention plan component. This information includes, but is not limited to an index, resource information, reference maps, grading information, project layout and design, and drainage plan*
☐	☒	☐	**1**	Index of the location of required plan elements in the construction plan
☐	☒	☐	**2**	A vicinity map depicting the project site location in relationship to recognizable local landmarks, towns, and major roads
☐	☒	☐	**3**	Narrative of the nature and purpose of the project
☐	☒	☐	**4**	Latitude and longitude to the nearest fifteen (15) seconds
☐	☒	☐	**5**	Legal description of the project site
☐	☒	☐	**6**	11 X 17-inch plat showing building lot numbers/boundaries and road layout/names
☐	☒	☐	**7**	Boundaries of the one hundred (100) year floodplains, floodway fringes, and floodways
☐	☒	☐	**8**	Land use of all adjacent properties
☐	☒	☐	**9**	Identification of a U.S. EPA approved or established TMDL
☐	☒	☐	**10**	Name(s) of the receiving water(s)
☐	☒	☐	**11**	Identification of discharges to a water on the current 303d list of impaired waters and the pollutant(s) for which it is impaired
☐	☒	☐	**12**	Soil map of the predominant soil types
☐	☒	☐	**13**	Identification and location of all known wetlands, lakes and water courses on or adjacent to the project site (construction plan, existing site layout)
☐	☒	☐	**14**	Identification of any other state or federal water quality permits or authorizations that are required for construction activities– required 50-foot natural buffer
☐	☒	☐	**15**	Identification and delineation of existing cover, including natural buffers
☐	☒	☐	**16**	Existing topography at a contour interval appropriate to indicate drainage patterns
☐	☒	☐	**17**	Location(s) of where run-off enters the project site
☐	☒	☐	**18**	Location(s) of where run-off discharges from the project site prior to land disturbance. Erosion measures required at the discharge point.
☐	☒	☐	**19**	Location of all existing structures on the project site
☐	☒	☐	**20**	Existing permanent retention or detention facilities, including manmade wetlands, designed for the purpose of stormwater management

☐	☒	☐	**21**	Locations where stormwater may be directly discharged into ground water, such as abandoned wells, sinkholes, or karst features
☐	☒	☐	**22**	Size of the project area expressed in acres
☐	☒	☐	**23**	Total expected land disturbance expressed in acres
☐	☒	☐	**24**	Proposed final topography
☐	☒	☐	**25**	Locations and approximate boundaries of all disturbed areas
☐	☒	☐	**26**	Location, size, and dimensions of all stormwater drainage systems, such as culverts, storm sewers, and conveyance channels
☐	☒	☐	**27**	Locations of specific points where stormwater and non-stormwater discharges will leave the project site
☐	☒	☐	**28**	Location of all proposed site improvements, including roads, utilities, lot delineation and identification, proposed structures, and common areas
☐	☒	☐	**29**	Location of all on-site soil stockpiles and borrow areas
☐	☒	☐	**30**	Construction support activities that are expected to be part of the project
☐	☒	☐	**31**	Location of any in-stream activities that are planned for the project including, but not limited to stream crossings and pump arounds

Section A – Comments:

- Please include a completed Stormwater Pollution Prevention Plan (SWPPP) and Operations and Maintenance (O&M) Manual with plan submittal.

Section B: Stormwater Pollution Prevention Plan – Erosion and Sediment Control/Project Site Management				
Adequate	**Deficient**	**NA**	**B**	*The construction component of the Stormwater Pollution Prevention Plan includes stormwater quality measures to address erosion, sedimentation, and other pollutants associated with land disturbance and construction activities. Proper implementation of the plan, maintenance of measures, and administering a self-monitoring program is required to manage the project site to minimize the discharge of sediment and other pollutants. Construction activities and unforeseen weather conditions may affect the performance of the erosion and sediment control system, individual measures, or the effectiveness of the plan. The plan must be a flexible document, with provisions to modify or substitute measures as necessary to ensure compliance.*
☐	☒	☐	**1**	Description of the potential pollutant generating sources and pollutants, including all potential non-stormwater discharges
☐	☒	☐	**2**	Stable construction entrance locations and specifications. Plan to clear tracking of sediments on road. Dust suppression plan.
☐	☒	☐	**3**	Specifications for temporary and permanent stabilization. Include seeding and mulching plan and 70% coverage requirement for final stabilization. Include 7-day stabilization requirement.
☐	☒	☐	**4**	Sediment control measures for concentrated flow areas (sediment basins if used have specific requirements)
☐	☒	☐	**5**	Sediment control measures for sheet flow areas
☐	☒	☐	**6**	Run-off control measures
☐	☒	☐	**7**	Stormwater outlet protection locations and specifications
☐	☒	☐	**8**	Grade stabilization structure locations and specifications
☐	☒	☐	**9**	Dewatering applications and management methods
☐	☒	☐	**10**	Measures utilized for work within waterbodies
☐	☒	☐	**11**	Maintenance guidelines for each proposed temporary stormwater quality measure
☐	☒	☐	**12**	Planned construction sequence describing the relationship between implementation of stormwater quality measures in relation to land disturbance
☐	☒	☐	**13**	Provisions for erosion and sediment control on individual building lots regulated under the proposed project
☐	☒	☐	**14**	Material handling and spill prevention and spill response plan meeting the requirements in 327 IAC 2-6.1

☐	☒	☐	**15**	Material handling and storage procedures associated with construction activity. Management of waste materials and dumpsters for runoff and wind. Concrete washout management. Fueling areas. Equipment washing. Application of pesticides, herbicides, insecticides and fertilizers. Disposal of hazardous waste. Washing of paint or grout applicators.

Section B – Comments:

-

Section C: Stormwater Pollution Prevention Plan – Post-Construction

Adequate	Deficient	NA	C	
				The post-construction component of the Stormwater Pollution Prevention Plan includes the implementation of stormwater quality measures to address pollutants that will be associated with the final project land use. Post-construction stormwater measures should be functional upon completion of the project. Long term functionality of the measures is critical to their performance and should be monitored and maintained.
☐	☒	☐	**1**	Description of pollutants and their sources associated with the proposed land use
☐	☒	☐	**2**	Description of proposed post-construction stormwater measures including stormwater detention and water quality treatment according to the local ordinance (refer also to separate technical review comments)
☐	☒	☐	**3**	Plan details for each stormwater measure
☐	☒	☐	**4**	Sequence describing stormwater measure implementation
☐	☒	☐	**5**	Maintenance guidelines for proposed post-construction stormwater measures. Operation and Maintenance (O&M) Manual.
☐	☒	☐	**6**	Entity that will be responsible for operation and maintenance of the post-construction stormwater measures

Section C – Comments:

-

February 13, 2026

Town of Brownsburg
Planning Commission Office
61 North Green Street
Brownsburg, Indiana 46112
Attn: Technical Review Committee
PH: (317) 852-1128

To whom it may concern:

Subject: REV1 Town of Brownsburg Comments
013-1263 Brownsburg, IN McDonalds Restaurant (NSN 45201)
7030 Northfield Drive, Brownsburg, IN 46112
CEC Project 355-081

CEC is pleased to provide a response to the items noted in the first review provided by the Town of Brownsburg, Indiana's Technical Review Committee in December 2025.Written response as follows:

Developed Services: Parking

1. *Note 1b: Parking calculation is based on the 2013 UDO, 1 parking space per 2 seats, please revise.*

   CEC Response: Parking space count has been revised per information provided by the Town of Brownsburg. Revision is reflected on sheet C000.

2. *Note 1c: Will there be bicycle parking/racks? If so, please show on plans.*

   CEC Response: Bike parking/racks are not included in the proposed work.

Developed Services: Fencing/Screening

3. *Note 1n: Will there be any visible mechanical units/coolers (ground or roof)?*

   CEC Response: Mechanical equipment will be screened.

Developed Services: General

4. *Note 1o: A multi-use trail should be shown along S. Green Street instead of a sidewalk.*

   CEC Response: The sidewalk along S Green Street has been changed to meet the standards of a multi-use trail.

Building

5. *Note 2a: Care should be taken working anywhere in the right way on Green Street and Northfield Drive. A powerline and conduit running through that easement powers Town of Brownsburg signage on Green Street to the south. Power line is in one and a half inch conduit. Please note this on site plans.*

   CEC Response: A note has been added to sheet C200 "Construction along the right-of-way along Green Street and Northfield Drive is to be done with care. Protect the existing powerline and 1.5 inch conduit running through the existing easement."

Wastewater

6. *Note 6a: Drawing C001 number 22 under utilities section should reference sanitary conforming to west central conservancy requirements and not Town of Brownsburg.*

   CEC Response: Sheet C001, note 22 has been revised to reference West Central Conservancy requirements instead of the Town of Brownsburg's.

7. *Note 6b: Clarify who is responsible for the private stormwater infrastructure operation and maintenance. Property owner? Possibly an updated stormwater operation and maintenance manual is needed. The uploaded document for this item seems to be more of a drainage system study/report.*

   CEC Response: The property owner will be responsible for the on-site storm water infrastructure. An Operations and Maintenance Manual has been included with this resubmittal.

Fire Territory

8. *Note 9a: This site will require installation of a fire hydrant to meet the requirements of IN Fire Code 507.5.1 507.5.1 Where required. Where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road, as measured by an approved route around the exterior of the facility or building, on-site fire hydrants and mains shall be provided.*

   CEC Response: A new fire hydrant has been added to the site. See sheet C500 for location and more information.

Stormwater

9. *Note 11a: See attached.*

a. *A one-tenth drop is required in all storm structures.*

CEC Response: One-tenth drop incorporated within pipe network.

b. *Refer to Ch. 151.21 I. for flood routing requirements. Show hatching, peak elevations, and flow path on plans. MFPG for structures is to be at least one foot above the localized peak ponding elevation.*

CEC Response: Flood routing has been added to the plan set on sheet C400.

c. *The Town requires a precast pollution prevention message.*

CEC Response: A note has been added to the plans to include a precast pollution prevention message.

d. *Pipe cover is to be a minimum of 2 feet. If this cannot be met, provide engineering justification, including protections for loading and frost heave, in the drainage report.*

CEC Response: 2 feet of cover has been provided where possible. The grade to tie into the existing development to the south and the sanitary lateral connection are constraints that limit the amount of cover over a portion of the pipe. To mitigate the limited cover, the pipe material has been changed to reinforced concrete pipe in areas where cover is < 2 feet.

e. *This is required to be shown on the construction plans (referencing the Soil Survey Map).*

A Soil Survey Map of the subject site has been added to the plan set on sheet C403-Soil Survey Map.

f. *Refer to Ch 151.21 D.3. for inlet calculation requirements. Include calculations for 50% clogged conditions in the report.*

CEC Response: The Stormwater Management Report has been updated to include the required inlet calculations.

g. *18" vertical separation is required between storm infrastructure and other utilities. The proposed sanitary line at catch basin 102 appears to only have 1.27 feet of separation according to the label in the profile.*

CEC Response: The maximum separation achievable, due to site constraints for the sanitary/storm crossing, is 1.27 feet. To mitigate the < 18 inch

separation, we are proposing concrete encasement of both the sanitary and storm lines as shown on the plans.

h. *Verify that downspouts (and sumps if applicable) will be directly connected to the storm pipe, no overland flow.*

CEC Response: It's confirmed that the downspouts on site will be directly connected to the storm pipe, and there will not be overland flow. A note has been added to sheet C400.

i. *Show on the plans where materials storage/staging will occur.*

Sheet C900 has been edited to show the materials storage/staging for the project.

Landscaping

1. *Wintercreeper is considered an invasive species and will need replaced*

   CEC Response: Wintercreeper has been removed and replaced.

2. *Please show vision triangle on plan.*

   CEC Response: Vision triangles have been included.

3. *In accordance with the chart in Section 9.03 (B), there shall be a value equivalent or greater than 50, for all landscaping on site*

   a. *At least 10% of the unit value shall be deciduous shade trees*

      CEC Response: Landscape plan has been updated accordingly.

   b. *At least 75% of the unit value shall be evergreen trees, evergreen shrubs, or earthen mounds.*

      CEC Response: Landscape plan has been updated accordingly.

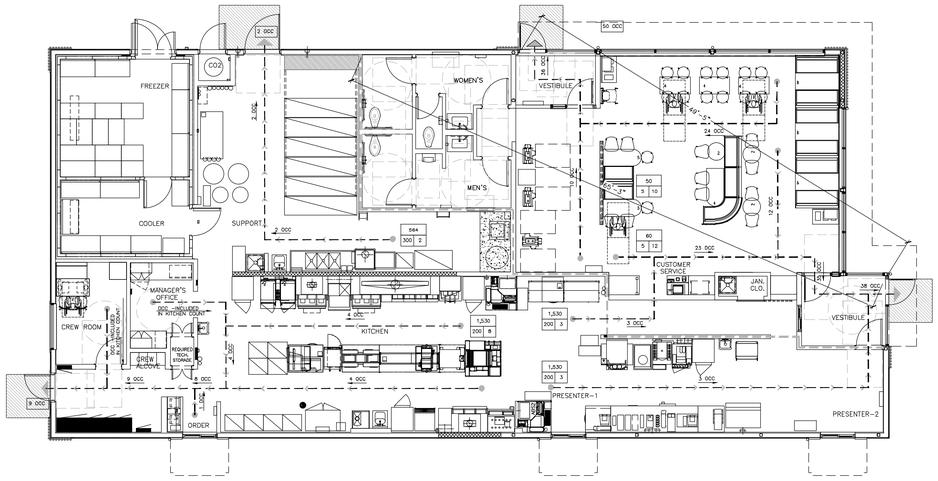

4. *Parking islands shall contain a minimum of two 2-1/2 inch caliper shade trees, with turf or mulch complimentary to the building color scheme.*

   CEC Response: Landscape plan has been updated accordingly.

5. *Perimeter parking shall include shrubs at a minimum of 3 feet in height.*

a. *Unit value for perimeter shrubs may be counted toward overall unit value.*

CEC Response: Landscape plan has been updated accordingly.

GENERAL NOTES

1. ALL WORK SHALL BE IN COMPLIANCE WITH APPLICABLE FEDERAL, STATE AND LOCAL BUILDING CODES, REGULATIONS, ORDINANCES AND STANDARDS INCLUDING ADA AND OR OTHER HANDICAP ACCESSIBILITY CODES.
2. GENERAL CONTRACTOR IS RESPONSIBLE FOR COORDINATING WITH THE OWNER'S VENDORS REGARDING SCHEDULING ON SITE DURING CONSTRUCTION AND SEQUENCING OF THE WORK.
3. THE CONSTRUCTION NOTES AND DRAWINGS ARE SUPPLIED TO ILLUSTRATE THE DESIGN INTENT AND GENERAL TYPE OF CONSTRUCTION DESIRED AND ARE INTENDED TO IMPLY THE FINEST QUALITY OF CONSTRUCTION, MATERIAL AND WORKMANSHIP THROUGHOUT.
4. THE DRAWINGS ARE NOT TO BE SCALED. FOR INFORMATION CONCERNING EXISTING CONDITIONS, ETC., VERIFICATION MUST BE DONE IN THE FIELD. LARGE SCALE DRAWINGS HAVE PRECEDENCE OVER SMALL SCALE DRAWINGS.
5. PRIOR TO COMMENCEMENT OF ANY CONSTRUCTION, CONTRACTOR SHALL VERIFY EXISTENCE AND LOCATION OF ALL EXISTING ABOVE AND BELOW GRADE, UTILITIES, INCLUDING SANITARY SEWER, STORM SEWER, WATER, GAS, ELECTRICAL, TELEPHONE, ETC. ANY DISCREPANCIES IN UTILITY LOCATIONS SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE ARCHITECT.
6. GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFICATION OF ALL BUILDING DIMENSIONS PRIOR TO BEGINNING CONSTRUCTION AND SHALL IMMEDIATELY NOTIFY THE ARCHITECT OF ANY VARIANCE OR DISCREPANCY AFFECTING NEW CONSTRUCTION PRIOR TO PROCEEDING WITH WORK.
7. CONTRACTOR SHALL PROVIDE ALL NECESSARY BLOCKING IN WALLS FOR SUPPORT OF ALL EQUIPMENT, SHELVING, ACCESSORIES, SIGNAGE, AND OTHER DEVICES REQUIRED.
8. ALL PENETRATIONS SHALL RECEIVE CAULKING TO SEAL ANY TYPE OF ENERGY LOSS.
9. THE CONTRACTOR SHALL VERIFY AND COORDINATE ALL APPLICABLE DIMENSIONS OF FIXTURES AND EQUIPMENT SUPPLIED AND/OR INSTALLED BY OTHERS.
10. UPON COMPLETION OF PROJECT, G.C. TO OBTAIN ALL FINAL INSPECTIONS AS REQUIRED BY LOCAL JURISDICTIONS AND FURNISH OWNER WITH EVIDENCE OF ALL SUCH INSPECTIONS AND CERTIFICATES OF OCCUPANCY.
11. SIGNS, UNLESS NOTED OTHERWISE, ARE PROVIDED BY OWNER'S SIGN CONTRACTOR. OWNER'S SIGN VENDOR WILL PROVIDE MONUMENT SIGN BASE (CONCRETE, STONE, BRICK, ETC.) IF PROJECT REQUIRES DECORATIVE BASE. SEE SHEET L-1 TO VERIFY IF REQUIRED. GENERAL CONTRACTOR TO PROVIDE ROUGH-IN & FINAL CONNECTION AND BRAILLE EXIT SIGN.
12. GENERAL CONTRACTOR TO PROVIDE FOUR (4) 30 YARD DUMPSTERS DURING McDONALD RETAIL MOVE-IN.
13. GENERAL CONTRACTOR SHALL PROVIDE ONE SKILLED LABORER FOR ONE WEEK DURING McDONALD RETAIL MOVE-IN. (40 HOURS)
14. GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR SET-UP AND COORDINATION OF ALL THE UTILITY SERVICES FOR THE PROJECT.
15. ALL EXTERIOR FLOOR PLAN DIMENSIONS ARE TO EXTERIOR FACE OF MASONRY UNLESS OTHERWISE NOTED. ALL INTERIOR FLOOR PLAN DIMENSIONS ARE TO FACE OF INTERIOR WALL BOARD UNLESS OTHERWISE NOTED.
16. FINAL KEYING TO BE COORDINATED WITH McDONALD FACILITY MANAGER AND PAID FOR BY McDONALD.
17. REFER TO "PROJECT MANUAL" FOR ALL OTHER INSTRUCTIONS & DIRECTIVES NOT SHOWN IN DRAWINGS. IF THERE IS A CONFLICT BETWEEN THE DRAWINGS AND PROJECT MANUAL, NOTIFY THE AREA CONSTRUCTION MANAGER FOR RESOLUTION.

ROOFING NOTES

1. SINGLE–PLY ROOFING SYSTEM WITH BASE FLASHING SHEET EXTENDING UP PARAPET AND TERMINATED UNDER COPING HOT WELDED TO SEALING STRIP SECURED TO WOOD BLOCKING
2. INSTALLATION OF ROOFING SHALL BE IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS AND PER DETAIL 2 OF THIS SHEET.
3. PROVIDE PREFABRICATED METAL CURBS. COORDINATE SIZE, LOCATION AND INSTALLATION REQUIREMENTS W/ M, E, P & S SHEETS. PROVIDE SHIMS TO LEVEL CURB AREAS WHERE ROOF DECK IS PITCHED.
4. FOR EXACT LOCATION OF EXHAUST FANS, HVAC UNITS, AND ROOF HATCH. REFER TO STRUCTURAL DRAWINGS.
5. CRICKETS MUST BE INSTALLED AT ALL ROOF CURBS & EQUIPMENT PLATFORMS BY GENERALCONTRACTOR.

2 A1.3 ROOFING SYSTEM
N.T.S.

THIS DETAIL IS ALSO SUITABLE FOR TERMINATION OF FLEECE BACKED MEMBRANES. NON FLEECE BACK MEMBRANE IS REQUIRED FOR WALL FLASHINGS.

ROOFING SYSTEM

1. MANUFACTURERS AND PRODUCTS:
   - A. DURO–LAST PVC ROOFING SYSTEM
   - B. JM–PVC. REFER TO JOHNS MANVILLE WEBSITE (www.jm.com) FOR MOST UP–TO–DATE INFORMATION.

   NO SUBSTITUTIONS ALLOWED
2. SPECIFIED ROOFING SYSTEMS (AS SHOWN):
   HEAT–WELDABLE SINGLE–PLY 50 MIL PVC ROOFING SYSTEM, INSTALLED OVER RIGID INSULATION ON WOOD ROOF DECK HAVING A SLOPE OF 3/8"/FT. MATERIALS SHALL BE AS FOLLOWS:
   - A. SINGLE–PLY ROOFING SYSTEM AS MANUFACTURED BY MANUFACTURER LISTED ABOVE TO COMPLY WITH ASTM E 108 OR UL 790, ASTM D–6878, AND FMG I–90 FOR WIND UPLIFT.
   - B. FASTENERS: METAL FASTENERS AND PLATES AS PER MANUFACTURER.
   - C. ACCESSORIES: PRE–FABRICATED CURBS, FLASHING, CORNERS, TERMINATION BARS, PIPE FLASHING, VENT FLASHING ETC. AS PER MANUFACTURER.
   - D. PLEASE SEE SINGLE–PLY FLASHING SPECIFICATIONS FOR A FULL DESCRIPTION OF INSTALLATION INSTRUCTIONS AND REQUIREMENTS WHICH ARE CONSIDERED A PART OF THIS DETAIL.
   - E. ANY CARPENTRY OR METAL WORK SHOULD BE DESIGNED AND CONSTRUCTED IN ACCORDANCE WITH LOCAL CODE REQUIREMENTS AND/OR PROJECT SPECIFICATIONS. THESE COMPONENTS SHOULD BE REVIEWED AND APPROVED BY A LICENSED DESIGN PROFESSIONAL. CONTACT MANUFACTURER FOR METAL OPTIONS TO BE INCLUDED WITHIN THE MANUFACTURER'S GUARANTEE.
   - F. ROOF MEMBRANE EDGE SEALANT IS REQUIRED ON ALL CUT OR NON–ENCAPSULATED EDGES OF REINFORCED MEMBRANE. THIS INCLUDES FACTORY CUT MEMBRANE
3. WALKWAYS:
   - A. 30" WIDE WALKWAY ROLL, HOT AIR WELDED TO MEMBRANE.
   - B. PROVIDE WALKWAY FROM ROOF LADDER EXIT TO ALL ROOF TOP EQUIPMENT AS PER ROOF PLAN ABOVE.
   - C. INSTALL WALKWAY ACCORDING TO WALKWAY PAD MANUFACTURER'S WRITTEN INSTRUCTION.
4. RIGID INSULATION:
   PROVIDE REQUIRED LAYERS OF POLYISOCYANURATE INSULATION W/ 1/2" "DENSDECK" COVER BOARD TO MEET A MINIMUM CONTINUOUS R–30 VALUE – THICKNESS AS REQUIRED. PROVIDE POSITIVE SLOPE TO ALL ROOF DRAINS. SEE ROOF PLAN. PROVIDE TOP LAYER PROTECTION MATERIAL AS PER MANUFACTURERS RECOMMENDATIONS. BOTTOM LAYER OF INSULATION TO HAVE INTEGRAL THERMAL BARRIER OR APPROVED ROOFING MANUFACTURER'S THERMAL UNDERLAYMENT SHEET. ASSEMBLY SHALL COMPLY WITH UL 1256 OR FMG 4450 AND ASTM C 1289, TYPE I OR II.
5. TAPERED INSULATION:
   PROVIDE TAPERED INSULATION AS REQUIRED FOR POSITIVE DRAINAGE TO ROOF DRAINS AS INDICATED PER ROOF PLAN ABOVE. ¼" PER FOOT MIN. REQUIRED.
6. EXHAUST FANS:
   PROVIDE ADDITIONAL LAYER OF ROOF MEMBRANE AROUND EXHAUST FANS AS INDICATED PER ROOF PLAN ABOVE.

1A. FIBER CEMENT HORIZONTAL LAP SIDING

1. JAMES HARDIE, HARDIEPLANK LAP SIDING, SMOOTH, 8 1/4" WIDTH, 7" EXPOSURE, HZ5, COLOR: SEE ELEVATIONS.
   a. COORDINATE FIBER CEMENT PANELS WITH FLASHING, TRIM, PARAPET WALLS AND OTHER ADJOINING WORK TO PROVIDE A LEAKPROOF, SECURE AND NONCORROSIVE INSTALLATION. INSTALL A 2" STARTER STRIP TO ENSURE A CONSISTENT PLANK ANGLE. OVERLAP PANELS 1 1/4" MIN. PROVIDE 7" EXPOSURE. SEE EXTERIOR ELEVATIONS.
   b. USE A POLYCRYSTALLINE DIAMOND-TIPPED FIBER CEMENT BLADE FOR CIRCULAR, MITER, AND TABLE SAWS.

1B. TRU EXTERIOR

1. 1"X6" PRE-PRIMED TRIM. COLOR: SEE ELEVATIONS. NAIL TRIM PIECES IN PLACE WITHIN 2" OF THE EDGE OF THE TRIM PIECE AND EVERY 16" ALONG THE LENGTH OF THE TRIM, USING MANUFACTURER APPROVED NAILS. INSTALL PER LOCAL CODES AND MANUFACTURERS SPECIFICATIONS.

1C. E.I.F.S. SYSTEM

1. "OUTSULATION PLUS MD" BY DRYVIT SYSTEMS. DRAINAGE E.I.F.S. SYSTEM (NOT BARRIER) CONSISTING OF 1 1/2" INSULATION WITH FIBER REINFORCING MESH MECHANICALLY FASTENED. USE "PANZER 20 ULTRA-HIGH IMPACT MESH" IN AREAS BELOW 8'-0" IF APPLICABLE. FINISH: HYDROPHOBIC. TEXTURE: FINESSE. INSTALL PER LOCAL CODES AND MANUFACTURERS SPECIFICATIONS ON TERMINATION AND INSTALLATION DETAILS.
2. OVER WALL ASSEMBLY 1A

1D. VERTICAL BATTEN SYSTEM

1. ALUMINUM BATTEN W/MOUNTING BACK RAIL. SIZE: 2" WIDE x 2" DEEP. REFER TO EXTERIOR ELEVATIONS FOR COLOR. INSTALL PER LOCAL CODES AND MANUFACTURERS SPECIFICATIONS ON TERMINATION AND INSTALLATION DETAILS. BY SUPPLIER. GC INSTALL
2. 1/2" EXTERIOR HIGH DENSITY OVERLAY (HDO) PLYWOOD, BB, GROUP 1. HDO BOTH FACES, APA TRADEMARKED. SAND WITH COURSE GRIT ALL SURFACES PRIOR TO PRIMING. PRIME AND PAINT BOTH SIDES AND ALL EDGES. BY GC, INSTALL BY GC. ALUM EDGE TRIM BY GC. COLOR TO MATCH SUBSTRATE.
3. 1" 0.125 ALUMINUM CHANNEL BY GC, INSTALL BY GC
4. OVER WALL ASSEMBLY 1A

VERTICAL BATTEN SYSTEM BY:

1E. CITADEL ACM PANEL

1. 4MM CITADEL E2000 METAL PANEL KIT. SEE ELEVATIONS FOR COLOR. PROVIDE MFG. SHOP DRAWINGS TO ARCHITECT FOR REVIEW. Mcdonalds@metalera.com

2. 3/4" RIGID INSULATION, R-3.8 VALUE
3. PERMEABLE BUILDING WRAP OVER 1/2" EXTERIOR GRADE PLYWOOD. INSTALL PER LOCAL CODES AND MFR'S SPEC'S.
4. 2x6 WOOD STUD FRAMING @ 16" O.C. (WITH CONTINUOUS DRAFTSTOP/FIRESTOP BLOCKING AT FINISH CEILING LEVEL).
5. 5 1/2" THICK UNFACED BATT INSULATION (R VALUE = 20 MIN.).
6. "CERTAINTEED MEMBRAIN" SMART VAPOR RETARDER (SEMI-VAPOR PERMEABLE) BY CERTAINTEED OR EQUAL.
7. 1X6 HORIZONTAL WOOD FURRING STRIPS @ 24" O.C. FOR ALL DINING ROOM EXTERIOR WALLS HOUSING STOREFRONT WINDOW ASSEMBLY.
8. 1/2" CEMENT BOARD OVER 1/2" PLYWOOD SUBSTRATE FOR ALL TILE LOCATIONS. (TYP.)
   NON TILE LOCATIONS: 1/2" GYPSUM BOARD TO EXTEND TO DECK ABOVE. UNLESS NOTED OTHERWISE.
   ALL GYP. BOARD MUST SCORE 10 PER ASTM D3273, REFERENCE CURRENT PROJECT MANUAL.
9. SEE A1.0 & ROOM FINISH SCHEDULE FOR ADDITIONAL SUBSTRATE INFORMATION.

EXTERIOR WINDOW ASSEMBLY

(STOREFRONT & ENTRANCE SYSTEM)

GLAZING REQ'S: U VALUE = 0.36 U VALUE "DOOR"= 0.63 SHGC = 0.40

1. DARK BRONZE ANODIZED ALUMINUM FRAME, THERMALLY BROKEN WITH HEAD RECEIVER CHANNEL.
2. 1" TEMPERED INSULATED GLAZING
3. PROVIDE FLASHING AT HEAD & SILL - CONTINUOUS SEALANT.
4. PROVIDE METAL SILL CAP AS SHOWN IN DETAILS
5. 1/2" CORIAN SILL AT INTERIOR

CANOPY SYSTEM

CANOPY INFORMATION SHOWN IN CONSTRUCTION DOCUMENTS IS FOR DESIGN INTENT ONLY. APPROVED MANUFACTURERS SHALL PROVIDE A COMPLETE AND CODE COMPLIANT FINAL DESIGN. REFER TO ELEVATIONS FOR COLOR OF ELEMENTS

1. CANOPY STRUCTURE/OUTRIGGERS: CONT. 2" x 8" PAINTED ALUM. TUBE. PROVIDE CLOSURE PIECE WHERE TUBE ENDS ARE EXPOSED.
2. WHERE INDICATED ON ROOF PLAN, PROVIDE PAINTED ALUM. PANEL INFILL WITH INTEGRAL SCUPPER TO MATCH OUTRIGGERS. PANEL TO PROVIDE POSITIVE SLOPE FOR DRAINAGE.
3. SYSTEM SHALL ALLOW FOR MOVEMENT AT EXPANSION JOINTS AND FOR MOVEMENT OF EXTERIOR WALL SYSTEM ON WHICH THE CANOPY IS MOUNTED.
4. STRUCTURAL ATTACHMENTS & LOAD CALCULATIONS SHALL BE FURNISHED BY CANOPY SYSTEM DESIGNER OF RECORD. SUPPLIER'S DESIGNER OF RECORD SHALL DESIGN PER PREVAILING CODES.
5. CANOPY SYSTEM SHALL BE SELECTED FROM ONE OF THE SUPPLIERS LISTED BELOW.
6. MANUFACTURER SHALL PROVIDE INSTALLER WITH INSTALLATION INSTRUCTIONS. MANUFACTURER SHALL DESIGN CANOPY IN ACCORDANCE WITH THE WALL SYSTEM AND BLOCKING AS INDICATED IN THE CONSTRUCTION DOCUMENTS.
7. INSTALLER SHALL NOTIFY CANOPY DESIGNER OF RECORD, McDONALD'S ACM, G.C. AND ARCHITECT OF ANY DEFICIENCIES THAT WOULD NOT ALLOW FOR THE PROPER INSTALLATION OF THE CANOPY. CANOPY SHALL NOT BE INSTALLED UNTIL DEFICIENCIES HAVE BEEN CORRECTED IN ACCORDANCE WITH THE CONSTRUCTION DOCUMENTS AND THE CANOPY MANUFACTURER'S INSTALLATION INSTRUCTIONS.

GENERAL FINISH NOTES:

1. REFERENCE: McDONALD'S PROJECT MANUAL – SECTION 093000
2. KITCHEN FLOOR TILE:
   TILE: CROSSVILLE 6"x6" 'METROPOLITAN QUARRY BASICS ABRASIVE'
   GROUT: CHARCOAL #47 BY MAPEI
   KERAPOXY IEG BLACK #10 BY MAPEI (FOR OPTIONAL GREY TILE)
   COLOR: PURITAN GRAY EXTRA ABRASIVE 57XA (STANDARD)
3. DINING ROOM FLOOR TILE:
   TILE: CROSSVILLE 24"x24" 'CLOUD NINE'
   GROUT: MAPEI ULTRACOLOR IRON 107 – JOINT 1/8" MAX.
4. RESTROOM TILE:
   MAIN WALL TILE: ICG ITALIA – ARCHITECT 12"x24" 'FACTORY'
   ACCENT WALL TILE: ICG ITALIA – SHELTER 4"x12" 'BIANCO MATTE'
   RESTROOM SINK & HAND DRYER PANEL: CORIAN – CAMEO WHITE
   FLOOR TILE: ICG ITALIA – NEW GROUND 12"x24" 'ANTHRACITE'
   GROUT: MAPEI ULTRACOLOR CHARCOAL 47 – JOINT 1/8" MAX
5. TILE TRANSITION AND EDGE PROTECTION:
   A) TILE BASE (RESTROOM ONLY): SCHLUTER DILEX-AHK SERIES, BRUSHED STAINLESS STEEL.
   B) TILE EDGE PROTECTION (WALL TRANSITION): SCHLUTER-RONDEC-DB, SATIN ANODIZED ALUMINUM.
   C) TILE CORNER PROTECTION (OUTSIDE CORNER): SCHLUTER-RONDEC-AE, SATIN ANODIZED ALUMINUM.

   BEFORE FINAL INSPECTION, REMOVE PROTECTIVE COVERINGS AND PERFORM FINAL CLEANING.
6. TILE CLEANER: DETERDEK, BY FILA SURFACE CARE PRODUCTS – NO SUBSTITUTIONS ALLOWED
   CAN BE ORDERED BY ICG ITALIA, CROSSVILLE, OR DIRECT FROM MANUFACTURER: FILA/DETEREK
   POST INSTALLATION CLEANING REQUIRED ON ALL FLOOR TILE INSTALLTIONS PRIOR TO RESTAURANT TURN OVER.

   APPLY CLEANER PER MANUFACTURER'S WRITTEN INSTRUCTIONS.
   REFERENCE: McDONDALD'S PROJECT MANUAL – SECTION 09300 TILING INTERIOR.
7. GROUT COLOR AND MANUFACTURER AS INDICATED ON SHEET A1.0 AND INTERIOR DECOR DRAWINGS.

GENERAL FINISH NOTES:

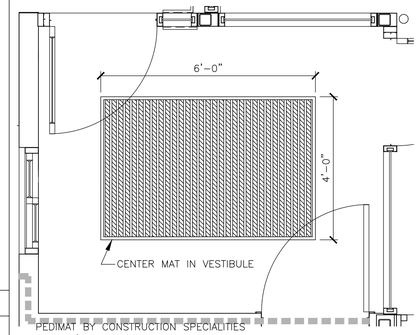

1. ALL FINISH SURFACES OF WALL AND CEILING MATERIALS SHALL BE CLASS B AND SHALL HAVE A FLAME SPREAD RATING OF 26 TO 75 AND A SMOKE DENSITY OF 450 MAX. (PER IBC TABLE 803.9).
2. DECORATIVE MATERIALS SHALL BE FLAME RETARDANT AND MEET THE CRITERIA OF NFPA 701.
3. DECORATIVE MATERIAL SHALL NOT CONCEAL EXITS, EXIT LIGHTS, ALARM STATIONS, HOSE CABINETS, AND EXTINGUISHER LOCATIONS
4. WHEN BUILDING TYPE IS A NON-COMBUSTIBLE CATEGORY, ALL PLYWOOD SHALL BE FIRE RETARDANT TREATED.
6. PROVIDE CEMENT BOARD BACKER OR EQUIVALENT AT ALL TILE LOCATIONS.
7. PROVIDE VAPOR BARRIER BEHIND PLYWOOD AT WALLS AND BEHIND GYP. AT CEILING
8. CREW ROOM FINISHES:
   NORTH WALL: MOMENTUM WALL GRAPHIC – VIS703.
   EAST/WEST/SOUTH WALLS: TILE WAINSCOT TO 3' A.F.F. – ICG ITALIA ARCHITECT FACTORY 12"x24". TILE COVE BASE – ICG ITALIA ARCHITECT FACTORY 6"x12". ROUTE 66 WOOD WALL COVERING – MOMENTUM NA-5C-MC500 – ROUTE 66 WOODGRAIN.

   *TILE OPTION FOR HEALTH CODE: WAINSCOT – ICG ITALIA MA.DE UNI GRIGIO 12"x24". TILE COVE BASE – ICG ITALIA UNI GRIGIO 6"x12".
9. ALL DECOR ELEMENTS MANUFACTURED BY DECOR TO BE PURCHASED AND INSTALLED BY GC, UNO.

* SEE CEILING PLAN FOR HEIGHTS & LAYOUTS

S1.0
FOUNDATION PLAN

INDICATES FRAME SHEAR WALL. SEE S3.2 FOR SHEAR WALL INFORMATION

INDICATES METAL STUD FRAME WALL. SEE 7/S3.0 FOR DETAILS.

INDICATES ALLOWABLE RTU PLACEMENT ZONE. RTU VENDOR/SUPPLIER, MODEL AND WEIGHTS SHALL BE VERIFIED PRIOR TO INSTALLATION FOR COORDINATION AND FINAL TRUSS DESIGN VERIFICATION. G.C. TO PROVIDE (2)–2x8 HDRS. BELOW RTU CURBS PER DETAIL 4/S3.2 AND COORDINATE LOCATIONS WITH MANUFACTURER CURB SPECIFICATIONS.

INDICATES RTU SUPPLY/RETURN ROOF DECK PENETRATIONS. G.C. TO PROVIDE (2)–2x8 HDRS. AT PERIMETER OF ALL PENETRATIONS/OPENINGS PER DETAIL 4/S3.2 AND COORDINATE EXTENT WITH MANUFACTURER SPECIFICATIONS.

1 S1.2 FRAMING PLAN

1/4"=1'-0"

NOTE TO CONTRACTOR:
ANY SPRINKLER LINES GREATER THAN 3" DIAMETER SHALL BE VERIFIED BY THE SPRINKLER CONTRACTOR PRIOR TO TRUSS FABRICATION.

NOTES:
1. SEE SHEET S4.0 FOR GENERAL STRUCTURAL NOTES.
2. R.D.: ROOF DRAINS
3. P.O.: ROOF CURB PORTAL OPENING – COORDINATE WITH MECHANICAL DRAWINGS.
4. WHEN TOP PLATES ARE NOT CONTINUOUS, USE SIMPSON "RPS22" TIE FOR NOTCH < 5 1/2", USE SIMPSON "RPS28" TIES FOR NOTCH < 12", W/ 16d NAILS INTO TOP PLATE ENDS. (MAX. SPACING BETWEEN STUDS = 16" O.C.)
5. TOP PLATE SPLICE SHALL BE MINIMUM LENGTH OF 48" WITH 2 ROWS (2 1/2" APART) OF 22–16d COMMON NAILS SPACED @ 2" ON CENTER (44 TOTAL).
6. SEE 5/S3.2 FOR SNOW DRIFT DIAGRAM.

STRUCTURAL GENERAL NOTES:

DESIGN AND LOADING

1. THE STRUCTURAL DESIGN OF THIS BUILDING WAS BASED ON THE DESIGN CRITERIA:
   - A. BUILDING CODE: **2012** INTERNATIONAL BUILDING CODE
   - B. FLOOR:
     - LIVE LOAD: 100 PSF (NON-REDUCIBLE)
   - C. ROOF:
     - LIVE LOAD: 20 PSF
     - DEAD LOAD: 20 PSF
   - D. SNOW:
     - GROUND LOAD, p_g: 25 PSF
     - FLAT ROOF LOAD, p_f: 18 PSF
     - IMPORTANCE FACTOR, I_s: 1.0
     - EXPOSURE FACTOR, C_e: 1.0
     - THERMAL FACTOR, C_t: 1.0
     - SLOPE FACTOR, C_s: 1.0
   - E. WIND:
     - BASIC DESIGN WIND SPEED (3-SECOND GUST), V: 115 MPH
     - ALLOWABLE STRESS DESIGN WIND SPEED (3-SECOND GUST), V_{ASD}: 90 MPH
     - RISK CATEGORY: II
     - WIND EXPOSURE: C
     - GC_{pi} = ±0.18
     - PRESSURES PER ASCE 7-16
   - F. SEISMIC:
     - RISK CATEGORY: II
     - IMPORTANCE FACTOR: 1.00
     - SITE CLASS: D (ASSUMED)
     - SS = 0.250, S1= 0.100
     - SDS = 0.267, SD1 = 0.160
     - DESIGN CATEGORY: C
     - PLYWOOD SHEAR WALLS (R = 6.5)
     - STEEL SYSTEMS NOT SPECIFICALLY DETAILED FOR SEISMIC RESISTANCE (R = 3.0)
     - Cs1: 0.041 (LONGITUDINAL DIRECTION) Cs2: 0.089 (TRANSVERSE DIRECTION)
     - DESIGN BASE SHEAR = SEE CALCULATIONS
     - ANALYSIS PROCEDURE: EQUIVALENT LATERAL FORCE PROCEDURE
   - G. FLOOD LOAD: N/A
   - H. SPECIAL LOADS: N/A
   - I. RAIN LOADS: N/A

FOUNDATION NOTES

1. THE FOUNDATION DESIGN OF THIS BUILDING WAS BASED ON THE FOLLOWING CRITERIA:
   - A. MINIMUM ALLOWABLE SOIL BEARING CAPACITY = 3,000 PSF.
   - B. RECOMMENDED BY ECS MIDWEST, LLC IN THEIR REPORT #66:1647 DATED 11/01/2025
   - C. ANY FILL REQUIRED BELOW SLABS ON GRADE OR FOOTINGS SHALL BE COMPACTED AS REQUIRED BY THE SOILS REPORT NOTED IN ITEM #2.
2. ALL EXTERIOR FOOTINGS SHALL EXTEND BELOW THE MAXIMUM ANTICIPATED DEPTH OF FROST. MINIMUM 36"
3. THE CONTRACTOR SHALL NOTIFY THE ARCHITECT OR ENGINEER OF RECORD IMMEDIATELY IN THE EVENT THAT THE SOILS CONDITIONS ENCOUNTERED VARY FROM THOSE SHOWN ON THE BORING LOGS.
4. ALL FOUNDATION EXCAVATIONS SHALL BE INSPECTED BY A SOILS TESTING LABORATORY PRIOR TO PLACEMENT OF CONCRETE.

CONCRETE AND REINFORCING

1. ALL CONCRETE SHALL BE IN ACCORDANCE WITH THE "AMERICAN CONCRETE INSTITUTE BUILDING CODE" (ACI 318) AND WITH "SPECIFICATIONS FOR STRUCTURAL CONCRETE FOR BUILDINGS" (ACI 301) LATEST EDITIONS.
2. ALL NORMAL WEIGHT CONCRETE (145 PCF) SHALL OBTAIN A MINIMUM 28 DAY COMPRESSIVE STRENGTH OF 3000 PSI (3500 PSI FOR SLABS).
3. ALL CONCRETE SUBJECT TO EXTERIOR EXPOSURE SHALL BE AIR ENTRAINED AS RECOMMENDED BY ACI 318.
4. TEST CYLINDERS SHALL BE MADE AND TESTED AS OUTLINED IN CHAPTER 16 OF ACI-301.
5. REINFORCING BARS SHALL BE DEFORMED BARS OF NEW BILLET STEEL CONFORMING TO ASTM A-615, GRADE 60. WELDED WIRE FABRIC SHALL CONFORM TO ASTM A-185. ALL REINFORCING AND ACCESSORIES SHALL BE DETAILED AND PLACED IN ACCORDANCE WITH ACI STANDARD 315 AND 315R.
6. PROVIDE ALL ACCESSORIES NECESSARY TO SUPPORT REINFORCEMENT AT POSITIONS SHOWN ON THE PLANS AND DETAILS. PLASTIC COATED ACCESSORIES SHALL BE USED IN ALL EXPOSED CONCRETE WORK.
7. THE GENERAL CONTRACTOR SHALL CHECK WITH ARCHITECTURAL, MECHANICAL AND ELECTRICAL DRAWINGS AND THE SUB-CONTRACTORS FOR OPENINGS, SLEEVES, ANCHORS, HANGERS, INSERTS, SLAB DEPRESSIONS AND OTHER ITEMS RELATED TO THE CONCRETE WORK AND SHALL ASSUME RESPONSIBILITY FOR THEIR PROPER LOCATION.

STRUCTURAL STEEL

1. STRUCTURAL STEEL SHALL BE DETAILED, FABRICATED AND ERECTED IN CONFORMANCE WITH THE AISC360 "SPECIFICATION FOR STRUCTURAL STEEL". SEISMIC DESIGN OF STRUCTURAL STEEL STRUCTURES SHALL CONFORM TO AISC 341.
2. STRUCTURAL STEEL SHALL CONFORM TO THE FOLLOWING ASTM SPECIFICATIONS:

A. ANCHOR RODS	F1554, GRADE 36
B. HIGH STRENGTH STRUCTURAL BOLTS	A325-N U.N.O.
C. STRUCTURAL SHAPES (W)	A992
D. STRUCTURAL SHAPES (M, S, C, MC, PLATES)	A36
E. STRUCTURAL SHAPES (HP)	A572
F. STRUCTURAL TUBING (HSS)	A500 GRADE C
G. STRUCTURAL ANGLES	A572

3. ALL WELDING ELECTRODES SHALL BE E70-XX. ALL SHOP AND FIELD WELDING SHALL BE MADE IN ACCORDANCE WITH A.W.S. D1.1 "CODE FOR WELDING IN BUILDING CONSTRUCTION" AND SHALL BE MADE BY CERTIFIED WELDERS.

LAMINATED VENEER LUMBER (LVL)

1. ALL BEAMS SHALL BE MANUFACTURED WITH LAMINATED VENEER LUMBER AND WATERPROOF ADHESIVES.
2. SIZE, MANUFACTURER & SERIES OF ALL LVL MEMBERS SHALL BE AS SHOWN ON DRAWINGS.
3. ANY SUBSTITUTIONS MUST BE APPROVED IN WRITING BY ENGINEER OR ARCHITECT OF RECORD.
4. PROVIDE 3" MINIMUM BEARING OR AS SPECIFIED ON PLANS. REFER TO PLANS FOR FASTENING OF MULTIPLE PIECE BEAMS.

OPEN WEB WOOD JOISTS

1. OPEN WEB WOOD JOISTS SHALL BE MANUFACTURED WITH MACHINE STRESS RATED TOP AND BOTTOM CHORDS. WEBS SHALL BE TUBULAR STEEL MEMBERS PER MANUFACTURERS' SPECIFICATIONS.
2. SIZE, MANUFACTURER & SERIES OF ALL OPEN WEB JOISTS SHALL BE AS SHOWN ON DRAWINGS. ANY SUBSTITUTIONS MUST BE APPROVED IN WRITING BY ENGINEER OR ARCHITECT OF RECORD.
3. PROVIDE 3 1/2" MINIMUM BEARING OR AS SPECIFIED ON PLANS. SHIM AS REQUIRED TO PROVIDE FULL BEARING AND LEVEL SUPPORT.
4. DO NOT CUT TOP OR BOTTOM CHORDS.
5. ALL HANGERS AND FRAMING CONNECTORS SHOWN ARE MANUFACTURED BY SIMPSON STRONG TIE. ANY SUBSTITUTIONS MUST BE APPROVED IN WRITING BY ENGINEER OR ARCHITECT OF RECORD.
6. REFER TO PLANS FOR WEB STIFFENER AND CONCENTRATED LOAD REQUIREMENTS.
7. REFER TO MANUFACTURERS' INSTALLATION GUIDE FOR JOIST BRACING DURING ERECTION. REFER TO MANUFACTURERS' INSTALLATION GUIDE FOR JOIST BRIDGING REQUIREMENTS.

SAWN LUMBER

1. ALL GRADES OF LUMBER INDICATED ON STRUCTURAL DRAWINGS SHALL BE RATED BY THE SOUTHERN PINE INSPECTION BUREAU (SPIB), OR THE WESTERN WOOD PRODUCTS ASSOCIATION (WWPA). LUMBER GRADES SHALL BE AS FOLLOWS, WITH A MAXIMUM MOISTURE CONTENT OF 19%:
   - A. SOUTHERN PINE NO. 1.
   - B. DOUGLAS FIR-LARCH NO. 1.
   - C. HEM-FIR NORTH NO. 1
2. BOLT HEADS AND NUTS BEARING ON WOOD SHALL BE PROVIDED WITH STANDARD CUT WASHERS. ALL WOOD IN CONTACT WITH CONCRETE OR MASONRY SHALL BE PRESSURE TREATED.
3. MINIMUM NAILED CONNECTIONS FOR WOOD FRAMING MEMBERS SHALL BE IN ACCORDANCE WITH THE LOCAL BUILDING CODE OR TABLE 2304.9.1 OF THE INTERNATIONAL BUILDING CODE IF NO OTHER CRITERIA IS GIVEN.
4. CONNECTORS SHOWN ON THE DETAILS ARE MANUFACTURED BY SIMPSON. WRITTEN APPROVAL BY ENGINEER REQUIRED FOR SUBSTITUTIONS.

ROOF & WALL SHEATHING

1. ALL SHEATHING SHALL CONFORM TO AMERICAN PLYWOOD ASSOCIATION (APA) DESIGN SPECIFICATIONS, LATEST EDITION. SHEATHING SHALL BE CONTINUOUS OVER THREE ADJACENT SPANS MINIMUM.
2. WALL SHEATHING SHALL BE 15/32" (1/2" NOMINAL) APA RATED SHEATHING, EXPOSURE 1, 32/16. ALL WALL SHEATHING SHALL BE FASTENED TO SUPPORTING MEMBERS W/ 8d COMMON NAILS @ 6" O.C. AT PANEL EDGES AND 12" O.C. AT INTERMEDIATED SUPPORTS, U.N.O.
3. ROOF SHEATHING SHALL BE 23/32" (3/4" NOMINAL) APA RATED SHEATHING, EXPOSURE 1, 48/24. ALL ROOF SHEATHING SHALL BE FASTENED TO SUPPORTING MEMBERS W/10d COMMON NAILS @ 6" O.C. AT PANEL EDGES, AND 12" O.C. AT INTERMEDIATE SUPPORTS. U.N.O.
4. ORIENTED STRAND BOARD (OSB) IS NOT AN ACCEPTABLE SUBSTITUTION FOR PLYWOOD. PLYWOOD SHALL BE USED FOR ALL EXTERIOR SHEATHING APPLICATIONS.

LIGHT GAGE METAL FRAMING

1. 16 GA. AND HEAVIER STUDS SHALL HAVE A MINIMUM YIELD STRESS OF 50,000 PSI. 18 GA. AND LIGHTER STUDS AND TRACKS SHALL HAVE A MINIMUM YIELD STRESS OF 33,000 PSI.
2. STUDS AND TRACKS SHALL BE 18 GA. MINIMUM U.N.O. THEY SHALL BE MANUFACTURED BY DIETRICH INDUSTRIES, INC. OR APPROVED EQUAL.
3. PROVIDE DOUBLE STUDS FOR FULL HEIGHT OF WALL EACH SIDE OF ALL OPENINGS UNLESS OTHERWISE NOTED. WELD STUDS TO EACH OTHER WITH 1 1/2" LONG 1/8" FILLET WELDS AT 12" O.C. EACH SIDE. PROVIDE STUD TRACK AT EACH HEAD AND SILL.
4. REFER TO PLANS AND DETAILS FOR CONNECTION OF STUD WALLS TO FOUNDATION, FLOOR OR ROOF.

SHOP DRAWINGS

1. SHOP DRAWING SUBMITTALS SHALL BE SUBMITTED ELECTRONICALLY.
2. SHOP DRAWINGS SHALL BE REVIEWED BY CONTRACTOR TO VERIFY THAT SUBMITTAL IS COMPLETE PRIOR TO SUBMITTING TO ARCHITECT/ENGINEER.
3. DRAWINGS CREATED BY THE ENGINEER OF RECORD CANNOT BE REPRODUCED AND/OR USED AS A SHOP DRAWING SUBMITTAL. SHOP DRAWING SUBMITTALS SHALL INCLUDE THE FOLLOWING:
   - A. CONCRETE MIX DESIGN
   - B. FOUNDATION REINFORCING BARS
   - C. STRUCTURAL STEEL
   - D. OPEN WEB JOISTS AND CALCULATIONS
   - E. ROOF SHEATHING
   - F. TRELLIS SYSTEM & CALCULATIONS
   - G. LAMINATED VENEER LUMBER (LVL)
   - H. SAWN LUMBER AND CONNECTORS

SPECIAL INSPECTIONS

1. SPECIAL INSPECTIONS SHALL BE PERFORMED IN ACCORDANCE WITH SECTION 1705 OF IBC AND THE OWNER SHALL EMPLOY ONE OR MORE SPECIAL INSPECTORS TO PROVIDE INSPECTIONS DURING CONSTRUCTION ON THE TYPES OF WORK LISTED UNDER SECTION 1705. THE FOLLOWING AREAS OF WORK REQUIRE SPECIAL INSPECTIONS IN ACCORDANCE WITH THE LISTED 2021 INTERNATIONAL BUILDING CODE SECTIONS/LOCATIONS:
   - A. SOILS – SECTION 1705.6 PER TABLE 1705.6
   - B. CONCRETE – SECTION 1705.3 PER TABLE 1705.3
   - C. STEEL – SECTION 1705.2 (SEE AISC 360-16)
   - D. WOOD – SECTION 1705.5

MISCELLANEOUS

1. ALL DIMENSIONS ON STRUCTURAL DRAWINGS TO BE CHECKED AGAINST ARCHITECTURAL, MECHANICAL AND ELECTRICAL DRAWINGS BY THE GENERAL CONTRACTOR AND ANY DISCREPANCIES ARE TO BE REPORTED TO THE ARCHITECT IMMEDIATELY.
2. THE CONTRACTOR SHALL ASSUME RESPONSIBILITY, UNRELIEVED BY REVIEW OF SHOP DRAWINGS OR PERIODIC OBSERVATION OF CONSTRUCTION, FOR COMPLIANCE WITH THE CONTRACT DOCUMENTS, FOR FABRICATION PROCESSES AND CONSTRUCTION TECHNIQUES, AND FOR SAFE CONDITIONS ON THE JOB SITE.
3. DO NOT SCALE THE DRAWINGS.

STRUCTURAL NOTES

CONDENSATE LINE FROM RTUs DOWN THROUGH THE ROOF ON UNITS BASE, TO BE FURNISHED AND INSTALLED BY PC. SEE PLUMBING SHEETS P1.2, P2.1 AND COORDINATION SCHEDULE ON M4.1.

1 / M1.0 ROOF PLAN
1/4"=1'-0"

DRAWING NOTES

1. ROOFTOP EQUIPMENT LOCATIONS SHOWN ARE GENERAL. ACTUAL LOCATIONS SHALL BE COORDINATED WITH THE STRUCTURAL DRAWINGS.
2. ROOF OPENINGS FOR ROOFTOP UNITS AND EXHAUST FANS SHALL BE COORDINATED WITH THE MANUFACTURER.
3. ROOF OPENINGS FOR PIPE PORTALS SHALL ONLY BE LARGE ENOUGH TO ALLOW PIPE AND CONDUIT PENETRATIONS. PIPE PORTAL CURB SHALL BE FILLED WITH AS MUCH BATT INSULATION AS POSSIBLE.
4. PRIOR TO INSTALLING THE TOP OF THE EQUIPMENT PLATFORM, INSIDE OF THE PLATFORM SHALL BE INSULATED WITH AS MUCH BATT INSULATION AS POSSIBLE.

KEYED NOTES

- M1 ARROW INDICATES DIRECTION OF EXHAUST FAN HINGE SWING (TYP.)
- M2 6"ø ALUMINUM EXHAUST DUCT FROM EXHAUST FAN (EF-5). PROVIDE PORTALS PLUS PLASTI-FLASH WITH C-126 CAP (OR EQUAL) FOR ROOF PENETRATION. TERMINATE DUCT A MIN. OF 24" ABOVE FINISHED ROOF WITH GOOSENECK.
- M3 NOT USED
- M4 MAINTAIN A MINIMUM 10'-0" CLEARANCE FROM EDGE OF OUTLETS AND VENT TERMINALS TO FRESH AIR INTAKES (TYP.)
- M5 NOT USED
- M6 ROOF PIPE PORTAL FOR CONDENSING UNITS
- M7 ROOF PIPE PORTAL FOR ROOFTOP UNITS (TYP. 3 PLACES)
- M8 NOT USED
- M9 NOT USED
- M10 ARROW INDICATES DIRECTION OF AIRFLOW FOR CONDENSING OR ROOFTOP UNIT AIR INTAKE (TYP.)
- M11 REFRIGERANT PIPING SUPPORT AS REQUIRED. PROVIDE ROOFTOP BLOX MODEL RTB-01 (OR EQUAL) AND ALL NECESSARY ACCESSORIES FOR PROPER PIPE AND CONDUIT SUPPORT. PROVIDE GALVANIZED PIPE SHIELD TO PROTECT INSULATION AT ALL SUPPORTS.
- M12 PROVIDE HAIL GUARD FOR RTU-1 PROTECTING CONDENSER COIL FROM GREASE.
- M13 EXHAUST FANS WITH WINDBAND EXTENSION TO PREVENT DIRECT GREASE BLOW ONTO CONDENSER COIL OF UNIT RTU-1.
- P1 NOT USED.
- P2 PLUMBING VENT THROUGH ROOF (SEE PLUMBING DRAWINGS). PROVIDE PORTALS PLUS PLASTI-FLASH WITH C-126 CAP (OR EQUAL) FOR ROOF PENETRATION.
- P3 PRIMARY ROOF DRAIN WITH DOME STRAINER (TYP). (SEE PLUMBING DRAWINGS)
- P4 OVERFLOW ROOF DRAIN WITH DOME STRAINER (TYP). (SEE PLUMBING DRAWINGS)
- P5 AREA OF ROOF SERVED BY ROOF DRAIN (TYP.)

PIPE PORTAL SCHEDULE

MANUFACTURER	CURB DIMENSIONS	CURB TYPE	CAP TYPE (QTY)	SERVES
RPS	12"x12"x11"H	RC-2A	N18 (1)	RTU-1 THROUGH RTU-3
RPS	43"x12"x13"H	RC-2A	N18 (3)	CU-1 THROUGH CU-6

SEQUENCE OF OPERATION

THERMOSTAT SETTINGS

MODE	FAN	SETPOINTS COOLING	SETPOINTS HEATING
OCCUPIED	ON	75°F	70°F
UNOCCUPIED	AUTO	90°F	55°F

HUMIDITY	
HUMIDITY SETPOINT (FOR DEHUMIDIFICATION UNITS ONLY)	60%

RTU-1, RTU-2 & RTU-3:

1. OCCUPIED MODE SHALL BEGIN AS FOLLOWS:
   - RTU-1: 1.5 HOURS BEFORE OPEN
   - RTU-2: 1 HOUR BEFORE OPEN
   - RTU-3: 30 MINUTES BEFORE OPEN
2. ROOFTOP UNIT FAN SHALL RUN CONTINUOUSLY DURING OCCUPIED MODE
3. ECONOMIZER SHALL BE OPEN DURING OCCUPIED MODE (OUTDOOR AIR THROUGH ROOFTOP UNITS SERVES AS MAKE-UP AIR FOR THE KITCHEN EXHAUST SYSTEM) – REFER TO E3.2 FOR HOOD/FAN INTERLOCK DETAILS.
4. UNOCCUPIED MODE SHALL BEGIN ONE (1) HOUR AFTER STORE CLOSES
5. DURING UNOCCUPIED MODE, ECONOMIZER IS CLOSED AND HEATING, COOLING AND FAN OPERATE IN AUTO MODE (ON DEMAND)
6. RTU-2 SHALL BE INTERLOCKED WITH EF-6. UPON ACTIVATION OF EF-6, RTU-2 SHALL INCREASE SUPPLY AND OUTSIDE AIR BY 600 CFM, WHILE MAINTAINING 1275 CFM RETURN AIR. COORDINATE WITH E.C. AND BAS SUPPLIER.

SHEET NO.: 013.1263.00.0
M1.0
ROOF PLAN

1 M1.2 DUCTWORK PLAN
1/4"=1'-0"

DRAWING NOTES

1. ALL DUCTWORK SHALL BE RUN BETWEEN OR THROUGH THE JOISTS UNLESS NOTED OTHERWISE. DUCTWORK DESIGNATED WITH (B.J.) SHALL BE RUN BELOW THE JOISTS.
2. DUCT SIZES SHOWN ARE INTERNAL FREE AREA DIMENSIONS UNLESS NOTED OTHERWISE.
3. ALL SHEET METAL DUCTWORK SHALL BE EXTERNALLY INSULATED. INSULATION IS NOT SHOWN FOR CLARITY. SEE MECHANICAL NOTES FOR INSULATION REQUIREMENTS.
4. CARBON STEEL KITCHEN EXHAUST DUCTWORK SHALL BE EXTERNALLY INSULATED. INSULATION NOT SHOWN FOR CLARITY. SEE MECHANICAL NOTES AND DETAILS FOR INSULATION REQUIREMENTS.
5. RETURN AIRFLOW VOLUME SHOWN ON PLAN IS FOR DUCTWORK SIZING PURPOSES WHEN THE UNIT IS IN RECIRCULATION (UNOCCUPIED) MODE.
6. DIFFUSERS IN DINING ROOM ARE SPECIFIC TO THE DECOR PLAN SHOWN. DIFFERENT CEILING LAYOUTS MAY REQUIRE A DIFFERENT DIFFUSER TYPES, QUANTITIES, LOCATIONS AND FINISHES/COLORS.
7. NO DIFFUSERS OR GRILLES TO BE INSTALLED ABOVE KIOSKS TO AVOID CONFLICTS WITH KIOSK'S CEILING PENETRATIONS FOR CONDUITS

KEYED NOTES

M1 18x20 SUPPLY AND 11x30 RETURN DUCT DROPS FROM ROOFTOP UNIT (RTU-2)

M2 20x60 SUPPLY AND 15x60 RETURN DUCT DROPS FROM ROOFTOP UNIT (RTU-1)

M3 20x60 SUPPLY AND 15x60 RETURN DUCT DROPS FROM ROOFTOP UNIT (RTU-3)

M4 PROVIDE SHEET METAL DUCT AT ALL DRAFTSTOP WALL PENETRATIONS (TYP.)

M5 6"ø ALUMINUM DUCT FROM EXHAUST FAN UP THROUGH ROOF

M6 EXTERNALLY INSULATE EXHAUST DUCT FROM FAN TO ROOF PENETRATION

M7 STEADY STATE SPEED CONTROLLER FOR CEILING MOUNTED EXHAUST FAN. STEADY STATE SPEED CONTROLLER SHALL BE INSTALLED OVER SUSPENDED CEILING FOR ACCESS. DO NOT INSTALL OVER AREAS WITH DRYWALL CEILINGS. SET IT CLOSET THERMOSTAT TO 80°F.

M8 SET DIFFUSER'S (S-5) OUTER SLOT FOR VERTICAL AIR THROW PATTERN AND INNER SLOT FOR HORIZONTAL THROW PATTERN (TYP.)

M9 BUILDING AUTOMATION SYSTEM LOCATION. SEE LIGHTING CONTROL DETAILS ON SHEET E4.1.

M10 MOUNT AIR CURTAIN TIGHT TO CEILING

M11 MOUNT AIR CURTAIN WITH BOTTOM OF UNIT AT TOP OF DOOR FRAME

M12 MOUNT AIR CURTAIN WITH BOTTOM OF UNIT ABOVE DOOR FRAME AND TOP OF SWITCHGEAR TO MEET 3'-0" MINIMUM SWITCHGEAR'S CLEARANCE REQUIREMENT

M13 FOR DIFFUSERS INSTALLED IN DRYWALL CEILINGS, VOLUME DAMPER IS INTEGRAL TO DIFFUSER AND ADJUSTABLE AT FACE OF DIFFUSER (SEE NOTE 18 UNDER "VENTILATION SYSTEMS" ON DRAWING M4.0 AND AIR DEVICE SCHEDULE ON DRAWING M4.1)

M14 FOR DIFFUSERS INSTALLED IN DRYWALL CEILINGS, INSTALL HIGH-EFFICIENCY TAKE-OFFS WITH VOLUME DAMPER IN FULL-OPEN POSITION TO FACILITATE BALANCING AT FACE OF DIFFUSER.

M15 GENERAL CONTRACTOR SHALL PROVIDE ADDITIONAL T-BAR FRAME TO PROPERLY LOCATE DIFFUSER AS SHOWN. AIR STREAM FROM DIFFUSER SHALL COVER ENTIRE DOOR OPENING.

M16 NONCOMBUSTIBLE WALL CONSTRUCTION BEHIND TYPE I KITCHEN HOODS. REFER TO SHEET A1.0 FOR MORE INFORMATION.

M17 6"X18" DOOR LOUVER BY NATIONAL GUARD PRODUCTS, MODEL: L-700-RX. ONE IN EACH DOOR TO IT CLOSET (200 CFM) (TYP. OF 2), SEE ARCHITECTURAL PLANS FOR LOUVERED DOOR SCHEDULE.

M18 NOT USED

M19 NOT USED

M20 10" TYPE 304 STAINLESS STEEL DUCT (BY KES) FROM TYPE II EXHAUST HOOD UP THROUGH ROOF TO EXHAUST FAN. DUCTWORK SHALL BE PITCHED TOWARDS TYPE II EXHAUST HOOD. EXTERNALLY INSULATE EXHAUST DUCT FROM TYPE II EXHAUST HOOD CONNECTION TO ROOF PENETRATION.

DETAILS

MECHANICAL NOTES

GENERAL:
1. ALL WORK PERFORMED SHALL BE IN ACCORDANCE WITH ALL LOCAL CODES AND ACCEPTABLE TO THE AUTHORITY HAVING JURISDICTION.
2. ALL DIMENSIONS, CLEARANCES AND TOLERANCES SHALL BE VERIFIED PRIOR TO INSTALLATION.
3. ALL MATERIALS, FIXTURES AND EQUIPMENT USED SHALL BE IN ACCORDANCE WITH McDONALD'S SPECIFICATIONS. SPECIFICATIONS ARE CONTAINED WITHIN THESE DRAWINGS AND THE McDONALD'S PROJECT MANUAL. ANY CONTRACTOR IN NEED OF A COPY OF THE McDONALD'S PROJECT MANUAL SHALL CONTACT THE McDONALD'S AREA CONSTRUCTION MANAGER. ANY VARIANCE FROM THE McDONALD'S SPECIFICATIONS SHALL BE REVIEWED AND APPROVED BY THE ENGINEER-OF-RECORD.
4. ALL EQUIPMENT SHALL BE INSTALLED IN ACCORDANCE WITH ITS LISTING AND/OR THE MANUFACTURER'S INSTALLATION INSTRUCTIONS.
5. SEE COORDINATION SCHEDULE FOR ADDITIONAL SCOPE OF WORK.
6. PRIOR TO BUILDING TURNOVER, A COMPLETE START-UP, TEST, ADJUST AND BALANCE SHALL BE PERFORMED ON ALL MECHANICAL SYSTEMS. THIS WORK SHALL BE PERFORMED BY A CERTIFIED TEST AND BALANCE CONTRACTOR. A CERTIFIED TEST AND BALANCE CONTRACTOR CAN BE FOUND BY VISITING:
   HTTP://WWW.AABCHQ.COM/DIRECTORY
   HTTP://WWW.NEBB.ORG/DIRECTORY.HTM
   HTTP://WWW.TABBCERTIFIED.ORG/SITE/CONTENT/CONTRACTORS/SEARCH
7. UPON COMPLETION OF THE PUNCHLIST, THE MECHANICAL CONTRACTOR AND TEST AND BALANCE CONTRACTOR SHALL SUBMIT REDLINED OR AS-BUILT DRAWINGS ALONG WITH THE TEST AND BALANCE REPORT AND ALL EQUIPMENT OPERATION AND MAINTENANCE MANUALS TO THE McDONALD'S AREA CONSTRUCTION MANAGER. A MINIMUM OF TWO (2) COPIES SHALL BE PROVIDED, ONE (1) FOR REGIONAL RECORDS AND ONE (1) FOR THE RESTAURANT.
8. ALL PENETRATIONS OF FIRE-RATED WALLS SHALL BE FIRESTOPPED WITH AN APPROVED AND LISTED FIRESTOPPING SYSTEM.

VENTILATION SYSTEMS:
1. ALL SHEET METAL DUCTWORK SHALL BE FABRICATED AND INSTALLED IN ACCORDANCE WITH LOCAL CODES AND SMACNA STANDARDS.
2. ALL DUCTWORK DIMENSIONS ARE INTERNAL FREE AREA DIMENSIONS AND SIZED FOR 0.08" W.C. PER 100 FT. OF DUCT.
3. ALL SHEET METAL DUCTWORK SHALL BE CONSTRUCTED IN ACCORDANCE WITH SMACNA TABLES FOR 2" W.C. AND SHALL BE SUPPORTED WITH AN APPROVED HANGER AT INTERVALS NOT EXCEEDING 10 FT.
4. ALL DUCT DROPS INTO THE BUILDING SHALL BE INSTALLED WITH FLEXIBLE CONNECTIONS TO ISOLATE THE DUCTWORK SYSTEM FROM NOISE AND VIBRATION. FLEXIBLE CONNECTIONS SHALL BE TESTED IN ACCORDANCE WITH UL 181 AND LISTED AS CLASS 0 OR CLASS 1.
5. ALL DUCT DROPS INTO THE BUILDING SHALL BE OFFSET AS NECESSARY TO ALLOW FOR THE CLEAR INSTALLATION OF THE EXTERNAL DUCTWORK INSULATION.
6. ALL DUCTWORK BRANCHES THAT SERVE A SINGLE DIFFUSER SHALL BE SUPPLIED WITH A VOLUME DAMPER FOR BALANCING. BRANCHES THAT SERVE MULTIPLE DIFFUSERS, THE BALANCING IS HANDLED VIA REMOTE DAMPER INSTALLED NEAR THE DIFFUSER. REFER TO M1.2 FOR DAMPER LOCATIONS. VOLUME DAMPER SHALL HAVE A 2" OFFSET TO ACCOMMODATE EXTERNAL INSULATION.
7. TAKE-OFFS FROM RECTANGULAR TO ROUND DUCT SHALL BE DUCTMATE STRAIGHT-SIDED OR CENTER HIGH-EFFICIENCY TAKE-OFFS WITH A 2" DAMPER STAND-OFF TO ACCOMMODATE FOR EXTERNAL INSULATION.
8. ALL DUCTWORK JOINTS, LONGITUDINAL AND TRANSVERSE SEAMS SHALL BE SEALED WITH WELDS, GASKETS, MASTICS (ADHESIVES), TAPES, ETC. ALL SEALANT MATERIALS SHALL BE LISTED IN ACCORDANCE WITH UL 181A OR 181B.
9. ALL SUPPLY AND RETURN SHEET METAL DUCTWORK LOCATED WITHIN THE CEILING SPACE SHALL BE EXTERNALLY INSULATED. INSULATION SHALL BE 2" THICK MICROLITE FSK-100 BY JOHNS MANVILLE OR EQUAL.
10. ALL SUPPLY AND RETURN SHEET METAL DUCTWORK LOCATED OUTSIDE OF THE BUILDING SHALL BE INTERNALLY LINED WITH A 1" THICK FIBERGLASS (MIN. R-4.2) AND EXTERNALLY INSULATED WITH A 2" THICK RIGID POLYSTYRENE, POLYURETHANE OR POLYISOCYANURATE BOARD (MIN. R-8 FOR CLIMATE ZONES 1 THROUGH 4), OR A 3" THICK (MIN R-12 FOR CLIMATE ZONES 5 THROUGH 8). INTERNAL FIBERGLASS INSULATION SHALL BE LINATEX BY JOHNS MANVILLE OR EQUAL. EXTERNAL RIGID BOARD INSULATION SHALL BE THERMAPINK BY OWENS CORNING OR EQUAL.
11. FOR APPLICABLE SITUATIONS OR PLAYPLACE ADDITIONS: ALL EXPOSED SPIRAL DUCTWORK SHALL BE INTERNALLY INSULATED TO PREVENT CONDENSATION (MIN. R-4.3). INTERNAL INSULATION SHALL BE 1" THICK SPIRACOUSTIC PLUS BY JOHNS MANVILLE OR EQUAL.
12. ALL DUCTWORK PENETRATIONS THROUGH FIRE-RATED WALLS, BARRIERS OR PARTITIONS SHALL BE PROTECTED WITH A FIRE DAMPER. THE PERIMETER OF THE FIRE DAMPER SHALL BE FIRESTOPPED WITH AN APPROVED AND LISTED FIRESTOPPING MATERIAL.
13. ALL EXTERIOR SHEET METAL DUCTWORK SHALL BE EXTERNALLY WRAPPED WITH AN APPROVED WEATHERPROOFING MATERIAL TO PROTECT AGAINST WATER PENETRATION AND CORROSION. SIDES AND TOP OF EXTERNAL WEATHERPROOFING SHALL BE ALUMAGUARD 60 MIL UV BARRIER BY POLYGUARD OR EQUAL. BOTTOM OF EXTERNAL WEATHERPROOFING SHALL BE VAPORGUARD 5 MIL MEMBRANE BY POLYGUARD OR EQUAL.
14. ALL FLEXIBLE DUCTWORK, METALLIC AND NONMETALLIC, SHALL CONFORM TO THE FOLLOWING:
   A. 2" THICK INSULATION (R-6.0) SEE NOTE#9 AND TABLE(S) BELOW:

DUCT LOCATION: UNCONDITIONED SPACE			CLIMATE ZONES 1 THROUGH 8
DUCTWORK CLASSIFICATION	PRESSURE	SEAL CLASS	INSULATION
SUPPLY	2.00" W.C.	A	TYPE A (R-6)
RETURN	-2.00" W.C.	A	TYPE A (R-6)
EXHAUST	-2.00" W.C.	A	(*)TYPE A (R-6)
HANGER SUPPORTS	EVERY 6 FT.		1" TYPE B

DUCT LOCATION: EXTERIOR (INCLUDES ATTICS ABOVE INSULATED CEILINGS AND CRAWL SPACES.			CLIMATE ZONES 1 THROUGH 4	CLIMATE ZONES 5 THROUGH 8
DUCTWORK CLASSIFICATION	PRESSURE	SEAL CLASS	INSULATION	INSULATION
SUPPLY	2.00" W.C.	A	TYPE A (R-8)	TYPE A (R-12)
RETURN	-2.00" W.C.	A	TYPE A (R-8)	TYPE A (R-12)
EXHAUST	-2.00" W.C.	A	(*)TYPE A (R-8)	(*)TYPE A (R-12)
HANGER SUPPORTS	EVERY 6 FT.		1" TYPE B	

   (*) EXHAUST DUCTWORK IS ONLY REQUIRED TO BE INSULATED WITHIN 2-FEET OF ROOF PENETRATION. REFER TO "COMMERCIAL KITCHEN EXHAUST SYSTEMS", NOTE#4 FOR FIRE WRAPPING REQUIREMENTS ON KITCHEN GREASE DUCTWORK.

   B. INTEGRAL VAPOR BARRIER
   C. LISTED AND LABELED UL 181, CLASS 0 OR CLASS 1
   D. INSTALLED IN ACCORDANCE WITH:
      i. SMACNA STANDARDS,
      ii. AIR DIFFUSION COUNCIL INSTALLATION GUIDELINES, AND/OR
      iii. MANUFACTURER'S INSTALLATION INSTRUCTIONS
14. FLEXIBLE DUCTWORK SHALL NOT PENETRATE WALLS. SHEET METAL DUCTWORK IS REQUIRED AT ALL FIRE-RATED AND DRAFTSTOP WALL PENETRATIONS.
15. ALL COVERINGS, LININGS AND ADHESIVES (TAPES, ETC.) SHALL HAVE A FLAME-SPREAD INDEX NOT GREATER THAN 25 AND A SMOKE-DEVELOPED INDEX NOT GREATER THAN 50.
16. DUCT-MOUNTED SMOKE DETECTORS, PROVIDED BY ROOFTOP UNIT MANUFACTURER, SHALL BE INSTALLED IN SYSTEMS WITH DESIGN CAPACITY GREATER THAN 2,000 CFM. SEE MECHANICAL DRAWINGS FOR LOCATIONS OF SMOKE DETECTORS. DUCT-MOUNTED SMOKE DETECTORS ARE NOT REQUIRED WHEN THE BUILDING IS PROTECTED THROUGHOUT BY AREA SMOKE DETECTORS CONNECTED TO A FIRE ALARM SYSTEM WHERE THE FIRE ALARM SYSTEM IS DESIGNED TO SHUT DOWN THE ROOFTOP UNITS.
17. ALL SUPPLY AIR DIFFUSERS SHALL BE INSULATED TO PREVENT CONDENSATION.
18. ALL AIR DEVICES LOCATED IN DRYWALL CEILINGS SHALL BE SUPPLIED WITH AN INTEGRAL VOLUME DAMPER ACCESSIBLE FROM THE AIR DEVICE FACE TO FACILITATE BALANCING.
19. ALL OUTDOOR AIR INTAKES SHALL BE LOCATED A MINIMUM OF 10 FT. HORIZONTALLY FROM ANY SOURCE OF CONTAMINATION SUCH AS EXHAUST FANS, PLUMBING VENTS, WATER HEATER FLUES, ETC. WHERE A CONTAMINANT SOURCE IS LOCATED WITHIN 10 FT. OF AN INTAKE, THE INTAKE OPENING SHALL BE LOCATED A MINIMUM OF 2 FT. BELOW THE CONTAMINANT SOURCE.
20. ALL ROOFTOP CONDENSING UNITS THAT DISCHARGE HORIZONTALLY SHALL BE ORIENTED SUCH THAT THE DISCHARGE DOES NOT BLOW IN THE DIRECTION OF AN OUTDOOR AIR INTAKE.

COMMERCIAL KITCHEN EXHAUST SYSTEMS:
1. ALL METAL DUCTWORK USED FOR THE CONVEYANCE OF GREASE-LADEN AIR SHALL BE CONSTRUCTED OF MINIMUM 18 GAUGE STAINLESS STEEL OR 16 GAUGE CARBON STEEL (BLACK IRON).
2. ALL GREASE EXHAUST DUCTWORK JOINTS SHALL BE EITHER TELESCOPING OR BELL TYPE. BUTT-WELDED JOINTS ARE PROHIBITED.
3. ALL GREASE EXHAUST DUCTWORK SEAMS AND JOINTS SHALL BE CONTINUOUSLY WELDED WATER-TIGHT ON THE EXTERNAL SURFACE OF THE DUCT SYSTEM. ALL WELDING SHALL BE PERFORMED BY A CERTIFIED WELDER.
4. ALL GREASE EXHAUST DUCTWORK SHALL BE EXTERNALLY INSULATED WITH A ASTM E2336 LISTED AND LABELED GREASE DUCT ENCLOSURE SYSTEM. INSULATION SHALL BE INSTALLED IN ACCORDANCE WITH ITS LISTING AND THE MANUFACTURER'S INSTALLATION INSTRUCTIONS.
5. ACCESS PANELS SHALL BE PROVIDED AT ALL CHANGES IN DIRECTION OF THE GREASE EXHAUST DUCTWORK SYSTEM. ACCESS PANELS SHALL BE INSTALLED IN ACCORDANCE WITH THE INSULATION MANUFACTURER'S INSTALLATION INSTRUCTIONS AND SHALL BE LABELED AS FOLLOWS: "ACCESS PANEL – DO NOT OBSTRUCT".
6. ALL HORIZONTAL GREASE EXHAUST DUCTWORK SHALL BE INSTALLED WITH A MINIMUM ¼" PER FOOT SLOPE AND SHALL BE PITCHED BACK TOWARD THE HOOD.
7. UPBLAST KITCHEN EXHAUST FANS SHALL BE LOCATED A MINIMUM OF 6 FT. FROM ANY PARAPET WALL OR ADJACENT STRUCTURE AND SHALL TERMINATE A MINIMUM OF 40 INCHES ABOVE THE FINISHED ROOFING MATERIAL.

REFRIGERANT PIPING:
1. ALL REFRIGERATION WORK SHALL BE PERFORMED BY A CERTIFIED REFRIGERATION CONTRACTOR.
2. ALL REFRIGERANT PIPING SHALL BE SEAMLESS COPPER TUBING OF TYPE L IN ACCORDANCE WITH ASTM B 88 AND ALL JOINTS SHALL BE SOLDERED.
3. ALL REFRIGERANT SUCTION LINES SHALL BE INSULATED WITH A MINIMUM 1" FOAM PIPE INSULATION. PIPE INSULATION INSTALLED OUTDOORS SHALL BE PROTECTED WITH AN APPROVED WEATHERPROOFING MATERIAL.
4. ALL SUSPENDED REFRIGERANT PIPING SHALL BE SUPPORTED AS FOLLOWS:

MATERIAL	MAX. HORIZ. SPACING	MAX. VERT. SPACING
COPPER TUBING ≤1¼"	6 FT.	10 FT.
COPPER TUBING ≥1½"	10 FT.	10 FT.

5. ALL REFRIGERANT PIPING SHALL BE SIZED PER EQUIPMENT MANUFACTURER'S RECOMMENDATIONS.
6. PRE-CHARGED LINESETS ARE NOT PERMITTED AS LINES WILL MOST LIKELY NEED TO BE CUT TO FIT THE APPLICATION AND REFRIGERANT WILL NEED TO BE RECLAIMED.
7. ALL PIPE INSULATION SHALL BE PROTECTED FROM DAMAGE FROM PIPE HANGERS. PROTECTION SHALL BE LIGHT GAUGE GALVANIZED STEEL OR EQUAL.
8. ALL REFRIGERANT PIPING SYSTEMS SHALL BE PRESSURE TESTED FOR LEAKS PRIOR TO START-UP. ALL LEAKS SHALL BE REMEDIED PRIOR TO BUILDING TURNOVER.
9. ALL PIPING SHALL MEET MINIMUM INSULATION THICKNESS PER THE TABLE BELOW:

PIPING	MINIMUM INSULATION THICKNESS (IN INCHES) PER NOMINAL PIPE OR TUBE SIZE				
NOMINAL PIPE SIZE	<1	1 TO 1.5	1.5 TO <4	4 TO <8	≥8
LIQUID (REFRIGERATION) (<40°F)	0.5	1.0	1.0	1.0	1.5
SUCTION (REFRIGERATION) (<40°F)	0.5	1.0	1.0	1.0	1.5

CO2 DETECTION EQUIPMENT:
1. THE CO2 DETECTOR SHALL BE HARD-WIRED TO PREVENT TAMPERING AND SHALL BE INSTALLED AT 12" A.F.F. WITHIN A 5 FT. RADIUS OF THE CO2 STORAGE TANKS.
2. ONE (1) AUDIBLE AND ONE (1) VISUAL ALARM SHALL BE INSTALLED A MINIMUM OF 7 FT. A.F.F., IN PLAIN SIGHT IN THE SAME ROOM AS THE CO2 STORAGE TANKS.
3. ONE (1) AUDIBLE AND ONE (1) VISUAL ALARM SHALL BE INSTALLED A MINIMUM OF 7 FT. A.F.F., AT THE BACK OF THE KITCHEN AND IN PLAIN SIGHT FROM THE MAIN SIDE OF THE PREP LINE.
4. THE CO2 EXTERIOR STROBE SHALL BE INSTALLED AS SHOWN ON SHEET A2.0, (DETAIL 2) AND ON SHEET E1.1. THE INSIDE AUDIBLE AND VISUAL ALARM SHALL BE INSTALLED INSIDE THE CO2 CLOSET, AND IN THE SUPPORT/BACK-OF-THE HOUSE LOCATION AS SHOWN ON SHEETS E1.1 AND E3.0.

CONDENSATE PIPING:
1. CONDENSATE PIPING SHALL BE GALVANIZED STEEL, COPPER OR PVC.
2. PVC PIPE SHALL BE PAINTED WITH WATER BASED LATEX PAINTING TO RESIST DEGRADATION FROM ULTRAVIOLET EXPOSURE.
3. PIPE SUPPORTS SHALL BE RPS MODEL PMP-2 OR EQUAL. QUANTITY AS REQUIRED DEPENDANT UPON PIPING MATERIAL.
4. PIPING SHALL BE SUPPORTED AS FOLLOWS:

MATERIAL	MAX. HORIZ. SPACING	MAX. VERT. SPACING
COPPER PIPE	12 FT.	10 FT.
GALVANIZED STEEL	12 FT.	15 FT.
PVC	4 FT.	15 FT.

5. CONDENSATE PIPING SHALL SLOPE A MINIMUM OF ⅛" PER FOOT.
6. CONDENSATE PIPING SHALL BE SIZED BASED ON THE FOLLOWING:

TOTAL TONS SERVED BY PIPE	MINIMUM PIPE SIZE
<20 TONS	¾"
>20 TONS, <40 TONS	1"

NOTES:
1. THIS SCHEDULE IS INTENDED AS A GUIDE FOR THE WORK TO BE PERFORMED. ALL WORK SHALL BE COORDINATED BETWEEN THE McDONALD'S AREA CONSTRUCTION MANAGER AND ALL GC AND O/O SUBCONTRACTORS.
2. ONE (1) COPY OF THE DECOR PACKAGE DRAWINGS SHALL BE SUPPLIED TO THE GENERAL CONTRACTOR AND EACH OF THE SUBCONTRACTORS. IT SHALL BE THE RESPONSIBILITY OF THE GENERAL CONTRACTOR AND THE SUBCONTRACTORS TO INSURE THAT THEY HAVE RECEIVED THE DECOR PACKAGE DRAWINGS.
3. FOR ANY WORK NOT CLARIFIED IN THIS SCHEDULE OR IN THE NOTES AND SPECIFICATIONS, PLEASE CONSULT THE McDONALD'S CONSTRUCTION MANAGER FOR SCOPE OF WORK.
4. ALL ROOFTOP UNIT EQUIPMENT SUPPLIED BY THE MECHANICAL CONTRACTOR AND THE KITCHEN EQUIPMENT SUPPLIER SHALL BE ON SITE AT THE SAME TIME FOR A SINGLE CRANE LIFT. EQUIPMENT SITE ARRIVAL DATE SHALL BE COORDINATED BETWEEN THE CONSTRUCTION MANAGER, MECHANICAL CONTRACTOR AND KITCHEN EQUIPMENT SUPPLIER.
5. ALL ROOFTOP UNITS INSTALLED IN McDONALD'S RESTAURANTS SHALL BE HIGH EFFICIENCY EQUIPMENT. THE INSTALLATION OF STANDARD EFFICIENCY ROOFTOP UNITS IS PROHIBITED. PLEASE REFER TO THE LATEST EDITION OF IECC FOR HVAC EQUIPMENT PERFORMANCE REQUIREMENTS.
6. ALL KITCHEN EQUIPMENT REQUIRING EXHAUST SHALL BE INSTALLED IN ACCORDANCE WITH THESE PLANS. ANY VARIATION FROM THESE PLANS SHALL BE REPORTED TO THE CONSTRUCTION MANAGER AND THE ENGINEER–OF–RECORD.
7. WHERE GYPSUM BOARD CEILINGS ARE INSTALLED, THE MECHANICAL CONTRACTOR SHALL SUPPLY DRYWALL MOUNTING FRAMES FOR LAY–IN TYPE DIFFUSERS.
8. ALL WORK SHOWN ON P1.6 DRAWING(S) SHALL BE COMPLETED BY THE BEVERAGE SYSTEM INSTALLER (OR K.E.S.) UNLESS OTHERWISE NOTED IN THE PLUMBING DRAWINGS.
9. ALL WORK ON P1.0 & P1.2 DRAWING(S) SHALL BE BY THE PLUMBING CONTRACTOR.
10. THE BEVERAGE SYSTEM INSTALLER FURNISHES, RUNS AND CONNECTS ALL FLEXIBLE WATER AND SYRUP LINES FOR ALL AFFECTED EQUIPMENT INCLUDING THE FOLLOWING:
    A. HOT CHOCOLATE
    B. COFFEE BREWER
    C. ICE MACHINE
    D. O.J.
    E. SODA TOWERS
11. ALL WATER HEATERS INSTALLED IN McDONALD'S RESTAURANTS SHALL BE HIGH EFFICIENCY SEALED–COMBUSTION WATER HEATERS. THE INSTALLATION OF STANDARD EFFICIENCY GRAVITY–VENTED WATER HEATERS IS PROHIBITED. PLEASE REFER TO THE LATEST EDITION OF IECC FOR SERVICE WATER–HEATING EQUIPMENT PERFORMANCE EFFICIENCY REQUIREMENTS.
12. THE CONSTRUCTION MANAGER, PLUMBING CONTRACTOR AND KITCHEN EQUIPMENT SUPPLIER SHALL COORDINATE WHICH SOILED DISHWASHER (3–COMPARTMENT SINK) IS BEING INSTALLED IN THE RESTAURANT.
13. N/A
14. N/A
15. ALL FIRE PROTECTION DRAWINGS CONTAINED WITHIN THIS SET ARE STRICTLY FOR REFERENCE ONLY. FIRE SPRINKLER DRAWINGS SHALL BE DESIGNED AND PERMITTED BY A FIRE PROTECTION CONTRACTOR.
16. ALL R–102 WET CHEMICAL FIRE SUPPRESSION SYSTEMS FOR TYPE I HOODS SHALL BE DESIGNED AND INSTALLED BY A LOCAL ANSUL AGENT. THE USE OF DRY CHEMICAL SYSTEMS IS PROHIBITED. THE LOCAL ANSUL AGENT CONTRACT IS HANDLED THROUGH THE KITCHEN EQUIPMENT SUPPLIER.
17. ALL ROOFTOP UNITS AND EXHAUST FANS ARE SUPPLIED WITH A FACTORY–INSTALLED DISCONNECT SWITCH.
18. ELECTRICAL CONTRACTOR SHALL PROVIDE DISCONNECT SWITCHES FOR REMOTE CONDENSING UNITS.
19. ALL ELECTRICAL CONDUITS FOR ROOFTOP EQUIPMENT SHALL BE BROUGHT UP THROUGH THE BASE OF THE UNIT TO MINIMIZE ROOF PENETRATIONS. WHERE THIS IS NOT POSSIBLE, THE ELECTRICAL CONTRACTOR SHALL PROVIDE THE NECESSARY PIPE PORTALS ON ROOF.
20. WALK–IN COOLER AND WALK–IN FREEZER REFRIGERATION SYSTEMS SHALL MEET THE PERFORMANCE REQUIREMENTS OUTLINED IN THE LATEST EDITION OF IECC. MINIMUM ANNUAL WALK–IN ENERGY FACTOR (AWEF) PROVIDED BY EQUIPMENT MANUFACTURER IS DETERMINED IN ACCORDANCE WITH AHRI 1250.
21. SEE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION.
22. SEE STRUCTURAL DRAWINGS FOR ADDITIONAL INFORMATION.
23. SEE MECHANICAL DRAWINGS FOR ADDITIONAL INFORMATION.
24. SEE PLUMBING DRAWINGS FOR ADDITIONAL INFORMATION.
25. SEE ELECTRICAL DRAWINGS FOR ADDITIONAL INFORMATION.
26. SEE FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION.
27. SEE FIRE ALARM DRAWINGS FOR ADDITIONAL INFORMATION.
28. SEE KITCHEN DRAWINGS FOR ADDITIONAL INFORMATION.
29. SEE DECOR DRAWINGS FOR ADDITIONAL INFORMATION.

SCHEDULES

1 / P1.0 DOMESTIC WATER PIPING
SCALE: 1/4" = 1'-0"

DRAWING NOTES

1. PIPING ROUTES AS SHOWN ARE GENERAL AND MAY VARY DUE TO FIELD CONDITIONS. COORDINATE ALL PIPE ROUTES WITH OTHER TRADES. MAKE SURE HOT WATER MAIN LOOP REMAINS WITHIN 10 FT OF FIXTURE FOR ENERGY CODE PURPOSE.
2. ALL WATER DISTRIBUTION PIPING SHALL BE INSULATED. INSULATION NOT SHOWN FOR CLARITY. SEE PLUMBING NOTES FOR INSULATION REQUIREMENTS, SHEET M4.0, "DOMESTIC SUPPLY SYSTEMS", NOTE 18.

KEYED NOTES

P1 INCOMING UNDERGROUND WATER SERVICE (SEE SITE PLAN FOR CONTINUATION). WATER PIPING FROM THIS POINT TO CEILING PENETRATION INSIDE BUILDING SHALL BE COPPER.

P2 COLD WATER UNDERGROUND TO YARD HYDRANT (HB-2) IN TRASH CORRAL. SEE SITE PLAN FOR CONTINUATION.

P3 SHUT-OFF VALVE FOR RESTROOM ISOLATION. SEE VALVE SCHEDULE. ALL SHUT-OFF VALVES SHALL BE LOCATED OVER SUSPENDED CEILINGS FOR ACCESSIBILITY. DO NOT LOCATE IN AREAS WITH DRYWALL CEILINGS.

P4 ¾" COLD WATER UP TO ROOF HYDRANT.

P5 FOR MIXING VALVE LOCATIONS AND INSTALLATION DETAILS ON PUBLIC LAVATORIES, SEE DETAIL 3 ON DRAWING P3.0. FOR PRIVATE HAND SINKS OR LAVS, MIXING VALVES FOR INFORMATIONAL PURPOSES.

P6 PIPE-MOUNTED AQUASTAT TO SHUT PUMP DOWN WHEN RECIRULATION TEMPERATURE REACHES 140°F. SEE DETAIL 6 ON DRAWING P3.0.

P7 TIME CLOCK TO SHUT PUMP AND WATER HEATER DOWN DURING UNOCCUPIED HOURS. SEE ELECTRICAL DRAWINGS FOR WIRING DETAIL.

P8 BALANCING VALVE FOR RECIRCULATION SYSTEM. SEE VALVE SCHEDULE. ALL BALANCING VALVES SHALL BE LOCATED OVER SUSPENDED CEILINGS FOR ACCESSIBILITY. DO NOT LOCATE IN AREAS WITH DRYWALL CEILINGS.

P9 WATER PIPING AFTER CEILING PENETRATION CAN TRANSITION TO CPVC OR PEX WHERE PERMITTED BY CODE.

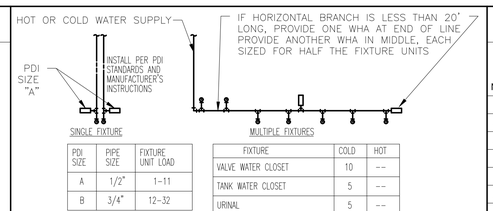

P10 PROPERLY SEAL ALL PIPE PENETRATIONS THROUGH DRAFT STOP WALL (TYP.)

P11 HOT WATER RECIRCULATION SHALL CONNECT WITHIN 6" OF SUPPLY STUB OUT TO FIXTURE.

P12 UTILITIES SHALL NOT BE ROUTED ABOVE THE TECH. CLOSET AND THE SWITCHGEAR.

P13 INSTALL WATER-HAMMER ARRESTOR WHERE QUICK-CLOSING VALVES ARE UTILIZED. WATER-HAMMER ARRESTORS SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S INSTRUCTIONS. WATER-HAMMER ARRESTORS SHALL CONFORM TO ASSE 1010.

P14 MAINTAIN A MINIMUM OF 10'-0" CLEARANCE FROM THE INCOMING DOMESTIC WATER TO THE GREASE WASTE AND SANITARY LINES.

1 P1.2 VENT & STORM PIPING PLAN

SCALE: 1/4" = 1'-0"

DRAWING NOTES

1. PIPING ROUTES ARE GENERAL AND MAY VARY DUE TO FIELD CONDITIONS. COORDINATE ALL PIPE ROUTES WITH OTHER TRADES.
2. WALL CLEAN-OUTS FOR WASTE PIPING NOT SHOWN FOR CLARITY. SEE GENERAL NOTES FOR REQUIREMENTS.
3. ONLY MAIN FLOOR CLEAN-OUTS ARE SHOWN FOR CLARITY. SEE GENERAL NOTES FOR REQUIREMENTS.
4. ALL HORIZONTAL STORM DRAINAGE PIPING SHALL BE INSULATED TO PREVENT CONDENSATION. INSULATION NOT SHOWN FOR CLARITY. SEE PLUMBING NOTES FOR INSULATION REQUIREMENTS.

KEYED NOTES

- P1 TERMINATE OVERFLOW DRAIN AS HIGH AS POSSIBLE WITH DOWNSPOUT COVER.
- P2 TERMINATE OVERFLOW DRAIN ABOVE TRELLIS WITH DOWNSPOUT COVER. BOTTOM OF DOWNSPOUT OUTLET PIPE SHALL BE AT LEAST 3" BUT NOT MORE THAN 8" ABOVE TOP OF TRELLIS.
- P3 TERMINATE BOTTOM OF OVERFLOW DRAIN A MINIMUM OF 12" ABOVE GRADE WITH DOWNSPOUT COVER.
- P4 PROVIDE PROSET TRAP GUARD® FOR FLOOR DRAIN.
- P5 TOP OF CONCRETE SLAB IS 0'-6" A.F.F.
- P6 VENT FROM GREASE INTERCEPTOR. SEE SITE PLAN FOR CONTINUATION. COORDINATE PIPE ROUTING WITH LOCATION OF GREASE INTERCEPTOR.
- P7 4" VENT UP THROUGH ROOF WITH A 4"x5" VENT CAP
- P8 REFERENCE MANUFACTURER INSTALLATION GUIDE FOR LAYOUT AND SLOPING GUIDELINES PRIOR TO INSTALL AND POURING THE SLAB.
- P9 UTILITIES SHALL NOT BE ROUTED ABOVE THE TECH. CLOSET AND THE SWITCHGEAR.
- P10 CONDENSATE LINE FROM RTUs DOWN TO DRAIN AT MOP SINK INDIRECT WITH AIR GAP 2 x DIAMETER, TERMINATE PIPE ABOVE FLOOD RIM. FURNISHED AND INSTALLED BY PC. SEE COORDINATION SCHEDULE ON P4.1 & M4.1.
- P11 CONTRACTOR SHALL ROUTE ½" OD 304 S/S PIPE (PROVIDED BY OTHERS) FROM TYPE II EXHAUST HOOD TO FLOOR SINK.
- P12 CONTRACTOR SHALL INSTALL DRAIN PIPE AND AIR GAP KIT (PROVIDED BY OTHERS). CONNECT DRAIN HOSES FROM WAREWASHER TO DRAIN PIPE PER MANUFACTURER'S INSTALLATION INSTRUCTIONS. REFER TO DETAIL 9/P3-0 FOR FURTHER DETAILS.
- P13 WALL CLEAN OUTS TO BE INSTALLED 18" A.F.F. ON VESTIBULE SIDE. OPTIONAL: PAINT TO MATCH WALL FINISH FOR CONCEALMENT.

DETAIL 1 P3.0
GREASE INTERCEPTOR INSTALLATION
SCALE: NONE

Grease Trap Sizing Formula (EPA-2 Model)

A. Determine maximum drainage flow from fixtures:

Type of fixture	Flow rate per unit	Quantity
Triple sink, 2 in. drain	35 gpm	1
Washing machine	10 gpm	1
Warewasher	15 gpm	1
Mop sink	20 gpm	2
Floor Drain or Sink	3 gpm	6
Vegetable Sink, 3 in drain	20 gpm	1
Total	*138 gpm*	*12*

B. Total - Divided by number of fixtures

Total	*11.50 gpm*

C. Loading factor

Fast food - paper delivery	0.5

D. B x C = Sub-total

Sub-total	*5.75 gpm*

E. D x 60 min. = Max. flow for one-hour

Max. Flow	*345 gpm*

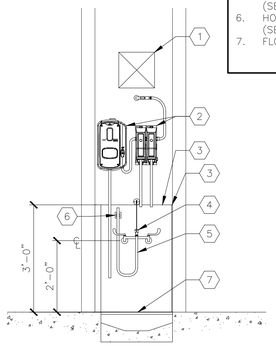

F. E x 2 hour retention time = Volume of Trap in gallons

Volume of Trap	*690 gallons*

Minimum Grease Trap Size
1300 gallons

SHEET NO. P3.0
DETAILS

GENERAL PLUMBING NOTES

GENERAL:
1. ALL WORK PERFORMED SHALL BE IN ACCORDANCE WITH ALL LOCAL CODES AND ACCEPTABLE TO THE AUTHORITY HAVING JURISDICTION.
2. ALL PLUMBING WORK SHALL BE PERFORMED BY A LICENSED PLUMBER.
3. ALL DIMENSIONS, CLEARANCES AND TOLERANCES SHALL BE VERIFIED PRIOR TO INSTALLATION. ALL ROUGH-IN LOCATIONS SHALL BE COORDINATED WITH THE MANUFACTURER'S SUBMITTAL INFORMATION.
4. ALL DIMENSIONAL INFORMATION IS AS FOLLOWS (UNLESS NOTED OTHERWISE):
   A. UNDERGROUND PIPE IS TO FOUNDATION
   B. OVERHEAD PIPE IS TO FINISHED WALL
   C. ELEVATIONS ARE TO FINISHED FLOOR
5. ALL MATERIALS, FIXTURES AND EQUIPMENT USED SHALL BE IN ACCORDANCE WITH McDONALD'S SPECIFICATIONS. SPECIFICATIONS ARE CONTAINED WITHIN THESE DRAWINGS AND THE McDONALD'S PROJECT MANUAL. ANY CONTRACTOR IN NEED OF A COPY OF THE McDONALD'S PROJECT MANUAL SHALL CONTACT THE McDONALD'S AREA CONSTRUCTION MANAGER. ANY VARIANCE FROM THE McDONALD'S SPECIFICATIONS SHALL BE REVIEWED AND APPROVED BY THE ENGINEER-OF-RECORD.
6. SEE COORDINATION SCHEDULE FOR ADDITIONAL SCOPE OF WORK.
7. ALL EQUIPMENT SHALL BE INSTALLED IN ACCORDANCE WITH ITS LISTING AND/OR THE MANUFACTURER'S INSTALLATION INSTRUCTIONS.
8. WHERE POOR SOIL CONDITIONS EXIST OR WHERE SUBSTANTIAL SETTLEMENT OF EITHER THE PIPING, THE BUILDING OR ADJACENT WALKS, PLANTERS, ETC., MAY OCCUR, THE CONTRACTOR SHALL PROVIDE ADEQUATE UNDERSLAB STAINLESS STEEL PIPE HANGERS OR APPROVED OTHER SUPPORT.
9. ALL PIPE SLEEVES SHALL BE PROPERLY SEALED AND INSULATED TO PREVENT HEAT LOSS AND SEEPAGE.
10. ALL PIPE INSULATION SHALL BE PROTECTED FROM DAMAGE FROM PIPE HANGERS. PROTECTION SHALL BE LIGHT GAUGE GALVANIZED STEEL OR EQUAL.
11. ALL PENETRATIONS OF FIRE-RATED WALLS SHALL BE FIRESTOPPED WITH AN APPROVED AND LISTED FIRESTOPPING SYSTEM.

SANITARY AND VENT SYSTEMS:
1. THE BUILDING SANITARY PIPE SHALL BE LOCATED A MINIMUM OF 10 FT. FROM THE INCOMING WATER SERVICE. WHERE A 10 FT. SEPARATION IS NOT POSSIBLE, THE BOTTOM OF THE WATER SERVICE PIPE SHALL BE A MINIMUM OF 12 IN. ABOVE THE TOP OF THE HIGHEST POINT OF THE SANITARY PIPE.
2. ALL SANITARY AND VENT PIPE SHALL BE PVC TYPE DWV, ABS OR CAST-IRON WHERE REQUIRED BY CODE.
3. ALL HORIZONTAL SANITARY PIPE SHALL BE INSTALLED WITH A MINIMUM PITCH AS FOLLOWS:

PIPE SIZE	MIN. SLOPE
2½" OR LESS	¼" PER FT.
3" TO 6"	⅛" PER FT.
8" OR LARGER	⅛" PER FT. (MIN)

4. CLEANOUTS SHALL BE INSTALLED IN ALL HORIZONTAL DRAINAGE PIPE AND SHALL BE LOCATED NOT MORE THAN 100 FT. APART. (UNLESS OTHERWISE DICTATED BY LOCAL CODES).
5. CLEANOUTS SHALL BE INSTALLED AT ALL CHANGES OF DIRECTION GREATER THAN 45 DEGREES. WHERE MORE THAN ONE CHANGE OF DIRECTION OCCURS IN A SINGLE PIPE RUN, ONLY ONE (1) CLEANOUT SHALL BE REQUIRED FOR EVERY 40 FEET OF DEVELOPED LENGTH.
6. CLEANOUTS SHALL BE INSTALLED ON PIPES PRIOR TO ANY SLAB PENETRATION.
7. WHERE PIPING IS LOCATED WITHIN WALL CAVITIES, ACCESS TO THE CLEANOUTS SHALL BE PROVIDED.
8. CLEANOUTS ON 6-IN. AND SMALLER PIPES SHALL BE PROVIDED WITH A CLEARANCE OF NOT LESS THAN 18 IN. CLEANOUTS ON 8-IN. AND LARGER PIPE SHALL BE PROVIDED WITH A CLEARANCE OF NOT LESS THAN 36 IN.
9. ALL SUSPENDED SANITARY AND VENT PIPE SHALL BE SUPPORTED AS FOLLOWS:

MATERIAL	MAX. HORIZ. SPACING	MAX. VERT. SPACING
ABS	4 FT.	10 FT.
PVC (TYPE DWV)	4 FT.	10 FT.
CAST-IRON (<10 FT. PIPE SECTIONS)	5 FT.	15 FT.
CAST-IRON (10 FT. PIPE SECTIONS)	10 FT.	15 FT.

10. ALL PLUMBING FIXTURES SHALL BE VENTED AND THE MAXIMUM DISTANCE FROM THE FIXTURE TRAP TO THE VENT SHALL BE AS FOLLOWS:

TRAP SIZE	SLOPE	DISTANCE
1¼"	¼" PER FT.	2'-6"
1½"	¼" PER FT.	3'-6"
2"	¼" PER FT.	5'-0"
3"	⅛" PER FT.	6'-0"
4" & LARGER	⅛" PER FT.	10'-0"

11. ALL PLUMBING VENTS THROUGH THE ROOF SHALL TERMINATE A MINIMUM OF 12 INCHES ABOVE THE ROOF AND SHALL BE LOCATED A MINIMUM OF 8 FT. FROM ANY PARAPET WALL. WHERE A VENT TERMINATES WITHIN 8 FT. OF A PARAPET WALL, THE VENT SHALL TERMINATE A MINIMUM OF 6 INCHES ABOVE THE PARAPET.
12. ALL PLUMBING VENTS SHALL TERMINATE A MINIMUM OF 10 FT. HORIZONTALLY FROM ANY OUTDOOR AIR INTAKE. WHERE A PLUMBING VENT IS LOCATED WITHIN 10 FT. OF AN INTAKE, THE VENT SHALL TERMINATE A MINIMUM OF 2 FT. ABOVE THE INTAKE.
13. ALL SIDE WALL VENT TERMINATIONS SHALL BE PROTECTED TO PREVENT BIRDS OR RODENTS FROM ENTERING OR BLOCKING THE VENT OPENING.
14. ALL FLOOR DRAINS THAT DO NOT SERVE EQUIPMENT SHALL BE PROTECTED AGAINST DRYING OUT EITHER THROUGH THE INSTALLATION OF A TRAP PRIMER, DEEP SEAL TRAP OR PROSET TRAP GUARD. ALL TRAPS SHALL BE FILLED WITH AN INITIAL LAYER OF COOKING OIL.
15. ALL APPLIANCES SHALL DRAIN TO AN APPROVED SANITARY WASTE RECEPTOR (FLOOR SINK OR FLOOR DRAIN WITH FUNNEL). INDIRECT DRAINAGE FROM AN APPLIANCE SHALL MAINTAIN AN AIR GAP BETWEEN THE PIPE OUTLET AND THE TOP OF THE RECEPTOR. THE MINIMUM DISTANCE BETWEEN THE PIPE OUTLET AND THE TOP OF THE RECEPTOR SHALL BE TWICE THE DIAMETER OF THE APPLIANCE DRAIN PIPE.

GREASE INTERCEPTORS:
1. SEE SITE PLAN FOR THE SIZE AND LOCATION OF THE GREASE INTERCEPTOR.
2. THE GREASE INTERCEPTOR SHALL BE INSTALLED IN A LOCATION THAT IS ACCESSIBLE FOR PUMPING.
3. THE GREASE INTERCEPTOR SHALL BE CONSTRUCTED OF FIBERGLASS OR ROTATIONALLY-MOLDED POLYETHYLENE. GREASE INTERCEPTOR CONSTRUCTION SHALL CONFORM TO ALL LOCAL CODES. CONCRETE GREASE INTERCEPTORS ARE NOT PERMITTED UNLESS REQUIRED BY THE LOCAL AHJ.
4. GREASE INTERCEPTORS SHALL BE GRAVITY TYPE, SIZED FOR THE APPLICATION LISTED.
5. THE GREASE INTERCEPTOR SHALL BE VENTED.
6. ACCESS TO THE GREASE INTERCEPTOR SHALL BE PROVIDED WITH TWO (2) 24-IN. MANHOLES. COVER SHALL PROVIDE WATER/GAS-TIGHT SEAL AND HAVE A MINIMUM 16,000 LBS. LOAD CAPACITY. ALL SURFACE WATER MUST DRAIN AWAY FROM MANHOLES.
7. PIPING INLET AND OUTLET SIDES SHALL BE CLEARLY LABELED ON THE TOP OF THE GREASE INTERCEPTOR TO INSURE PROPER INSTALLATION.

DOMESTIC SUPPLY SYSTEMS:
1. THE INCOMING WATER SERVICE PIPE SHALL BE LOCATED A MINIMUM OF 10 FT. FROM THE EXITING SANITARY PIPE. WHERE A 10 FT. SEPARATION IS NOT POSSIBLE, THE BOTTOM OF THE WATER SERVICE PIPE SHALL BE A MINIMUM OF 12 IN. ABOVE THE TOP OF THE HIGHEST POINT OF THE SANITARY PIPE.
2. ALL UNDERGROUND SITE PLUMBING SHALL CONFORM TO NSF 61, SHALL BE TYPE K COPPER TUBING OR COPPER PIPE, POLYETHYLENE (PE), PEX OR CPVC. IF CPVC IS USED, FOAM INSULATION SHALL BE INSTALLED AT ALL CHANGES OF DIRECTION TO ACCOUNT FOR EXPANSION AND CONTRACTION.
3. INCOMING DOMESTIC WATER SIZE TO BE 2" INNER DIAMETER. FOR PROJECTS WISHING TO DOWNSIZE, A HYDRANT FLOW TEST IS REQUIRED PRIOR TO CONSTRUCTION DOCUMENTS. ENGINEER OF RECORD TO SUBMIT PRESSURE DROP CALCULATIONS AND HYDRANT FLOW TEST TO USRD FOR REVIEW AND APPROVAL OF SMALLER INCOMING DOMESTIC WATER LINE
4. IF PEX PIPING IS USED, ALL MAINS SHALL BE UPSIZED BY 0.5" DIAMETER.
5. INCOMING WATER SERVICE PRESSURE SHOULD BE BETWEEN 50 AND 55 PSI STATIC. WHERE WATER PRESSURE SERVICE EXCEEDS 80 PSI STATIC, AN APPROVED WATER-PRESSURE REDUCING VALVE WITH STRAINER CONFORMING TO ASSE 1003 SHALL BE INSTALLED. WHERE INCOMING WATER PRESSURE IS BELOW 50 PSI STATIC, A PRESSURE BOOSTER SYSTEM SHALL BE INSTALLED.
6. IF THE RESTAURANT HAS A COMBINED WATER AND FIRE SPRINKLER SERVICE, THE INCOMING WATER SERVICE SHALL BE SIZED BASED ON THE FIRE SPRINKLER CONTRACTOR'S HYDRAULIC CALCULATIONS.
7. PROVIDE A MINIMUM ½" ANNULAR CLEARANCE AROUND ALL PIPE SLAB PENETRATIONS.
8. A REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTER (RPZ) SHALL BE INSTALLED AT THE INCOMING SERVICE WHERE REQUIRED BY CODE. (MIN. 60" A.F.F.)
9. AN EXPANSION TANK SHALL BE INSTALLED ON THE COLD WATER LINE INLET TO THE WATER HEATER. SEE EXPANSION TANK SCHEDULE.
10. ALL WATER SUPPLY PIPE WITHIN 5 FT. OF THE BUILDING AND INSIDE THE BUILDING SHALL COMPLY WITH NSF 61 AND SHALL BE TYPE L COPPER TUBING, COPPER PIPE, PEX OR CPVC PIPE.
11. CPVC PIPE SHALL BE FLOWGUARD GOLD OR FLOWGUARD BENDABLE AS MANUFACTURED BY LUBRIZOL.
12. CPVC PIPE SHALL BE CONNECTED WITH FLOWGUARD GOLD YELLOW LOW-VOC SOLVENT CEMENT AS MANUFACTURED BY IPS WELD-ON OR OATEY.
13. ALL CPVC PIPE SHALL BE INSULATED TO PREVENT EXPOSURE TO GREASE.
14. ALL SUSPENDED PIPE SHALL BE SUPPORTED AS FOLLOWS:

MATERIAL	MAX. HORIZ. SPACING	MAX. VERT. SPACING
COPPER PIPE	12 FT.	10 FT.
COPPER TUBING ≤1¼"	6 FT.	10 FT.
COPPER TUBING >1½"	10 FT.	10 FT.
CPVC ≤1"	3 FT.	10 FT.
CPVC ≥1¼"	4 FT.	10 FT.
PEX ≤1"	3 FT.	10 FT.
PEX ≥1¼"	4 FT.	10 FT.

15. A REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTER (RPZ) SHALL BE INSTALLED AT THE INLET TO THE WATER FILTRATION SYSTEM. ALL PIPING DOWNSTREAM OF THE RPZ SHALL BE COPPER OR CROSS-LINKED POLYETHYLENE (PEX).
16. ALL DEVICES, APPLIANCES, AND APPARATUS INTENDED TO SERVE SOME SPECIAL FUNCTION (EX.: SODA MACHINE, COFFEE MACHINE, BEVERAGE DISPENSERS, ETC.) SHALL BE PROVIDED WITH PROTECTION AGAINST BACKFLOW AND CONTAMINATION OF THE WATER SUPPLY SYSTEM. ALL BACKFLOW PREVENTION DEVICES SHALL BE ASSE LISTED AND APPROVED FOR THE DEVICE OR APPLIANCE THEY SERVE.
17. ALL WATER SUPPLY LINES SHALL BE PROVIDED WITH A QUARTER-TURN SHUT-OFF VALVE BEFORE FINAL CONNECTION TO EQUIPMENT.
18. QUARTER-TURN SHUT-OFF VALVES SHALL BE INSTALLED UPSTREAM OF ANY INLINE BACKFLOW PREVENTION DEVICE.
19. ALL VALVES AND BACKFLOW PREVENTION DEVICES SHALL BE INSTALLED WITH FITTINGS THAT FACILITATE REMOVAL IN CASE OF FAILURE.
20. ALL OVERHEAD WATER LINES SHALL BE INSULATED PER SCHEDULE THIS SHEET WITH EXTERNAL JACKETED INSULATION AND A MINIMUM INSTALLED R-VALUE OF 3.7.
21. PRIOR TO BUILDING TURNOVER, THE DOMESTIC WATER SUPPLY SYSTEM SHALL BE PURGED OF DELETERIOUS MATERIAL AND DISINFECTED. DISINFECTION SHALL BE DONE IN ACCORDANCE WITH THE LOCAL HEALTH CODE, PLUMBING CODE OR IN ACCORDANCE WITH AWWA C651 OR AWWA C652.

STORM DRAINAGE SYSTEMS:
1. ALL ROOF DRAINS SHALL BE SIZED IN ACCORDANCE WITH LOCAL CODES AND SHALL CONFORM TO ASME A112.21.2M OR A112.3.1.
2. ALL STORM DRAINAGE PIPING SHALL BE ABS, PVC TYPE DWV OR CAST-IRON WHERE REQUIRED BY CODE.
3. ALL SUSPENDED STORM DRAINAGE PIPE SUPPORT REQUIREMENTS SHALL BE THE SAME AS THE SANITARY AND VENT REQUIREMENTS.
4. ALL HORIZONTAL STORM DRAINAGE PIPE PITCH REQUIREMENTS SHALL BE THE SAME AS THE SANITARY AND VENT REQUIREMENTS.
5. ALL HORIZONTAL STORM DRAINAGE PIPE SHALL BE INSULATED WITH 1" THICK EXTERNAL JACKETED INSULATION AND A MINIMUM INSTALLED R-VALUE OF 3.7 TO PROTECT AGAINST CONDENSATION.
6. CLEANOUTS SHALL BE INSTALLED IN ALL HORIZONTAL DRAINAGE PIPE AND SHALL BE LOCATED NOT MORE THAN 100 FT. APART.
7. CLEANOUTS SHALL BE INSTALLED AT ALL CHANGES OF DIRECTION GREATER THAN 45 DEGREES. WHERE MORE THAN ONE CHANGE OF DIRECTION OCCURS IN A SINGLE PIPE RUN, ONLY ONE (1) CLEANOUT SHALL BE REQUIRED FOR EVERY 40 FEET OF DEVELOPED LENGTH.
8. CLEANOUTS SHALL BE INSTALLED ON PIPES PRIOR TO ANY SLAB PENETRATION.
9. WHERE PIPING IS LOCATED WITHIN WALL CAVITIES, ACCESS TO THE CLEANOUTS SHALL BE PROVIDED.
10. ROOF DRAINS AND OVERFLOW ROOF DRAINS SHALL BE PIPED INDEPENDENTLY. OVERFLOW ROOF DRAINS SHALL NOT BE CONNECTED TO THE PRIMARY ROOF DRAINAGE SYSTEM.
11. MINIMUM PIPING INSULATION THICKNESS HEATING AND HOT-WATER SYSTEMS (STEAM, STEAM CONDENSATE, HOT-WATER HEATING AND DOMESTIC WATER SYSTEMS). PLEASE REFER TO THE LATEST EDITION OF IECC FOR MINIMUM PIPE INSULATION THICKNESS (TABLE C403.12.3)

PIPING	MINIMUM INSULATION THICKNESS (IN INCHES) PER NOMINAL PIPE OR TUBE SIZE				
NOMINAL PIPE SIZE	<1	1 TO 1.5	1.5 TO <4	4 TO <8	≥8
DOMESTIC COLD WATER (40°F TO 60°F)	0.5	0.5	1.0	1.0	1.0
TEMPERATE HOT WATER (105°F TO 140°F)	1.0	1.0	1.5	1.5	1.5
HOT WATER (141°F TO 200°F)	1.5	1.5	2.0	2.0	2.0
STORM DRAIN (HORIZONTAL)	–	–	1.0	1.0	1.0

CO2 DETECTION SYSTEM	KES/BSI	EC/BSI	EC/BSI	1–3, 22, 27

NOTES:
1. THIS SCHEDULE IS INTENDED AS A GUIDE FOR THE WORK TO BE PERFORMED. ALL WORK SHALL BE COORDINATED BETWEEN THE McDONALD'S AREA CONSTRUCTION MANAGER AND ALL GC AND O/O SUBCONTRACTORS.
2. ONE (1) COPY OF THE DECOR PACKAGE DRAWINGS SHALL BE SUPPLIED TO THE GENERAL CONTRACTOR AND EACH OF THE SUBCONTRACTORS. IT SHALL BE THE RESPONSIBILITY OF THE GENERAL CONTRACTOR AND THE SUBCONTRACTORS TO INSURE THAT THEY HAVE RECEIVED THE DECOR PACKAGE DRAWINGS.
3. FOR ANY WORK NOT CLARIFIED IN THIS SCHEDULE OR IN THE NOTES AND SPECIFICATIONS, PLEASE CONSULT THE McDONALD'S CONSTRUCTION MANAGER FOR SCOPE OF WORK.
4. ALL ROOFTOP UNIT EQUIPMENT SUPPLIED BY THE MECHANICAL CONTRACTOR AND THE KITCHEN EQUIPMENT SUPPLIER SHALL BE ON SITE AT THE SAME TIME FOR A SINGLE CRANE LIFT. EQUIPMENT SITE ARRIVAL DATE SHALL BE COORDINATED BETWEEN THE CONSTRUCTION MANAGER, MECHANICAL CONTRACTOR AND KITCHEN EQUIPMENT SUPPLIER.
5. ALL ROOFTOP UNITS INSTALLED IN McDONALD'S RESTAURANTS SHALL BE HIGH EFFICIENCY EQUIPMENT. THE INSTALLATION OF STANDARD EFFICIENCY ROOFTOP UNITS IS PROHIBITED. PLEASE REFER TO THE LATEST EDITION OF IECC FOR HVAC EQUIPMENT PERFORMANCE REQUIREMENTS.
6. ALL KITCHEN EQUIPMENT REQUIRING EXHAUST SHALL BE INSTALLED IN ACCORDANCE WITH THESE PLANS. ANY VARIATION FROM THESE PLANS SHALL BE REPORTED TO THE CONSTRUCTION MANAGER AND THE ENGINEER–OF–RECORD.
7. WHERE GYPSUM BOARD CEILINGS ARE INSTALLED, THE MECHANICAL CONTRACTOR SHALL SUPPLY DRYWALL MOUNTING FRAMES FOR LAY–IN TYPE DIFFUSERS.
8. ALL WORK SHOWN ON P1.6 DRAWING(S) SHALL BE COMPLETED BY THE BEVERAGE SYSTEM INSTALLER (OR K.E.S.) UNLESS OTHERWISE NOTED IN THE PLUMBING DRAWINGS.
9. ALL WORK ON P1.0 & P1.2 DRAWING(S) SHALL BE BY THE PLUMBING CONTRACTOR.
10. THE BEVERAGE SYSTEM INSTALLER FURNISHES, RUNS AND CONNECTS ALL FLEXIBLE WATER AND SYRUP LINES FOR ALL AFFECTED EQUIPMENT INCLUDING THE FOLLOWING:
    A. HOT CHOCOLATE
    B. COFFEE BREWER
    C. ICE MACHINE
    D. O.J.
    E. SODA TOWERS
11. ALL WATER HEATERS INSTALLED IN McDONALD'S RESTAURANTS SHALL BE HIGH EFFICIENCY SEALED–COMBUSTION WATER HEATERS. THE INSTALLATION OF STANDARD EFFICIENCY GRAVITY–VENTED WATER HEATERS IS PROHIBITED. PLEASE REFER TO THE LATEST EDITION OF IECC FOR SERVICE WATER–HEATING EQUIPMENT PERFORMANCE EFFICIENCY REQUIREMENTS.
12. THE CONSTRUCTION MANAGER, PLUMBING CONTRACTOR AND KITCHEN EQUIPMENT SUPPLIER SHALL COORDINATE WHICH SOILED DISHWASHER (3–COMPARTMENT SINK) IS BEING INSTALLED IN THE RESTAURANT.
13. N/A
14. N/A
15. ALL FIRE PROTECTION DRAWINGS CONTAINED WITHIN THIS SET ARE STRICTLY FOR REFERENCE ONLY. FIRE SPRINKLER DRAWINGS SHALL BE DESIGNED AND PERMITTED BY A FIRE PROTECTION CONTRACTOR.
16. ALL R–102 WET CHEMICAL FIRE SUPPRESSION SYSTEMS FOR TYPE I HOODS SHALL BE DESIGNED AND INSTALLED BY A LOCAL ANSUL AGENT. THE USE OF DRY CHEMICAL SYSTEMS IS PROHIBITED. THE LOCAL ANSUL AGENT CONTRACT IS HANDLED THROUGH THE KITCHEN EQUIPMENT SUPPLIER.
17. ALL ROOFTOP UNITS AND EXHAUST FANS ARE SUPPLIED WITH A FACTORY–INSTALLED DISCONNECT SWITCH.
18. ELECTRICAL CONTRACTOR SHALL PROVIDE DISCONNECT SWITCHES FOR REMOTE CONDENSING UNITS.
19. ALL ELECTRICAL CONDUITS FOR ROOFTOP EQUIPMENT SHALL BE BROUGHT UP THROUGH THE BASE OF THE UNIT TO MINIMIZE ROOF PENETRATIONS. WHERE THIS IS NOT POSSIBLE, THE ELECTRICAL CONTRACTOR SHALL PROVIDE THE NECESSARY PIPE PORTALS ON ROOF.
20. WALK–IN COOLER AND WALK–IN FREEZER REFRIGERATION SYSTEMS SHALL MEET THE PERFORMANCE REQUIREMENTS OUTLINED IN THE LATEST EDITION OF IECC. MINIMUM ANNUAL WALK–IN ENERGY FACTOR (AWEF) PROVIDED BY EQUIPMENT MANUFACTURER IS DETERMINED IN ACCORDANCE WITH AHRI 1250.
21. SEE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION.
22. SEE STRUCTURAL DRAWINGS FOR ADDITIONAL INFORMATION.
23. SEE MECHANICAL DRAWINGS FOR ADDITIONAL INFORMATION.
24. SEE PLUMBING DRAWINGS FOR ADDITIONAL INFORMATION.
25. SEE ELECTRICAL DRAWINGS FOR ADDITIONAL INFORMATION.
26. SEE FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION.
27. SEE FIRE ALARM DRAWINGS FOR ADDITIONAL INFORMATION.
28. SEE KITCHEN DRAWINGS FOR ADDITIONAL INFORMATION.
29. SEE DECOR DRAWINGS FOR ADDITIONAL INFORMATION.

These drawings and specifications are the confidential and proprietary property of McDonald's USA, LLC and shall not be copied or reproduced without written authorization. The contract documents were prepared for use on a different site or at a later time. Use of these drawings for conjunction with its issue date and are not suitable

THE PURPOSE OF THIS SHEET IS TO PROVIDE A CHECKLIST AND VISUAL GUIDE SO THE INSTALLING EC CAN VERIFY THE WORK IS IN COMPLIANCE WITH MCDONALD'S SPECIFICATIONS THAT ARE CRITICAL TO THE PROPER FUNCTIONING OF OUR POINT OF SALE (POS) COMPUTER SYSTEMS.

POS ELECTRICAL RISER DIAGRAM

THIS RISER DIAGRAM SHOWS THE ELECTRICAL ROUGH-INS REQUIRED FOR A TYPICAL POINT OF SALE (POS) SYSTEM IN A FREE STANDING FAST FORWARD RESTAURANT. VERIFY ALL POS ROUGH-INS AND MOUNTING HEIGHTS WITH THE ELECTRICAL ROUGH-IN PLAN, NOTES AND INFORMATION DRAWINGS.

LOW VOLTAGE CABLE MANAGEMENT SPECIFICATION

GENERAL/MATERIALS

1. THE GC OR EC SHALL FURNISH AND INSTALL A COMPLETE LOW VOLTAGE CABLE MANAGEMENT SYSTEM UTILIZING CADDY-ERICO TYPE CAT-32 J-HOOK SUPPORTS (2-INCH DIAMETER LOOP MINIMUM). ALL J-HOOKS SHALL;
   - HAVE A MINIMUM BEARING SURFACE OF 1⅜",
   - HAVE FLARED EDGES TO PREVENT DAMAGE TO HIGH PERFORMANCE CABLES,
   - HAVE AN ELECTRO-GALVANIZED FINISH,
   - HAVE 3/8" WIDE CABLE RETAINING STRAPS,
   - BE UL LISTED AND LABELED,
   - BEAR THE UL SYMBOL MARKING ON THE PART FOR IDENTIFICATION
   - BE INSTALLED PER THE MANUFACTURERS INSTALLATION INSTRUCTIONS.
2. THE ENTIRE INSTALLATION SHALL BE IN COMPLIANCE WITH THE NATIONAL ELECTRICAL CODE (NEC), NEC SECTION 800, BICSI STANDARDS 568 & 569, ALL APPLICABLE NATIONAL, STATE, LOCAL, AND SAFETY CODES, AND McDONALD'S SPECIFICATIONS.

INSTALLATION

1. LOW VOLTAGE J-HOOK CABLE PATHWAY (FOR POS CABLING SYSTEM) SHALL BE PROVIDED FROM THE MANAGERS OFFICE (OR COMPUTER CLOSET) DATA CONDUIT STUB-UP LOCATION TO THE FOLLOWING DATA CONDUIT STUB-UP LOCATIONS (AS APPLICABLE):
   - FRONT COUNTER.
   - PRESENTERS BOOTH.
   - CASHIERS BOOTH.
   - THIRD DRIVE-THRU WINDOW(IF PRESENT).
   - CREW ROOM.
   - VALENCE WALL.
   - REMOTE ORDERING STATIONS.
   - NETPOP TELEPHONE PANEL LOCATION.
   - KIOSK
   - DIGITAL MERCHANDISER

   CABLE SUPPORTS SHALL BE PROVIDED WITHIN 24 INCHES OF THESE STUB-UP LOCATIONS. ALL STUB-UP CONDUITS SHALL BE PROVIDED WITH AN INSULATED BUSHING TO PROTECT CABLES DURING INSTALLATION.
2. THE LOCATION AND ROUTING OF THE LOW VOLTAGE CABLE MANAGEMENT SYSTEM SHALL BE COORDINATED WITH ALL OTHER CONSTRUCTION TRADES PRIOR TO INSTALLATION TO AVOID CONFLICTS WITH THE OTHER TRADES FINAL INSTALLATIONS, BOTH BEFORE AND AFTER THE CABLE MANAGEMENT SYSTEM AND THE POS CABLING ARE INSTALLED. FINAL INSTALLATION LOCATION SHALL BE READILY ACCESSIBLE TO ALLOW FOR EASE IN INSTALLATION OF THE POS CABLING BY THE POS VENDOR'S INSTALLER.
3. LOW VOLTAGE J-HOOK CABLE SUPPORTS AND APPURTENANCES SHALL BE FASTENED TO THE BUILDING STRUCTURAL AND/OR FRAMING MEMBERS. LOW VOLTAGE J-HOOK CABLE SUPPORTS SHALL NOT BE FASTENED OR UTILIZE THE CEILING GRID SUSPENSION WIRES OR T-BAR GRID FOR INSTALLATION. CONTRACTOR SHALL PROVIDE ALL NECESSARY BRACKETS, HANGERS, RODS, CLAMPS, FLANGES, SUPPORTS, ETC. FOR A COMPLETE AND FULLY FUNCTIONAL SYSTEM. THE INSTALLATION OF THE LOW-VOLTAGE CABLE MANAGEMENT SYSTEM SHALL BE DONE SO THAT THE ROUTING OF THE CABLES IS PARALLEL TO AND/OR PERPENDICULAR TO FRAMING AND STRUCTURAL BUILDING MEMBERS.
4. LOW VOLTAGE J-HOOK **CABLE SUPPORTS** SHALL BE INSTALLED A MAXIMUM OF 36 INCHES APART. AT TRANSITION LOCATIONS, THE CONTRACTOR SHALL PROVIDE ADDITIONAL J-HOOKS TO ALLOW FOR A MINIMUM ONE-FOOT RADIUS BEND AND FOR ADDITIONAL CABLE SUPPORT AT THESE TRANSITION POINTS.
5. TO AVOID **ELECTROMAGNETIC INTERFERENCE** (EMI), ALL PATHWAYS SHALL PROVIDE A MINIMUM CLEARANCE OF 4 FEET (1.2 METERS) FROM MOTORS AND TRANSFORMERS AND A MINIMUM CLEARANCE OF 1 FOOT (0.3 METERS) FROM CONDUIT AND CABLES UTILIZED FOR ELECTRICAL POWER DISTRIBUTION, AND OTHER NON-POS LOW VOLTAGE CONDUCTORS.
6. ANY **CEILING TILES** IN THE AREA WHERE THE LOW-VOLTAGE CABLE MANAGEMENT SYSTEM IS LOCATED SHALL NOT BE INSTALLED UNTIL THE POS VENDOR'S CONTRACTOR COMPLETES THE INSTALLATION OF ALL POS CABLING.
7. ALL NON-POS LOW VOLTAGE CABLING SHALL BE INSTALLED IN A SEPARATE CABLE MANAGEMENT SYSTEM INDEPENDENT OF THE LOW-VOLTAGE CABLE MANAGEMENT SYSTEM UTILIZED FOR THE POS CABLING.
8. THE POS INSTALLER SHALL BE RESPONSIBLE TO FURNISH AND INSTALL ALL LOW VOLTAGE CABLING REQUIRED FOR THE COMPLETE AND FULLY FUNCTIONAL OPERATION OF THE POS SYSTEM. ALL POS CABLING SHALL BE INSTALLED WITHIN THE LOW-VOLTAGE CABLE MANAGEMENT SYSTEM.
9. GENERAL CONTRACTOR TO COORDINATE WITH POS INSTALLER. POS INSTALLER TO PERFORM POS CABLE INSTALLATION PRIOR TO CLOSING OF WALLS AND CEILING.

ELECTRICAL POS CERTIFICATION

AS OF THE DATE BELOW, I HEREBY CERTIFY THAT ALL ELECTRICAL WORK, ELECTRICAL SERVICE AND ELECTRICAL SYSTEMS, MATERIALS AND LABOR RELATED TO THE POS ELECTRICAL INSTALLATION IN WHICH THE UNDERSIGNED ARE DIRECTLY OR INDIRECTLY RESPONSIBLE HAVE BEEN PROPERLY INSTALLED IN FULL COMPLIANCE WITH ALL CONSTRUCTION DOCUMENTS AND ALL NFPA, BUILDING, ELECTRICAL AND OTHER APPLICABLE CODES, ALONG WITH ALL OF THE REQUIREMENTS OUTLINED ON THIS DRAWING. I FURTHER CERTIFY THAT THE ELECTRIC SERVICE POWERING THE POS SYSTEM HAS BEEN PROPERLY INSTALLED BY A QUALIFIED ELECTRICIAN. SKILLED, KNOWLEDGEABLE AND TRAINED TO INSTALL ALL THE REQUIRED ELECTRICAL DISTRIBUTION COMPONENTS NECESSARY TO POWER THE POINT OF SALE (POS) SYSTEM.

ADT ROUGH-IN NOTES

1. COORDINATE EXACT INSTALLATION REQUIREMENTS WITH ADT PRIOR TO INSTALLATION TEL. 800-417-8238
2. EC SHALL PROVIDE A 2 GANG 3 25/32" X 3 25/32" X 3 1/8"D JUNCTION BOX AT DOOR FOR INSTALLATION OF DOOR ALARM UNIT. STUB 1/2"C ABOVE CEILING FROM JUNCTION BOX. PROVIDE 1/2"C FROM J-BOX TO DOOR MAGNETIC SWITCH LOCATION.
3. EC SHALL PROVIDE 4" X 4" JUNCTION BOX ABOVE CEILING FOR INSTALLATION OF LOW VOLTAGE TRANSFORMER. VERIFY EXACT LOCATION WITH ADT PRIOR TO INSTALLATION. PROVIDE 1/2"C-2#12 TO LOCKOUT TYPE CB IN PANEL LP-1.

GENERAL NOTES

1. SEE SHEET E3.0 FOR PANEL & CIRCUIT BREAKER ASSIGNMENT, VOLT/PH, FLA, BREAKER SIZE, COND/WIRE, RECEPTACLE TYPE, HEIGHT ABOVE FINISHED FLOOR, REQUIREMENTS & REMARKS FOR ALL ELECTRICAL EQUIPMENT.
2. SEE LOW VOLTAGE CABLE MANAGEMENT SPECIFICATION ON SHEET E1.0 FOR POS, DATA, AND SOUND SYSTEM REQUIREMENTS.
3. GC/EC SHALL COORDINATE LOCATION AND ALL REQUIREMENTS OF CT& METER CABINET WITH LOCAL UTILITY COMPANY. CT & METER CABINET SHALL NOT BE INSTALLED ON D/T SIDE OF BUILDING. GC SHALL PAINT TO MATCH BUILDING COLOR.

KEY NOTES

1. TAMPER RESISTANT GFCI DUPLEX RECEPTACLE IN PUBLIC AREAS. EC SHALL PROVIDE HUBBELL GFTRST* ("*": AL=ALMOND, BK=BLACK, --=BROWN, GY=GRAY, I=IVORY, LA=LIGHT ALMOND, R=RED, W=WHITE). SPECIFIED RECEPTACLE BECOMES DE-ENERGIZED UPON FAILURE OF GFCI DEVICE. NO SUBSTITUTIONS.(TYPICAL)
2. SEE POS ELECTRICAL RISER DIAGRAM ON SHEET E1.0. (TYPICAL)

KEY NOTES

3. EC TO FURNISH AND INSTALL A FLUSH MOUNTED JUNCTION BOX WITH WEATHERPROOF GASKET AND OUTDOOR WEATHERPROOF, 24 VOLT CO2 HORN/STROBE UNIT COMPATIBLE WITH CO2 ALARM SYSTEM - EDWARDS GENESIS WGAVRN OR APPROVED EQUAL. STROBE SHALL HAVE AN AMBER COVER AND MEET ALL LOCAL REGULATORY REQUIREMENTS FOR SPECIFICATIONS AND INSTALLATION. PROVIDE A 3/4" CONDUIT STUB-IN INTO BUILDING WITH THERMOPLASTIC BUSHING FROM WEATHERPROOF BACKBOX. PROVIDE FINAL WIRING TERMINATIONS AT HORN/STROBE UNIT AND THEN PROVIDE 36 INCHES OF PIGTAIL WIRING FROM HORN/STROBE INTO THE BUILDING AND NEATLY COIL FOR FINAL CONNECTION. FINAL WIRING CONNECTION FROM OUTDOOR HORN/STROBE PIGTAILS TO THE CO2 ALARM SYSTEM INSTALLATION TO BE PROVIDED BY BEVERAGE INSTALLER.
4. PER THE AMERICAN WITH DISABILITIES ACT ACCESSIBILITY GUIDELINES (ADAAG), A MINIMUM OF ONE (1) ADA COMPLIANT ELECTRICAL RECEPTACLE SHALL BE INSTALLED AT AN ACCESSIBLE TABLE. GC/EC SHALL REFERENCE FINAL DECOR PLANS AND PROVIDE RECEPTACLES AS NECESSARY FOR COMPLIANCE. (TYPICAL)
5. COORDINATE LOCATION OF RECEPTACLES SO THAT RECEPTACLES ARE LOCATED ON FULL HEIGHT WALLS PER THE DECOR PLAN. STUB UP AND CIRCUIT IN HALF WALL FOR RECEPTACLES NOT ON FULL HEIGHT WALLS, CONFIRM FINAL LOCATIONS WITH DECOR DRAWINGS PRIOR TO ROUGH-IN.
6. IF MOUNTED TO A LIGHTING POLE, DT CAMERA SHALL ONLY BE INSTALLED ON A POLE WITH MAXIMUM OF (2) LIGHTING HEADS. PROVIDE ISOLATION OF DT CAMERA MOUNTING HARDWARE AND POLE TO PREVENT BI-METALLIC OR GALVANIC CORROSION.
7. E.C. TO PROVIDE AN ALLOWANCE IN BID TO PROVIDE TWO(2) FLEXIBLE POWER CONNECTIONS FOR POWER TO FURNITURE/ FAMILY EXPERIENCE ELEMENTS AS PART OF THE DECOR PACKAGE. E.C. SHALL VERIFY EXACT LOCATIONS IN FIELD AND WITH DECOR DRAWINGS. PROVIDE ALL NECESSARY MATERIALS AND LABOR FOR A COMPLETE AND FULLY NEC CODE COMPLIANT INSTALLATION. ALL COMPONENTS SHALL BE FED FROM A GFCI TYPE CIRCUIT BREAKER AND BRANCH CIRCUIT SHALL CONTAIN TWO PATHS OF GROUNDING (CONDUIT BODY AND AN INSULATED GROUNDING CONDUCTOR) TO COMPLY WITH McDONALD'S GROUNDING STANDARDS.
8. DRIVE THRU WINDOW POWER, CONFIRM REQUIREMENTS WITH MANUFACTURER DRAWINGS.

KEY NOTES

9. PROVIDE POWER FOR CONNECTION TO SELF ORDER KIOSKS. COORDINATE EXACT LOCATION OF KIOSKS WITH DECOR DRAWINGS. PROVIDE 2#12, 1#12 GRD., & 1#12 ISOLATED GROUND ON A 20A DEDICATED CIRCUIT FED FROM THE CP PANEL FOR EVERY KIOSK.
10. VERIFY DROP CORDS AND RECEPTACLES DO NOT FALL BELOW HEIGHTS LISTED ON E3.0 ELECTRICAL SCHEDULE. RECEPTACLES SHOULD BE LOCATED AT HEIGHTS TO AVOID CONTACT WITH HOT APPLIANCES.
11. PROVIDE POWER AND DATA ROUGH-INS FOR DIGITAL MERCHANDISER. EXTEND CIRCUIT TO DINING FROM FRONT COUNTER MERCHANDISER IN SERVICE AREA. EXTEND J-HOOKS FROM SERVICE AREA FOR DATA CABLES. REFER TO 3/E3.1.
12. EC TO INSTALL DROP CORDS JUSTIFIED TO THE DRIVE THRU SIDE OF THE BUILDING.
13. PROVIDE POWER AND DATA ROUGH-INS FOR CASH HANDLERS REFER TO 4/E3.1 FOR MORE INFORMATION. COORDINATE EXACT LOCATION WITH DECOR DRAWINGS.
14. AT&T TO PROVIDE #8 GRD CONDUCTOR FROM BUILDING EXTERIOR WIRELESS ACCESS POINT TO ABOVE INTERIOR CEILING. EC TO EXEND CONDUCTOR TO BUILDING GROUNDING SYSTEM. COORDINATE EXACT LOCATION OF ACCESS POINT IN FIELD WITH AT&T.
15. CONTRACTOR TO PUNCH HOLES IN SERVICE POD FOR CABLE AND CONDUIT ROUTING. UTILIZE BUSHINGS PROVIDE WITH SERVICE POD TO PROTECT CABLES.

TITLE: 2025 OPTIMIZED BUILDING - BB20
4590-WOOD/WOOD

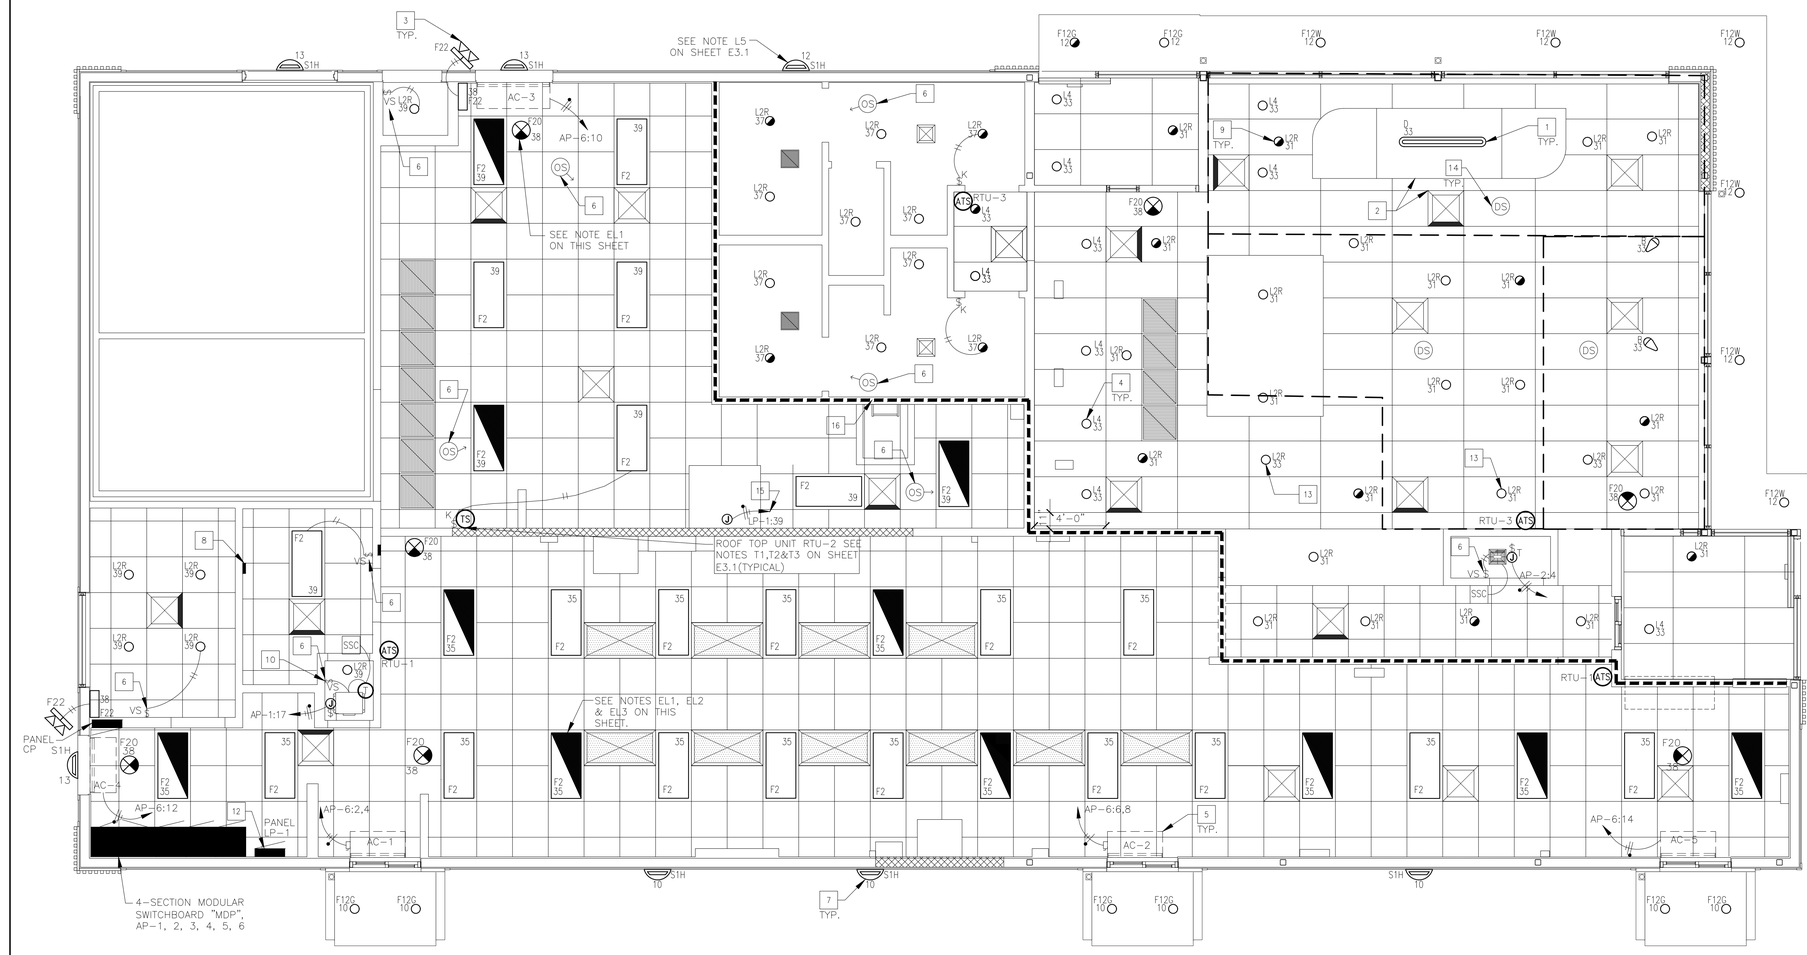

DESCRIPTION
WOOD BEARING WALLS W/HARDIE BOARD EXTERIOR FINISH & CI
WOOD TRUSS ROOF FRAMING
E.I.F.S./BATTEN/LAP SIDING EXTERIOR FINISH

SITE ADDRESS
7030 Northfield Dr. BROWNSBURG, IN

NSN: 013.1263

SHEET NO. E1.1
ROUGH-IN PLAN

013.1263.00.0

1 E2.0 LIGHTING FLOOR PLAN
1/4"=1'-0"

KEY NOTES

1. CENTER PENDANT LIGHTS OVER TABLES (TYPICAL)
2. ALL SOFFIT LOCATIONS, LIGHTING, & SUPPLY GRILLS SHALL BE COORDINATED WITH DECOR COMPANY DRAWING PRIOR TO INSTALLATION.
3. EC SHALL INSTALL AND CONFIGURE REMOTE EMERGENCY LIGHTING AT ALL EGRESS EXTERIOR DOORS FOR MAXIMUM ILLUMINATION AT POINTS OF EGRESS. INSTALL WP J-BOX WITHIN SOFFIT TO ALLOW A FLUSH INSTALLATION OF ANY EXTERIOR EMERGENCY EGRESS LIGHTING (TYPICAL).
4. OPTIONAL ADJUSTABLE WALL WASH FIXTURE TO ILLUMINATE LOGO OR GRAPHICS. EC SHALL VERIFY EXACT LOCATION SO AS TO ADEQUATELY ILLUMINATE McDONALD'S ARCH LOGO SIGN AND GRAPHICS.
5. AIR CURTAIN UNIT. NON HEATED VERSION TO USE 1/2"C. 2#12, 1#12GRD. HEATED VERSION TO USE 1"C. 2#6, 1#10 GRD. (TYPICAL).
6. PROVIDE DUAL TECHNOLOGY CEILING MOUNTED OCCUPANCY SENSOR OR WALL MOUNTED VACANCY SENSOR AS SHOWN. ORDER ALL SENSORS FROM SECURITY LIGHTING SYSTEMS, INC.
7. RADIAL WALL SCONCE. SEE NOTE L2 ON SHEET E3.1 AND ARCHITECTURAL ELEVATIONS ON SHEETS A2.0 & A2.1. (TYPICAL)
8. BUILDING AUTOMATION SYSTEM LOCATION. SEE LIGHTING CONTROL DETAILS ON SHEET E4.1.
9. PROVIDE LIGHTING INVERTER FOR USE WITH FIXTURES SHOWN SLASHED. MODEL #LG125T SHOULD BE USED FOR L2R, L4 & FI2G WITH NOT MORE THAN SEVEN DOWNLIGHTS CONNECTED TO EACH INVERTER, AND NOT MORE THAN TWO F2 FIXTURES. IF DECOR USES ALTERNATE FIXTURES, COORDINATE INVERTER TO BE USED WITH LIGHTING SUPPLIER. E.C. SHALL VERIFY THE QUANTITY OF FIXTURES THAT CAN BE CONNECTED WITHOUT EXCEEDING OPERATING CAPACITY OF UNIT AND PROVIDE ADDITIONAL CIRCUITS AND INVERTERS AS REQUIRED. (TYPICAL)
10. CENTER VACANCY SENSOR SWITCH OPPOSITE COMPUTER RACK IN A LOCATION ACCESSIBLE FROM BOTH DOORS FOR CONTROL OF CEILING MOUNTED LIGHT, IN DATA ROOM. FAN CONTROLLED BY LOCAL THERMOSTAT.
11. NOT USED.
12. LIGHTING CONTACTORS IN NEMA 1 ENCLOSURE JUST BELOW CEILING. EC SHALL PROVIDE 120 VOLT CONTROL CIRCUIT TO CONTACTOR PANEL. VERIFY EXACT LOCATION IN FIELD AND REFER TO DRAWING E4.1 FOR ADDITIONAL DETAILS.
13. ADJUST FIXTURE TO ILLUMINATE DELIVERY POD SHELVING.
14. NEW DAYLIGHT SENSOR TO BE INSTALLED TO CONTROL DAYLIGHT AREAS IN THE DINNING AREAS. ORDER ALL DAYLIGHT SENSORS FROM; SECURITY LIGHTING SYSTEMS, INC.
15. PROVIDE POWER FOR LIGHT WITHIN EXHAUST HOOD. INTEGRATE INTO LOCAL LIGHTING CONTROLS.
16. DRAFT STOP ABOVE CEILING, SEAL ALL ELECTRICAL PENETRATIONS.

EMERGENCY LIGHTING NOTES

EL1. EC SHALL VERIFY ALL REQUIREMENTS AND FINAL EMERGENCY LIGHTING LOCATIONS WITH LOCAL AUTHORITIES. INCLUDE ALL COSTS IN BASE BID.

EL2. IF NOT INSTALLED BY MANUFACTURER, EC SHALL BE RESPONSIBLE FOR THE COMPLETE INSTALLATION OF THE EMERGENCY INVERTER IN SWITCHED EMERGENCY FIXTURES SHOWN ON THIS SHEET.

EL3. LED FIXTURES DENOTED AS SWITCHED EMERGENCY SHALL BE CONNECTED TO AN INVERTER. INVERTER SHALL BE CAPABLE OF ILLUMINATING FIXTURE FOR 1.5 HOURS TO COMPLY WITH NEC SECTION 700 AND UL924.

EL4. EMERGENCY BATTERY LIGHTING WALL PACKS IN PLAYPLACE SHALL BE LOCATED SO AS TO PROVIDE FOR MAXIMUM ILLUMINATION OF AREA. EC SHALL VERIFY EXACT PLACEMENT IN THE FIELD WITH McDONALD'S ACM. (IF APPLICABLE)

EL5. EMERGENCY LIGHTING HAS BEEN DESIGNED PER NFPA 101 TO MAINTAIN 1 FC IN PATH OF EGRESS. IF FIELD CONDITIONS REQUIRE ANY CHANGES TO LIGHTING DESIGN, EMERGENCY LIGHTING, SHALL BE INSTALLED TO MEET THE ABOVE REQUIREMENTS.

KEY

DENOTES FIXTURE TYPE — F2
DENOTES CIRCUIT NUMBER — 41

LIGHTING FIXTURES SHOWN HALF HATCHED SHALL BE WIRED TO AN EMERGENCY INVERTER AND CIRCUITED AS SWITCHED EMERGENCY FIXTURES SO THE FIXTURE IS CONTROLLED VIA TIMECLOCK BUT TURNS ON UPON LOSS OF POWER. SEE NOTE EL3 ON THIS SHEET. COORDINATE LOCATION WITH DECOR.

LIGHTING FIXTURES SHOWN WITH ARROW DENOTES GENERAL DIRECTION TO AIM ADJUSTABLE FIXTURES. VERIFY IN FIELD.

SEE SHEET E3.1 FOR GENERAL LIGHTING NOTES AND "ROOF PLAN" (SHEET E2.1) FOR ADDITIONAL ELECTRICAL ROUGH-IN & LIGHTING REQUIREMENTS.

McDONALD'S SITE SIGNAGE:

EC SHALL PROVIDE:

ELECTRICAL CONTRACTOR SHALL COORDINATE POWER REQUIRED FOR ROAD SIGN. MOST SIGNS REQUIRE (1) 20 AMP 120V CIRCUIT. IF USED A 90-200 SIGN REQUIRES (4) 20 AMP 120V CIRCUITS OR ONE 1-PHASE 60 AMP 120/208V CIRCUIT. COORDINATE WITH SUPPLIERS DRAWINGS.
(1) 20 AMP 208 VOLT CIRCUIT, EC TO WIRE 2#12 TO 208 VOLT FLAG FLOODLIGHTS.
(1) 20 AMP 120 VOLT CIRCUIT TO D.C.O. IN ROAD SIGN BASE IF REQUIRED.
(2) 20 AMP 120 VOLT CIRCUITS FOR INGRESS/EGRESS DIRECTIONAL SIGNS (IF APPLICABLE).

*VERIFY EXACT LOCATIONS/TYPES/QUANTITIES OF ALL THE ABOVE WITH SITE/CIVIL PLANS AND MCD ACM.

LIGHTING FIXTURE SCHEDULE:

SHEET NO. E2.0
LIGHTING PLAN

ELECTRICAL ROOF PLAN

SCALE: 1/4"=1'-0"

KEYED NOTES

E1 EVERY LINEAR RUN OF SLED FIXTURES REQUIRES A DEDICATED WHIP KIT PROVIDED WITH FIXTURE. CONTRACTOR TO FIELD VERIFY FIXTURE MOUNTING HEIGHT, LOCATION, QUANTITY, FIXTURE LENGTHS, AND ALL ELECTRICAL CONNECTION REQUIREMENTS WITH SECURITY LIGHTING PRIOR TO ORDERING AND INSTALLATION (TYPICAL).

E2 WEATHER PROOF RECEPTACLES WITH GFCI PROTECTION ARE PROVIDED AND MOUNTED WITHIN MOTOR HOUSING LOCATIONS PER NEC ARTICLE 210.63. CIRCUIT SHALL EMANATE FROM PANEL AP-5,CCT.#13.(TYPICAL).

E3 SMOOTH BRACING IS REQUIRED FOR LED FIXTURE INSTALLATION UNDER COPING/FLASHING.(TYPICAL)

E4 REFER TO SHEET E4.0 FOR CONDUIT AND WIRE SIZE.(TYPICAL)

E5 E.C SHALL PROVIDE A WEATHER-PROOF J-BOX ON INSIDE FACE OF PARAPET, MOUNTED 6" BELOW TOP OF PARAPET FOR LIGHTING CONTROL PANEL PHOTOCELL. (PHOTOCELL FURNISHED BY OTHERS AND INSTALLED BY EC). REFER TO LIGHTING CONTROL DETAILS ON E4.1

E6 TO LIGHTING ENCLOSURE W/ TIMER. COORDINATE WITH LIGHTING CONTROL DETAILS ON SHEET E4.1

E7 COOKING EQUIPMENT EXHAUST FANS. SEE SHEET E3.0 FOR ELECTRICAL REQUIREMENTS. SEE SHEET E3.2 FOR EXHAUST FAN INTERLOCK WIRING DIAGRAMS. (TYPICAL)

E8 PROVIDE NEMA 3R DISCONNECT WITH CURRENT LIMITING FUSES TO COMPLY WITH NEC 110 AND 440. ELECTRICAL CONTRACTOR SHALL STUB UP THRU RACEWAY IN CURB TO ELIMINATE CONDUIT PENETRATION OF ROOFING. (TYPICAL)

E9 EXTERNAL NEMA 3R MOUNTED ON SIDE OF FAN BY MANUFACTURER. ELECTRICAL CONTRACTOR SHALL STUB-UP THRU ROOF AND PROVIDE FLEXIBLE WEATHERPROOF CONDUIT FROM ROOF PENETRATION TO DISCONNECT (TYPICAL).

E10 REMOTE CONDENSING UNITS. SEE SHEET E3.0 FOR WIRING AND CIRCUITRY REQUIREMENTS.

E11 NOT USED.

E12 E.C. SHALL PROVIDE A WEATHER-PROOF JUNCTION BOX WITH ¾"C STUB DOWN TO CEILING SPACE WITH BUSHING FOR ROOF-TOP CAMERA OR SATELLITE. VERIFY EXACT LOCATION(S) WITH MCD AREA CONSTRUCTION MANAGER PRIOR TO INSTALLATION.

E13 E.C. SHALL PROVIDE A JUNCTION BOX FOR ARCH LOGO / McDONALD'S FASCIA / PLAY-PLACE SIGN. SEE NOTE L1 ON SHEET E3.1. COORDINATE EXACT LOCATION IN FIELD WITH ACM. ALL SIGNS PROVIDED WITH INTEGRAL DISCONNECT SWITCH FROM MANUFACTURER.(TYPICAL)

E14 E.C. SHALL PROVIDE A JUNCTION BOX FOR ROOF-TOP FLAG POLE LIGHTING. VERIFY LOCATION(S) WITH MCD PROJECT MANAGER PRIOR TO INSTALLATION.

E15 FLOOD LIGHT MOUNTED ABOVE CANOPY. LP-1:11 EC SHALL VERIFY EXACT SPECIFICATIONS AND LOCATION WITH ARCHITECTURAL ELEVATIONS. VERIFY EXACT INFEED REQUIREMENTS IN THE FIELD. SEE FLOOD LIGHT DETAIL ON SHEET E3.1. (TYPICAL)

DRAWING NOTES

1. SEE DRAWING M-4.0 FOR GENERAL MECHANICAL NOTES.
2. SEE DRAWINGS M-3.0 AND M-4.1 FOR MECHANICAL EQUIPMENT SCHEDULES AND DETAILS.
3. SEE DRAWING M-4.0 FOR MECHANICAL LEGEND.
4. SEE DRAWING K-2.1 FOR REMOTE CONDENSER AND MAC UNIT INFORMATION.
5. SEE ELECTRICAL DRAWINGS FOR ADDITIONAL INFORMATION.

LED GENERAL NOTES

1. PLACE LED FIXTURE AT DESIRED LOCATION AND ATTACH POWER SUPPLY AND MOUNTING BRACKET AS RECOMMENDED BY MANUFACTURER.
2. EC SHALL CONNECT NEW FIXTURES TO A 120V CIRCUIT AND MAKE ALL ELECTRICAL CONNECTIONS AS REQUIRED FOR A COMPLETE OPERATING SYSTEM.
3. POWER SUPPLY SHALL ALWAYS BE INSTALLED TO THE LEFT SIDE OF FIXTURE WHEN FACING BRAND WALL.

LED FIXTURE SCHEDULE:

MARK	SYMBOL	DESCRIPTION	DIFFUSER	LAMPS		BALLAST	MOUNTING	MANUFACTURER AND CATALOG NUMBER
				WATTS	TYPE

REMOTE ANSUL PULL STATION FOR REFERENCE

ELEVATIONS

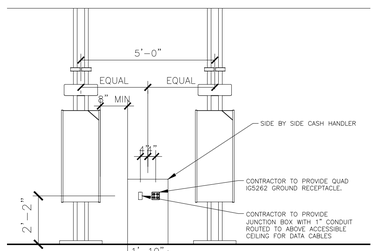

NOTES:

1. ANSUL INSTALLER SHALL INSTALL CONDUIT AND PULLEY ELBOWS ABOVE CEILING AND TO KITCHEN EQUIPMENT.
2. ELECTRICAL CONTRACTOR SHALL INSTALL BOX AND TERMINATE CONDUIT ABOVE CEILING. THE CONDUIT SHALL BE 18" ABOVE CEILING OR 6" ABOVE BOTTOM CHORD OF JOIST WHICH EVER IS LOWER.
3. ALL CONDUIT ENDS SHALL BE DEBURRED INSIDE AND OUT.
4. TABS SHALL BE IN ORIENTATION SHOWN FOR WORDING ON COVER TO BE RIGHT SIDE UP.
5. FINAL HEIGHT AND LOCATION TO BE DETERMINED BY AUTHORITY HAVING JURISDICTION.

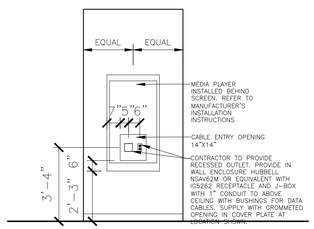

NOTES:
1. THIS EXAMPLE IS FOR A SIDE BY SIDE CASH HANDLER THAT DOES NOT HAVE A GC WALL BEHIND IT AND IS NEXT TO A KIOSK. IT IS ALSO INTENDED FOR ALL STACKED CASH HANDLERS.
2. EACH SIDE BY SIDE CASH HANDLER UTILIZES 3 PLUGS AND ADDS 4.4 AMPS OF LOAD TO THE KIOSK CIRCUIT.
3. EACH STACKED CASH HANDLER UTILIZED 2 PLUGS AND ADDS 3.6 AMPS OF LOAD TO THE KIOSK CIRCUIT.
4. ONLY 1 SIDE BY SIDE CAN BE CONNECTED TO A KIOSK, HOWEVER TWO STACKED UNITS CAN BE CONNECTED. REFER TO DECOR PLANS FOR EXACT CONFIGURATIONS.

5 TYP. CASH HANDLER POWER DETAIL
E-3.1 NOT TO SCALE

NOTES:
1. THIS EXAMPLE IS FOR A SIDE BY SIDE CASH HANDLER WITH THE REAR OF THE UNIT FACING A FULL HEIGHT GC BUILT WALL.
2. EACH SIDE BY SIDE CASH HANDLER UTILIZES 3 PLUGS AND ADDS 4.4 AMPS OF LOAD.

4 CASH HANDLER POWER DETAIL W/REAR TO WALL
E-3.1 NOT TO SCALE

NOTES:
1. THIS EXAMPLE IS FOR A WALL MOUNTED DIGITAL MERCHANDISER.

3 DIGITAL MERCHANDISER POWER DETAIL

GENERAL ELECTRICAL NOTES:

INSTALLATION METHODS:

M1. ALL ELECTRICAL MATERIAL USED ON THIS PROJECT SHALL BE "UL" LISTED AND LABELED.

M2. ALL DIMENSIONS SHOWN ARE TAKEN FROM FACE OF GYP BOARD/PLYWOOD. THE EC SHALL MAKE NECESSARY DIMENSIONAL ALLOWANCES. ALL DIMENSIONS SHOWN ARE TO CENTER LINE OF OUTLET BOX AND/OR RECEPTACLE UNLESS NOTED OTHERWISE.

M3. ALL J-BOXES, DCOs, AND OTHER ELECTRICAL DEVICES SHOWN SHALL BE RECESSED INTO A WALL, FLOOR OR CEILING UNLESS SPECIFICALLY NOTED OTHERWISE.

M4. ALL RECEPTACLES (EXCEPT SPECIFIED HUBBELL PIN & SLEEVE TYPES) SHALL BE FURNISHED BY THE EC. THE RECEPTACLES INCLUDING PIN AND SLEEVE TYPE SHALL BE INSTALLED BY THE EC.

M5. EC SHALL PROVIDE STAINLESS STEEL COVER PLATES ON ALL RECEPTACLES AND J-BOXES. ADDITIONALLY, EC SHALL PROVIDE ORANGE NYLON COVER PLATES MARKED "COMPUTER ONLY" ON ALL ISOLATED GROUND/DEDICATED CIRCUIT RECEPTACLES. PURCHASE PJ8CO (ONE DUPLEX) OR PJ82CO (TWO DUPLEX) FROM HUBBELL.

M6. ROUGH-INS FOR OPTIONAL EQUIPMENT ARE SHOWN ON THESE SHEETS. EC SHALL VERIFY WITH McDONALD'S PROJECT MANAGER WHICH OPTIONAL EQUIPMENT IS TO BE INCLUDED AND INSTALL OPTIONAL ROUGH-INS AS REQUIRED. PRICING FOR OPTIONAL ROUGH-INS SHALL BE INCLUDED IN BID AND CALLED OUT AS OPTIONAL.

M7. EC SHALL COORDINATE WITH KITCHEN EQUIPMENT SUPPLIER, MECHANICAL CONTRACTOR AND GC FOR FINAL LOCATIONS AND CONNECTION REQUIREMENTS OF ALL EQUIPMENT PRIOR TO INSTALLATION OF ANY CONDUIT AND/OR STUB-UP LOCATIONS.

M8. CEILING MOUNTED ECONOMY OEP BOX IS FURNISHED BY McDONALD'S, AND INSTALLED BY THE GC. CORD AND PLUG SET FURNISHED BY KES AND INSTALLED BY THE EC.

M9. FOR GRILLS, FRYERS, AND ANSUL SYSTEMS, EC SHALL EXTEND CONDUIT AND CONDUCTORS DOWN CHASE OR WALL TO TERMINAL BLOCK MOUNTED ON EQUIPMENT AND MAKE FINAL CONNECTIONS TO TERMINAL BLOCKS.

M10. ALL HOLES IN THE FRONT COUNTER FOR THE POS CORDS AND CABLES SHALL BE LOCATED BY OWNER AND DRILLED BY GC.

M11. ALL ELECTRICAL CONDUCTORS SHALL BE CONNECTED TO RECEPTACLES USING ONLY THE TERMINAL SCREWS. RECEPTACLE BACK WIRE/QUICK CONNECTIONS SHALL NOT BE USED. HUBBELL EDGE CONNECT IS APPROVED ALTERNATIVE.

M12. EC SHALL PROVIDE 208V HEAT TRACE ON THE FREEZER EVAPORATOR CONDENSATE DRAIN LINE. HEAT TRACE SHALL OPERATE CONTINUOUSLY. EC SHALL WIRE HEAT TRACE TO FREEZER EVAPORATOR POWER SUPPLY. A SEPARATE CIRCUIT FOR HEAT TRACE IS NOT REQUIRED. VERIFY HEAT TRACE REQUIREMENTS WITH EVAPORATOR MANUFACTURER

M13. POWER AND CONTROL CORDS ARE FURNISHED WITH KITCHEN APPLIANCES. THE EC SHALL CONNECT CORD SETS TO APPLIANCES AS REQUIRED.

M14. GC SHALL NOT INSTALL CEILING TILE IN AREAS OF THE BEVERAGE BAR REFRIGERATION LINES AND EQUIPMENT PENETRATION LOCATIONS UNTIL THE LINES HAVE BEEN INSTALLED. THE CEILING TILE INSTALLER SHALL RETURN AND INSTALL THE TILES AFTER THE REFRIGERATION LINES HAVE BEEN INSTALLED AND TESTED.

UTILITIES:

U1. INCOMING SERVICE SHALL BE 208Y/120V, 3 PHASE, 4 WIRE. ANY DEVIATIONS TO THIS SERVICE TYPE SHALL NOT BE PERMITTED UNLESS APPROVED IN WRITING BY McDONALD'S.

U2. THE EC SHALL ARRANGE WITH THE ELECTRIC, TELEPHONE, AND OTHER UTILITY COMPANIES FOR INCOMING SERVICE REQUIREMENTS AND SHALL INCLUDE ALL COSTS IN BASE BID.

U3. THE EC SHALL VERIFY EXACT METHODS AND REQUIREMENTS FOR ELECTRICAL SERVICE WITH LOCAL UTILITY COMPANY. CURRENT TRANSFORMERS SHALL BE INSTALLED OUTSIDE RESTAURANT, LOCATE INSIDE ONLY IF REQUIRED BY UTILITY COMPANY OR LOCAL AUTHORITIES.

U4. PROVIDE CONCRETE PAD IF TRANSFORMER IS LOCATED ON GRADE AND PROVIDE SECONDARY SERVICE FEEDER AND CONDUITS TO PANEL MDP AS PER LOCAL UTILITY REQUIREMENTS.

U5. THE EC/GC/ACM SHALL OBTAIN AVAILABLE SHORT CIRCUIT CURRENT FROM THE LOCAL UTILITY COMPANY. THE EC/GC/ACM SHALL ADVISE IN WRITING (FAX SUPPLIER THE UTILITY LETTER) THE AVAILABLE AMOUNT OF FAULT CURRENT. THE PANELBOARD SUPPLIER SHALL BE RESPONSIBLE TO VERIFY THAT THE ELECTRICAL EQUIPMENT SHIPPED HAS APPROPRIATE ELECTRICAL RATINGS WHICH ARE EQUAL TO OR GREATER THAN THE AVAILABLE AMOUNT OF FAULT CURRENT AT THE SITE.

U6. EC AND ACM OR OWNER/OPERATOR AND ACM SHALL COORDINATE WITH LOCAL PHONE COMPANY TO PROVIDE A 10 PAIR (OR MORE) COPPER TELEPHONE CABLE FROM THE TELEPHONE UTILITY EASEMENT TO THE RESTAURANT TELEPHONE DEMARCATION POINT. IF THE TELEPHONE PANEL/BOX IS LOCATED INSIDE THE RESTAURANT, EC SHALL PROVIDE (2) EMPTY 3/4" CONDUITS FROM THE TELEPHONE PANEL/BOX UP TO ABOVE THE CEILING FOR FUTURE TELEPHONE CABLE INSTALLATION. ADDITIONALLY, THE EC SHALL PROVIDE AN EMPTY 3/4" CONDUIT FROM THE TELEPHONE PANEL/BOX TO THE LOCATION OF THE FUTURE INTERNET SERVER (VERIFY LOCATION WITH PM). EC SHALL CONNECT, INSTALL AND INCORPORATE ALL OTHER REQUIREMENTS NECESSARY FOR COMPLETE AND OPERATIONAL TELEPHONE SYSTEM(S) FOR THIS SITE. THE REMAINING UNUSED TELEPHONE CONDUCTOR PAIRS SHALL BE CAPPED AND LEFT IN PLACE FOR FUTURE USE. THE TELEPHONE PANEL/BOX SHALL BE GROUNDED AS SHOWN IN THE "BUILDING ELECTRICAL GROUNDING DETAIL."

U7. EC SHALL PROVIDE A 4" SCHEDULE 40/80 PVC CONDUIT THAT IS SUITABLE FOR DIRECT BURIAL FROM BUILDING TO UTILITY EASEMENT/ROW IN UTILITY CABLING/CONDUIT TRENCH PROVIDED BY GC. CONDUIT SHALL RUN FROM INCOMING TELCOM LOCATION AT BUILDING TO TELECOM PEDESTAL LOCATION IN UTILITY EASEMENT/ROW. VERIFY EXACT LOCATIONS IN FIELD WITH AREA CONSTRUCTION MANAGER AND TELECOM UTILITY PROVIDER PRIOR TO INSTALLATION.

INSTALLATION NOTES:

1. IF TELCOM CONDUIT IS TERMINATED WITHIN BUILDING, PVC SHALL TRANSITION TO HWG/RMC TYPE CONDUIT PRIOR TO RISING ABOVE FINISHED SLAB.
2. PROVIDE THERMOPLASTIC BUSHINGS AT BOTH ENDS OF CONDUIT FOR CABLING PROTECTION.
3. IF 90 DEGREE BENDS ARE REQUIRED, CONTRACTOR SHALL PROVIDE WIDE SWEEPING BENDS TO PREVENT BENDING/DAMAGE TO CABLE
4. ALL COMMUNICATIONS CABLING SHALL BE PULLED VIA THIS CONDUIT.
5. INSTALL A MINIMUM OF 6 PULL WIRES IN CONDUIT TO ALLOW FOR THE INSTALLATION OF FUTURE CABLING. USE NON-DEGRADING POLYPROPYLENE OR MONOFILAMENT PLASTIC LINE OR #12 AWGT SOLID COPPER CONDUCTORS WITH NOT LESS THAN 200 LBF TENSILE STRENGTH. PROVIDE AT LEAST 12 INCHES OF SLACK AT EACH END OF PULL WIRE.
6. AFTER INSTALLATION OF COMMUNICATIONS CABLING AND PULLSTRINGS/WIRES, CONTRACTOR SHALL SEAL BOTH ENDS OF CONDUIT TO PREVENT INTRUSION FROM WEATHER, RODENTS, DEBRIS, ETC. SEAL SHALL BE OF TYPE TO ALLOW FOR REMOVAL FOR INSTALLATION OF FUTURE CABLING

CONDUIT AND WIRE:

W1. THE FOLLOWING WIRING METHODS SHALL NOT BE USED: NON-METALLIC SHEATHED CABLE (ROMEX, NM, NMC, & NMS), ARMORED CABLE TYPE AC (BX), ELECTRICAL NON-METALLIC TUBING, TYPE ENT (SMURF-TUBE).

W2. CONDUIT RUNS MAY BE COMBINED EXCEPT WHERE ISOLATED GROUNDS ARE USED. IG CIRCUITS SHALL BE RUN IN SEPARATE CONDUITS. ALL HOME RUNS SHALL BE SIZED BASED ON DERATED CONDUCTOR AMPACITIES AND INCREASE CONDUIT AND WIRE SIZE AS REQUIRED BY NEC SECTION 310 REQUIREMENTS.

W3. CONDUIT SHALL HAVE A MAXIMUM OF 4 BENDS WITHOUT A JUNCTION BOX TO PREVENT DAMAGE TO CABLE DURING PULLING. THE EC SHALL PIGTAIL #12 PULL WIRE AT EACH END FOR INSTALLER TO PULL CABLE. ALL LOW VOLTAGE CONDUIT STUB-UPS SHALL BE PROVIDED WITH A BUSHING.

W4. MINIMUM WIRE SIZE SHALL BE #12 AWG COPPER UNLESS NOTED OTHERWISE. MINIMUM CONDUIT SIZE SHALL BE 1/2" UNLESS NOTED OTHERWISE. WIRES INSTALLED UNDERGROUND OR OUTDOORS SHALL BE THW.

W5. CONDUCTORS #10 AWG AND SMALLER SHALL BE SOLID COPPER. CONDUCTORS #8 AND LARGER SHALL BE STRANDED COPPER. ALUMINUM CONDUCTORS SHALL NOT BE UTILIZED FOR FEEDER OR BRANCH CIRCUIT DISTRIBUTION.

W6. RACEWAYS SHALL BE ANY OF THE FOLLOWING MATERIALS, INSTALLED IN ACCORDANCE WITH ALL APPLICABLE CODES:

OUTDOORS: (FOR SPECIFIC APPLICATIONS AND APPROPRIATE FITTINGS, SEE TABLE W6)

1. EXPOSED: RMC, IMC.
2. CONCEALED: RMC, IMC.
3. BELOW GRADE, SINGLE RUN: RNC, RMC.
4. BELOW GRADE, GROUPED: RNC, RMC.
5. CONNECTION TO VIBRATING EQUIPMENT (INCLUDING TRANSFORMERS AND HYDRAULIC, PNEUMATIC, ELECTRIC SOLENOID, OR MOTOR-DRIVEN EQUIPMENT): LFMC.
6. BOXES AND ENCLOSURES: NEMA 250, TYPE 3R OR 4.

INDOORS: (FOR SPECIFIC APPLICATIONS AND APPROPRIATE FITTINGS, SEE TABLE W6)

1. EXPOSED: EMT, IMC.
2. CONCEALED: EMT, IMC.

(CONTINUED ON TOP)

3. CONNECTION TO VIBRATING EQUIPMENT (INCLUDING TRANSFORMERS AND HYDRAULIC, PNEUMATIC, ELECTRIC SOLENOID, OR MOTOR-DRIVEN EQUIPMENT): FMC; EXCEPT USE LFMC IN DAMP OR WET LOCATIONS.
4. DAMP OR WET LOCATIONS: RIGID STEEL CONDUIT.
5. BOXES AND ENCLOSURES: NEMA 250, TYPE 1, EXCEPT AS FOLLOWS: A. DAMP, WET OR KITCHEN LOCATIONS: NEMA 250, TYPE 4, STAINLESS STEEL.

TABLE W6:

LOCATION	208V.	480V.	LOW ENERGY*
EXPOSED			
INDOORS	< 1" EMT COMPRESS. FTGS >1.25" IMC THREADED FTGS	IMC THREADED FTGS	EMT COMPR. FTGS
OUTDOORS	RMC OR IMC THREADED FTGS	RMC OR IMC THREADED FTGS	RMC OR IMC THREADED FTGS
CONCEALED			
WALLS	<2" EMT SET SCREW FTGS >2.5" IMC THREADED FTGS	<2" EMT SET SCREW. FTGS >2.5" IMC THREADED FTGS	EMT 1/2"- 2" SET SCREW FTGS 2.5" - 4" COMPR. FTGS

NON AIR HANDLING CEILING/SPACE	<2" EMT SET SCREW FTGS >2.5" IMC THREADED. FTGS	<2" EMT COMPR. FTGS >2.5" IMC THREADED. FTGS	EMT 1/2" - 2" SET SCREW FTGS 2.5"- 4" COMPR. FTGS
BELOW GRADE			
INTERIOR	IMC THREADED FTGS OR SCHEDULE 40 OR 80 PVC	IMC THREADED FTGS	IMC THREADED FTGS SCHEDULE 40 OR 80 PVC
EXTERIOR	SCHEDULE 40 OR 80 PVC OR RMC THREADED FTGS	SCHEDULE 40 OR 80 PVC OR RMC THREADED FTGS	SCHEDULE 40 OR 80 PVC OR RMC THREADED FTGS

W7. ALL CONDUITS PENETRATING THE FREEZER/COOLER BOX SHALL BE SEALED IN COMPLIANCE NEC SECTION 300 AND THE FREEZER/COOLER BOX MANUFACTURERS REQUIREMENTS.

W8. PROVIDE THREE (3) 3/4" EMPTY CONDUITS FROM PANEL LP-1 UP TO THE CEILING SPACE AND CAP FOR FUTURE USE.

GROUNDING:

G1. ALL BRANCH AND FEEDER CIRCUITS SHALL BE GROUNDED BY TWO METHODS. THE FIRST METHOD SHALL INCLUDE AN INSULATED COPPER EQUIPMENT GROUNDING CONDUCTOR CONTAINED WITHIN THE SAME CONDUIT AS THE PHASE CIRCUIT CONDUCTORS AND SIZED PER NEC SECTION 250 REQUIREMENTS. THIS INSULATED EQUIPMENT GROUNDING CONDUCTOR SHALL HAVE ONE END PROPERLY TERMINATED AT THE EQUIPMENT GROUND BUS IN THE CORRESPONDING CIRCUIT BREAKER PANEL, AND THE OTHER END TERMINATED AT THE GROUNDING CONTACT OF A GROUNDING RECEPTACLE AND TO THE JUNCTION BOX OR TO AN EQUIPMENT CABINET, AS APPLICABLE. THE SECOND METHOD PROVIDES EQUIPMENT GROUNDING VIA METALLIC CONDUIT THAT IS CONNECTED AND TERMINATED IN FITTINGS LISTED FOR GROUNDING PER NEC SECTION 250 REQUIREMENTS. BOTH GROUNDING METHODS ARE REQUIRED IN A MCDONALD'S RESTAURANT. ISOLATED GROUND SHALL BE INSTALLED WHERE INDICATED ON PLAN AND AS SHOWN IN POS ISOLATED GROUND/DEDICATED CIRCUIT DETAIL ON SHEET E4.2.

G2. THE BUILDING GROUNDING SYSTEM SHALL COMPLY WITH NEC ARTICLE 250, MCDONALD'S SPECIFICATIONS, AND SHEET E4.2. CAUTION: IT IS A SAFETY HAZARD AND AN NEC VIOLATION TO HAVE ANY NEUTRAL TO GROUND CONNECTIONS BEYOND THE MAIN ELECTRICAL DISCONNECT MEANS. MCDONALD'S GROUNDING STANDARDS PURPOSELY EXCEED THOSE GIVEN BY THE NEC. THE EC SHALL PROVIDE A BUILDING GROUNDING SYSTEM MEETING NEC SECTION 250 REQUIREMENTS AS WELL AS MCDONALD'S STANDARDS.

G3. EC SHALL REFER TO "POS ISOLATED GROUND/DEDICATED CIRCUIT DETAIL, SHEET E4.2, FOR REQUIRED WIRING REQUIREMENTS OF COMPUTER PANEL CP.

G4. METAL RACEWAYS CONTAINING A GROUNDING ELECTRODE CONDUCTOR SHALL BE BONDED AT BOTH ENDS AS REQUIRED BY NEC SECTION 250 REQUIREMENTS.

TEMPERATURE CONTROLS:

T1. REMOTE TEMPERATURE SENSORS: EC SHALL PROVIDE 1/2" CONDUIT FROM JUNCTION BOX ABOVE CEILING DOWN TO SENSOR MOUNTED AT 4'-0" TO 4'-6" AFF.

T2. SEE DETAIL ON SHEET M3.0. FOR SENSOR MOUNTING DETAIL. LOCATION OF WALL MOUNTED TEMPERATURE SENSORS ARE SHOWN ON SHEET M1.2 AND E2.0.

T3. WHEN WIRING FOR PROGRAMMABLE THERMOSTATS AND REMOTE SENSORS IS NOT IN A CONDUIT, THE WIRING SHALL BE RUN TO THE UNDERSIDE OF THE ROOF DECK. NONE OF THE WIRING SHALL BE ROUTED OVER FLUORESCENT BALLASTS, POWER BOXES OR IN A CONDUIT WITH LINE VOLTAGE WIRING AS ELECTRICAL INTERFERENCE (NOISE) WILL CAUSE ERRATIC CONTROL OPERATION. ALL THERMOSTATS SHALL BE MOUNTED 4'-0" AFF.

FLAT PANEL TELEVISIONS:

TV1. EC SHALL PROVIDE A DUPLEX RECEPTACLE AND A LOW VOLTAGE BROADBAND CONNECTION FOR THE INSTALLATION OF FLAT PANEL TELEVISIONS. COORDINATE EXACT LOCATIONS WITH DECOR COMPANY. FOR BROADBAND CONNECTION, EC SHALL PROVIDE A 4 X 4 BOX WITH A 3/4" CONDUIT STUB-UP WITH A BUSHING INTO ACCESSIBLE CEILING SPACE.

ELECTRICAL PANELS:

E1. THE EC SHALL BE RESPONSIBLE FOR BALANCING THE LOADS ON ALL PANELS.

E2. THE EC SHALL PROVIDE ELECTRICAL SERVICE TO THE EQUIPMENT MOUNTED BREAKER PANEL. SEE ELECTRICAL ROUGH-IN PLAN AND SCHEDULE FOR ALL REQUIREMENTS.

E3. THE EC SHALL BE RESPONSIBLE FOR THE PROPER IDENTIFICATION AND LABELING OF ALL CIRCUIT BREAKERS. EACH PANEL SHALL BE PROVIDED WITH AN ACCURATE TYPEWRITTEN CIRCUIT DIRECTORY AT THE CONCLUSION OF THE PROJECT AND PRIOR TO RESTAURANT OPENING.

SECURITY AND DRIVE-THRU CAMERAS:

S1. EC TO PROVIDE ELECTRICAL POWER AND COMMUNICATION CONDUITS FOR BUILDING MOUNTED SECURITY AND DRIVE THRU CAMERAS. COORDINATE FINAL LOCATIONS WITH SECURITY AND DRIVE THRU CAMERA INSTALLERS.

LIGHTING:

L1. PROVIDE A WEATHERPROOF JUNCTION BOX IN PARAPET FOR FASCIA SIGN. FINAL CONNECTION BY OTHERS.

L2. COORDINATE THE LOCATION OF JUNCTION BOX (IN THE WALL) WITH THE OPENING IN TRELLIS (FOR THE LIGHT FIXTURE WIRES). THE LOCATION OF THE JUNCTION BOX AND THE OPENING IN THE TRELLIS SHALL BE ALIGNED FOR THE LIGHT FIXTURE TO BE INSTALLED PROPERLY. COORDINATE INSTALLATION OF JUNCTION BOX AND ANY NECESSARY OPENINGS IN TRELLIS WITH GC AND TRELLIS/CANOPY MANUFACTURER. SEE LIGHT FIXTURE INSTALLATION INSTRUCTIONS FOR REQUIREMENTS REGARDING MOUNTING BRACKETS FOR USE IN C-CHANNEL TRELLISES.

L3. EC SHALL FIELD VERIFY THAT LIGHT FIXTURES DO NOT OBSTRUCT OR CONFLICT WITH THE WORK OF OTHER TRADES. IF A DISCREPANCY IS FOUND, THE EC SHALL IMMEDIATELY NOTIFY THE GC BEFORE THE THE INSTALLATION OF SUCH FIXTURE(S). EC SHALL COORDINATE LOCATIONS OF ALL LIGHT FIXTURES IN DINING AREA WITH FINAL SEATING AND DECOR PLANS.

L4. IF PC-POS CASH REGISTER SYSTEM IS INSTALLED, EC SHALL RELOCATE FIXTURES ABOVE FRONT COUNTER TO AVOID GLARE ON THE CASH REGISTER SCREENS. EC SHALL INSTALL CABLE WHIP TO FIXTURES SO THAT FIXTURE MAY BE RELOCATED FOUR FEET WITHOUT DISCONNECTING CABLE WHIP.

L5. EC SHALL COORDINATE LOCATION OF ALL EXTERIOR LIGHTS TO AVOID INTERFERENCE WITH ANY CORBELS, TRUSSES, BEAMS OR OTHER SPECIAL EXTERIOR TREATMENTS. INSTALL LIGHT FIXTURES WITH CORRECT ORIENTATION PER MANUFACTURER'S INSTRUCTIONS

L6. THE USE OF INTERLOCK TYPE "MC" CABLE IN LENGTHS OF 6 FEET OR LESS (WHERE PERMITTED BY LOCAL CODES) SHALL BE ALLOWED FOR WIRING TO INTERIOR LIGHTING FIXTURES. "ROMEX" OR "BX" SHALL NOT BE USED.

L7. EC SHALL VERIFY THAT NOT MORE THAN 3% VOLTAGE DROP EXISTS FROM THE LIGHTING PANEL TO ANY EXTERIOR LIGHTING FIXTURE OR SIGNAGE BALLAST.

L8. WHERE MCDONALD'S RESTAURANT HAS A PLAYPLACE, THE EC SHALL COORDINATE EXACT LOCATION OF PLAYPLACE LIGHTING WITH PLAYPLACE TOY VENDOR FOR MAXIMUM ILLUMINATION AND SAFETY PER THE FINAL LOCATION OF THE PLAYPLACE TOY. LIGHTING FIXTURES SHALL NOT BE MOUNTED TO THE TOY OR ANY PART OF THE TOY STRUCTURE.

L9. EC SHALL VERIFY ALL TAP SETTINGS FOR H.I.D. LIGHTING FIXTURES AND MAKE ANY NECESSARY CORRECTIONS PRIOR TO INSTALLATION.

SEQUENCE OF OPERATION:

1. TURNING "ON" ANY PIECE OF COOKING EQUIPMENT UNDER A HOOD WILL TURN ON THE EXHAUST FAN AND ASSOCIATED RTU PROVIDING MAKEUP AIR FOR THAT HOOD.
2. TURNING "OFF" THE LAST PIECE OF COOKING EQUIPMENT UNDER A HOOD WILL TURN OFF THE EXHAUST FAN FOR THAT HOOD.
3. IF THE ANSUL SYSTEM SHOULD DISCHARGE WHILE THE COOKING EQUIPMENT AND EXHAUST FAN ARE OPERATING, THE COOKING EQUIPMENT WILL BE SHUT OFF, BUT THE EXHAUST FAN WILL CONTINUE TO RUN AND WILL FORCE THE ROOFTOP UNITS INTO A "SCHEDULED" MODE
4. THE ANSUL SYSTEM MUST BE RECHARGED AND MANUALLY RESET BEFORE THE COOKING EQUIPMENT WILL AGAIN BE ABLE TO OPERATE.
5. THE ON/OFF SWITCH ON THE EXHAUST FAN IS NORMALLY KEPT IN THE "ON" POSITION. IF IT IS TURNED OFF FOR SERVICE, THE COOKING EQUIPMENT WILL TURN OFF AND NOT BE ABLE TO OPERATE UNTIL THE EXHAUST FAN ON/OFF SWITCH IS AGAIN TURNED ON.

NOT TO SCALE

3 / E-4.0 **BRAND WALL LIGHTING DETAIL**
NOT TO SCALE

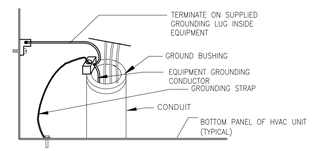

GENERAL NOTES

1. PLACE LED FIXTURE AT DESIRED LOCATION AND INSTALL FIXTURE FROM LEFT TO RIGHT WHEN FACING ARCADE AND ATTACH POWER SUPPLY AND MOUNTING BRACKET AS RECOMMENDED BY MANUFACTURER.
2. EC SHALL CONNECT NEW FIXTURES TO THE NEXT AVAILABLE SPARE 120V CIRCUIT AND MAKE ALL ELECTRICAL CONNECTIONS AS REQUIRED FOR A COMPLETE OPERATING SYSTEM.
3. POWER SUPPLY SHALL ALWAYS BE INSTALLED TO THE LEFT SIDE OF FIXTURE WHEN FACING ARCADE.
4. OVERALL FIXTURE RUN TO BE CENTERED ON OVERALL LENGTH OF WALL.
5. CONNECT NEW LED FIXTURES TO EXISTING LIGHTING CIRCUIT(S) AS REQUIRED. ENSURE THAT CIRCUIT BREAKER AND CONDUCTOR SIZES DO NOT EXCEED 1200 WATTS ON A 15A CIRCUIT AND 1600 WATTS ON A 20A CIRCUIT. VERIFY EXISTING CONDITIONS AND REQUIREMENTS IN FIELD. PROVIDE ADDITIONAL CIRCUITS (C.B.,WIRING,CONDUITS) AS REQUIRED.

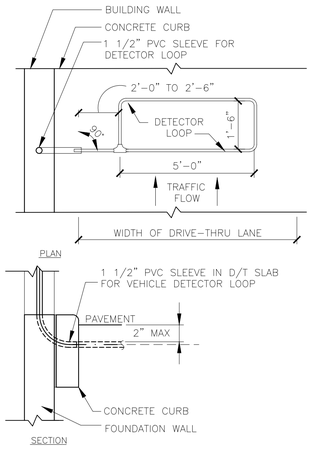

CONDUIT, WIRE SIZE AND GROUNDING FOR HVAC UNITS

HACR BRKR SIZE	CONDUIT & WIRE SIZE

NOTES

1. VERIFY CONDUIT SIZES AND LAYOUT WITH DETECTOR LOOP MANUFACTURER.
2. CENTER VEHICLE DETECTOR LOOP (ITEM # 217.11E1) IN DRIVE THRU LANE. INSTALL PER MFR. RECOMMENDATIONS.
3. SEE CIVIL FOR DIMENSIONS OF DRIVE–THRU LANE CONCRETE PAD FOR DETECTOR LOOP.
4. NO STEEL (REBAR OR ELECTRICAL WIRE) SHALL BE USED WITHIN 2' OF LOOP.
5. DETECTOR LOOP MANUFACTURERS:
   DETECTOR LOOPS MAY BE BY ONE OF THE FOLLOWINGS COMPANIES OR EQUAL.
   3M: 1–800–328–0033
   HME: 1–800–848–4468
6. DETECTOR LOOP MATERIAL:
   PVC TUBING 1/2" I.D. 100 PSI LOOP MADE FROM ONE LENGTH OF THIN FOURTEEN GAUGE STRANDED WIRE. LEAD–IN IS PRE–TWISTED AT FACTORY.
7. DETECTOR LOOP CONSTRUCTION:
   FORMED WITH ONE CONTINUOUS LENGTH OF PVC WITH NO SHARP CORNERS AS DETAILED. WIRE LOOPED, FORMED, & PIGTAILED AS DETAILED.

NOTES

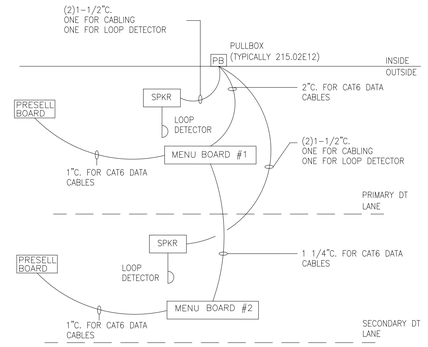

1. ALL P.O.S. EQUIPMENT (COMPUTERS,PRINTERS,MONITORS KVS, MODEM, HUB & COD) SHALL BE POWERED FROM THE COMPUTER PANEL.

   ALL OTHER COMPUTER/DIGITAL EQUIPMENT SHALL BE POWERED FROM PHASE "A" IN THE COMPUTER PANEL.
2. ISOLATED GROUND INSTALLATION SHALL COMPLY WITH THE REQUIREMENTS OF NEC SECTION 250 .
3. EACH 20 AMP CIRCUIT SHALL HAVE IT'S OWN ISOLATED EQUIPMENT GROUNDING CONDUCTOR.
4. ENTIRE GROUNDING SYSTEM SHALL COMPLY WITH NEC ARTICLE 250 AND MCDONALD'S BUILDING GROUNDING DETAIL.
5. EC SHALL VERIFY CORRECT POLARITY AT RECEPTACLE.
6. EC SHALL VERIFY THAT SUBPANEL CP DOES NOT CONTAIN ANY ILLEGAL NEUTRAL TO GROUND BONDS.
7. PANEL CP SHALL ONLY BE USED TO POWER SENSITIVE ELECTRONIC EQUIPMENT, AS OUTLINED IN NOTE #1. IT SHALL NOT BE USED TO POWER ANY OTHER LOADS.
8. IT IS A SAFETY HAZARD AND AN NEC VIOLATION FOR THE POS SYSTEM TO HAVE ITS OWN INDEPENDENT GROUNDING ROD. IF AN INDEPENDENT GROUND ROD IS FOUND FOR THE POS SYSTEM, IT SHALL BE BONDED TO THE BUILDING GROUNDING SYSTEM.

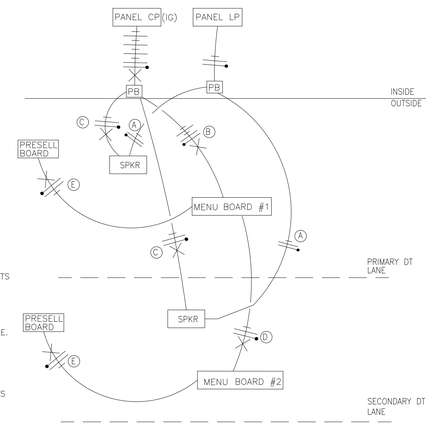

KEY NOTES

1. THIS IS THE ONLY POINT WHERE THE ISOLATED EQUIPMENT GROUNDING CONDUCTOR SHALL BE CONNECTED TO THE BUILDING'S GROUNDING SYSTEM.
2. SEE BUILDING GROUNDING DETAIL SHEET E4.2.
3. 2" METAL CONDUIT: 4–#1/0 CU + 1–#6 CU EQUIP GND + 1–#4 CU ISOLATED GND.
4. ALL ISOLATED GROUND/ DEDICATED CIRCUIT RECEPTACLE COVER PLATES SHALL BE ORANGE HUBBELL PJ7CO (SINGLE), PJ8CO (ONE DUPLEX) OR PJ82CO (TWO DUPLEX) MARKED "COMPUTER ONLY".
5. METAL CONDUIT SHALL CONTAIN ONLY P.O.S. CIRCUIT CONDUCTORS (DEDICATED CIRCUIT). ONLY USE RIGID NON–METALLIC CONDUIT BELOW GRADE WHEN REQUIRED BY LOCAL CODE.
6. EQUIPMENT GROUNDING BONDING CONDUCTOR (TYPICAL)
7. ISOLATED GROUND BUS, ELECTRICALLY INSULATED FROM PANEL ENCLOSURE USED TO TERMINATE ONLY ISOLATED EQUIPMENT GROUNDING CONDUCTORS.
8. ALL CONDUCTORS SHALL BE SOLID COPPER AND TERMINATED TO THEIR APPROPRIATE TERMINAL SCREWS BY WRAPPING THE CONDUCTOR COMPLETELY AROUND THE SCREW BARREL AND TIGHTENING THE SCREW PER MANUFACTURER'S TORQUE SPECIFICATIONS.
9. ISOLATED GROUND RECEPTACLE HUBBELL–IG4700,IG4710,IG5262 OR IG5261. SEE ROUGH IN SCHEDULE FOR THE APPROPRIATE RECEPTACLE TO USE.
10. ISOLATED GREEN GROUND SCREW.
11. ISOLATED EQUIPMENT GROUNDING CONDUCTOR (GRN W/YLW STRIP)
12. NEUTRAL CONDUCTOR TERMINATED ON SILVER SCREW.
13. PHASE CONDUCTOR TERMINATED ON BRASS SCREW

5 / E-4.0 **POS & COD ISOLATED GROUND/DEDICATED CIRCUIT**
NOT TO SCALE

DT LOW VOLTAGE CONDUIT DIAGRAM
NOT TO SCALE

NOTE:

* VERIFY EXACT CIRCUITS & QUANTITIES OF CIRCUITS WITH PANEL SCHEDULES AND MANUFACTURERS INSTALLATION INSTRUCTIONS.
* VERIFY LOW VOLTAGE CABLE COUNT WITH POS INSTALLER. LOW VOLTAGE CABLE SUPPLIED AND TERMINATED BY POS INSTALLER. EC TO PULL CABLE.

(A) 2#12 & 1#12 GND. TO LP–1 FOR COD CANOPY LIGHTING.
(B) 4#12 & 1#12 GND & 1#12 ISOLATED GND., TO CP FOR ISOLATED GROUND POWER TO MENUBOARDS AND MEDIA PLAYERS.
(C) 2#12 & 1#12 GND & 1#12 ISOLATED GND., TO CP FOR ISOLATED GROUND POWER TO SPEAKER CANOPY/STAND. EACH CANOPY/STAND SHALL BE ON ITS OWN SEPARATE CIRCUIT.
(D) 2#12 & 1#12 GND & 1#12 ISOLATED GND., TO CP FOR ISOLATED GROUND POWER TO MENUBOARDS AND MEDIA PLAYERS.
(E) 2#12 & 1#12 GND & 1#12 ISOLATED GND., TO CP FOR ISOLATED GROUND POWER TO FOR PRESELL BOARDS AND MEDIA PLAYER.

DINING	MANAGERS OFFICE		X		X		X
KITCHEN	MANAGERS OFFICE		X				X
SUPPORT/STOCK	X					X	
CREW	X	X		X		X	
MANAGER	X	X		X		X	
BATHROOM						X	
SMALL STORAGE	X	X				X	
ENTRY VESTIBULE							X

NOTES:
1. LOCAL CONTROL: MANUAL LIGHTING CONTROL THAT PROVIDES ON AND OFF CONTROL IN SPACE. REMOTE LOCATION CONTROL DEVICE MUST BE LABELED TO IDENTIFY CONTROLLED LIGHTING.
2. MANUAL ON: NONE OF THE LIGHTING SHALL BE AUTOMATICALLY TURNED ON.
3. PARTIAL ON: 50% OF THE GENERAL LIGHTING SHALL BE AUTOMATICALLY TURNED ON.
4. MULTI LEVEL: GENERAL LIGHTING SHALL BE FITTED WITH A MANUAL CONTROLLED CONTINUOUS DIMMER.
5. DAYLIGHTING: REQUIRED WHEN PRIMARY AND SECONDARY ZONES CONTAIN 150W OF GENERAL LIGHTING. PHOTOCONTROL SHALL REDUCE LIGHTING IN RESPONSE TO AVAILABLE DAYLIGHT USING CONTINUOUS DIMMING TO 20% AND OFF.
6. AUTO OFF: ALL LIGHTING INCLUDING LIGHTING CONNECTED TO EMERGENCY CIRCUITS SHALL BE AUTOMATICALLY SHUT OFF WITHIN 20 MINUTES OF OCCUPANTS LEAVING THE SPACE.
7. SCHEDULE OFF: ALL LIGHTING, INCLUDING LIGHTING CONNECTED TO EMERGENCY CIRCUITS, SHALL BE AUTOMATICALLY SHUT OFF DURING PERIODS WHEN THE SPACE IS SCHEDULED TO BE UNOCCUPIED.
8. 0.02W PER SQUARE FT OF BUILDING ALLOWED TO BE CONTINUOUSLY LIT.

EXTERIOR LIGHTING CONTROL SCHEDULE			
	TIME CLOCK	PHOTCELL	OCCUPANCY SENSOR
POLE LIGHTING	X	X	X
BUILDING MOUNT LIGHTING	X	X	
SIGNAGE	X	X	

NOTES:
1. TIME CLOCK: LIGHTING SHALL BE AUTOMATICALLY SHUT OFF BETWEEN BUSINESS CLOSING (OR MIDNIGHT) AND BUSINESS OPENING (OR 6AM) WHICHEVER PROVIDES THE SHORTEST OFF DURATION.
2. PHOTOCELL: LIGHTING SHALL BE AUTOMATICALLY TURNED OFF WHEN SUFFICIENT DAYLIGHT IS AVAILABLE.
3. OCCUPANCY SENSOR: LIGHTING SHALL AUTOMATICALLY REDUCE THE CONNECTED LIGHTING POWER BY 50% WHEN NO ACTIVITY HAS BEEN DETECTED IN AREA IN 15 MINUTES. NO MORE THAN 1500W OF LIGHTING PER CONTROL ZONE.

LIGHTING CONTROL NOTES:

LIGHTING CONTROL NOTES

LC1. CONTACTOR DETAILS ARE DIAGRAMMATIC ONLY AND ARE SHOWN WITH TYPICAL LOADS AND CIRCUIT ASSIGNMENTS. LOADS, CIRCUIT ASSIGNMENTS AND NUMBER OF CONTACTORS MAY VARY BY RESTAURANT LOCATION AND PER BAS SUPPLIERS SYSTEMS. VERIFY EXACT REQUIREMENTS WITH BAS INSTALLATION DETAILS, SITE PLANS, ELECTRICAL PANEL SCHEDULES AND ACM. EC SHALL MAKE ALL MODIFICATIONS AS REQUIRED. FINAL INSTALLATION SHALL BE FULLY NEC AND ENERGY CODE COMPLIANT.

LC2. ELECTRICAL CONTRACTOR SHALL FURNISH AND INSTALL ALL WIRING, CONNECTIONS, TERMINATIONS, ETC. THAT ARE NOT PROVIDED BY THE BAS SUPPLIER FOR A COMPLETE, FULLY OPERATIONAL AND CODE COMPLIANT LIGHTING CONTROL SYSTEM.

LC3. ALL COMPONENTS FOR THIS LIGHTING CONTROL SYSTEM SHALL BE INSTALLED BY THE ELECTRICAL CONTRACTOR. SEE BOXED NOTE BELOW FOR OPTIONS.

LC4. ALL COMPONENTS SHALL BE UL LISTED AND LABELED AND THE SYSTEM SHALL COMPLY WITH ALL LOCAL, STATE AND FEDERAL ENERGY CODE REQUIREMENTS.

LC5. ALL CONTACTORS SHALL BE LOCATED IN A NEMA 1 ENCLOSURE WITH SCREW TYPE COVER MOUNTED DIRECTLY ABOVE LIGHTING PANEL OR SWITCHGEAR SO AS TO BE ACCESSIBLE.

LC6. ALL CONTACTORS SHALL BE RATED FOR 30 AMP LOADS UNLESS NOTED OTHERWISE AND SHALL BE HID RATED WHERE REQUIRED.

LC7. COIL VOLTAGES FOR ALL CONTACTORS SHALL BE 120 VOLT UNLESS NOTED OTHERWISE.

LC8. CONTACTOR C5 IS INTENDED TO CONTROL PARKING LOT LIGHTS NEAR TRASH CORRAL, DELIVERY DOORS, AND EMPLOYEE PARKING, THUS ALLOWING A DIFFERENT LIGHTING SCHEDULE TO BE USED IN THOSE AREAS.

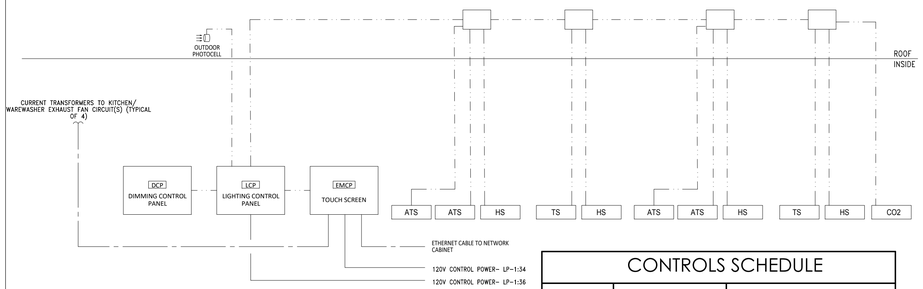

LIGHTING CONTROL INSTALLATION OPTIONS

OPTION 1 (STANDARD) CONTACTORS AND CONTACTOR ENCLOSURE FOR THIS LIGHTING CONTROL SYSTEM SHALL BE FURNISHED BY THE BAS SUPPLIER AND INSTALLED BY THE ELECTRICAL CONTRACTOR ON SITE FOR A COMPLETE AND FULLY FUNCTIONAL SYSTEM.

OPTION 2 (OPTIONAL) LIGHTING CONTROL CAN BE ACCOMPLISHED VIA UTILIZATION OF A SMART TYPE BREAKER PANEL REPLACING STANDARD PANEL LP-1. PANEL SHALL UTILIZE AN INTEGRAL MOTOR OPERATED CIRCUIT BREAKERS OR AN INTEGRAL CIRCUIT BREAKER/CONTACTOR TYPE COMBINATION DEVICE WITH AN INTEGRAL PROGRAMMING CONTROL MODULE AND SHALL BE ORDERED THROUGH OUR ELECTRICAL EQUIPMENT NATIONAL ACCOUNT PROGRAM (SQUARE-D) THROUGH OUR CONSTRUCTION PURCHASING TEAM.

BUILDING AUTOMATION SYSTEM

INSTALLATION & TECHNICAL ASSISTANCE INFORMATION:
LENNOX BAS: McD@CCBAC.com

PROVIDE AND INSTALL DATA OUTLET NEXT TO BAS PANEL. REMOTE COMMISSIONING IS NOT POSSIBLE WITHOUT DATA CONNECTION.

INSTALLATION NOTES:

1. PROVIDE, INSTALL AND SECURE ALL NECESSARY CABLE & CONDUIT PER BAS DRAWINGS AND SPECIFICATIONS.
2. MOUNT ALL BAS CONTROL ENCLOSURES.
3. PERFORM ALL LOW VOLTAGE TERMINATIONS.
4. ROUGH-IN, INSTALLATION AND WIRING FOR TEMPERATURE SENSORS AND TOUCHSCREEN PER PLAN LOCATIONS.
5. PROVIDE POWER CIRCUITS INTO CONTROL CANS PER BAS DETAILS.
6. COORDINATE WITH SUPPLIER TO SCHEDULE REMOTE COMMISSIONING.
7. CORRECT ALL PUNCH LIST ITEMS FOUND DURING REMOTE COMMISSIONING.

CONTROLS SCHEDULE		
MARK	DESCRIPTION	MANUFACTURER MODEL
TS	TEMPERATURE SENSOR	*PROVIDED WITH BAS

BUILDING AUTOMATION SYSTEM NOTES

BAS1. THE DIAGRAM SHOWN ABOVE IS SCHEMATIC IN NATURE AND SHOWS THE GENERAL REQUIREMENTS FOR THE INSTALLATION OF THE BUILDING AUTOMATION SYSTEM. EXACT EQUIPMENT REQUIREMENTS AND QUANTITIES WILL VARY PER SITE. G.C., M.C., T.C.C. AND E.C. SHALL COORDINATE ALL EXACT EQUIPMENT AND INSTALLATION REQUIREMENTS WITH SUPPLIER PRIOR TO SUBMITTING BID FOR A COMPLETE AND FULLY FUNCTIONAL SYSTEM.

BAS2. THE BUILDING AUTOMATION SYSTEM ALSO HAS ADDITIONAL OPTIONS AVAILABLE SUCH AS MONITORING DOOR CONTACTS (RESTROOM & COOLER FREEZER), ENERGY METER, COOLER/FREEZER TEMP. ADDITIONAL OPTIONS MAY BE SELECTED ON CENTRAL PURCHASING PROJECT DETAIL FORM. G.C., M.C., T.C.C. AND E.C. SHALL COORDINATE ALL EXACT INSTALLATION REQUIREMENTS WITH SUPPLIER PRIOR TO SUBMITTING BID FOR A COMPLETE AND FULLY FUNCTIONAL SYSTEM.

BAS3. ELECTRICAL CONTRACTOR SHALL FURNISH AND INSTALL ALL LINE AND LOW VOLTAGE WIRING AND CONNECTIONS, INCLUDING BUT NOT LIMITED TO CONTROL POWER TO ALL BAS COMPONENTS AND POWER CIRCUITRY WIRING OF ALL LIGHTING CONTACTORS. COORDINATE INSTALLATION WITH SITE SPECIFIC BAS INSTALLATION DETAILS PROVIDED BY SUPPLIER.

11. Demand (9+10):	339	**940**

SINGLE LINE RISER DIAGRAM

BUILDING ELECTRICAL GROUNDING DETAIL

KEY NOTES

1. PROVIDE ENOUGH LENGTH TO TERMINATE DIRECTLY TO GROUND BUS OR USE BOLTED–TYPE CONNECTION DEVICE OR EXOTHERMIC WELD.
2. NON–METALLIC PROTECTIVE SLEEVE. LOCATE SLEEVE DIRECTLY UNDER THE ELECTRICAL SERVICE ENTRANCE PANEL. EC TO PROVIDE PLIABLE SEALANT BETWEEN COPPER WIRE AND SLEEVE.
3. FOR NEW CONSTRUCTION WHEN A SPREAD FOOTING OR DOWN TURNED SLAB IS USED, EC SHALL INSTALL A CONCRETE ENCASED ELECTRODE, COMPLIANT WITH NEC SECTION 250, CONSISTING OF AT LEAST 20 FEET OF BARE #4 AWG COPPER ENCASED IN 2 INCHES OF CONCRETE NEAR THE BOTTOM OF THE FOOTING OR FOUNDATION (BELOW GRADE) THAT IS IN DIRECT CONTACT WITH EARTH.
4. METAL UNDERGROUND WATER PIPE ELECTRODE COMPLIANT WITH NEC SECTION 250. THE GROUNDING CONNECTION TO THE INTERIOR METAL WATER PIPE SHALL BE MADE WITHIN THE FIRST FIVE FEET OF THE WATER PIPE ENTRANCE TO THE BUILDING.
5. IF MULTIPLE GROUNDING RODS ARE BEING USED OR NEED TO BE USED, THEY SHALL ALL BE BONDED TOGETHER PER NEC SECTION 250.
6. CLAMPS SUITABLE FOR DIRECT BURIAL OR EXOTHERMIC WELD.
7. 8'–0" X 5/8" CU ROD GROUNDING ELECTRODE COMPLIANT WITH NEC SECTION 250.
8. CU BONDING JUMPER SIZED PER NEC SECTION 250 OR FACTORY PROVIDED NEUTRAL TO GROUND BAR LINK. (THIS IS THE ONLY PLACE IN THE BUILDING WHERE N–G SHALL BE BONDED TOGETHER)
9. ALL METAL RACEWAYS CONTAINING GROUNDING ELECTRODE CONDUCTORS SHALL BE BONDED AT BOTH ENDS AS REQUIRED BY NEC SECTION 250. PROVIDE GROUNDING TYPE BUSHINGS & FITTINGS.
10. MCDONALD'S GROUNDING STANDARDS PURPOSELY EXCEED THOSE GIVEN BY THE NEC. THE ELECTRICAL CONTRACTOR SHALL PROVIDE A BUILDING GROUNDING SYSTEM MEETING NEC AND MCDONALD'S STANDARDS AS SHOWN ON THIS DRAWING.
11. CU GROUNDING ELECTRODE CONDUCTORS AND BONDING JUMPERS SHALL BE SIZED BASED UPON ELECTRICAL SERVICE SIZE PER NEC SECTION 250

800A	1000A	1200A

• SHOWS CONNECTION/BONDING POINT
12. TERMINAL GROUNDING BUS AT 90°AFF. HARGER #GBI14212D.

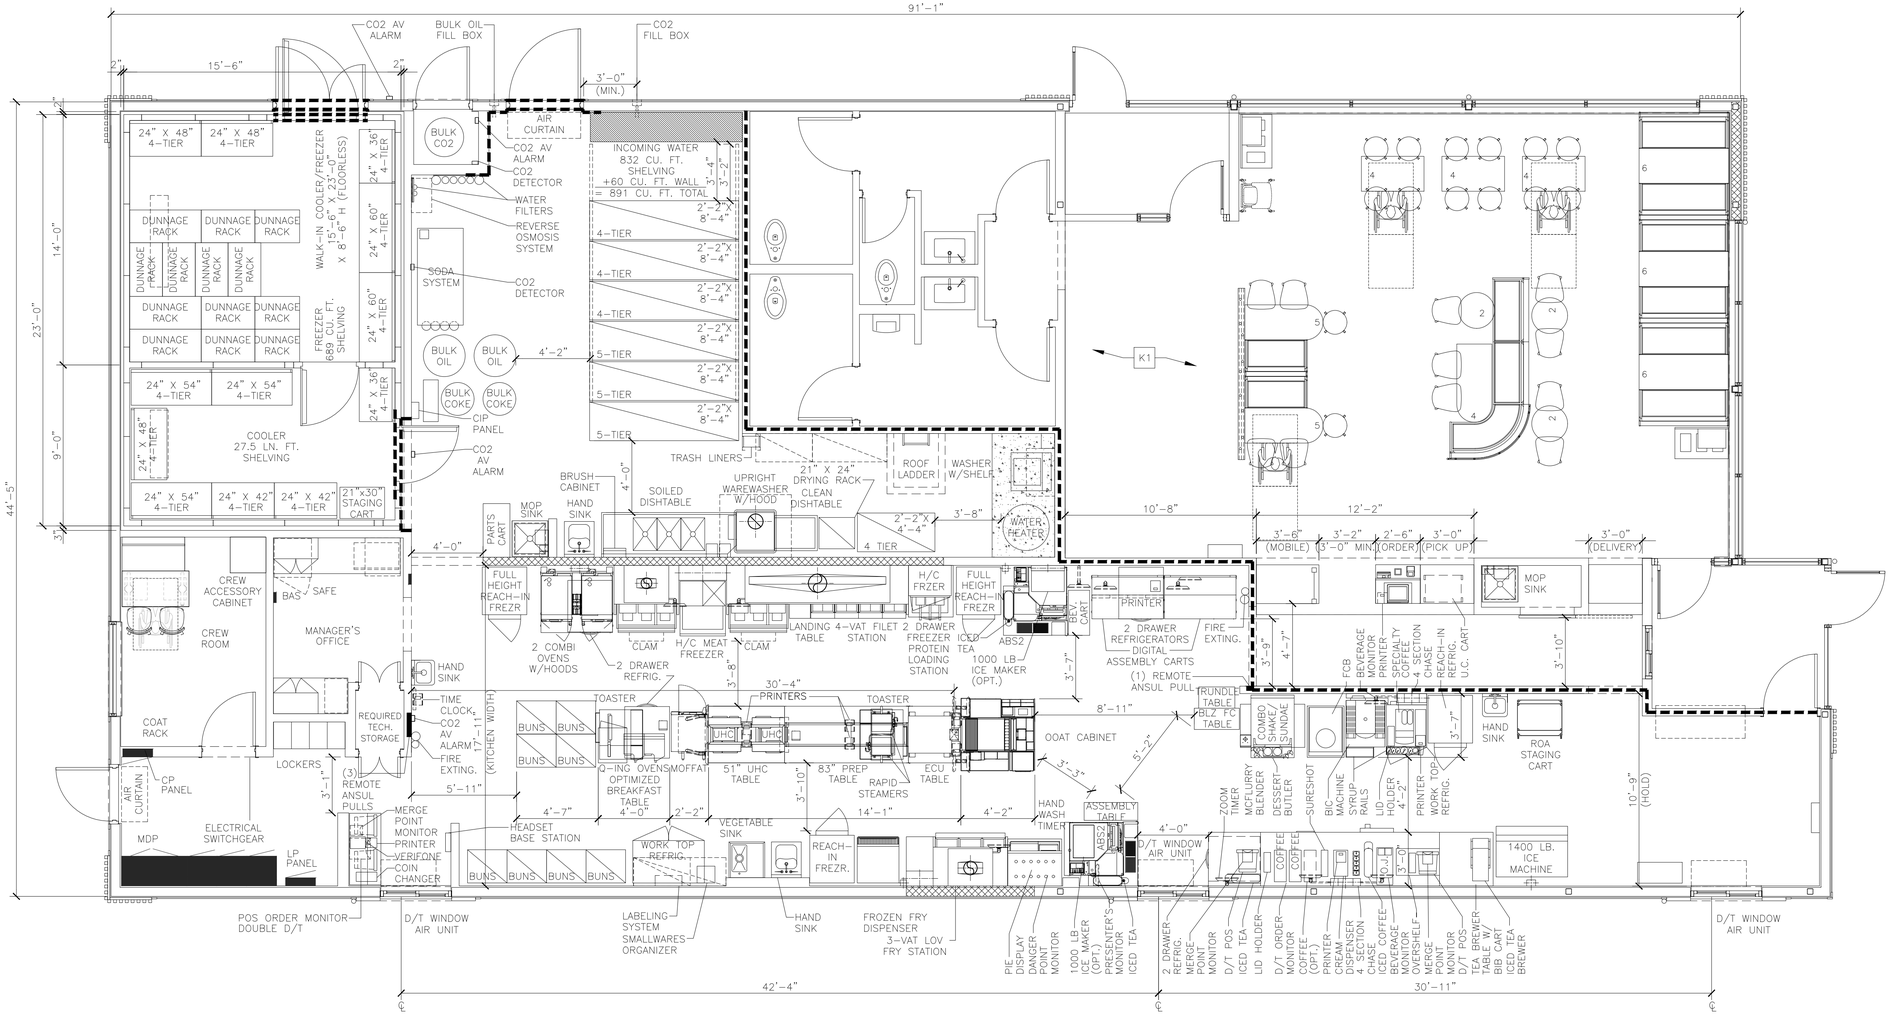

DISTRIBUTION EQUIPMENT NOTES:

D1. ALL ELECTRICAL MATERIAL USED ON THIS PROJECT SHALL BE "UL" LISTED AND LABELED.

D2. THE EC/GC/AREA CONSTRUCTION MANAGER WHEN ORDERING PANELBOARDS, SHALL DETERMINE THE NUMBER OF SERVICE ENTRANCE CONDUCTORS, SIZE AND MATERIAL TYPE, AND SHALL PROVIDE THIS INFORMATION TO THE PANELBOARD SUPPLIER SO THAT THE APPROPRIATE LUGS CAN BE PROVIDED FROM THE FACTORY.

D3. ALUMINUM SERVICE ENTRANCE CONDUCTORS SHALL ONLY BE USED WHEN THEY ARE TERMINATED DIRECTLY TO THE LINE LUGS ON A C/T AND METERING CABINET, THE LINE LUGS OF A FUSIBLE DISCONNECT SWITCH OR TO THE LINE LUGS OF A MAIN LUG ONLY (6 HANDLE RULE) SERVICE ENTRANCE PANEL. ALUMINUM SERVICE ENTRANCE CONDUCTORS SHALL NOT BE TERMINATED TO THE LINE LUGS OF ANY MAIN BREAKER SINCE DOING SO WILL VIOLATE IT'S 100% UL RATING. IF ALUMINUM CONDUCTORS ARE USED AS PREVIOUSLY INDICATED THEY SHALL BE TERMINATED AS FOLLOWS, AND THE WIRE SIZE INCREASED DUE TO LOWER AMPACITY OF ALUMINUM. EXPOSED ALUMINUM CONDUCTOR STRANDS SHALL BE COATED WITH AN ANTI–OXIDANT IMMEDIATELY AFTER INSULATION IS STRIPPED AWAY. A COMPRESSION LUG SHALL BE PROPERLY INSTALLED ONTO THE EXPOSED ALUMINUM CONDUCTOR STRANDS, AND THAT COMPRESSION LUG SHALL THEN BE BOLTED TO THE TRANSFORMER TAPS AND SWITCHBOARD BUSS USING PROPERLY SIZED BOLTS, NUTS AND WASHERS. MERELY INSERTING ALUMINUM STRANDS UNDER A SCREW LUG SHALL NOT BE ACCEPTABLE.

D4. THE SURGE PROTECTIVE DEVICE (SPD) UNIT SHALL BE AN INTEGRAL UNIT PROVIDED AND INSTALLED BY THE SWITCHBOARD MANUFACTURER. ORDER APPRO

Letter of Intent

July 16th, 2025

RE: BLI: 253355
City, ST: Brownsburg, IN
Address: SEC of Green St. & Northfield Dr.
L/C: 131263
County: Hendricks

This non-binding letter (Letter) sets forth the basic terms for a purchase contract (the "**Contract**") with respect to the property located in Hendricks County at the address referenced above. All documents in this transaction (including the Contract) will be prepared on Tenant's form documents.

1. **Purchaser:** McDonald's USA, LLC, a Delaware limited liability company or its nominee.

2. **Seller: Christian Brothers**
Address: 17725 Katy Freeway, Houston, TX 77904
Phone Number:
E-Mail: Michael.suttle@cbac.com
Seller's Federal Tax ID #: Will present at closing

3. **Premises:** Approximately 67,954 square feet with a frontage of 200 feet on Green St. See **Exhibit A.**

4. **Purchase Price:** $ $799,000

5. **Earnest Money:** Purchaser will deposit $15,000.00 with the title insurance company as escrow agent within 30 days after Contract execution.

6. **Restrictive Covenant:** Seller will restrict all property, where they are the same owner as this property, within a two-mile radius from being a restaurant serves any hamburgers, cheeseburgers, chicken sandwiches or other beef and chicken products in sandwich form unless only one such item is on the restaurant's menu.

7. **Zoning/Subdivision:** Already zoned and platted.

8. **Contingencies:** Purchaser shall have 240 days after the execution of the Contract (the Contingency Period) to review any due diligence reports or matters and to obtain all necessary permits and approvals. Purchaser shall have the right to extend the Contingency Period for 2 period(s) of 30 days. Each 30-day extension shall require an additional earnest money deposit of $10,000/ each. At the time of the first extension being made, the earnest money shall all become non-refundable.

9. **Signage:** Purchaser will have the right to pursue entitlements to obtain the maximum amount of signage permitted on the Premises.

10. **Seller's Work:** This is an "as-is" sale. All utilities are at the site or in the right of way.

11. **Broker Commission:** Seller agrees to pay any real estate agent, broker, finder.

Name of Broker(s): Andrew Clifford of 7D Commercial Real Estate.

12. **Scope of this Letter/Non-Binding Effect:** The parties agree and understand that this Letter is intended to be, and will be construed only as, an understanding that summarizes the discussions between the parties. This

LANCER
ASSOCIATES
ARCHITECTURE

RE: McDonald's Restaurant – Brownsburg IN
Response to Technical Review Committee Comments
Location: 7030 Northfield Drive, Brownsburg, Indiana

To Whom It May Concern,

We submit the following responses to the Technical Review Committee comments. Revised architectural drawings have been prepared and included with this resubmittal.

1. Exterior Masonry Requirement

The building exterior has been revised to a full brick façade to comply with the requirement that a minimum of 75% of the exterior be masonry or architectural block.

2. Fenestration Percentages

Fenestration percentages for each façade have been added to Sheets A2.0 and A2.1 to demonstrate compliance with the minimum 30% fenestration requirement.

3. Façade Articulation (Projections/Recesses)

Façade bump-outs have been incorporated into the design to meet the requirement for projections/recesses extending at least 20% of the façade length for elevations exceeding 75 feet. These architectural features are shown on the updated elevations and plans (Sheets A1.0, A2.0 and A2.1).

4. Repeating Architectural Elements

The revised elevations now incorporate repeating architectural elements, including material changes (brick articulation), profile changes via façade bump-outs, and fenestration variation, satisfying the requirement for multiple visual design elements.

5. Signage Modifications

Building signage has been modified to align with the updated architectural design and Town requirements. Revised signage is shown on the architectural elevation sheets.

All above revisions address the Development Services architectural comments regarding masonry percentage, fenestration, façade articulation, and architectural patterning. Please let us know if any additional clarification is required.

Sincerely,

Chelsea Meadows
Project Manager
Lancer Associates Architects

LANCER ASSOCIATES ARCHITECTURE

ADDENDUM TO RESPONSE LETTER

McDonald's Restaurant

7030 Northfield Drive, Brownsburg, Indiana

Date: February 16, 2026

To Whom It May Concern,

This addendum is submitted to clarify Item 2 (Fenestration Percentages) within our previously submitted Technical Review response letter.

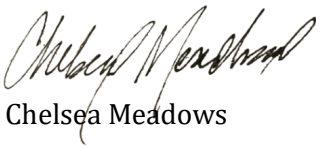

While fenestration percentages were added to Sheets A2.0 and A2.1 for reference, the current elevations do not yet meet the minimum 30% fenestration requirement on all façades. The project team is actively evaluating design options to address this requirement, including potential revisions to increase glazing and/or pursuing alternative compliance pending Owner direction.

Updated elevations and/or supporting documentation will be provided with a subsequent submittal once a finalized approach is confirmed.

All other architectural responses included in the original response letter remain unchanged.

We appreciate your understanding and continued coordination.

Sincerely,

Chelsea Meadows

Project Manager

Lancer Associates Architects

☒	Tech Review & Response
☒	Site Plan/Civil
☒	Landscape Plan
☒	Architectural Plans
☒	Other: Stormwater Management Report, O & M Manual, Lighting Plan

Site and Zoning Map:

Proposed Administrative Plat with Outlot Subdivide:

Project and Site Background:

This proposed development includes the construction of a 4,285 sq. ft. Heartland Dental office building with associated sidewalks, parking area, landscaping, and utilities on 1.21 acres. The project will get access from a private drive in between Heartland Dental and the new Meijer gas station to the east. This access drive has both right and left turn lanes onto E. 56th St. The project does not require any variances.

Technical Review:

The TECH review for this project took place on January 15, 2026. Planning Services commented that vision clearance triangles need to be added to the landscape plan and a stub needs to be added to the right northwest corner for connectivity and emergency services when a business goes in next to Heartland Dental in the future. The lot coverage percentage needs added to the civil plans and the streets need a private or public designation put under the road name with the road width labeled as well. The Water Department commented that the water service for this property is provided by Citizens Energy Group. The Wastewater Department commented that this area is within the Hendricks County Regional Sewer District/ Aqua IN Service Area. The Fire Territory commented that the majority of the proposed building is more than 400' from the closest fire hydrant along an approved route. A hydrant shall be placed to satisfy requirement of IFC 507.5.1. The preferred location mentioned was at the parking lot

entrance on the northeast corner of the parcel. The final location must be approved by the Fire Marshal. The Police Department wanted to ensure there would be no landscape obstructions for egress traffic onto 56th St (CR 600 N).

Traffic Study:

There was not a traffic study submitted for this project.

Criteria:

Pursuant to Chapter 8 of the Brownsburg Unified Development Ordinance the Advisory Plan Commission shall make findings of fact on the following criteria:

1) The Development Plan is consistent with the **Comprehensive Plan**.

   Future Land Use Map Link: https://www.brownsburg.org/DocumentCenter/View/1068/2021-Future-Land-Use-Map-PDF

   a) The Future Land Use Map notes this parcel being used for Regional Commercial. The parcel Heartland Dental is on was platted as an outlot for a regional commercial anchor (Meijer). The outlots bring diverse, need based services to a larger, anchored commercial center. Regional commercial areas are typically located near major traffic corridors, in this case the Ronald Reagan Parkway.

   Based on the above information, staff believes this criterion has been met.

2) The Development Plan complies with applicable development requirements and standards of **CHAPTER 2 – ZONING DISTRICTS, CHAPTER 3 – PERMITTED USES,** and/or the PUD Ordinance.

   https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=14

   a) The project's lot coverage is at 61.2% which is under the maximum allowed 75%. The max allowed height in a C3 district is 60', the dental office is 23'-4". The civil plan submittal has the setbacks marked and the setbacks satisfy UDO requirements.

Based on the above information, staff believes this criterion has been met.

3) The Development Plan complies with applicable standards found in **CHAPTER 5: SITE DEVELOPMENT** and/or the PUD Ordinance.

https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=101

a) *Landscaping*: The on-site, street frontage, perimeter parking lot, interior parking lot, foundation, and buffer yard landscaping standards have been met.

b) *Lighting*: The lighting does not exceed the maximum allowed 20 lux at the property lines.

c) *Parking*: There are 37 standard parking spaces and 2 ADA accessible spaces for a total of 39 spaces. The requirement for a dental/ medical office is 1.5 spaces per treatment space which would only require them to have 18 spaces.

d) *Vision Clearance Triangle*: The most recent landscape plan submittal has the vision clearance triangles marked on it and there is not any landscaping within the vision clearance triangles.

Based on the above information, staff believes this criterion has been met.

4) The Development Plan complies with any **other applicable provisions** of this Ordinance or **Overlay Standards.**

a) No special provisions that relate to the plat are noted for this site. Overlay districts are not applicable to this project.

Based on the above information, staff believes this criterion has been met.

5) Satisfies any provision related to a development's design as found in **CHAPTER 7 – SUBDIVISION REGULATIONS** and/or the PUD Ordinance.

https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=168

a) The project was not subject to open space requirements being in a commercial district. Easements are shown and labeled in the civil plans. Setbacks, lot coverage, and height have also been met.

Based on the above information, staff believes this criterion has been met.

6) The Development Plan satisfies the construction requirements of the **Brownsburg Construction Standards and Specifications.**

a) The project did not receive any waivers. Stormwater review is ongoing, Wessler is reviewing the applicant's new submittals since the TECH review meeting. TECH review comments will need to be resolved before permitting, this will be added as a condition for approval.

Based on the above information, staff believes this criterion has been met.

Recommendations:

The Advisory Plan Commission may request conditions and commitments related to the project and criteria. Conditions or commitments must be made as part of the motion.

Based on the information provided and the criteria responses, staff recommends a motion to

☐	Approve PSDP-26-1 as presented.
☒	Approve PSDP-26-1 with the following staff conditions: 1. The approval of Findings of Fact and Report of Determination. 2. The stamping of the construction plans by the Director. 3. The completion of any outstanding TECH comments.
☐	Deny PSDP-26-1 based on the following criteria:

Advisory Plan Commission
TECHNICAL REVIEW COMMITTEE

TOWN OF Brownsburg
61 North Green Street | Brownsburg, Indiana 46112
Tel 317.852.1128 | Fax 317.852.1134

Project Name: Heartland Dental DPR
Record Number: PSDP-26-1
TECH Meeting Date: January 15, 2026

The following Technical Review Committee ("TECH") members provided comments for the project as detailed below:

Development Services
- ☐ Kevin Tolloty, Senior Planner
- ☒ Lauren Bouslog, Planner I
- ☐ Steve Fletcher, Building Commissioner/Director
- ☐ Frank Wise, Senior Building Inspector

Town Administration
- ☐ Debbie Cook, Town Manager
- ☐ Aaron Kaytar, Capital Projects & Procurement Manager
- ☐ Ethan Pierce, Economic Development Manager

Water Department
- ☒ Frank Monts, Superintendent

Wastewater Department
- ☒ Kathy Dillon, Water Utilities Director
- ☐

Street Department
- ☐ Aaron Love, Superintendent
- ☐ Matt Griner, Asst. Superintendent

Parks Department
- ☐ Amber Lane, Director
- ☐

Fire Territory
- ☒ Paul Hudson, Fire Marshal
- ☐ Jeff Schlageter, Deputy Fire Marshal

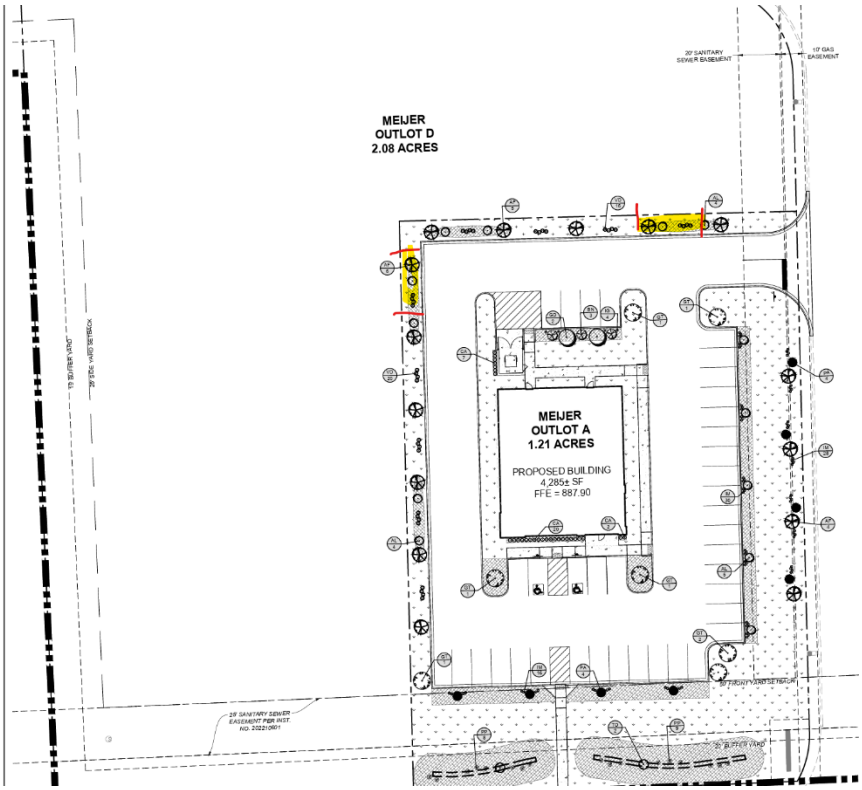

Police Department
- ☐ Joe Grimes, Chief
- ☐ Pat Bullock, Captain
- ☒ Bryan Fultz, Major

External Agencies

- ☐ Dave Gaston, P.S., Hend. Co. Surveyor
- ☐ John Ayers, Hendricks Co. Engineer
- ☒ Mary Atkins, Wessler Engineering
- ☐ Angie DeKemper, CountryMark
- ☐ Gerry Jones, Vectren

1) DEVELOPMENT SERVICES

a) Add Vision Clearance Triangles to the Landscape Plan.

b) Do you foresee future businesses on this outlot to need access at these points below? That will influence where your landcaping can go. We would like for a stub to be added for connectivity and emergency services.

c) Add lot coverage percentage to civil plans (impervious surface %).
d) Label streets and put private or public designation under the name with the road width (Ex. 56' Public ROW)

2) BUILDING

a) None

3) CAPITAL PROJECTS

a) None

4) ECONOMIC DEVELOPMENT

a) None

5) WATER

a) Water service for this property is provided by Citizens Energy Group.

6) WASTEWATER

a) This area is within the Hendricks County Regional Sewer District/Aqua IN service area.

7) STREET/PUBLIC WORKS

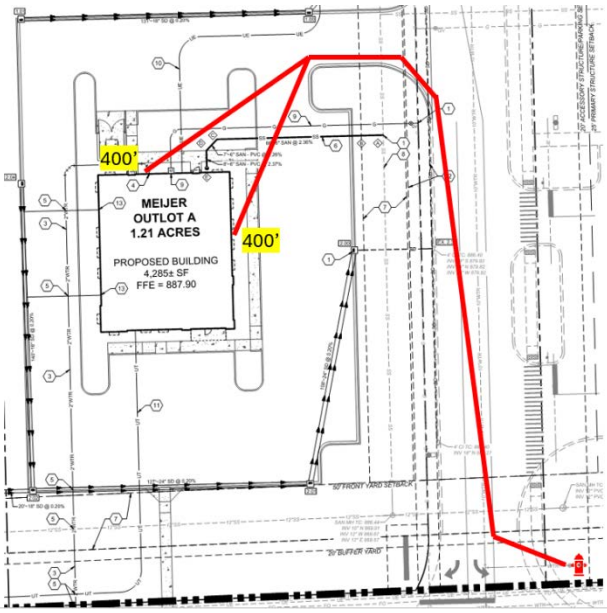

a) None

8) PARKS

a) None

9) FIRE TERRITORY

a) Majority of proposed building is more than 400' from closest fire hydrant along approved route.

10) 2014 IN Fire Code 675 IAC 22-2.5

507.5 Fire hydrant systems. Fire hydrant systems shall comply with Sections 507.5.1 through 507.5.6.

507.5.1 Where required. Where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road, as measured by an *approved* route around the exterior of the facility or building, on-site fire hydrants and mains shall be
provided.

Exceptions:
1. For Group R-3 and Group U occupancies, the distance
requirement shall be 600 feet (183 m).
2. For buildings equipped throughout with an *approved automatic sprinkler system* installed in accordance with Section 903.3.1.1 or 903.3.1.2, the distance requirement shall be 600 feet (183 m).

ACTION REQUIRED: A hydrant shall be placed to satisfy requirement of IFC 507.5.1. Preferred location to be at parking lot entrance at northeast corner of parcel. Location to be approved by Fire Marshal.

11) POLICE

a) Ensure there is no landscape obstructions for egress traffic onto 56th Street (CR 600 N).

12) STORMWATER

a) See attached

13) BROWNSBURG COMMUNITY SCHOOL CORPORATION

a) None

14) **HENDRICKS COUNTY SURVEYOR**

a) None

15) **HENDRICKS COUNTY ENGINEER**

Construction/Stormwater Pollution Prevention Plan Technical Review and Comment

Project Name: MEIJER OUTLOT #338A - HEARTLAND DENTAL
Scope of Project: Dental office and associated infrastructure
Location of Project: 9180 E 56th St, Brownsburg, IN
County(ies): Hendricks
Latitude: N 39.851910 **Longitude:** W -86.359869

Plan Submittal Date: **January 6, 2026**
Plan Review Date: **January 9, 2026**

Plan Preparer: Brianne Vangorder, PE **Affiliation:** Woolpert, Inc.
Address: 333 N Alabama St., Suite 200
City: Indianapolis **State:** IN **Zip:** 46204
Phone: (317) 299-7500 **Cell Phone:** **Email:** BRIANNE.VANGORDER@WOOLPERT.COM

Project Site Owner: **Company Name (if applicable):** Meijer Stores Limited Partnership
Address: 2350 Three Mile Road
City: Grand Rapids **State:** MI **Zip:** 49544
Phone: **Cell Phone:** **Email:**

Plan Reviewer: Mary Atkins, PE, CPESC **Affiliation:** Wessler Engineering **On behalf of:** Town of Brownsburg
Assisted By: Michaela Tauil, CPESC – Wessler Engineering
Address: 6219 South East Street
City: Indianapolis, IN **State:** IN **Zip:** 46227
Phone: 317-788-4551 **Cell Phone:** **Email:** MaryA@wesslerengineering.com

Plan Review Status:		
☐	**Plan is Adequate**	A comprehensive plan review has been completed and it has been determined that the plan satisfies the minimum requirements of the Town of Brownsburg Stormwater Management Ordinance and Construction Standards, and the Construction Stormwater General Permit INRA00000 (Effective 12-18-2021).
☐	**Preliminary Review**	A comprehensive review will not be completed at this time. The plan review authority reserves the right to perform a comprehensive review at a later date, and revisions may be required at that time.
☐	**Conditional Acceptance**	Acceptance of the plan is conditional. The conditional acceptance is contingent upon addressing the issues identified in the comment sections.
☒	**Plan is Deficient**	Significant deficiencies were identified and must be addressed. Refer to the comment sections.

Action:	
☐	**Submit a Notice of Intent:** Submit the Notice of Intent (NOI) online through the IDEM Regulatory ePortal. It is required to upload a copy of this review form when submitting the NOI through the IDEM Regulatory ePortal: (https://stormwater.idem.in.gov/ncore/external/home)
☒	**Do not file a Notice of Intent or commence land-disturbing activities:** Deficiencies must be adequately addressed and an acceptable plan review completed.
☒	**Comments:** Refer to Plan Review Comments Sections of this document.
☒	**Revisions:** Update and submit the revised Construction/Stormwater Pollution Prevention Plan as indicated below.
	☒ Update and submit a complete plan set that addresses plan deficiencies.
	☒ Update and submit a document (narrative and/or plan sheets) that address plan deficiencies.
	☐ Update and submit a complete plan set that addresses plan deficiencies. A comprehensive plan review will not be completed.

Plan Review Information

- *The technical review and comment is intended to evaluate the completeness of the Construction/Stormwater Pollution Prevention Plan for the project. The Plan submitted was not reviewed for the adequacy of engineering design. All measures included in the plan, as well as those recommended in the comments should be evaluated as to their feasibility by a qualified individual with structural measures designed by a qualified engineer. The Plan has not been reviewed for other local, state, or federal permits that may be required to proceed with this project.*
- *Construction activities and unforeseen weather conditions may affect the performance of the erosion and sediment control system, individual measures, or the effectiveness of the plan. The plan must be a flexible document, with provisions to modify or substitute measures as necessary to ensure compliance.*

Priority Site Information:

☐	**Nature and Extent of Construction**	☐	**Close Proximity to Wetlands**
☐	**Close Proximity to Sensitive Area**	☐	**Potential for Direct Runoff to Receiving Waters**
☐	**Steep Topography on Proposed Construction Site**	☒	**Not a Priority Site**

Section A: Construction Plan Elements

Adequate	Deficient	NA	A	*The construction plan elements include general information associated with the project site that are critical for the evaluation of the stormwater pollution prevention plan component. This information includes, but is not limited to an index, resource information, reference maps, grading information, project layout and design, and drainage plan*
☒	☐	☐	**1**	Index of the location of required plan elements in the construction plan
☒	☐	☐	**2**	A vicinity map depicting the project site location in relationship to recognizable local landmarks, towns, and major roads
☒	☐	☐	**3**	Narrative of the nature and purpose of the project
☒	☐	☐	**4**	Latitude and longitude to the nearest fifteen (15) seconds
☒	☐	☐	**5**	Legal description of the project site
☒	☐	☐	**6**	11 X 17-inch plat showing building lot numbers/boundaries and road layout/names
☒	☐	☐	**7**	Boundaries of the one hundred (100) year floodplains, floodway fringes, and floodways
☒	☐	☐	**8**	Land use of all adjacent properties
☒	☐	☐	**9**	Identification of a U.S. EPA approved or established TMDL
☒	☐	☐	**10**	Name(s) of the receiving water(s)
☒	☐	☐	**11**	Identification of discharges to a water on the current 303d list of impaired waters and the pollutant(s) for which it is impaired
☒	☐	☐	**12**	Soil map of the predominant soil types
☒	☐	☐	**13**	Identification and location of all known wetlands, lakes and water courses on or adjacent to the project site (construction plan, existing site layout)
☒	☐	☐	**14**	Identification of any other state or federal water quality permits or authorizations that are required for construction activities– required 50-foot natural buffer
☐	☒	☐	**15**	Identification and delineation of existing cover, including natural buffers
☒	☐	☐	**16**	Existing topography at a contour interval appropriate to indicate drainage patterns
☒	☐	☐	**17**	Location(s) of where run-off enters the project site
☒	☐	☐	**18**	Location(s) of where run-off discharges from the project site prior to land disturbance. Erosion measures required at the discharge point.
☒	☐	☐	**19**	Location of all existing structures on the project site
☒	☐	☐	**20**	Existing permanent retention or detention facilities, including manmade wetlands, designed for the purpose of stormwater management

☒	☐	☐	**21**	Locations where stormwater may be directly discharged into ground water, such as abandoned wells, sinkholes, or karst features
☐	☒	☐	**22**	Size of the project area expressed in acres
☐	☒	☐	**23**	Total expected land disturbance expressed in acres
☒	☐	☐	**24**	Proposed final topography
☒	☐	☐	**25**	Locations and approximate boundaries of all disturbed areas
☐	☒	☐	**26**	Location, size, and dimensions of all stormwater drainage systems, such as culverts, storm sewers, and conveyance channels
☒	☐	☐	**27**	Locations of specific points where stormwater and non-stormwater discharges will leave the project site
☒	☐	☐	**28**	Location of all proposed site improvements, including roads, utilities, lot delineation and identification, proposed structures, and common areas
☒	☐	☐	**29**	Location of all on-site soil stockpiles and borrow areas
☒	☐	☐	**30**	Construction support activities that are expected to be part of the project
☐	☐	☒	**31**	Location of any in-stream activities that are planned for the project including, but not limited to stream crossings and pump arounds

Section A – Comments:

- A15: Sheet C100 does not indicate the existing vegetation on the site.
- A22/A23: Disturbed area is greater than the total project area, please clarify and update as needed.
- A26: Sheet C705 is not included in the plan set. Update the SWPPP to reference the correct sheet.

Section B: Stormwater Pollution Prevention Plan – Erosion and Sediment Control/Project Site Management				
Adequate	**Deficient**	**NA**	**B**	*The construction component of the Stormwater Pollution Prevention Plan includes stormwater quality measures to address erosion, sedimentation, and other pollutants associated with land disturbance and construction activities. Proper implementation of the plan, maintenance of measures, and administering a self-monitoring program is required to manage the project site to minimize the discharge of sediment and other pollutants. Construction activities and unforeseen weather conditions may affect the performance of the erosion and sediment control system, individual measures, or the effectiveness of the plan. The plan must be a flexible document, with provisions to modify or substitute measures as necessary to ensure compliance.*
☒	☐	☐	**1**	Description of the potential pollutant generating sources and pollutants, including all potential non-stormwater discharges
☒	☐	☐	**2**	Stable construction entrance locations and specifications. Plan to clear tracking of sediments on road. Dust suppression plan.
☐	☒	☐	**3**	Specifications for temporary and permanent stabilization. Include seeding and mulching plan and 70% coverage requirement for final stabilization. Include 7-day stabilization requirement.
☐	☒	☐	**4**	Sediment control measures for concentrated flow areas (sediment basins if used have specific requirements)
☒	☐	☐	**5**	Sediment control measures for sheet flow areas
☐	☒	☐	**6**	Run-off control measures
☐	☒	☐	**7**	Stormwater outlet protection locations and specifications
☐	☐	☒	**8**	Grade stabilization structure locations and specifications
☒	☐	☐	**9**	Dewatering applications and management methods
☐	☐	☒	**10**	Measures utilized for work within waterbodies
☒	☐	☐	**11**	Maintenance guidelines for each proposed temporary stormwater quality measure
☐	☒	☐	**12**	Planned construction sequence describing the relationship between implementation of stormwater quality measures in relation to land disturbance
☐	☐	☒	**13**	Provisions for erosion and sediment control on individual building lots regulated under the proposed project

☒	☐	☐	**14**	Material handling and spill prevention and spill response plan meeting the requirements in 327 IAC 2-6.1
☒	☐	☐	**15**	Material handling and storage procedures associated with construction activity. Management of waste materials and dumpsters for runoff and wind. Concrete washout management. Fueling areas. Equipment washing. Application of pesticides, herbicides, insecticides and fertilizers. Disposal of hazardous waste. Washing of paint or grout applicators.

Section B – Comments:

- B3: The SWPP indicates the erosion control blanket will be used and the plans have hatching and a key note for the measure however there is no blanket shown. Evaluate if erosion control blanket is needed on site and show as appropriate.
- B4: Section B4 of the SWPPP indicates temporary sediment basins will be used however these are not shown on the plans. Clarify if these measures will be utilized.
- B6/B7: Section B6 and Section B7 of the SWPPP do not appear to have been updated for this project.
- B12: Per Town of Brownsburg Construction Standards 02101 submit notice of termination (NOT) inspection request to Town prior to filing NOT with IDEM. The note should added to the Plan Sheets specifying this requirement.

Section C: Stormwater Pollution Prevention Plan – Post-Construction

Adequate	Deficient	NA	C	*The post-construction component of the Stormwater Pollution Prevention Plan includes the implementation of stormwater quality measures to address pollutants that will be associated with the final project land use. Post-construction stormwater measures should be functional upon completion of the project. Long term functionality of the measures is critical to their performance and should be monitored and maintained.*
☒	☐	☐	**1**	Description of pollutants and their sources associated with the proposed land use
☒	☐	☐	**2**	Description of proposed post-construction stormwater measures including stormwater detention and water quality treatment according to the local ordinance (refer also to separate technical review comments)
☒	☐	☐	**3**	Plan details for each stormwater measure
☒	☐	☐	**4**	Sequence describing stormwater measure implementation
☒	☐	☐	**5**	Maintenance guidelines for proposed post-construction stormwater measures. Operation and Maintenance (O&M) Manual.
☒	☐	☐	**6**	Entity that will be responsible for operation and maintenance of the post-construction stormwater measures

Section C – Comments:

- O&M Manual: Per the Town of Brownsburg Stormwater Management Ordinance Chapter 151, and O&M Manual shall be provided for alltormwater management facilities including pipes, structures, swales, open channels, and subsurface drains. Provide an O&M Manual meeting the Town of Brownsburg requirements for this specific site and it's infrastructure.

Response to Heartland Dental (Meijer ABE-OD1) – TECH Resubmittal Comments

To: Town of Brownsburg

From: Brianne VanGorder, PE

Date: January 29, 2026

This response to the review comments received via email from the Town of Brownsburg Technical Review Committee on 01/15/2026.

Development Services:

a) Add Vision Clearance Triangles to the Landscape Plan.
Woolpert Response: Triangles are added to sheet C-600.

b) Do you foresee future businesses on this outlot to need access at these points below? That will influence where your landscaping can go. We would like for a stub to be added for connectivity and emergency services.
Woolpert Response: There aren't any plans for development to the North, but a stub street has been added for any future development to the West.

c) Add lot coverage percentage to civil plans (impervious surface %).
Woolpert Response: See sheet C-001 for this information per the stormwater review.

d) Label streets and put private or public designation under the name with the road width (Ex. 56' Public ROW)
Woolpert Response: This information has been added to the plan sheets.

Construction/Stormwater Pollution Prevention Plan Technical Review

1. A15: Sheet C100 does not indicate the existing vegetation on the site.
   Woolpert Response: Information added to sheet C-100.

2. A22/A23: Disturbed area is greater than the total project area, please clarify and update as needed.
   Woolpert Response: Areas revised to reflect the same acreage.

3. A26: Sheet C705 is not included in the plan set. Update the SWPPP to reference the correct sheet.
   Woolpert Response: Referenced information has been updated.

4. B3: The SWPP indicates the erosion control blanket will be used and the plans have hatching and a key note for the measure however there is no blanket shown. Evaluate if erosion control blanket is needed on site and show as appropriate.
   Woolpert Response: Erosion control blanket is shown on C-311

5. B4: Section B4 of the SWPPP indicates temporary sediment basins will be used however these are not shown on the plans. Clarify if these measures will be utilized.
   Woolpert Response: No sediment basin will be used. The section is updated as such.

6. B6/B7: Section B6 and Section B7 of the SWPPP do not appear to have been updated for this project.
   Woolpert Response: These sections are updated.

7. B12: Per Town of Brownsburg Construction Standards 02101 submit notice of termination (NOT) inspection request to Town prior to filing NOT with IDEM. The note should added to the Plan Sheets specifying this requirement.
   Woolpert Response: Note has been added to the construction sequence on sheet C-311.

8. O&M Manual: Per the Town of Brownsburg Stormwater Management Ordinance Chapter 151, and O&M Manual shall be provided for all stormwater management facilities including pipes, structures, swales, open channels, and subsurface drains. Provide an O&M Manual meeting the Town of Brownsburg requirements for this specific site and it's infrastructure.
   Woolpert Response: O&M Manual is provided with this submittal.

WOOLPERT

Stormwater Management Summary

To: Town of Brownsburg Engineering Department

From: Brianne VanGorder, P.E.

Date: January 29, 2026

Subject: Meijer #338A-OD1 – Stormwater Management Summary

INTRODUCTION

This Stormwater Management summary was prepared to summarize the drainage conditions and analysis for the proposed Heartland Dental in the Meijer outlot development located at 9180 E. 56th Street, Brownsburg, Indiana. Detention facilities are designed and constructed by the overall developer as established by the Meijer Store ABE Stormwater Management Report developed by Woolpert, Inc. dated September 5, 2023, and revised January 10, 2025. See Exhibit 3 for a copy of this report.

SITE DESCRIPTION

1. Existing Conditions: Outlot A of the Meijer subdivision, which is 1.21-acres. The lot has been prepared for future development. It is rough graded for a building pad and drainage facilities provided.

2. Proposed Conditions: A Heartland Dental with associated parking areas and access drives will be constructed on the 1.21-acre site. Storm sewer and utility services will be constructed and connected to the proposed subdivision utility infrastructure. Stormwater runoff will be managed within stormwater management facilities that are designed and constructed by the overall development. See FIG-1B of the Meijer Subdivision Stormwater Management Report for the Post-Development Project Area Drainage Plan. See FIG-1D of the Meijer Subdivision Stormwater Management Report for the subdivision Inlet Drainage Plan.

STORM SEWER DESIGN

See Exhibit 1 for the Inlet Drainage Plan. The storm sewer system is divided into multiple drainage areas, all of which drain to a proposed catch basin or curb inlet. The proposed drainage structures discharge to existing drainage structures as part of the Meijer subdivision. The onsite storm sewers were designed in accordance with the Town of Brownsburg Codified Ordinances. The storm sewers are designed to convey the 10-year storm event. An n-value of 0.012 was used for the storm design calculations. See Exhibit 2 for the post-developed weighted C calculations and storm sewer design. The areas draining to Structures 1.01 and 2.03 are assumed to include future development on Outlot D. As such, the runoff coefficient reflects that area being 75% impervious and 25% pervious. Based on this analysis, the Meijer subdivision storm sewer has the capacity for the proposed Heartland Dental development.

INTRODUCTION

This stormwater management report was prepared to provide the methodology and control measures that will be utilized to control stormwater runoff from the proposed Meijer development in post-construction conditions. The development will be constructed at 9202 East 56th St, Brownsburg, Hendricks County, IN. The site is bordered by East 56th Street (E CR 600 N) to the south, N CR 900 E to the west, undeveloped agricultural land to the north, and the right-of-way and future stormwater management basin for the Ronald Reagan Parkway extension to the east.

The Town of Brownsburg Stormwater Management regulations were used to design the stormwater management system, along with the Hendricks County required release rates. HydroCAD was used to simulate pre- and post-developed runoff and to model post-developed stormwater management routing.

PROJECT DESCRIPTION

The 31.63-acre site will be developed as a Meijer supercenter and mExpress convenience/fueling store with associated parking area, access drives and landscaping. Four entrance drives will be constructed to access the site: two on East 56th Street (E CR 600 N) and two on N CR 900 E. Storm sewer and utility services will be constructed and connect to the existing utility infrastructure. Two proposed above-ground stormwater management basins and an underground stormwater management system will provide detention and water quality treatment for the Meijer development in accordance with the Town of Brownsburg and Hendricks County requirements. Additionally, the commercial outlots to be constructed in the future have been considered in the proposed design. The proposed stormwater management system is designed to manage all detention from the commercial outlots.

PRE-DEVELOPED SITE CONDITIONS

See Figure 1A for the Pre-Developed Drainage Plan and Figure 1C for the Site Watershed Map. The existing 31.63-acre site is an undeveloped agricultural field. The site is composed primarily of poorly drained Hydrologic Soil Group (HSG) C/D (Treaty Silt Loam) and somewhat poorly drained HSG B/D (Crosby Silt Loam) soils. The site slopes from northwest to southeast at roughly 0.50 – 2.00 percent. Existing storm runoff sheet flows to a common low point at the southeast corner of the site. Additionally, there is an existing 27” storm pipe running West to East across the site. This pipe conveys stormwater discharge from the Hession Farms Subdivision from the west side of CR 900 as well as discharge from the OrthoIndy detention basin located to the southwest of the subject site. The 27” pipe increases in size to a 36” pipe immediately downstream (east) of the subject site and discharges to School Branch. Immediately east of the subject site is the South Detention Pond for the Ronald Regan Extension Road Project, currently under construction. This detention basin is owned and maintained by the Hendricks County Engineering Department. As part of the construction, the 36” discharge pipe from Hession Farms and OrthoIndy will be rerouted around the new detention basin. All stormwater discharge from the South Detention Pond and the 36” pipe will discharge to School Branch. Lastly, the southern portion of the site is bordered by two outlots owned by OrthoIndy, B-1 and B-2, 1.70 acres and 1.80 acres in area, respectively. These outlots will be developed by others but existing runoff within these areas sheet flows from west to east towards the common low point on the subject property.

POST-DEVELOPED SITE CONDITIONS

See Figure 1B for the Post-Developed Drainage Plan. The Meijer supercenter and convenience store as well as the outlots of the development will be constructed on the 31.63-acre site. The existing 27” storm pipe will remain undisturbed throughout construction. Storm sewer and utility services will be constructed and connect to existing utility infrastructure. The proposed stormwater management system will provide detention and water quality treatment for the development per Town of Brownsburg and Hendricks County requirements.

The proposed stormwater management system is separated into two detention systems for the north and south portions of the site generally delineated by the existing 27” storm pipe running West to East across the site. The majority of the north portion of the site discharges to the above-ground wet detention basin (Pond 1P) located along the northern and eastern property lines. Pond 1P provides detention volume and water quality for the Meijer supercenter store, northern parking lots, Outlots B & C and off-site drainage north of the subject property. The on-site drainage areas referred to as A-1, Out B, and Out C will be detained within the basin. The off-site drainage areas north of the subject property referred to as D-1 and D-2 will bypass through the basin as uncontrolled flow. The small area along

the perimeter referred to as C-2 will remain uncontrolled and contribute to the total site runoff. Pond 1P has a wet bottom elevation of 875.00, a normal pool elevation of 877.29, and a top of bank elevation of 885.00.

The majority of the south portion of the site discharges to the combined above-ground basin and underground detention facility (Pond 2P) located north of Outlot A and the mExpress. Pond 2P provides detention volume and water quality for the Meijer convenience store/fueling station, southern parking lots, and Outlot A. The on-site drainage areas referred to as A-2 and Out A will be detained within the detention system. Small areas along the perimeter referred to as C-3, C-4, C-5, C-6, and C-7 will remain uncontrolled and contribute to the total site runoff. The underground stormwater management facility and the above-ground detention basin are connected via a 42" equalization pipe. The underground detention system does not accept any site runoff but works in combination with the above-ground detention basin to provide additional storage volume. The 42” equalizer pipe will begin to stage as the above-ground detention basin fills up. Runoff volume will continue to stage between the above-ground detention basin, the 42” equalizer pipe and the underground detention system. Runoff volume will flow into and out of the underground detention system via the 42” pipe as the above-ground detention basin fills up and begins to outlet from the outlet control structure, 3.02, at a controlled release rate. Both systems are hydraulically connected and have been modeled as one entity. Pond 2P has a dry bottom elevation of 877.38 with a top of bank elevation of 886.00. The underground detention system is a CONTECH 72” CMP system with stone backfill.

For each post-developed drainage area, the acreage, CN value, and time of concentration were determined. The CN value is weighted based on an impervious CN of 98 and an open space, good condition CN of 80. To comply with Town of Brownsburg and Hendricks County requirements, the future outlots were assumed to have a CN of 95 for commercial development. In post-developed conditions, the HSG has been modeled as Group D. The post-developed time of concentrations for detained developed areas were calculated to be 15.0 minutes assuming 10 minutes of overland flow and 5 minutes of pipe flow. The post-developed time of concentrations for the undetained perimeter areas were assumed to be 6.0 minutes based on the minimum allowable per TR-55 guidance.

The outlet control structures for each detention basin discharge to the existing 27” pipe in accordance with Watershed-Specific Release Rates as coordinated with the Hendricks County Drainage Board. An analysis of the existing 27” pipe running through the subject site indicates that the pipe has sufficient capacity to convey the detained runoff from the proposed development to School Branch. See Appendix 1.6 for the analysis.

Emergency overflow spillways have been provided for both above-ground detention basins and are designed to directly discharge into the future Ronald Reagan detention basin east of the site. An analysis of the Ronald Reagan Parkway detention basin indicates that the emergency spillway has sufficient capacity to allow for the potential overflow from the Meijer basin emergency spillways. See Appendix 1.3 for the Emergency Spillway Calculations.

DETENTION DESIGN

Stormwater detention will be provided for the proposed development in accordance with the Town of Brownsburg and Hendricks County design requirements. Per a comment received from the Hendricks County Drainage Board on January 4th, 2024, the allowable release rates for the 10- and 100-year storm events have been calculated based on 0.1 cfs per acre and 0.3 cfs per acre, respectively. Table 1.1 on the following page provides the drainage areas for each detention system as well as the allowable release rates. Tables 1.2 and 1.3 provide summaries of the designed release rates. See Appendices 1.1 and 1.2 for HydroCAD Inputs and Results.

POND 1P (ABOVE-GROUND BASIN) DETENTION DESIGN

The proposed above-ground stormwater management system is designed so that runoff from the post-developed Meijer supercenter store, northern parking lots, Outlots B & C will be managed within the detention basin up to and including the 100-year storm. Runoff from the drainage areas referred to as A-1, Out B, and Out C will discharge to the proposed basin. A 40" X 40" structure will be modified to serve as the outlet control structure to control the post-developed release rates for this area. A 4" orifice at invert 877.29 will function as the primary control device. A 12" orifice at invert 882.14 will function as the secondary control device. The grate of the outlet control structure will have an elevation of 884.54. The stormwater management system will outlet to the existing 27" pipe through a 12" pipe at invert 877.29. An emergency spillway will be provided at elevation 884.54 and the top of the basin is at 885.00. See Appendix 1.4 for the Outlet Structure Detail.

POND 2P (COMBINED ABOVE-GROUND & UNDERGROUND BASIN) DETENTION DESIGN

The proposed combined above-ground basin and 72" underground stormwater management system is designed so that runoff from the post-developed Meijer convenience store/fueling station, southern parking lots, and Outlot A will be managed within the detention basin up to and including the 100-year storm. Runoff from the drainage areas referred to as A-2 and Out A will discharge to the proposed basin. A storm structure will be modified to serve as the outlet control structure to control the post-developed release rates for this area. A 4" orifice at invert 877.38 will function as the primary control device. A 12" orifice at invert 882.61 will function as the secondary control device. The grate of the outlet control structure will have an elevation of 885.40. The stormwater management system will outlet to the existing 27" pipe through a 12" pipe at invert 877.38. An emergency spillway will be provided at elevation 885.40 and the top of the basin is at 886.00. See Appendix 1.4 for the Outlet Structure and Underground Detention System Details.

Per comments received from the Hendricks County Drainage Board on January 4th, 2024, the underground detention system was requested to be modeled separately from the above-ground detention basin 2P. Due to HydroCAD modeling software limitations, the model produced oscillations in the hydrograph output for the south pond. After reviewing various HydroCAD help documents, it is recommended to model these systems as a single detention facility for accurate routing.

Table 1.1: Allowable Release Rate Calculations

Rows highlighted orange denote drainage areas that are detained within the detention systems. Non-highlighted rows indicate drainage areas that are bypassed within the detention systems.

Detention System 1P (North Detention Basin)

Site Type	Node Name	Area (acres)	10-yr Existing Release Rate (cfs)	10-yr Allowable (0.1 cfs/acre)	100-yr Existing Release Rate (cfs)	100-yr Allowable (0.3 cfs/acre)

	Total Area	4.54					
				Total 10-yr Allowable Release Rate =		11.42	cfs
				Total 100-yr Allowable Release Rate =		20.13	cfs

Total On-Site 10-YR Allowable Release Rate =	3.16	cfs
Total On-Site 100-YR Allowable Release Rate =	9.48	cfs

Total Site 10-YR Allowable Release Rate =	68.29	cfs
Total Site 100-YR Allowable Release Rate =	115.54	cfs

Table 1.2: On-Site Release Rate Summary

Site Area	10-YR Allowable Release Rate	10-YR Design Release Rate	WSE	100-YR Allowable Release Rate	100-YR Design Release Rate	WSE
Pond 1P	2.23 cfs	0.91 cfs	882.14’	6.68 cfs	4.00 cfs	883.27’
Pond 2P	0.83 cfs	0.95 cfs*	882.61’	2.49 cfs	5.19 cfs*	884.29’
Undetained Areas	0.10 cfs			0.31 cfs		
Total Site Runoff	3.16 cfs	5.62 cfs*		9.48 cfs	9.08 cfs	

*Note:
The design release rates for the detention system are above the calculated allowable release rates. This is due to the minimum orifice size of 4” as stated in the Town of Brownsburg Stormwater Manual.

Table 1.3: On-Site & Off-Site Release Rate Summary

Site Area	10-YR Allowable Release Rate	10-YR Design Release Rate	WSE	100-YR Allowable Release Rate	100-YR Design Release Rate	WSE
Pond 1P	56.04 cfs	6.24 cfs	884.48’	92.92 cfs	61.91 cfs	884.86’
Pond 2P	0.83 cfs	0.95 cfs*	882.61’	2.49 cfs	5.19 cfs*	884.29’
Undetained Areas	11.42 cfs			20.13 cfs		
Total Site Runoff	68.29 cfs	15.13 cfs		115.54 cfs	69.48 cfs	

*Note:
The design release rates for the detention system are above the calculated allowable release rates. This is due to the minimum orifice size of 4” as stated in the Town of Brownsburg Stormwater Manual. However, once both on-site detained and off-site bypass areas are considered, actual release rates for both the 10- and 100-year design storms are below allowable release rates.

STORM WATER QUALITY

Stormwater quality will be provided by a treatment train of three Hydrodynamic Separators, Structures 1.01, 1.31, & 2.01, to allow for pre-treatment of the stormwater runoff prior to entering the detention systems and the detention basins. Applicable water quality flow rates were used to size each structure to adhere to Town of Brownsburg requirements. Each water quality structure is specified as a Cascade Separator™ by CONTECH Engineering which has independent third-party testing showing 80% TSS removal rates as required by the Town of Brownsburg. See Appendix 1.5 for Water Quality Structure Sizing.

STORM SEWER DESIGN

See Figure 1D for the Inlet Drainage Plan. The storm sewer system for the site is divided into multiple drainage areas, all of which typically drain to a proposed catch basin or curb inlet and discharge to one of the proposed detention basins. The storm sewer is sized to convey the 10-year storm event and keep the hydraulic grade line within the pipe per Town of Brownsburg and Hendricks County requirements. The system was also designed to keep the hydraulic grade line below the rims of the drainage structures for the 25-year storm event. An n-value of 0.012 was used for the storm sewer design calculations. Additionally, a ponding analysis was completed for all drainage structures with the assumption that 50% of the open grate area for each inlet was blocked. The castings assumed for this analysis adhere to the Town of Brownsburg Construction Standards and utilize applicable Neenah casting types. See Appendices 2.2, 2.3 and 2.4 for Hydraflow Storm Sewers Calculations.

Per Town of Brownsburg regulations, the 100-yr ponding limits under the assumption that all storm inlets are at capacity have been provided on the proposed grading plan. The ponding limits at storm structures 1.02 and 1.03 include the truck dock area and abut the east building face. The pavement elevations in this area are set at or above the 100-yr water surface elevation of the detention basin, so the water elevations in the pond will not impact or flood this area. This ponding would only be a result of clogging or capacity issues with the storm sewer inlet grates to receive surface runoff. Additionally, per Meijer prototypical design standards, the truck dock entrance doors are set 50” above finished grade in this area to align with the main store finished floor elevation and the concrete pad for the entrance is sloped away from the building face at 1.00% to allow for positive drainage. Although the ponding limits abut the building face, site runoff will not pond up to the truck dock entrance doors, even in a case of clogging or capacity issues. The structural integrity of the building foundation will not be impacted by the ponding. The ponding will fluctuate as the detention

basin fills up and drains, so no permanent ponding will occur in this area. In summary, the design is not anticipated to impact the building foundation.

CONCLUSION

The proposed design meets the requirements outlined in the Town of Brownsburg and Hendricks County Stormwater Technical Standards Manual Adopted October 2017.

GRADING NOTES

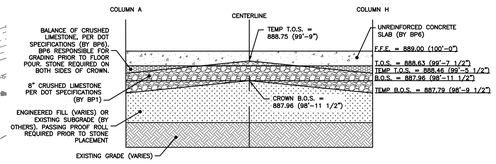

1. ALL SPOT ELEVATIONS ARE TO:
   TOP OF PAVEMENT – (TP)
   TOP OF SLAB – (TS)
   TOP OF CURB – (TC)
   TOP OF WALL – (TW)
   GUTTER PAN – (GP)
   UNLESS NOTED OTHERWISE.
2. CONTOURS SHOWN ARE FOR REFERENCE ONLY.
3. PROVIDE POSITIVE DRAINAGE AT ALL TIMES TO ENSURE NO STANDING WATER WITHIN PAVEMENT, BUILDING PAD, OR GREEN AREAS.
4. FOR ALL CURB ISLANDS, CENTER OF ISLANDS TO BE A MINIMUM OF 6" HIGHER THAN TOP OF CURB.
5. RESTORE ALL STREET SURFACES, DRIVEWAYS, CULVERTS, ROADSIDE DRAINAGE DITCHES, AND OTHER PUBLIC OR PRIVATE STRUCTURES THAT ARE DISTURBED OR DAMAGED AS A RESULT OF CONSTRUCTION ACTIVITIES TO MATCH AT A MINIMUM EXISTING CONDITIONS.
6. CONTRACTOR'S MANNER AND METHOD OF INGRESS AND EGRESS WITH RESPECT TO THE PROJECT AREAS SHALL IN NO WAY PROHIBIT OR DISTURB NORMAL PEDESTRIAN OR VEHICULAR TRAFFIC IN THE VICINITY AND IS SUBJECT TO REGULATION AND WRITTEN APPROVAL OF APPROPRIATE GOVERNING AGENCIES.
7. FINISHED SUBGRADE SURFACE SHALL NOT BE MORE THAN 0.1 FEET ABOVE OR BELOW ESTABLISHED FINISHED SUBGRADE ELEVATIONS AND ALL GROUND SURFACES SHALL VARY UNIFORMLY BETWEEN INDICATED ELEVATIONS. FINISHED DITCHES SHALL BE GRADED TO ALLOW FOR PROPER DRAINAGE WITHOUT PONDING AND IN A MANNER THAT WILL MINIMIZE EROSION.
8. VERIFY THE HORIZONTAL AND VERTICAL LOCATION OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.
9. UTILITIES SHALL END 5 FEET FROM THE BUILDING UNLESS NOTED OTHERWISE.
10. PROTECT AND MAINTAIN CROSSINGS OF OTHER UTILITIES.
11. ALL MATERIAL, SPECIFICATIONS, AND CONSTRUCTION METHODS SHALL BE IN CONFORMANCE WITH MEIJER STANDARD SPECIFICATIONS AND THOSE OF THE APPROPRIATE UTILITY COMPANIES.
12. BEFORE COMMENCING WORK, CONTRACTOR SHALL VERIFY ALL LOCATIONS AND ELEVATIONS OF EXISTING UTILITIES.
13. ACCORDING TO THE FLOOD INSURANCE RATE MAP – MAP NUMBER 18063C0176E, PUBLISHED BY THE FEDERAL EMERGENCY MANAGEMENT AGENCY WITH A REVISION DATE OF JUNE 15, 2022, WHICH IS THE MOST CURRENT FLOOD INSURANCE RATE MAP AVAILABLE ON FEMA'S WEBSITE, THIS SITE IS LOCATED IN ZONE "X" (NO SCREEN) – AREAS OF MINIMAL FLOOD HAZARD. THE ABOVE REFERENCED FLOODPLAIN MAP WAS UTILIZED FOR THIS DETERMINATION.
14. ENTRY LANDINGS PART OF AN ACCESSIBLE ROUTE SHALL MAINTAIN A MAXIMUM SLOPE OF 1.50% IN ALL DIRECTIONS. THIS IS INTENDED TO ALLOW FOR CONSTRUCTION TOLERANCES. SLOPES STEEPER THAN 1:48 SHALL NOT BE PERMITTED THUS MEETING THE REQUIREMENTS OF THE DEPARTMENT OF JUSTICE 2010 ADA STANDARDS FOR ACCESSIBLE DESIGN. ALL SLOPES TO BE VERIFIED AS ACCEPTABLE BY USING A 2'–0" LEVEL.

GRADING NOTES

1. ALL SPOT ELEVATIONS ARE TO:
   TOP OF PAVEMENT – (TP)
   TOP OF SLAB – (TS)
   TOP OF CURB – (TC)
   TOP OF WALL – (TW)
   GUTTER PAN – (GP)
   UNLESS NOTED OTHERWISE.
2. CONTOURS SHOWN ARE FOR REFERENCE ONLY.
3. PROVIDE POSITIVE DRAINAGE AT ALL TIMES TO ENSURE NO STANDING WATER WITHIN PAVEMENT, BUILDING PAD, OR GREEN AREAS.
4. FOR ALL CURB ISLANDS, CENTER OF ISLANDS TO BE A MINIMUM OF 6" HIGHER THAN TOP OF CURB.
5. RESTORE ALL STREET SURFACES, DRIVEWAYS, CULVERTS, ROADSIDE DRAINAGE DITCHES, AND OTHER PUBLIC OR PRIVATE STRUCTURES THAT ARE DISTURBED OR DAMAGED AS A RESULT OF CONSTRUCTION ACTIVITIES TO MATCH AT A MINIMUM EXISTING CONDITIONS.
6. CONTRACTOR'S MANNER AND METHOD OF INGRESS AND EGRESS WITH RESPECT TO THE PROJECT AREAS SHALL IN NO WAY PROHIBIT OR DISTURB NORMAL PEDESTRIAN OR VEHICULAR TRAFFIC IN THE VICINITY AND IS SUBJECT TO REGULATION AND WRITTEN APPROVAL OF APPROPRIATE GOVERNING AGENCIES.
7. FINISHED SUBGRADE SURFACE SHALL NOT BE MORE THAN 0.1 FEET ABOVE OR BELOW ESTABLISHED FINISHED SUBGRADE ELEVATIONS AND ALL GROUND SURFACES SHALL VARY UNIFORMLY BETWEEN INDICATED ELEVATIONS. FINISHED DITCHES SHALL BE GRADED TO ALLOW FOR PROPER DRAINAGE WITHOUT PONDING AND IN A MANNER THAT WILL MINIMIZE EROSION.
8. VERIFY THE HORIZONTAL AND VERTICAL LOCATION OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.
9. UTILITIES SHALL END 5 FEET FROM THE BUILDING UNLESS NOTED OTHERWISE.
10. PROTECT AND MAINTAIN CROSSINGS OF OTHER UTILITIES.
11. ALL MATERIAL, SPECIFICATIONS, AND CONSTRUCTION METHODS SHALL BE IN CONFORMANCE WITH MEIJER STANDARD SPECIFICATIONS AND THOSE OF THE APPROPRIATE UTILITY COMPANIES.
12. BEFORE COMMENCING WORK, CONTRACTOR SHALL VERIFY ALL LOCATIONS AND ELEVATIONS OF EXISTING UTILITIES.
13. ACCORDING TO THE FLOOD INSURANCE RATE MAP – MAP NUMBER 18063C0176E, PUBLISHED BY THE FEDERAL EMERGENCY MANAGEMENT AGENCY WITH A REVISION DATE OF JUNE 15, 2022, WHICH IS THE MOST CURRENT FLOOD INSURANCE RATE MAP AVAILABLE ON FEMA'S WEBSITE, THIS SITE IS LOCATED IN ZONE "X" (NO SCREEN) – AREAS OF MINIMAL FLOOD HAZARD. THE ABOVE REFERENCED FLOODPLAIN MAP WAS UTILIZED FOR THIS DETERMINATION.
14. ENTRY LANDINGS PART OF AN ACCESSIBLE ROUTE SHALL MAINTAIN A MAXIMUM SLOPE OF 1.50% IN ALL DIRECTIONS. THIS IS INTENDED TO ALLOW FOR CONSTRUCTION TOLERANCES. SLOPES STEEPER THAN 1:48 SHALL NOT BE PERMITTED THUS MEETING THE REQUIREMENTS OF THE DEPARTMENT OF JUSTICE 2010 ADA STANDARDS FOR ACCESSIBLE DESIGN. FIGURE 3 – UTILITY PLANS

UTILITIES RESPONSIBILITIES SUMMARY

1. "WORK" IS DEFINED AS INSTALLATION OF SUBJECT UTILITY, INCLUDING TRENCHING, BEDDING, BACKFILL, AS WELL AS DEMOLITION AND RESTORATION OF THE DISTURBED AREA. INSPECTIONS ARE NOT INCLUDED. "INSTALL" MEANS PROVIDE AND INSTALL UNLESS NOTED OTHERWISE.
2. SANITARY SEWER: MEIJER CONTRACTOR (MC) SHALL PERFORM ALL WORK INCLUDING MAKING CONNECTION TO THE EXISTING MAIN. MC TO SCHEDULE PRE-CONSTRUCTION MEETING WITH HENDRICKS COUNTY REGIONAL SEWER DISTRICT (HCRSD) PRIOR TO STARTING CONSTRUCTION. MC SHALL NOTIFY HCRSD 48 HOURS PRIOR TO ANY SANITARY INSTALLATION AND TESTING. HCRSD TO BE PRESENT FOR ALL TESTING.
3. WATER: MC SHALL PERFORM ALL WORK ASSOCIATED WITH INSTALLATION OF THE WATER SERVICE LINE. CITIZENS ENERGY GROUP (CEG) SHALL MAKE THE TAP ON THE EXISTING MAIN. MC SHALL CONNECT TO THE TAP. MC SHALL CONTACT CEG TO SCHEDULE A PRE-CONSTRUCTION MEETING PRIOR TO INSTALLING FIRE PROTECTION SERVICES. MC TO NOTIFY THE BROWNSBURG FIRE DEPARTMENT (BFD) 48 HOURS PRIOR TO INSTALLATION OF WATER AND FIRE SERVICE LINES, BUT PRESENCE IS NOT REQUIRED. BFD TO BE PRESENT TO WITNESS ACCEPTANCE TESTING.
4. STORM SEWER: MC SHALL PERFORM ALL WORK. MC SHALL CONTACT THE TOWN OF BROWNSBURG WHEN PERFORMING WORK IN THE RIGHT-OF-WAY TO DETERMINE CONTRACTOR REQUIREMENTS.
5. GAS: FOR BOTH BUILDINGS, THE GAS COMPANY, CENTERPOINT ENERGY (CE), SHALL PROVIDE ALL SERVICE PIPING AND EQUIPMENT FROM THE POINT OF CONNECTION AT THE RIGHT-OF-WAY UP TO AND INCLUDING THE GAS METER. MC TO INSTALL ALL SERVICE PIPING FROM THE POINT OF CONNECTION AT THE RIGHT-OF-WAY TO THE GAS METER. CE TO INSTALL GAS METER ONCE MC HAS INSTALLED THE STUBBED OUT CONNECTION. MC TO PROVIDE AND INSTALL ALL PIPING AND MATERIALS DOWNSTREAM OF THE GAS METER. MC SHALL INSTALL METER PROTECTION BOLLARDS PER CE REQUIREMENTS.
6. COMMUNICATIONS:
   - 6.1. MAIN STORE: MC SHALL ISNTALL ALL CONDUIT AND MANHOLES. MC SHALL COORDINATE WITH MEIJER IT AND EVERSTREAM TO COORDINATE WITH MEIJER-SELECTED COMMUNICATIONS PROVIDER WHO SHALL PULL ALL WIRING AND MAKE CONNECTIONS.
   - 6.2. mEXPRESS: MC SHALL INSTALL HANDHOLES AND WIRING. MC SHALL COORDINATE WITH MEIJER IT AND EVERSTREAM TO MAKE CONNECTIONS.
7. ELECTRIC:
   - 7.1. MAIN STORE: THE ELECTRIC COMPANY, HENDRICKS POWER (HP), SHALL PROVIDE AND INSTALL ALL CONDUIT, CONDUCTOR, AND EQUIPMENT FROM THE POINT OF CONNECTION UP TO THE PRIMARY METERING CABINET. MC TO PROVIDE AND INSTALL ALL CONDUIT, CONDUCTOR, AND EQUIPMENT DOWNSTREAM OF THE METERING CABINET.
   - 7.2. mEXPRESS: HP SHALL PROVIDE AND INSTALL ALL CONDUIT, CONDUCTOR, AND EQUIPMENT FROM THE POINT OF CONNECTION UP TO AND INCLUDING THE TRANSFORMER. HP TO PROVIDE TRANSFORMER PAD. HP TO INSTALL METER ON SIDE OF TRANSFORMER.

GENERAL NOTES

1. THE CONTRACTOR IS RESPONSIBLE FOR ALL RESTORATION AND CLEAN-UP ASSOCIATED WITH THE INSTALLATION OF THE PROPOSED UTILITIES WITHIN THE PUBLIC RIGHT-OF-WAY AND EASEMENT.
2. VERIFY THE HORIZONTAL AND VERTICAL LOCATION OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.
3. UTILITIES SHALL END 5 FEET FROM THE BUILDING UNLESS NOTED OTHERWISE.
4. PROTECT AND MAINTAIN CROSSINGS OF OTHER UTILITIES.
5. ALL DIMENSIONS ARE TO COLUMN LINE, CENTERLINE OF PIPE, CENTER OF MANHOLE, EDGE OF PAVEMENT OR BACK OF CURB WHERE APPLICABLE. DIMENSIONS TO COLUMN LINE ASSUME 9" THICK BUILDING WALL.
6. ALL MATERIAL, SPECIFICATIONS, AND CONSTRUCTION METHODS SHALL BE IN CONFORMANCE WITH MEIJER STANDARD SPECIFICATIONS AND DETAILS AND TOWN OF BROWNSBURG AND HENDRICKS COUNTY REQUIREMENTS.
7. CONTRACTOR SHALL PERFORM FULL DEPTH REMOVAL AND REPLACEMENT OF EXISTING PAVEMENT PER MEIJER REQUIREMENTS AT PROPOSED UTILITIES INSTALLATION IN EXISTING PAVED AREAS.
8. PROVIDE MINIMUM 18" VERTICAL CLEARANCE AT ALL UTILITY CROSSINGS.

40. UNDERGROUND COMMUNICATIONS SERVICE. SEE SHEET C-800.
41. HELIUM CABINET. SEE P-405.
42. PHARMACY DETECTION LOOP. VENDOR TO SAWCUT ASPHALT, INSTALL DETECTION LOOP, AND SEAL ASPHALT.

UTILITIES SUMMARY

SUPERCENTER:

ELECTRIC: PRIMARY SERVICE, PREFERRED BASED ON RATE, MEIJER OWNED TRANSFORMER 2,000 KVA, SECONDARY 480/277V, 3PH, 4W GRD WYE.

PHONE: FIBER OPTIC ENTRANCE CABLE.

GAS: 11,966 CFH @ 2 PSI (5 PSI IF AVAILABLE) FOR 1.5 STORE.

WATER: 4" DIA. PIPE WITH 2" METER, 10,000 GPD SUMMER, 5,000 GPD WINTER, 150 GPM PEAK USE, 65 PSI AFTER BACKFLOW PREVENTER.

FIRE PROTECTION: 10" DIA. MIN., 1,575 GPM @ 35 PSI AT BASE OF RISER.

SANITARY SEWER: 5,000 GPD AVG., 40 GPM PEAK FLOW.

IRRIGATION: DESIGN TO BE PROVIDED AS PART OF FINAL DESIGN.

MEXPRESS:

ELECTRIC: SECONDARY SERVICE PREFERRED BASED ON RATE. PAD-MOUNT UTILITY OWNED TRANSFORMER, 600 AMP, 120/208V, 3PH, 4W SECONDARY SERVICE. TRANSFORMER SIZED AND FURNISHED BY UTILITY COMPANY.

PHONE: FED FROM SUPERCENTER, TYPICALLY NO DEDICATED SERVICE.

GAS: 394 CFH @ 7" WC

WATER: 2" DIA., 1.5" METER, 50 GPM PEAK USE, 65 PSI AFTER BACKFLOW PREVENTER. 750 GPD SUMMER, 500 GPD NON-SUMMER.

FIRE PROTECTION: NOT REQUIRED.

SANITARY SEWER: 500 GPD AVG. 20 GPM PEAK.

STORM NOTES

1. INSTALL UNDERDRAINS AT ALL PROPOSED CATCH BASINS.
2. ALL UNDERDRAINS ARE 4" DIAMETER AT MINIMUM SLOPE OF 0.50% UNLESS OTHERWISE NOTED.
3. END SECTIONS ARE INCLUDED IN PIPE LENGTHS SHOWN.
4. PROVIDE INLET FILTER FOR ALL CATCH BASIN INLETS.
5. PROVIDE RIP RAP AT ALL END SECTIONS UNLESS OTHERWISE NOTED.
6. ALL STORM GRATE CASTINGS TO BE PRE-CAST WITH A POLLUTION PREVENTION MESSAGE PERMANENTLY ATTACHED, PER TOWN OF BROWNSBURG STANDARD DETAILS SW-13 AND SW-14, POLLUTION PREVENTION MESSAGE TO STATE, AT MINIMUM, "DUMP NO WASTE <FISH ICON> DRAINGS TO WATERWAY" IN MINIMUM 1 INCH HIGH LETTERS.
7. EXISTING CHAIR BACK CURB DRAIN INLETS THAT ARE LOCATED IN THE NEW DRIVE ENTRANCES TO 56TH STREET ARE TO BE CONVERTED TO FLAT GRATE STORM INLET PER TOWN OF BROWNSBURG REQUIREMENTS. CASTINGS WILL HAVE TO BE SPECIAL ORDERED. CONTRACTOR TO PROVIDE ONE ADDITIONAL CASTING TO BROWNSBURG STREET DEPARTMENT AS SPARE STOCK FOR EACH CONVERSION FOR A TOTAL OF SIX NEW CASTINGS.

SANITARY NOTES

1. ROOF DRAINS, FOUNDATION DRAINS, AND OTHER CLEAN WATER CONNECTIONS TO THE SANITARY SEWER ARE PROHIBITED.
2. A CONTINUOUS 20' LENGTH OF SDR-35 PVC SHALL BE EXTENDED FROM THE YARD CLEANOUTS AT THE FRONT OF THE BUILDING. COORDINATE WITH PLUMBING CONTRACTOR ON LOCATION AND ROUTING.
3. FERNCO COUPLINGS SHALL NOT BE USED ALONG THE SERVICE LATERALS FROM THE FRONT OF THE BUILDING TO THE SANITARY MANHOLE OR MAIN.

WATER NOTES

1. INSTALL WATER MAIN WITH A MINIMUM OF 4.5 FEET OF COVER.
2. CONTRACTOR TO COORDINATE WITH CITIZENS ENERGY GROUP FOR INSPECTION OF INSTALLATION OF WATER LINES INCLUDING CONNECTIONS TO EXISTING. PROVIDE 48 HOURS NOTICE.
3. ON SITE HYDRANTS SHALL FACE THE BUILDING.
4. HYDRANTS LOCATED IN CURB ISLAND OR GREEN SPACE SHALL BE LOCATED 5' FROM BACK OF CURB OR EDGE OF PAVEMENT (TYP.).
5. INSTALL CONCRETE PADS FOR ALL HYDRANT VALVES IN NON-PAVED AREAS.
6. PROVIDE A MINIMUM OF EIGHTEEN (18) INCHES OF VERTICAL SEPARATION AND TEN (10) FEET OF HORIZONTAL SEPARATION BETWEEN THE WATER LINE AND ALL SANITARY AND STORM SEWERS.
7. PROVIDE THRUST BLOCKS AT ALL WATER BENDS, PLUGS AND TEES IF REQUIRED BY THE UTILITY COMPANY.
8. EXISTING WATER MAINS AND ALL HYDRANTS REQUIRE PREVENTERS TO ADHERE TO CITIZENS ENERGY GROUP STANDARD DETAILS AND REQUIREMENTS.
9. ALL PROPOSED WATER METERS AND BACKFLOW PREVENTERS TO ADHERE TO CITIZENS ENERGY GROUP STANDARD DETAILS AND REQUIREMENTS.
10. FIRE DEPARTMENT CONNECTION SHALL BE 5" STORZ WITH 30-DEGREE DOWN ANGLE AND HEIGHT BETWEEN 3'-4' ABOVE FINISHED GRADE. REFER TO TOWN OF BROWNSBURG CONSTRUCTION STANDARD DETAIL DW-12.

GAS NOTES

1. GAS COMPANY WILL PROVIDE GAS SERVICE TAP, METER, REGULATOR, AND INSTALL THE NEW SERVICE LINE TO THE METER.

BENCHMARK:

THE BASIS OF ELEVATIONS HEREON IS NAVD 88 PER OBSERVATIONS OF SELECTED STATIONS IN THE NATIONAL GEODETIC SURVEY CONTINUOUSLY OPERATING REFERENCE STATION (NGS CORS) NETWORK.
MAG NAIL SET IN THE CORNER TOP OF THE CURB JOINT – SEE DRAWING FOR LOCATION.
ELEVATION = 889.36'

UTILITIES RESPONSIBILITIES SUMMARY

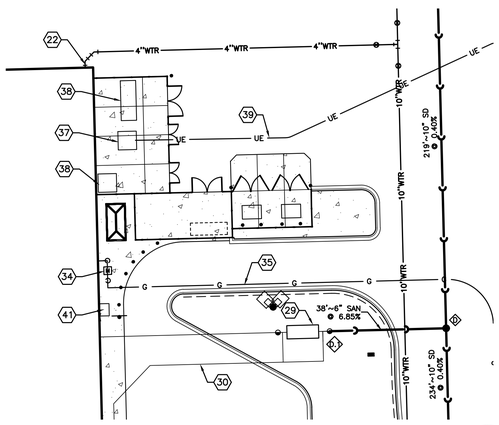

1. "WORK" IS DEFINED AS INSTALLATION OF SUBJECT UTILITY, INCLUDING TRENCHING, BEDDING, BACKFILL, AS WELL AS DEMOLITION AND RESTORATION OF THE DISTURBED AREA. INSPECTIONS ARE NOT INCLUDED. "INSTALL" MEANS PROVIDE AND INSTALL UNLESS NOTED OTHERWISE.
2. SANITARY SEWER: MEIJER CONTRACTOR (MC) SHALL PERFORM ALL WORK INCLUDING MAKING CONNECTION TO THE EXISTING MAIN. MC TO SCHEDULE PRE-CONSTRUCTION MEETING WITH HENDRICKS COUNTY REGIONAL SEWER DISTRICT (HCRSD) PRIOR TO STARTING CONSTRUCTION. MC SHALL NOTIFY HCRSD 48 HOURS PRIOR TO ANY SANITARY INSTALLATION AND TESTING. HCRSD TO BE PRESENT FOR ALL TESTING.
3. WATER: MC SHALL PERFORM ALL WORK ASSOCIATED WITH INSTALLATION OF THE WATER SERVICE LINE. CITIZENS ENERGY GROUP (CEG) SHALL MAKE THE TAP ON THE EXISTING MAIN. MC SHALL CONNECT TO THE TAP. MC SHALL CONTACT CEG TO SCHEDULE A PRE-CONSTRUCTION MEETING PRIOR TO INSTALLING FIRE PROTECTION SERVICES. MC TO NOTIFY THE BROWNSBURG FIRE DEPARTMENT (BFD) 48 HOURS PRIOR TO INSTALLATION OF WATER AND FIRE SERVICE LINES, BUT PRESENCE IS NOT REQUIRED. BFD TO BE PRESENT TO WITNESS ACCEPTANCE TESTING.
4. STORM SEWER: MC SHALL PERFORM ALL WORK. MC SHALL CONTACT THE TOWN OF BROWNSBURG WHEN PERFORMING WORK IN THE RIGHT-OF-WAY TO DETERMINE CONTRACTOR REQUIREMENTS.
5. GAS: FOR BOTH BUILDINGS, THE GAS COMPANY, CENTERPOINT ENERGY (CE), SHALL PROVIDE ALL SERVICE PIPING AND EQUIPMENT FROM THE POINT OF CONNECTION AT THE RIGHT-OF-WAY UP TO AND INCLUDING THE GAS METER. MC TO INSTALL ALL SERVICE PIPING FROM THE POINT OF CONNECTION AT THE RIGHT-OF-WAY TO THE GAS METER. CE TO INSTALL GAS METER ONCE MC HAS INSTALLED THE STUBBED OUT CONNECTION. MC TO PROVIDE AND INSTALL ALL PIPING AND MATERIALS DOWNSTREAM OF THE GAS METER. MC SHALL INSTALL METER PROTECTION BOLLARDS PER CE REQUIREMENTS.
6. COMMUNICATIONS:
   - 6.1. MAIN STORE: MC SHALL ISNTALL ALL CONDUIT AND MANHOLES. MC SHALL COORDINATE WITH MEIJER IT AND EVERSTREAM TO COORDINATE WITH MEIJER-SELECTED COMMUNICATIONS PROVIDER WHO SHALL PULL ALL WIRING AND MAKE CONNECTIONS.
   - 6.2. mEXPRESS: MC SHALL INSTALL HANDHOLES AND WIRING. MC SHALL COORDINATE WITH MEIJER IT AND EVERSTREAM TO MAKE CONNECTIONS.
7. ELECTRIC:
   - 7.1. MAIN STORE: THE ELECTRIC COMPANY, HENDRICKS POWER (HP), SHALL PROVIDE AND INSTALL ALL CONDUIT, CONDUCTOR, AND EQUIPMENT FROM THE POINT OF CONNECTION UP TO THE PRIMARY METERING CABINET. MC TO PROVIDE AND INSTALL ALL CONDUIT, CONDUCTOR, AND EQUIPMENT DOWNSTREAM OF THE METERING CABINET.
   - 7.2. mEXPRESS: HP SHALL PROVIDE AND INSTALL ALL CONDUIT, CONDUCTOR, AND EQUIPMENT FROM THE POINT OF CONNECTION UP TO AND INCLUDING THE TRANSFORMER. HP TO PROVIDE TRANSFORMER PAD. HP TO INSTALL METER ON SIDE OF TRANSFORMER.

GENERAL NOTES

1. THE CONTRACTOR IS RESPONSIBLE FOR ALL RESTORATION AND CLEAN-UP ASSOCIATED WITH THE INSTALLATION OF THE PROPOSED UTILITIES WITHIN THE PUBLIC RIGHT-OF-WAY AND EASEMENT.
2. VERIFY THE HORIZONTAL AND VERTICAL LOCATION OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.
3. UTILITIES SHALL END 5 FEET FROM THE BUILDING UNLESS NOTED OTHERWISE.
4. PROTECT AND MAINTAIN CROSSINGS OF OTHER UTILITIES.
5. ALL DIMENSIONS ARE TO COLUMN LINE, CENTERLINE OF PIPE, CENTER OF MANHOLE, EDGE OF PAVEMENT OR BACK OF CURB WHERE APPLICABLE. DIMENSIONS TO COLUMN LINE ASSUME 9" THICK BUILDING WALL.
6. ALL MATERIAL, SPECIFICATIONS, AND CONSTRUCTION METHODS SHALL BE IN CONFORMANCE WITH MEIJER STANDARD SPECIFICATIONS AND DETAILS AND TOWN OF BROWNSBURG AND HENDRICKS COUNTY REQUIREMENTS.
7. CONTRACTOR SHALL PERFORM FULL DEPTH REMOVAL AND REPLACEMENT OF EXISTING PAVEMENT PER MEIJER REQUIREMENTS AT PROPOSED UTILITIES INSTALLATION IN EXISTING PAVED AREAS.
8. PROVIDE MINIMUM 18" VERTICAL CLEARANCE AT ALL UTILITY CROSSINGS.

STORM NOTES

1. INSTALL UNDERDRAINS AT ALL PROPOSED CATCH BASINS.
2. ALL UNDERDRAINS ARE 4" DIAMETER AT MINIMUM SLOPE OF 0.50% UNLESS OTHERWISE NOTED.
3. END SECTIONS ARE INCLUDED IN PIPE LENGTHS SHOWN.
4. PROVIDE INLET FILTER FOR ALL CATCH BASIN INLETS.
5. PROVIDE RIP RAP AT ALL END SECTIONS UNLESS OTHERWISE NOTED.
6. ALL STORM GRATE CASTINGS TO BE PRE-CAST WITH A POLLUTION PREVENTION MESSAGE PERMANENTLY ATTACHED. PER TOWN OF BROWNSBURG STANDARD DETAILS SW-13 AND SW-14, POLLUTION PREVENTION MESSAGE TO STATE, AT MINIMUM, "DUMP NO WASTE <FISH ICON> DRAINGS TO WATERWAY" IN MINIMUM 1 INCH HIGH LETTERS.
7. EXISTING CHAIR BACK CURB DRAIN INLETS THAT ARE LOCATED IN THE NEW DRIVE ENTRANCES TO 56TH STREET ARE TO BE CONVERTED TO FLAT GRATE STORM INLET PER TOWN OF BROWNSBURG REQUIREMENTS. CASTINGS WILL HAVE TO BE SPECIAL ORDERED. CONTRACTOR PROVIDE ONE ADDITIONAL CASTING TO BROWNSBURG STREET DEPARTMENT AS SPARE STOCK FOR EACH CONVERSION FOR A TOTAL OF SIX NEW CASTINGS.

SANITARY NOTES

1. ROOF DRAINS, FOUNDATION DRAINS, AND OTHER CLEAN WATER CONNECTIONS TO THE SANITARY SEWER ARE PROHIBITED.
2. A CONTINUOUS 20' LENGTH OF SDR-35 PVC SHALL BE EXTENDED FROM THE YARD CLEANOUTS AT THE FRONT OF THE BUILDING. COORDINATE WITH PLUMBING CONTRACTOR ON LOCATION AND ROUTING.
3. FERNCO COUPLINGS SHALL NOT BE USED ALONG THE SERVICE LATERALS FROM THE FRONT OF THE BUILDING TO THE SANITARY MANHOLE OR MAIN.

KEYNOTES (X)

1. CONNECT TO EXISTING UTILITY PER AGENCY REQUIREMENTS. CONTRACTOR TO VERIFY LOCATION OF EXISTING UTILITY IN WHICH TO MAKE CONNECTION.
2. ELECTRIC UTILITY OWNER TO MAKE CONNECTION TO EXISTING UTILITY. UTILITY OWNER TO PERFORM RESTORATION WORK OF DISTURBED AREA UNLESS NOTED OTHERWISE.
3. ABOVE-GROUND STORMWATER MANAGEMENT FACILITY.
4. UNDERGROUND STORMWATER MANAGEMENT FACILITY.
5. DETENTION OUTLET STRUCTURE.
6. WATER QUALITY HYDRODYNAMIC SEPARATOR.
7. ENVIRONMENTAL CATCH BASIN.
8. 4" CANOPY STORM DRAIN AT 1.00% (MIN). INVERT AT BUILDING FACE = 886.75.
9. 6" CANOPY DRAIN INV. 883.90. 5' BEYOND EDGE OF CONCRETE SLAB.
10. 6" STORM ROOF DRAIN AT 2.00% (MIN). INVERT AT BUILDING = 886.50.
11. 6" CANOPY STORM DRAIN AT 0.50% (MIN).
12. 4" GARDEN CENTER DRAIN AT 0.50% (MIN). INVERT = 886.00.
13. 6" ROOF DRAIN FOR GUTTER DOWNSPOUTS. SEE C2 ON C-700.
14. LOADING DOCK WALL 4" UNDERDRAIN. INVERT = 882.43.
15. 4" SANITARY SERVICE. INVERT AT BUILDING = 883.90.
16. RONALD REAGAN STORM BY OTHERS.
17. 4" HDPE PERFORATED DRAIN WITH NYLON SOCK. INVERT = 881.90 ADJACENT TO FUEL TANKS. CONNECT TO STRUCTURE 2.05. INSTALLATION AND FINAL DETERMINATION WILL BE DECISION OF FUEL SYSTEM DESIGNER.
18. CONVERT EXISTING CHAIR BACK CURB INLET TO FLAT GRATE STORM INLET PER TOWN OF BROWNSBURG REQUIREMENTS. SEE STORM NOTE 7 THIS SHEET.
19. PROPOSED FIRE HYDRANT ASSEMBLY.
20. FIRE DEPARTMENT CONNECTION. SEE WATER NOTE 10.
21. 10" BUILDING FIRE SERVICE.
22. 4" DOMESTIC WATER SERVICE. 2" DOMESTIC METER AND BACKFLOW PREVENTER TO BE LOCATED INSIDE THE BUILDING.
23. POST INDICATOR VALVE.
24. 2" WATER SERVICE. 1.5" DOMESTIC METER AND BACKFLOW PREVENTER TO BE LOCATED INSIDE THE BUILDING.
25. 2" IRRIGATION SERVICE. 1.5" METER AND BACKFLOW PREVENTER TO BE LOCATED INSIDE THE BUILDING. IRRIGATION METER SHALL HAVE DUAL SET UP PER CITIZENS ENERGY GROUP STANDARD DRAWING 1.4. SEE DETAIL ON C-709.
26. 6" SANITARY SERVICE. INVERT AT BUILDING = 885.00.
27. 6" SANITARY SERVICE. INVERT AT BUILDING = 882.00.
28. 6" SANITARY SERVICE. INVERT AT BUILDING = 882.60.
29. GREASE INTERCEPTOR.
30. GREASE INTERCEPTOR SANITARY VENT LINE.
31. 8" WATER LINE TO SERVE FUTURE OUTLOT DEVELOPMENT. PROVIDE WATER LINE CAP PER AGENCY REQUIREMENTS.
32. GAS MAIN BY GAS COMPANY LOCATED IN 10' EASEMENT. GAS COMPANY TO RESTORE ALL DISTURBED AREAS OUTSIDE OF MEIJER WORK LIMITS RELATED TO GAS MAIN INSTALLATION WORK.
33. UNDERGROUND ELECTRIC LOCATED IN 10' EASEMENT. WIRING TO BE DIRECT BURIED BY HENDRICKS POWER.
34. GAS METER.
35. MAIN STORE 2" GAS SERVICE.
36. mEXPRESS 1" GAS SERVICE.
37. PAD-MOUNTED TRANSFORMER. SEE SHEET C-800.
38. PAD-MOUNTED ELECTRICAL EQUIPMENT. SEE SHEET C-800.
39. UNDERGROUND ELECTRIC SERVICE. SEE SHEET C-800.
40. UNDERGROUND COMMUNICATIONS SERVICE. SEE SHEET C-800.
41. HELIUM CABINET. SEE P-405.
42. PHARMACY DETECTION LOOP. VENDOR TO SAWCUT ASPHALT, INSTALL DETECTION LOOP, AND SEAL ASPHALT.

BENCHMARK:

UTILITIES SUMMARY

SUPERCENTER:

ELECTRIC: PRIMARY SERVICE, PREFERRED BASED ON RATE, MEIJER OWNED TRANSFORMER 2,000 KVA, SECONDARY 480/277V, 3PH, 4W GRD WYE.

PHONE: FIBER OPTIC ENTRANCE CABLE.

GAS: 11,966 CFH @ 2 PSI (5 PSI IF AVAILABLE) FOR 1.5 STORE.

WATER: 4" DIA. PIPE WITH 2" METER, 10,000 GPD SUMMER, 5,000 GPD WINTER, 150 GPM PEAK USE, 65 PSI AFTER BACKFLOW PREVENTER.

FIRE PROTECTION: 10" DIA. MIN., 1,575 GPM @ 35 PSI AT BASE OF RISER.

SANITARY SEWER: 5,000 GPD AVG., 40 GPM PEAK FLOW.

IRRIGATION: DESIGN TO BE PROVIDED AS PART OF FINAL DESIGN.

MEXPRESS:

ELECTRIC: SECONDARY SERVICE PREFERRED BASED ON RATE, PAD-MOUNT UTILITY OWNED TRANSFORMER, 600 AMP, 120/208V, 3PH, 4W SECONDARY SERVICE, TRANSFORMER SIZED AND FURNISHED BY UTILITY COMPANY.

PHONE: FED FROM SUPERCENTER, TYPICALLY NO DEDICATED SERVICE.

GAS: 394 CFH @ 7" WC

WATER: 2" DIA., 1.5" METER, 50 GPM PEAK USE, 65 PSI AFTER BACKFLOW PREVENTER. 750 GPD SUMMER, 500 GPD NON-SUMMER.

FIRE PROTECTION: NOT REQUIRED.

SANITARY SEWER: 500 GPD AVG. 20 GPM PEAK.

WATER NOTES

1. INSTALL WATER MAIN WITH A MINIMUM OF 4.5 FEET OF COVER.
2. CONTRACTOR TO COORDINATE WITH CITIZENS ENERGY GROUP FOR INSPECTION OF INSTALLATION OF WATER LINES INCLUDING CONNECTIONS TO EXISTING. PROVIDE 48 HOURS NOTICE.
3. ON SITE HYDRANTS SHALL FACE THE BUILDING.
4. HYDRANTS LOCATED IN CURB ISLAND OR GREEN SPACE SHALL BE LOCATED 5' FROM BACK OF CURB OR EDGE OF PAVEMENT (TYP.).
5. INSTALL CONCRETE PADS FOR ALL HYDRANT VALVES IN NON-PAVED AREAS.
6. PROVIDE A MINIMUM OF EIGHTEEN (18) INCHES OF VERTICAL SEPARATION AND TEN (10) FEET OF HORIZONTAL SEPARATION BETWEEN THE WATER LINE AND ALL SANITARY AND STORM SEWERS.
7. PROVIDE THRUST BLOCKS AT ALL WATER BENDS, PLUGS AND TEES IF REQUIRED BY THE UTILITY COMPANY.
8. EXISTING WATER MAINS AND ALL HYDRANTS REQUIRE TESTING. CONTRACTOR TO COORDINATE WITH UTILITY COMPANY.
9. ALL PROPOSED WATER METERS AND BACKFLOW PREVENTERS TO ADHERE TO CITIZENS ENERGY GROUP STANDARD DETAILS AND REQUIREMENTS.
10. FIRE DEPARTMENT CONNECTION SHALL BE 5" STORZ WITH 30-DEGREE DOWN ANGLE AND HEIGHT BETWEEN 3'-4' ABOVE FINISHED GRADE. REFER TO TOWN OF BROWNSBURG CONSTRUCTION STANDARD DETAIL DW-12.

GAS NOTES

1. GAS COMPANY WILL PROVIDE GAS SERVICE TAP, METER, REGULATOR, AND INSTALL THE NEW SERVICE LINE TO THE METER.

STRUCTURE TABLE NOTES

1. EX = EXISTING.
2. CI = CURB INLET.
3. CB = CATCH BASIN.
4. MH = MANHOLE.
5. CTE = CONNECT TO EXISTING.
6. RIM/GRATE ELEVATION INDICATES:
   - 6.1. FOR MANHOLE, JUNCTION BOX/CLEANOUT: RIM ELEVATION.
   - 6.2. FOR CATCH BASIN: GRATE ELEVATION.
   - 6.3. FOR CURB INLET: TOP OF CASTING/TOP OF CURB ELEVATION.
7. ALL PROPOSED STORM STRUCTURE TYPES SHALL BE IN ACCORDANCE WITH TOWN OF BROWNSBURG CONSTRUCTION STANDARD DETAILS UNLESS OTHERWISE NOTED.
8. CONTRACTOR SHALL REVIEW CONDITION OF EXISTING STRUCTURES TO REMAIN IN WHICH PROPOSED PIPES ARE PROPOSED TO CONNECT. IF CONDITIONS WARRANT IT, STRUCTURE(S) SHALL BE REPLACED.
9. ALL STORM GRATE CASTINGS TO BE PRE-CAST WITH A POLLUTION PREVENTION MESSAGE PERMANENTLY ATTACHED. PER TOWN OF BROWNSBURG STANDARD DETAILS SW-13 AND SW-14. POLLUTION PREVENTION MESSAGE TO STATE, AT MINIMUM, "DUMP NO WASTE <FISH ICON> DRAINS TO WATERWAY" IN MINIMUM 1 INCH HIGH LETTERS.
10. STORM SEWER PIPING TO BE HIGH DENSITY POLYETHYLENE (HDPE) FOR PIPES 12 TO 24 INCHES IN DIAMETER, POLYPROPYLENE (PP) FOR PIPES 12 TO 60 INCHES IN DIAMETER, POLYVINYL CHLORIDE (PVC) FOR PIPES 12 TO 36 INCHES IN DIAMETER, OR REINFORCED CONCRETE (RCP) FOR PIPES 12 INCHES IN DIAMETER OR LARGER IN ACCORDANCE WITH THE TOWN OF BROWNSBURG CONSTRUCTION STANDARDS, MOST CURRENT EDITION.
11. CONTRACTOR TO SIZE STORM STRUCTURES PER TOWN OF BROWNSBURG STANDARDS.
12. ALL CATCH BASINS AND CURB INLETS SHALL HAVE A 2' SUMP. OUTLET STRUCTURES SHALL NOT HAVE A SUMP.
13. BID ALTERNATE 5: PROVIDE SQUARE CONCRETE COLLARS FOR SANITARY AND STORM STRUCTURES.

1.4 – STORMWATER DETAILS

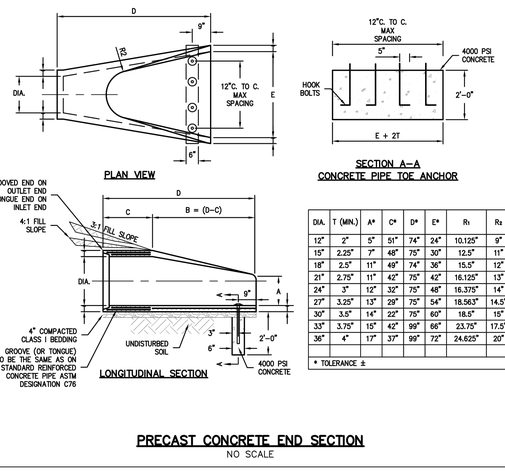

POND SECTION

NOTES:

1. GENERAL
   - A. ALL PONDS, INCLUDING THOSE NOT USED FOR DETENTION/RETENTION SHALL INCORPORATE APPLICABLE REQUIREMENTS BELOW. PONDS SHALL MEET THE REQUIREMENTS OF THE TOWN'S STORMWATER MANAGEMENT ORDINANCE AND THE HENDRICKS COUNTY STORMWATER TECHNICAL STANDARDS MANUAL UNLESS OTHERWISE NOTED.
2. ACCESS
   - A. PROVIDE INGRESS AND EGRESS FROM A NEARBY ROAD AND A SAFETY RAMP INTO THE POND.
   - B. SAFETY RAMP SHALL BE A MINIMUM OF 20 FEET WIDE AND MAXIMUM EXIT SLOPE OF 6H:1V.
3. WET POND DESIGN
   - A. MAXIMUM GROUND SLOPE AND POND DIMENSIONS SHALL BE AS SHOWN.
   - B. POND SHALL BE DESIGNED TO PREVENT STAGNATION OF WATER. POND DESIGN SHALL CONSIDER SHAPE, DEPTH, VEGETATIVE BUFFERS, AND OTHER METHODS TO ENCOURAGE A WELL – FUNCTIONING POND. THE TOWN MAY REQUIRE SURFACE OR SUBMERGED AERATION EQUIPMENT IF POND STAGNATION IS A CONCERN.
4. DRY POND DESIGN
   - A. AN UNDERDRAIN IS REQUIRED.
   - B. MAXIMUM GROUND SLOPE SHALL BE 3H:1V. PROTECT SIDE SLOPES WITH TURF REINFORCEMENT MAT.

MINIMUM WIDTH DEPENDS ON SITE CONDITIONS AND ENGINEERING JUDGEMENT

TABLE 1:

DIAMETER, D	MIN. COVER	CORR. PROFILE
6"-10"	12"	1 1/2" x 1/4"
12"-48"	12"	2 2/3" x 1/2"
>48"-96"	12"	3" x 1", 5" x 1"
>96"	D/8	3" x 1", 5" x 1"

- STRUCTURAL BACKFILL MUST EXTEND TO LIMITS OF THE TABLE
- TOTAL HEIGHT OF COMPACTED COVER FOR CONVENTIONAL HIGHWAY LOADS IS MEASURED FROM TOP OF PIPE TO BOTTOM OF FLEXIBLE PAVEMENT OR TOP OF RIGID PAVEMENT.

INSTALLATION NOTES

1. WHEN PLACING THE FIRST LIFTS OF BACKFILL IT IS IMPORTANT TO MAKE SURE THAT THE BACKFILL IS PROPERLY COMPACTED UNDER AND AROUND THE PIPE HAUNCHES.
2. OTHER ALTERNATE BACKFILL MATERIAL MAY BE ALLOWED DEPENDING ON SITE SPECIFIC CONDITIONS, AS APPROVED BY SITE ENGINEER.
3. IF SALTING AGENTS FOR SNOW AND ICE REMOVAL ARE USED ON OR NEAR THE PROJECT A GEOMEMBRANE BARRIER IS RECOMMENDED OVER THE UPPER HALF OF THE PIPE. THE GEOMEMBRANE LINER IS INTENDED TO HELP PROTECT THE SYSTEM FROM THE POTENTIAL ADVERSE EFFECTS THAT MAY RESULT FROM A CHANGE IN THE SURROUNDING ENVIRONMENT OVER A PERIOD OF TIME. PLEASE REFER TO THE CORRUGATED METAL PIPE DETENTION DESIGN GUIDE FOR ADDITIONAL INFORMATION.

TABLE 2: xFiltration

XFILTRATION® JOINT STANDARD BACKFILL SPECIFICATIONS

	MATERIAL LOCATION	MATERIAL SPECIFICATION	DESCRIPTION	
1	FILL ENVELOPE WIDTH	PER ENGINEER OF RECORD	MINIMUM TRENCH WIDTH MUST ALLOW ROOM FOR PROPER COMPACTION OF HAUNCH MATERIALS UNDER THE PIPE. THE SUGGESTED MINIMUM TRENCH WIDTH, OR EOR RECOMMENDATION: PIPE ≤ 12": D + 16" PIPE > 12": 1.50 × D	MINIMUM EMBANKMENT WIDTH (IN FEET) FOR INITIAL FILL ENVELOPE: PIPE < 24": 3.0D PIPE 24" - 144": D + 4'0" PIPE > 144": D + 10'0"
2	FOUNDATION	**AASHTO 26.5.2** - PER ENGINEER OF RECORD	PRIOR TO PLACING THE BEDDING, THE FOUNDATION MUST BE CONSTRUCTED TO A UNIFORM AND STABLE GRADE. IN THE EVENT THAT UNSUITABLE FOUNDATION MATERIALS ARE ENCOUNTERED DURING EXCAVATION, THEY SHALL BE REMOVED AND FOUNDATION BROUGHT BACK TO GRADE WITH A FILL MATERIAL APPROVED BY THE ENGINEER OF RECORD.	
3	BEDDING	**AASHTO M 43: 3, 357, 4, 467, 5, 56, 57**	PIPE SHOULD BE PLACED ON THE FOUNDATION BOTTOM WITH A 4"-6" MINIMUM STONE DEPTH ROUGHLY SHAPPED TO FIT THE BOTTOM OF THE PIPE. IF THE ENGINEER OF RECORD DETERMINES THAT STONE BEDDING IS NOT NEEDED, THE PIPE MAY BE PLACED ON THE TRENCH BOTTOM SEPERATED WITH A NON-WOVEN GEOTEXTILE PLACED AT THE INVERT OF A RELATIVELY LOOSE MATERIAL THAT IS ROUGHLY SHAPED TO FIT THE BOTTOM OF THE PIPE, 2" MIN DEPTH.	
4			CORRUGATED METAL PIPE	
5	BACKFILL	FREE-DRAINING, ANGULAR, NATURALLY OCCURING WASHED-STONE PER **AASHTO M 43: 3, 357, 4, 467, 5, 56, 57** APPROVED EQUAL * OR	HAUNCH ZONE MATERIAL SHALL BE HAND SHOVELED OR SHOVEL SLICED INTO PLACE TO ALLOW FOR PROPER COMPACTION WITHOUT SOFT SPOTS. BACKFILL SHALL BE PLACED IN 8" +/- LOOSE LIFTS AND COMPACTED TO 90% STANDARD PROCTOR PER AASHTO T 99. BACKFILL SHALL BE PLACED SUCH THAT THERE IS NO MORE THAN A TWO LIFT (16") DIFFERENTIAL BETWEEN ANY OF THE PIPES AT ANY TIME DURING THE BACKFILL PROCESS. THE BACKFILL SHOULD BE ADVANCED ALONG THE LENGTH OF THE SYSTEM TO AVOID DIFFERENTIAL LOADING. WHERE CONVENTIONAL COMPACTION TESTING IS NOT PRACTICAL, THE MATERIAL SHALL BE MECHANICALLY COMPACTED UNTIL NO FURTHER YIELDING OF MATERIAL IS OBSERVED UNDER THE COMPACTOR. AREAS WITH HIGH WATER TABLE FLUCTUATIONS THAT INTERACT WITH THE PIPE ZONE, CONSIDER INSTALLING A GEOTEXTILE SEPARATION LAYER TO PREVENT SOIL MIGRATION.	*IN
6	COVER MATERIAL	UP TO MIN. COVER - **AASHTO M 145: A-1, A-2, A-3** ABOVE MIN. COVER - PER ENGINEER OF RECORD	COVER MATERIAL MAY INCLUDE NON-BITUMINOUS, GRANULAR ROADBASE MATERIAL WITHIN MIN COVER LIMITS	
7	RIGID OR FLEXIBLE PAVEMENT (IF APPLICABLE)	PER ENGINEER OF RECORD	FLEXIBLE PAVEMENT SHOULD NOT BE COUNTED AS PART OF THE FILL HEIGHT OVER THE CMP. FINAL BACKFILL MATERIAL SELECTION AND COMPACTION REQUIREMENTS SHALL FOLLOW THE PROJECT PLANS AND SPECIFICATIONS PER THE ENGINEER OF RECORD.	
A	SIDE GEOTEXTILE	NONE	GEOTEXTILE LAYER IS RECOMMENDED ON SIDES OF EXCAVATION TO PREVENT SOIL MIGRATION WHEN STONE BEDDING IS USED. IF NO STONE BEDDING IS USED, THEN SIDE GEOTEXTILE IS REQUIRED.	
B	GEOTEXTILE BETWEEN LAYERS	NONE	IF SOIL TYPES DIFFER AT ANY POINT ABOVE PIPE INVERT, A GEOTEXTILE LAYER IS RECOMMENDED TO BE PLACED BETWEEN THE LAYERS TO PREVENT SOIL MIGRATION.	

NOTES:

- FOR MULTIPLE BARREL INSTALLATIONS, THE RECOMMENDED STANDARD SPACING BETWEEN PARALLEL PIPE RUNS SHALL BE THE PIPE DIAMETER /2 BUT NO LESS THAN 12" FOR DIAMETERS <72". FOR 72" AND LARGER DIAMETERS, THE MINIMUM SPACING IS 36". CONTACT YOUR CONTECH REPRESENTATIVE FOR NONSTANDARD SPACING.
- APPROVED REGIONAL EQUIVALENTS FOR SECTION 5 INCLUDE CA-7, MIDOT 6AA, 6A, OR 5G, PROVIDED THEY MEET THE PARTICLE SIZES INDICATED.

MANUFACTURER RECOMMENDED BACKFILL

NOT TO SCALE

The design and information shown on this drawing is provided as a service to the project owner, engineer and contractor by Contech Engineered Solutions LLC ("Contech"). Neither the design nor any part of the design may be changed or modified in any manner without the prior written consent of Contech. Failure to comply is done at the user's own risk and Contech expressly disclaims any liability or responsibility for such use.

If discrepancies between the supplied information upon which this drawing is based and actual field conditions are encountered as the work progresses, these discrepancies must be reported to Contech immediately for re-evaluation of the design. Contech also expressly disclaims any liability arising, incomplete or inaccurate information supplied by others.

CMP DETENTION INSTALLATION GUIDE

PROPER INSTALLATION OF A FLEXIBLE UNDERGROUND DETENTION SYSTEM WILL ENSURE LONG-TERM PERFORMANCE. THE CONFIGURATION OF THESE SYSTEMS OFTEN REQUIRES SPECIAL CONSTRUCTION PRACTICES THAT DIFFER FROM CONVENTIONAL FLEXIBLE PIPE CONSTRUCTION. CONTECH ENGINEERED SOLUTIONS STRONGLY SUGGESTS SCHEDULING A PRE-CONSTRUCTION MEETING WITH YOUR LOCAL SALES ENGINEER TO DETERMINE IF ADDITIONAL MEASURES, NOT COVERED IN THIS GUIDE, ARE APPROPRIATE FOR YOUR SITE.

FOUNDATION

CONSTRUCT A FOUNDATION THAT CAN SUPPORT THE DESIGN LOADING APPLIED BY THE PIPE AND ADJACENT BACKFILL WEIGHT AS WELL AS MAINTAIN ITS INTEGRITY DURING CONSTRUCTION.

IF SOFT OR UNSUITABLE SOILS ARE ENCOUNTERED, REMOVE THE POOR SOILS DOWN TO A SUITABLE DEPTH AND THEN BUILD UP TO THE APPROPRIATE ELEVATION WITH A COMPETENT BACKFILL MATERIAL. THE STRUCTURAL FILL MATERIAL GRADATION SHOULD NOT ALLOW THE MIGRATION OF FINES, WHICH CAN CAUSE SETTLEMENT OF THE DETENTION SYSTEM OR PAVEMENT ABOVE. IF THE STRUCTURAL FILL MATERIAL IS NOT COMPATIBLE WITH THE UNDERLYING SOILS AN ENGINEERING FABRIC SHOULD BE USED AS A SEPARATOR. IN SOME CASES, USING A STIFF REINFORCING GEOGRID REDUCES OVER EXCAVATION AND REPLACEMENT FILL QUANTITIES.

GRADE THE FOUNDATION SUBGRADE TO A UNIFORM OR SLIGHTLY SLOPING GRADE. IF THE SUBGRADE IS CLAY OR RELATIVELY NON-POROUS AND THE CONSTRUCTION SEQUENCE WILL LAST FOR AN EXTENDED PERIOD OF TIME, IT IS BEST TO SLOPE THE GRADE TO ONE END OF THE SYSTEM. THIS WILL ALLOW EXCESS WATER TO DRAIN QUICKLY, PREVENTING SATURATION OF THE SUBGRADE.

GEOMEMBRANE BARRIER

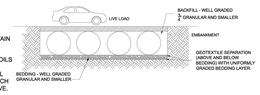

THE RESISTIVITY OF A PROJECT SITE MAY CHANGE OVER TIME DUE TO THE USE OF VARIOUS SALTING, DE-ICING, AND AGRICULTURAL AGENTS APPLIED ON OR NEAR THE AREA. TO MITIGATE THE POTENTIAL IMPACT OF THESE AGENTS, AN HDPE MEMBRANE LINER WILL BE INSTALLED ON THE CROWN OF EACH PIPE, CREATING AN IMPERMEABLE BARRIER. THIS MEASURE IS DESIGNED TO PROTECT THE SYSTEM FROM ENVIRONMENTAL CHANGES THAT COULD LEAD TO PREMATURE CORROSION AND REDUCE THE OVERALL SERVICE LIFE.

IN-SITU TRENCH WALL

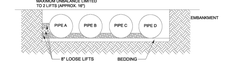

IF EXCAVATION IS REQUIRED, THE TRENCH WALL NEEDS TO BE CAPABLE OF SUPPORTING THE LOAD THAT THE PIPE SHEDS AS THE SYSTEM IS LOADED. IF SOILS ARE NOT CAPABLE OF SUPPORTING THESE LOADS, THE PIPE CAN DEFLECT. PERFORM A SIMPLE SOIL PRESSURE CHECK USING THE APPLIED LOADS TO DETERMINE THE LIMITS OF EXCAVATION BEYOND THE SPRING LINE OF THE OUTER MOST PIPES.

IN MOST CASES THE REQUIREMENTS FOR A SAFE WORK ENVIRONMENT AND PROPER BACKFILL PLACEMENT AND COMPACTION TAKE CARE OF THIS CONCERN.

BACKFILL PLACEMENT

MATERIAL SHALL BE WORKED INTO THE PIPE HAUNCHES BY MEANS OF SHOVEL-SLICING, RODDING, AIR TAMPER, VIBRATORY ROD, OR OTHER EFFECTIVE METHODS.

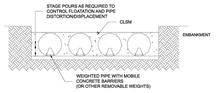

IF AASHTO T99 PROCEDURES ARE DETERMINED INFEASIBLE BY THE GEOTECHNICAL ENGINEER OF RECORD, COMPACTION IS DEEMED ADEQUATE WHEN NO FURTHER YIELDING OF THE MATERIAL IS OBSERVED UNDER THE COMPACTOR, OR UNDER FOOT, AND THE GEOTECHNICAL ENGINEER OF RECORD (OR REPRESENTATIVE THEREOF) IS SATISFIED WITH THE LEVEL OF COMPACTION.

FOR LARGE SYSTEMS, CONVEYOR SYSTEMS, BACKHOES WITH LONG REACHES OR DRAGLINES WITH STONE BUCKETS MAY BE USED TO PLACE BACKFILL. ONCE MINIMUM COVER FOR CONSTRUCTION LOADING ACROSS THE ENTIRE WIDTH OF THE SYSTEM IS REACHED, ADVANCE THE EQUIPMENT TO THE END OF THE RECENTLY PLACED FILL, AND BEGIN THE SEQUENCE AGAIN UNTIL THE SYSTEM IS COMPLETELY BACKFILLED. THIS TYPE OF CONSTRUCTION SEQUENCE PROVIDES ROOM FOR STOCKPILED BACKFILL DIRECTLY BEHIND THE BACKHOE, AS WELL AS THE MOVEMENT OF CONSTRUCTION TRAFFIC. MATERIAL STOCKPILES ON TOP OF THE BACKFILLED DETENTION SYSTEM SHOULD BE LIMITED TO 8- TO 10-FEET HIGH AND MUST PROVIDE BALANCED LOADING ACROSS ALL BARRELS. TO DETERMINE THE PROPER COVER OVER THE PIPES TO ALLOW THE MOVEMENT OF CONSTRUCTION EQUIPMENT SEE TABLE 1, OR CONTACT YOUR LOCAL CONTECH SALES ENGINEER.

WHEN FLOWABLE FILL IS USED, YOU MUST PREVENT PIPE FLOATATION. TYPICALLY, SMALL LIFTS ARE PLACED BETWEEN THE PIPES AND THEN ALLOWED TO SET-UP PRIOR TO THE PLACEMENT OF THE NEXT LIFT. THE ALLOWABLE THICKNESS OF THE CLSM LIFT IS A FUNCTION OF A PROPER BALANCE BETWEEN THE UPLIFT FORCE OF THE CLSM, THE OPPOSING WEIGHT OF THE PIPE, AND THE EFFECT OF OTHER RESTRAINING MEASURES. THE PIPE CAN CARRY LIMITED FLUID PRESSURE WITHOUT PIPE DISTORTION OR DISPLACEMENT, WHICH ALSO AFFECTS THE CLSM LIFT THICKNESS. YOUR LOCAL CONTECH SALES ENGINEER CAN HELP DETERMINE THE PROPER LIFT THICKNESS.

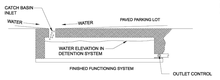

CONSTRUCTION LOADING

TYPICALLY, THE MINIMUM COVER SPECIFIED FOR A PROJECT ASSUMES H-20 LIVE LOAD. BECAUSE CONSTRUCTION LOADS OFTEN EXCEED DESIGN LIVE LOADS, INCREASED TEMPORARY MINIMUM COVER REQUIREMENTS ARE NECESSARY. SINCE CONSTRUCTION EQUIPMENT VARIES FROM JOB TO JOB, IT IS BEST TO ADDRESS EQUIPMENT SPECIFIC MINIMUM COVER REQUIREMENTS WITH YOUR LOCAL CONTECH SALES ENGINEER DURING YOUR PRE-CONSTRUCTION MEETING.

ADDITIONAL CONSIDERATIONS

BECAUSE MOST SYSTEMS ARE CONSTRUCTED BELOW-GRADE, RAINFALL CAN RAPIDLY FILL THE EXCAVATION; POTENTIALLY CAUSING FLOATATION AND MOVEMENT OF THE PREVIOUSLY PLACED PIPES. TO HELP MITIGATE POTENTIAL PROBLEMS, IT IS BEST TO START THE INSTALLATION AT THE DOWNSTREAM END WITH THE OUTLET ALREADY CONSTRUCTED TO ALLOW A ROUTE FOR THE WATER TO ESCAPE. TEMPORARY DIVERSION MEASURES MAY BE REQUIRED FOR HIGH FLOWS DUE TO THE RESTRICTED NATURE OF THE OUTLET PIPE.

CMP DETENTION SYSTEM INSPECTION AND MAINTENANCE

UNDERGROUND STORMWATER DETENTION AND INFILTRATION SYSTEMS MUST BE INSPECTED AND MAINTAINED AT REGULAR INTERVALS FOR PURPOSES OF PERFORMANCE AND LONGEVITY.

INSPECTION

INSPECTION IS THE KEY TO EFFECTIVE MAINTENANCE OF CMP DETENTION SYSTEMS AND IS EASILY PERFORMED. CONTECH RECOMMENDS ONGOING, ANNUAL INSPECTIONS. SITES WITH HIGH TRASH LOAD OR SMALL OUTLET CONTROL ORIFICES MAY NEED MORE FREQUENT INSPECTIONS. THE RATE AT WHICH THE SYSTEM COLLECTS POLLUTANTS WILL DEPEND MORE ON SITE SPECIFIC ACTIVITIES RATHER THAN THE SIZE OR CONFIGURATION OF THE SYSTEM.

INSPECTIONS SHOULD BE PERFORMED MORE OFTEN IN EQUIPMENT WASHDOWN AREAS, IN CLIMATES WHERE SANDING AND/OR SALTING OPERATIONS TAKE PLACE, AND IN OTHER VARIOUS INSTANCES IN WHICH ONE WOULD EXPECT HIGHER ACCUMULATIONS OF SEDIMENT OR ABRASIVE/ CORROSIVE CONDITIONS. A RECORD OF EACH INSPECTION IS TO BE MAINTAINED FOR THE LIFE OF THE SYSTEM

MAINTENANCE

CMP DETENTION SYSTEMS SHOULD BE CLEANED WHEN AN INSPECTION REVEALS ACCUMULATED SEDIMENT OR TRASH IS CLOGGING THE DISCHARGE ORIFICE.

ACCUMULATED SEDIMENT AND TRASH CAN TYPICALLY BE EVACUATED THROUGH THE MANHOLE OVER THE OUTLET ORIFICE. IF MAINTENANCE IS NOT PERFORMED AS RECOMMENDED, SEDIMENT AND TRASH MAY ACCUMULATE IN FRONT OF THE OUTLET ORIFICE. MANHOLE COVERS SHOULD BE SECURELY SEATED FOLLOWING CLEANING ACTIVITIES. CONTECH SUGGESTS THAT ALL SYSTEMS BE DESIGNED WITH AN ACCESS/INSPECTION MANHOLE SITUATED AT OR NEAR THE INLET AND THE OUTLET ORIFICE. SHOULD IT BE NECESSARY TO GET INSIDE THE SYSTEM TO PERFORM MAINTENANCE ACTIVITIES, ALL APPROPRIATE PRECAUTIONS REGARDING CONFINED SPACE ENTRY AND OSHA REGULATIONS SHOULD BE FOLLOWED.

ANNUAL INSPECTIONS ARE BEST PRACTICE FOR ALL UNDERGROUND SYSTEMS. DURING THIS INSPECTION, IF EVIDENCE OF SALTING/DE-ICING AGENTS IS OBSERVED WITHIN THE SYSTEM, IT IS BEST PRACTICE FOR THE SYSTEM TO BE RINSED; INCLUDING ABOVE THE SPRING LINE SOON AFTER THE SPRING THAW AS PART OF THE MAINTENANCE PROGRAM FOR THE SYSTEM.

MAINTAINING AN UNDERGROUND DETENTION OR INFILTRATION SYSTEM IS EASIEST WHEN THERE IS NO FLOW ENTERING THE SYSTEM. FOR THIS REASON, IT IS A GOOD IDEA TO SCHEDULE THE CLEANOUT DURING DRY WEATHER.

THE FOREGOING INSPECTION AND MAINTENANCE EFFORTS HELP ENSURE UNDERGROUND PIPE SYSTEMS USED FOR STORMWATER STORAGE CONTINUE TO FUNCTION AS INTENDED BY IDENTIFYING RECOMMENDED REGULAR INSPECTION AND MAINTENANCE PRACTICES. INSPECTION AND MAINTENANCE RELATED TO THE STRUCTURAL INTEGRITY OF THE PIPE OR THE SOUNDNESS OF PIPE JOINT CONNECTIONS IS BEYOND THE SCOPE OF THIS GUIDE.

The design and information shown on this drawing is provided as a service to the project owner, engineer and contractor by Contech Engineered Solutions LLC ("Contech"). Neither the design nor any part of the design may be changed or modified in any manner without the prior written consent of Contech. Failure to comply is done at the user's own risk and Contech expressly disclaims any liability or responsibility for such use.

If discrepancies between the supplied information upon which this drawing is based and actual field conditions are encountered as the work progresses, these discrepancies must be reported to Contech immediately for re-evaluation of the design. Contech also expressly disclaims any liability arising, incomplete or inaccurate information supplied by others.

CONSTRUCTION LOADS

FOR TEMPORARY CONSTRUCTION VEHICLE LOADS, AN EXTRA AMOUNT OF COMPACTED COVER MAY BE REQUIRED OVER THE TOP OF THE PIPE. THE HEIGHT-OF-COVER SHALL MEET THE MINIMUM REQUIREMENTS SHOWN IN THE TABLE BELOW. THE USE OF HEAVY CONSTRUCTION EQUIPMENT NECESSITATES GREATER PROTECTION FOR THE PIPE THAN FINISHED GRADE COVER MINIMUMS FOR NORMAL HIGHWAY TRAFFIC.

PIPE SPAN, INCHES	AXLE LOADS (kips)			
	18-50	50-75	75-110	110-150
	MINIMUM COVER (FT)			
12-42	2.0	2.5	3.0	3.0
48-72	3.0	3.0	3.5	4.0
78-120	3.0	3.5	4.0	4.0
126-144	3.5	4.0	4.5	4.5

*MINIMUM COVER MAY VARY, DEPENDING ON LOCAL CONDITIONS. THE CONTRACTOR MUST PROVIDE THE ADDITIONAL COVER REQUIRED TO AVOID DAMAGE TO THE PIPE. MINIMUM COVER IS MEASURED FROM THE TOP OF THE PIPE TO THE TOP OF THE MAINTAINED CONSTRUCTION ROADWAY SURFACE.

CONSTRUCTION LOADING DIAGRAM

SCALE: N.T.S.

SPECIFICATION FOR DESIGNED DETENTION SYSTEM:

SCOPE
THIS SPECIFICATION COVERS THE MANUFACTURE AND INSTALLATION OF THE DESIGNED DETENTION SYSTEM DETAILED IN THE PROJECT PLANS.

MATERIAL
THE MATERIAL SHALL CONFORM TO THE APPLICABLE REQUIREMENTS LISTED BELOW:

ALUMINIZED TYPE 2 STEEL COILS SHALL CONFORM TO THE REQUIREMENTS OF AASHTO M-274 OR ASTM A-92.

THE GALVANIZED STEEL COILS SHALL CONFORM TO THE REQUIREMENTS OF AASHTO M-218 OR ASTM A-929.

THE POLYMER COATED STEEL COILS SHALL CONFORM TO THE REQUIREMENTS OF AASHTO M-246 OR ASTM A-742.

THE ALUMINUM COILS SHALL CONFORM TO THE APPLICABLE OF AASHTO M-197 OR ASTM B-744.

CONSTRUCTION LOADS
CONSTRUCTION LOADS MAY BE HIGHER THAN FINAL LOADS. FOLLOW THE MANUFACTURER'S OR NCSPA GUIDELINES.

PIPE
THE PIPE SHALL BE MANUFACTURED IN ACCORDANCE TO THE APPLICABLE REQUIREMENTS LISTED BELOW:

ALUMINIZED TYPE 2: AASHTO M-36 OR ASTM A-760

GALVANIZED: AASHTO M-36 OR ASTM A-760

POLYMER COATED: AASHTO M-245 OR ASTM A-762

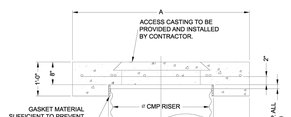

ALUMINUM: AASHTO M-196 OR ASTM B-745

APPLICABLE HANDLING AND ASSEMBLY
SHALL BE IN ACCORDANCE WITH NCSPS (NATIONAL CORRUGATED STEEL PIPE ASSOCIATION) FOR ALUMINIZED TYPE 2, GALVANIZED OR POLYMER COATED STEEL. SHALL BE IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS FOR ALUMINUM PIPE.

REQUIREMENTS
INSTALLATION
SHALL BE IN ACCORDANCE WITH AASHTO STANDARD SPECIFICATIONS FOR HIGHWAY BRIDGES, SECTION 26, DIVISION II DIVISION I OR ASTM A-798 (FOR ALUMINIZED TYPE 2, GALVANIZED OR POLYMER COATED STEEL) OR ASTM B-788 (FOR ALUMINUM PIPE) AND IN CONFORMANCE WITH THE PROJECT PLANS AND SPECIFICATIONS. IF THERE ARE ANY INCONSISTENCIES OR CONFLICTS THE CONTRACTOR SHOULD DISCUSS AND RESOLVE WITH THE SITE ENGINEER.

IT IS ALWAYS THE RESPONSIBILITY OF THE CONTRACTOR TO FOLLOW OSHA GUIDELINES FOR SAFE PRACTICES.

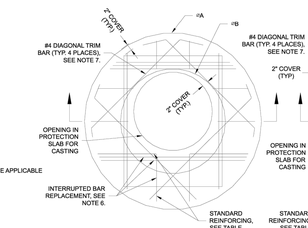

NOTE:
THESE DRAWINGS ARE FOR CONCEPTUAL PURPOSES AND DO NOT REFLECT ANY LOCAL PREFERENCES OR REGULATIONS. PLEASE CONTACT YOUR LOCAL CONTECH REP FOR MODIFICATIONS.

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. FOR FABRICATION DRAWINGS WITH DETAILED STRUCTURE DIMENSIONS AND WEIGHT, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE. www.ContechES.com
3. CDS WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING. CONTRACTOR TO CONFIRM STRUCTURE MEETS REQUIREMENTS OF PROJECT.
4. STRUCTURE SHALL MEET AASHTO HS-20 LOAD RATING, ASSUMING EARTH COVER OF 0' - 2', AND GROUNDWATER ELEVATION AT, OR BELOW, THE OUTLET PIPE INVERT ELEVATION. ENGINEER OF RECORD TO CONFIRM ACTUAL GROUNDWATER ELEVATION. CASTINGS SHALL MEET AASHTO M306 AND BE CAST WITH THE CONTECH LOGO.
5. IF REQUIRED, PVC HYDRAULIC SHEAR PLATE IS PLACED ON SHELF AT BOTTOM OF SCREEN CYLINDER. REMOVE AND REPLACE AS NECESSARY DURING MAINTENANCE CLEANING.
6. CDS STRUCTURE SHALL BE PRECAST CONCRETE CONFORMING TO ASTM C-478 AND AASHTO LOAD FACTOR DESIGN METHOD.

INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CDS MANHOLE STRUCTURE.
C. CONTRACTOR TO INSTALL JOINT SEALANT BETWEEN ALL STRUCTURE SECTIONS AND ASSEMBLE STRUCTURE.
D. CONTRACTOR TO PROVIDE, INSTALL, AND GROUT INLET AND OUTLET PIPE(S). MATCH PIPE INVERTS WITH ELEVATIONS SHOWN. ALL PIPE CENTERLINES TO MATCH PIPE OPENING CENTERLINES.
E. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO ASSURE UNIT IS WATER TIGHT, HOLDING WATER TO FLOWLINE INVERT MINIMUM. IT IS SUGGESTED THAT ALL JOINTS BELOW PIPE INVERTS ARE GROUTED.

STRUCTURE WEIGHT
APPROXIMATE HEAVIEST PICK = 22000 LBS.
STRUCTURE IS DELIVERED IN 4 PIECES

MAX FOOTPRINT = 9.50'Ø

1.5 – WATER QUALITY STRUCTURE SIZING

Project: Meijer ABE
Location: *Brownsburg, IN*
Prepared For: Woolpert, Inc

Purpose: To calculate the first flush runoff flow rate (WQF) over a given site area. In this situation the WQV to be analyzed is the runoff produced by the first 1" of rainfall.

Reference: United States Department of Agriculture Natural Resources Conservation Service TR-55 Manual

Given:

Structure Name	A (acres)	A ($miles^2$)	Runoff Coefficient	Percent Imp. (%)*	t_c (min)	t_c (hr)
1.01	10.67	0.01667	0.84	90.00	19.0	0.317
1.31	7.54	0.01178	0.79	81.67	16.0	0.267
2.01	7.59	0.01186	0.77	78.33	15.0	0.250

* Assumes runoff coefficient of 0.3 for pervious areas and 0.9 for impervious areas.

Procedure:

The Water Quality Flow (WQF) is calculated using the Water Quality Volume (WQV). This WQV, converted to watershed inches, is substituted for the runoff depth (Q) in the Natural Resources Conservation Service (formerly Soil Conservation Service), TR-55 Gr

1. Compute WQV in watershed inches using the following equation:

$$WQV = P * R$$

where: WQV = water quality volume (watershed inches)
P = design precipitation (inches)
R = volumetric runoff coefficient = 0.05 + 0.009(I)
I = percent impervious cover

Structure Name	Percent Imp. (%)	R	P (in)	WQV (in)	WQV (CF)
1.01	90.00	0.860	1	0.860	33,309.61
1.31	81.67	0.785	1	0.785	21,485.61
2.01	78.33	0.755	1	0.755	20,801.53

2. Compute the NRCS Runoff Curve Number (CN) using the following equation, or graphically using Figure 2-1 from TR-55 (USDA, 1986):

$$CN = 1000 / [10+5P+10Q-10(Q^2+1.25QP)^{1/2}]$$

where: CN = Runoff Curve Number
P = design precipitation (inches)
Q = runoff depth (watershed inches)

Structure Name	Q (in)	CN
1.01	0.860	98.72
1.31	0.785	97.93
2.01	0.755	97.59

3. Using computed CN, read initial abstraction (I_a) from Table 4-1 in Chapter 4 of TR-55; compute I_a/P, interpolating when appropriate.

Structure Name	I_a (in)	I_a/P
1.01	0.041	0.041
1.31	0.041	0.041
2.01	0.041	0.041

4. Compute the time of concentration (t_c) in hours and the drainage area in square miles. A minimum t_c of 0.167 hours (10 minutes) should be used.

Structure Name	t_c (hr)	A (miles^2)
1.01	0.317	0.01667
1.31	0.267	0.01178
2.01	0.250	0.01186

5. Read the unit peak discharge (q_u) from Exhibit 4-II in Chapter 4 of TR-55 for appropriate t_c for type II rainfall distribution.

Structure Name	t_c (hr)	I_a/P	q_u (csm/in)
1.01	0.317	0.041	660
1.31	0.267	0.041	712
2.01	0.250	0.041	731

6. Substituting WQV (watershed inches) for runoff depth (Q), compute the water quality flow (WQF) from the following equation:

$$\mathbf{WQF = (q_u)*(A)*(Q)}$$

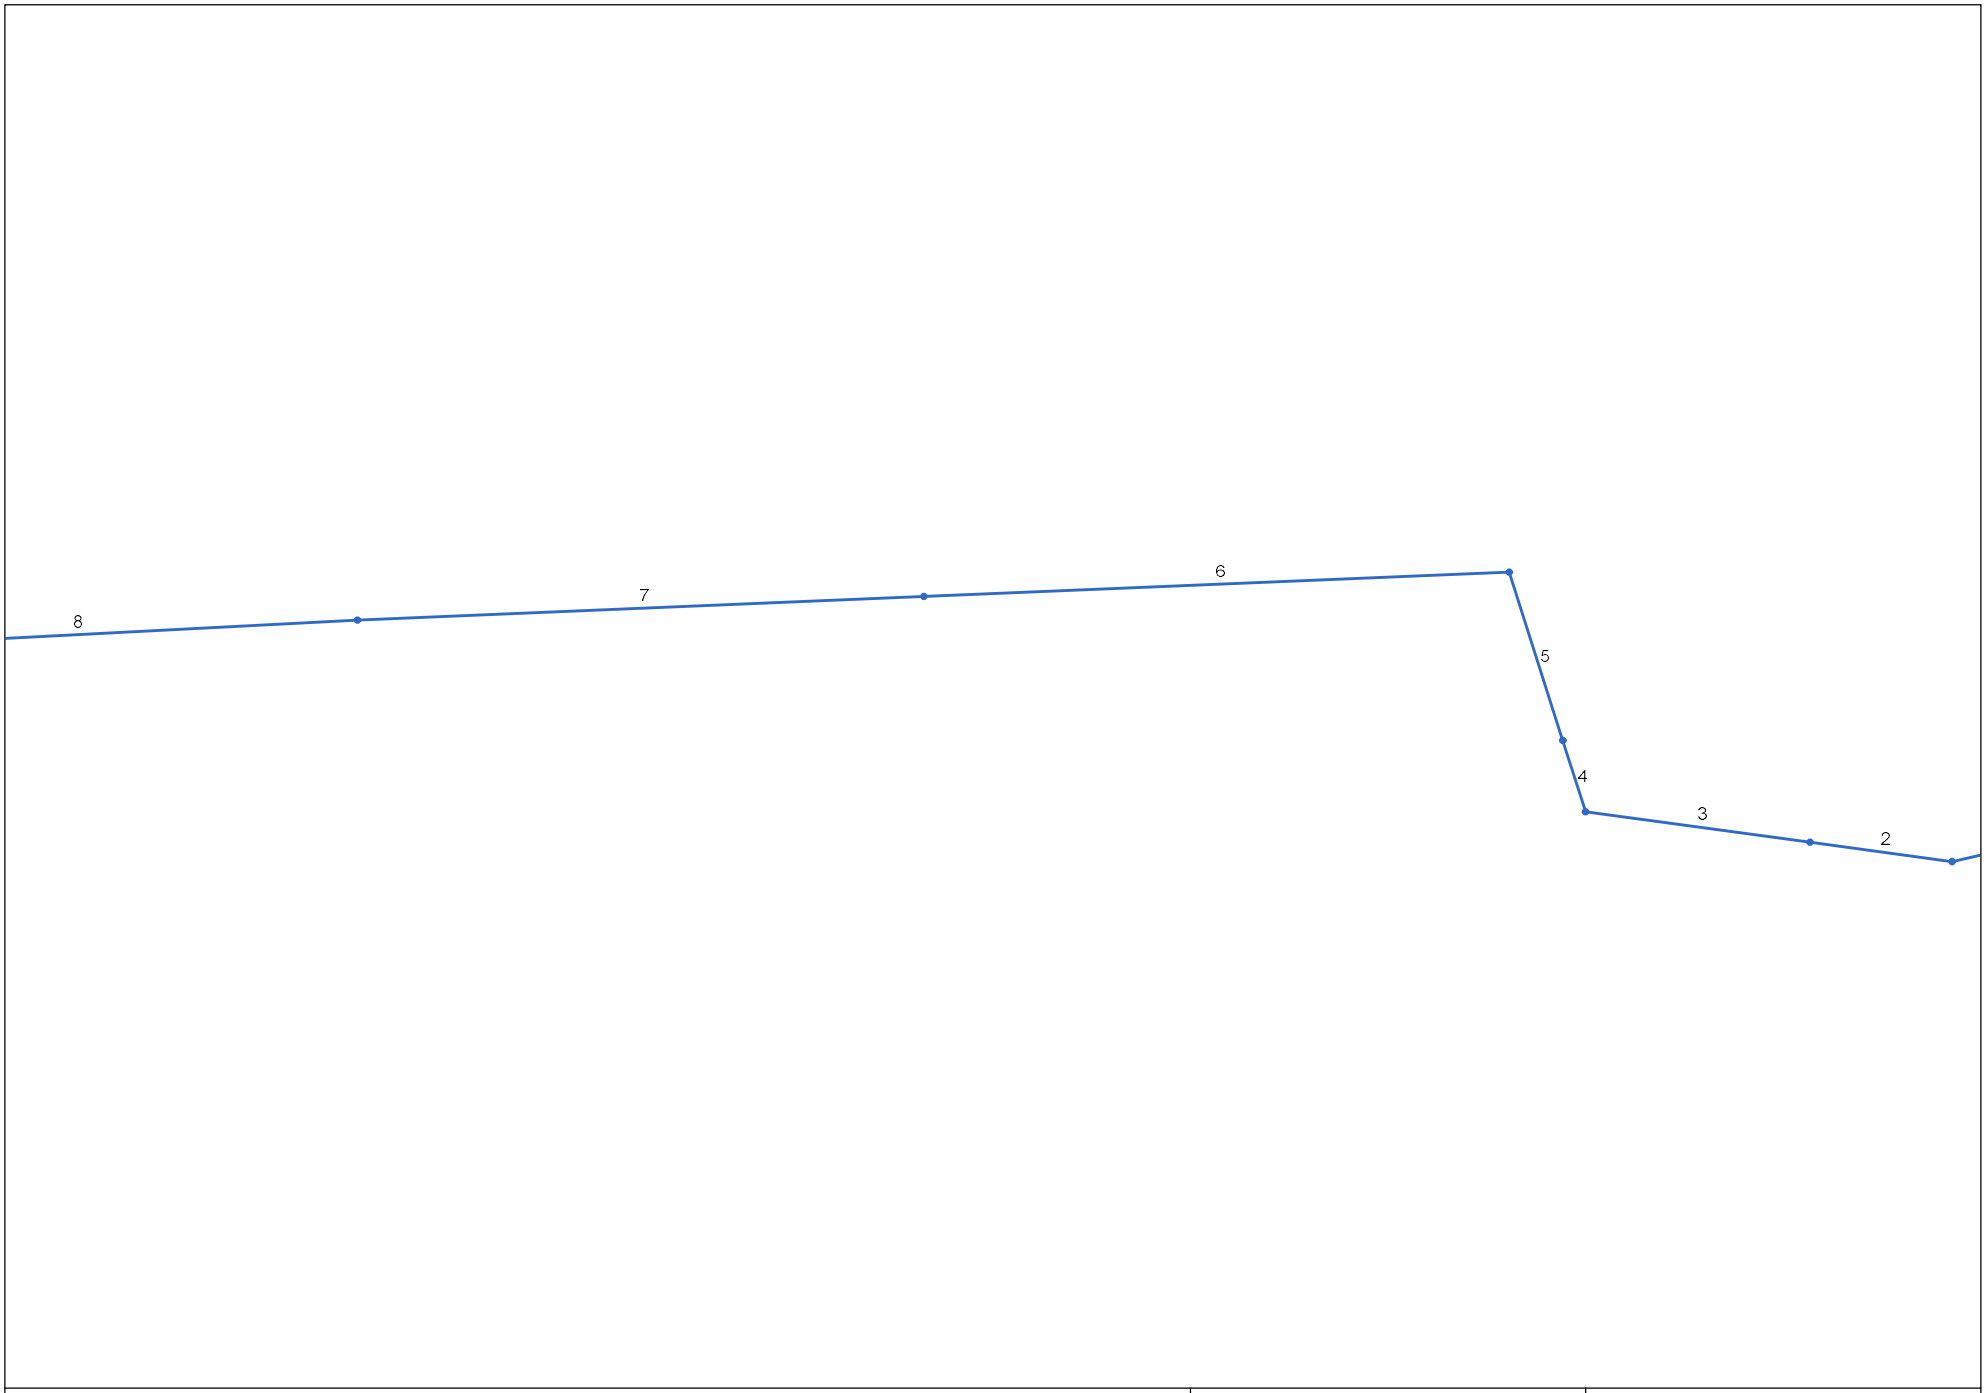

where: WQF = water quality flow (cfs)
q_u = unit peak discharge (cfs/mi^2/inch)
A = drainage area (mi^2)
Q = runoff depth (watershed inches)

Structure Name	q_u (csm/in)	A (miles^2)	Q (in)	WQF (cfs)	
1.01	660	0.01667	0.860	9.46	CDS5653-10
1.31	712	0.01178	0.785	6.58	CDS4045-8
2.01	731	0.01186	0.755	6.55	CDS4045-8

2.1 – NCRS WEB SOIL SURVEY REPORT

United States Department of Agriculture

NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

Custom Soil Resource Report for Hendricks County, Indiana

October 23, 2023

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Hendricks County, Indiana
Survey Area Data: Version 27, Sep 1, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 15, 2022—Jun 21, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
CrA	Crosby silt loam, fine-loamy subsoil, 0 to 2 percent slopes	10.9	34.6%
ThrA	Treaty silty clay loam, 0 to 1 percent slopes	20.7	65.4%
YclA	Crosby silt loam, fine-loamy subsoil-Urban land complex, 0 to 2 percent slopes	0.0	0.1%
Totals for Area of Interest		**31.7**	**100.0%**

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or

landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Hendricks County, Indiana

CrA—Crosby silt loam, fine-loamy subsoil, 0 to 2 percent slopes

Map Unit Setting

National map unit symbol: 2thy4
Elevation: 600 to 1,000 feet
Mean annual precipitation: 36 to 44 inches
Mean annual air temperature: 49 to 54 degrees F
Frost-free period: 145 to 180 days
Farmland classification: Prime farmland if drained

Map Unit Composition

Crosby and similar soils: 93 percent
Minor components: 7 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Crosby

Setting

Landform: Water-lain moraines, recessionial moraines, ground moraines
Landform position (two-dimensional): Summit, backslope, footslope
Landform position (three-dimensional): Interfluve, rise
Down-slope shape: Convex, linear
Across-slope shape: Linear, convex
Parent material: Silty material or loess over loamy till

Typical profile

Ap - 0 to 10 inches: silt loam
Btg - 10 to 17 inches: silty clay loam
2Bt - 17 to 29 inches: clay loam
2BCt - 29 to 36 inches: loam
2Cd - 36 to 79 inches: loam

Properties and qualities

Slope: 0 to 2 percent
Depth to restrictive feature: 24 to 40 inches to densic material
Drainage class: Somewhat poorly drained
Runoff class: Medium
Capacity of the most limiting layer to transmit water (Ksat): Low to moderately high (0.01 to 0.20 in/hr)
Depth to water table: About 6 to 24 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 55 percent
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water supply, 0 to 60 inches: Moderate (about 6.5 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 2w
Hydrologic Soil Group: C/D
Ecological site: F111XA008IN - Wet Till Ridge
Hydric soil rating: No

Minor Components

Williamstown, eroded

Percent of map unit: 5 percent
Landform: Recessionial moraines, ground moraines, water-lain moraines
Landform position (two-dimensional): Summit, shoulder, backslope
Landform position (three-dimensional): Head slope, nose slope, side slope, crest, rise
Down-slope shape: Linear, convex
Across-slope shape: Convex, linear
Ecological site: F111XA009IN - Till Ridge
Hydric soil rating: No

Treaty, drained

Percent of map unit: 2 percent
Landform: Swales, water-lain moraines, depressions
Landform position (two-dimensional): Footslope, toeslope
Landform position (three-dimensional): Base slope, dip
Down-slope shape: Linear
Across-slope shape: Concave
Ecological site: F111XA007IN - Till Depression Flatwood
Hydric soil rating: Yes

ThrA—Treaty silty clay loam, 0 to 1 percent slopes

Map Unit Setting

National map unit symbol: 2ygzn
Elevation: 450 to 1,200 feet
Mean annual precipitation: 37 to 46 inches
Mean annual air temperature: 48 to 55 degrees F
Frost-free period: 145 to 180 days
Farmland classification: Prime farmland if drained

Map Unit Composition

Treaty, frequently ponded, drained, and similar soils: 80 percent
Minor components: 20 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Treaty, Frequently Ponded, Drained

Setting

Landform: Depressions, ground moraines, water-lain moraines, swales
Landform position (three-dimensional): Dip, talf
Down-slope shape: Concave, linear
Across-slope shape: Concave, linear
Parent material: Silty material or loess over loamy till

Typical profile

Ap - 0 to 10 inches: silty clay loam
A - 10 to 14 inches: silty clay loam

Btg1 - 14 to 36 inches: silty clay loam
2Btg2 - 36 to 59 inches: loam
2C - 59 to 79 inches: loam

Properties and qualities

Slope: 0 to 1 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Poorly drained
Runoff class: Negligible
Capacity of the most limiting layer to transmit water (Ksat): Moderately high (0.20 to 0.60 in/hr)
Depth to water table: About 0 to 12 inches
Frequency of flooding: None
Frequency of ponding: Frequent
Calcium carbonate, maximum content: 40 percent
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water supply, 0 to 60 inches: High (about 9.7 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 2w
Hydrologic Soil Group: B/D
Ecological site: F111XA007IN - Till Depression Flatwood
Hydric soil rating: Yes

Minor Components

Southwest, frequently ponded, drained

Percent of map unit: 5 percent
Landform: Depressions, ground moraines, drainageways
Landform position (three-dimensional): Dip
Down-slope shape: Concave, linear
Across-slope shape: Linear, concave
Ecological site: F111XA004IN - Wet Alluvium
Hydric soil rating: Yes

Rensselaer, frequently ponded, drained

Percent of map unit: 5 percent
Landform: Depressions, ground moraines, glacial drainage channels
Landform position (three-dimensional): Dip
Down-slope shape: Concave
Across-slope shape: Concave
Ecological site: R111XA016IN - Outwash Mollisol
Hydric soil rating: Yes

Pella, frequently ponded, drained

Percent of map unit: 5 percent
Landform: Outwash plains, till plains, lake plains, ground moraines
Landform position (three-dimensional): Talf
Down-slope shape: Linear
Across-slope shape: Linear
Ecological site: R111XA016IN - Outwash Mollisol
Hydric soil rating: Yes

Crosby

Percent of map unit: 5 percent
Landform: Recessionial moraines, ground moraines, water-lain moraines

Landform position (three-dimensional): Rise
Down-slope shape: Convex
Across-slope shape: Linear
Ecological site: F111XA008IN - Wet Till Ridge
Hydric soil rating: No

YclA—Crosby silt loam, fine-loamy subsoil-Urban land complex, 0 to 2 percent slopes

Map Unit Setting

National map unit symbol: 2w57p
Elevation: 600 to 1,040 feet
Mean annual precipitation: 36 to 46 inches
Mean annual air temperature: 48 to 55 degrees F
Frost-free period: 145 to 180 days
Farmland classification: Not prime farmland

Map Unit Composition

Crosby and similar soils: 60 percent
Urban land: 30 percent
Minor components: 10 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Soil Information for All Uses

Soil Properties and Qualities

The Soil Properties and Qualities section includes various soil properties and qualities displayed as thematic maps with a summary table for the soil map units in the selected area of interest. A single value or rating for each map unit is generated by aggregating the interpretive ratings of individual map unit components. This aggregation process is defined for each property or quality.

Soil Qualities and Features

Soil qualities are behavior and performance attributes that are not directly measured, but are inferred from observations of dynamic conditions and from soil properties. Example soil qualities include natural drainage, and frost action. Soil features are attributes that are not directly part of the soil. Example soil features include slope and depth to restrictive layer. These features can greatly impact the use and management of the soil.

Hydrologic Soil Group (Meijer - ABE)

Hydrologic soil groups are based on estimates of runoff potential. Soils are assigned to one of four groups according to the rate of water infiltration when the soils are not protected by vegetation, are thoroughly wet, and receive precipitation from long-duration storms.

The soils in the United States are assigned to four groups (A, B, C, and D) and three dual classes (A/D, B/D, and C/D). The groups are defined as follows:

Group A. Soils having a high infiltration rate (low runoff potential) when thoroughly wet. These consist mainly of deep, well drained to excessively drained sands or gravelly sands. These soils have a high rate of water transmission.

Group B. Soils having a moderate infiltration rate when thoroughly wet. These consist chiefly of moderately deep or deep, moderately well drained or well drained soils that have moderately fine texture to moderately coarse texture. These soils have a moderate rate of water transmission.

Group C. Soils having a slow infiltration rate when thoroughly wet. These consist chiefly of soils having a layer that impedes the downward movement of water or soils of moderately fine texture or fine texture. These soils have a slow rate of water transmission.

Group D. Soils having a very slow infiltration rate (high runoff potential) when thoroughly wet. These consist chiefly of clays that have a high shrink-swell potential, soils that have a high water table, soils that have a claypan or clay layer at or near the surface, and soils that are shallow over nearly impervious material. These soils have a very slow rate of water transmission.

If a soil is assigned to a dual hydrologic group (A/D, B/D, or C/D), the first letter is for drained areas and the second is for undrained areas. Only the soils that in their natural condition are in group D are assigned to dual classes.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Hendricks County, Indiana
Survey Area Data: Version 27, Sep 1, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 15, 2022—Jun 21, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Table—Hydrologic Soil Group (Meijer - ABE)

Map unit symbol	Map unit name	Rating	Acres in AOI	Percent of AOI
CrA	Crosby silt loam, fine-loamy subsoil, 0 to 2 percent slopes	C/D	10.9	34.6%
ThrA	Treaty silty clay loam, 0 to 1 percent slopes	B/D	20.7	65.4%
YclA	Crosby silt loam, fine-loamy subsoil-Urban land complex, 0 to 2 percent slopes	C/D	0.0	0.1%
Totals for Area of Interest			**31.7**	**100.0%**

General Provisions Page

The following maintenance plan provides guidelines for proper operation and maintenance of the specified water quality best management practices (BMP's). The information supplied is based on the guidelines of the Town of Brownsburg and should be followed to ensure proper operation and longevity of the system.

Water quality BMP's are to be inspected bi-annually, and per the schedule included in Appendix O-1A. In the event that an unsatisfactory condition exists, it is the responsibility of the Owner to clean or perform any other necessary work to the water quality BMP's so that their condition is deemed satisfactory by the Town of Brownsburg. Maintained infrastructure shall include all pipes and channels built to convey stormwater to the facility, as well as all structures, improvements, and vegetation provided to control the quantity and quality of the stormwater from the facility. "Maintain" is herein defined as good working condition so that these facilities are performing their design functions. Any additional costs of repair, maintenance and inspection are the sole responsibility of the Owner. All work performed on the water quality BMP's is to be within recommendations and specifications of the Town of Brownsburg.

Section 1.0 – Owner Information

Owner information submitted to the Town of Brownsburg should be current and up-to-date at all times. In the event of a change of ownership, contact person, phone, fax, or any other change in information listed on the Owner's Information page, is the responsibility of the Owner to notify the Town of Brownsburg of the changes. It is the responsibility of the Owner to notify the Town of Brownsburg when major repairs or failure have occurred. Owner must notify the Town in writing within thirty (30) days. All changes in ownership and notifications of major repairs or failure can be directed to the Town of Brownsburg at the address listed below:

Town of Brownsburg
Department of Development Services
61 N. Green Street
Brownsburg, IN 46112
DevelopmentServices@Brownsburg.org
(317) 852-1128

Section 2.0 – Site Information

The site in which this manual is written for is located at the address listed below. A set of construction plans may be obtained from the Owner listed on the Owner's Information page in this manual.

Site Address: Heartland Dental
9180 E. 56th Street
Brownsburg, IN 46112

Section 3.0 – Maintenance of BMP's

Maintenance of the BMP's is the responsibility of the Owner. All maintenance is to be performed within the guidelines and requirements of the Town of Brownsburg. These requirements are in Appendix O-1A of this manual. Any deviation from the required maintenance could result in unsatisfactory conditions, increased cost of inspection or even total replacement of the BMP's. Proper maintenance is imperative to ensure proper function and longevity of each BMP measure.

Following construction completion and the issuance of a Notice of Termination (NOT), inspection and maintenance of stormwater management facilities and BMP's shall be the long-term responsibility of the Owner.

Section 4.0 – Inspection of BMP's

Inspections of the water quality BMP's are to be completed in accordance with the schedule included in Appendix O-1A. An Owner representative will perform this inspection and access must be granted to the Town of Brownsburg, if requested.

Inspections shall cover all elements for the stormwater facility as defined in this Maintenance Plan. The Owner shall keep an updated logbook or inspection worksheets documenting the performance of the required operation and maintenance activities for perpetuity. Note inspection dates, facility components inspected, facility condition, and any maintenance performed, or repairs made. Documentation must be provided upon the request of the Town Personnel within forty-eight (48) hours of the request.

The stormwater management facility or BMP Owner must conduct necessary inspections at least once per year. The inspections shall follow the guidelines and requirements of the Town of Brownsburg. The inspection shall cover physical conditions, available water quality storage capacity, and the operational condition of key facility elements. Completed inspection forms must be maintained by the Owner and produced upon request by the Town Personnel within forty-eight (48) hours of the request.

Annual inspection reports shall be due to the Development Services Department, beginning one year after construction is completed. Subsequent reports shall be due each year within the same month of the initial report. All deficiencies found during the inspection shall be addressed. If the annual inspection report is not received within the month it is due, if there are deficiencies which exist but are not included in the report, or if any deficiencies included in the report are not addressed in a timely manner, the Town may take enforcement action in accordance with Chapter 151.29 of the Town of Brownsburg Stormwater Management Ordinance.

In the event that the Town Personnel find a stormwater management facility in need of maintenance or repair, the Development Services Department will notify the Owner on record of the necessary maintenance or repairs

and give the Owner a timeframe for completing the work. If maintenance or repairs are not completed within the designated timeframe, the Town may perform the work and bill the Owner for the actual costs of the work.

Any questions or issues regarding the inspection of the water quality BMP's should be directed to Town of Brownsburg.

Section 5.0 – Town Required Maintenance

In the event that any of the BMP's fail an inspection, it is the responsibility of the Owner to correct the problem and follow the directions as shown on the inspection sheet. All costs incurred through repair or additional inspection of the water quality BMP's is the responsibility of the Owner.

The Town also has the authority to perform long-term inspection of all public or privately-owned stormwater management facilities. Such inspections will be in addition to the regular inspections required to be performed by the facility owner. The inspections will follow the operation and maintenance procedures listed in Appendix O-1A. Noted deficiencies and recommended corrective action will be included in an inspection report.

Appendix O-1A

Maintenance Guidelines

Stormwater Water Quality BMP Inspection and Maintenance Activities

Operation and maintenance procedures and practices shall be reviewed and assessed annually. The BMP owner agrees to follow the following maintenance and inspection program:

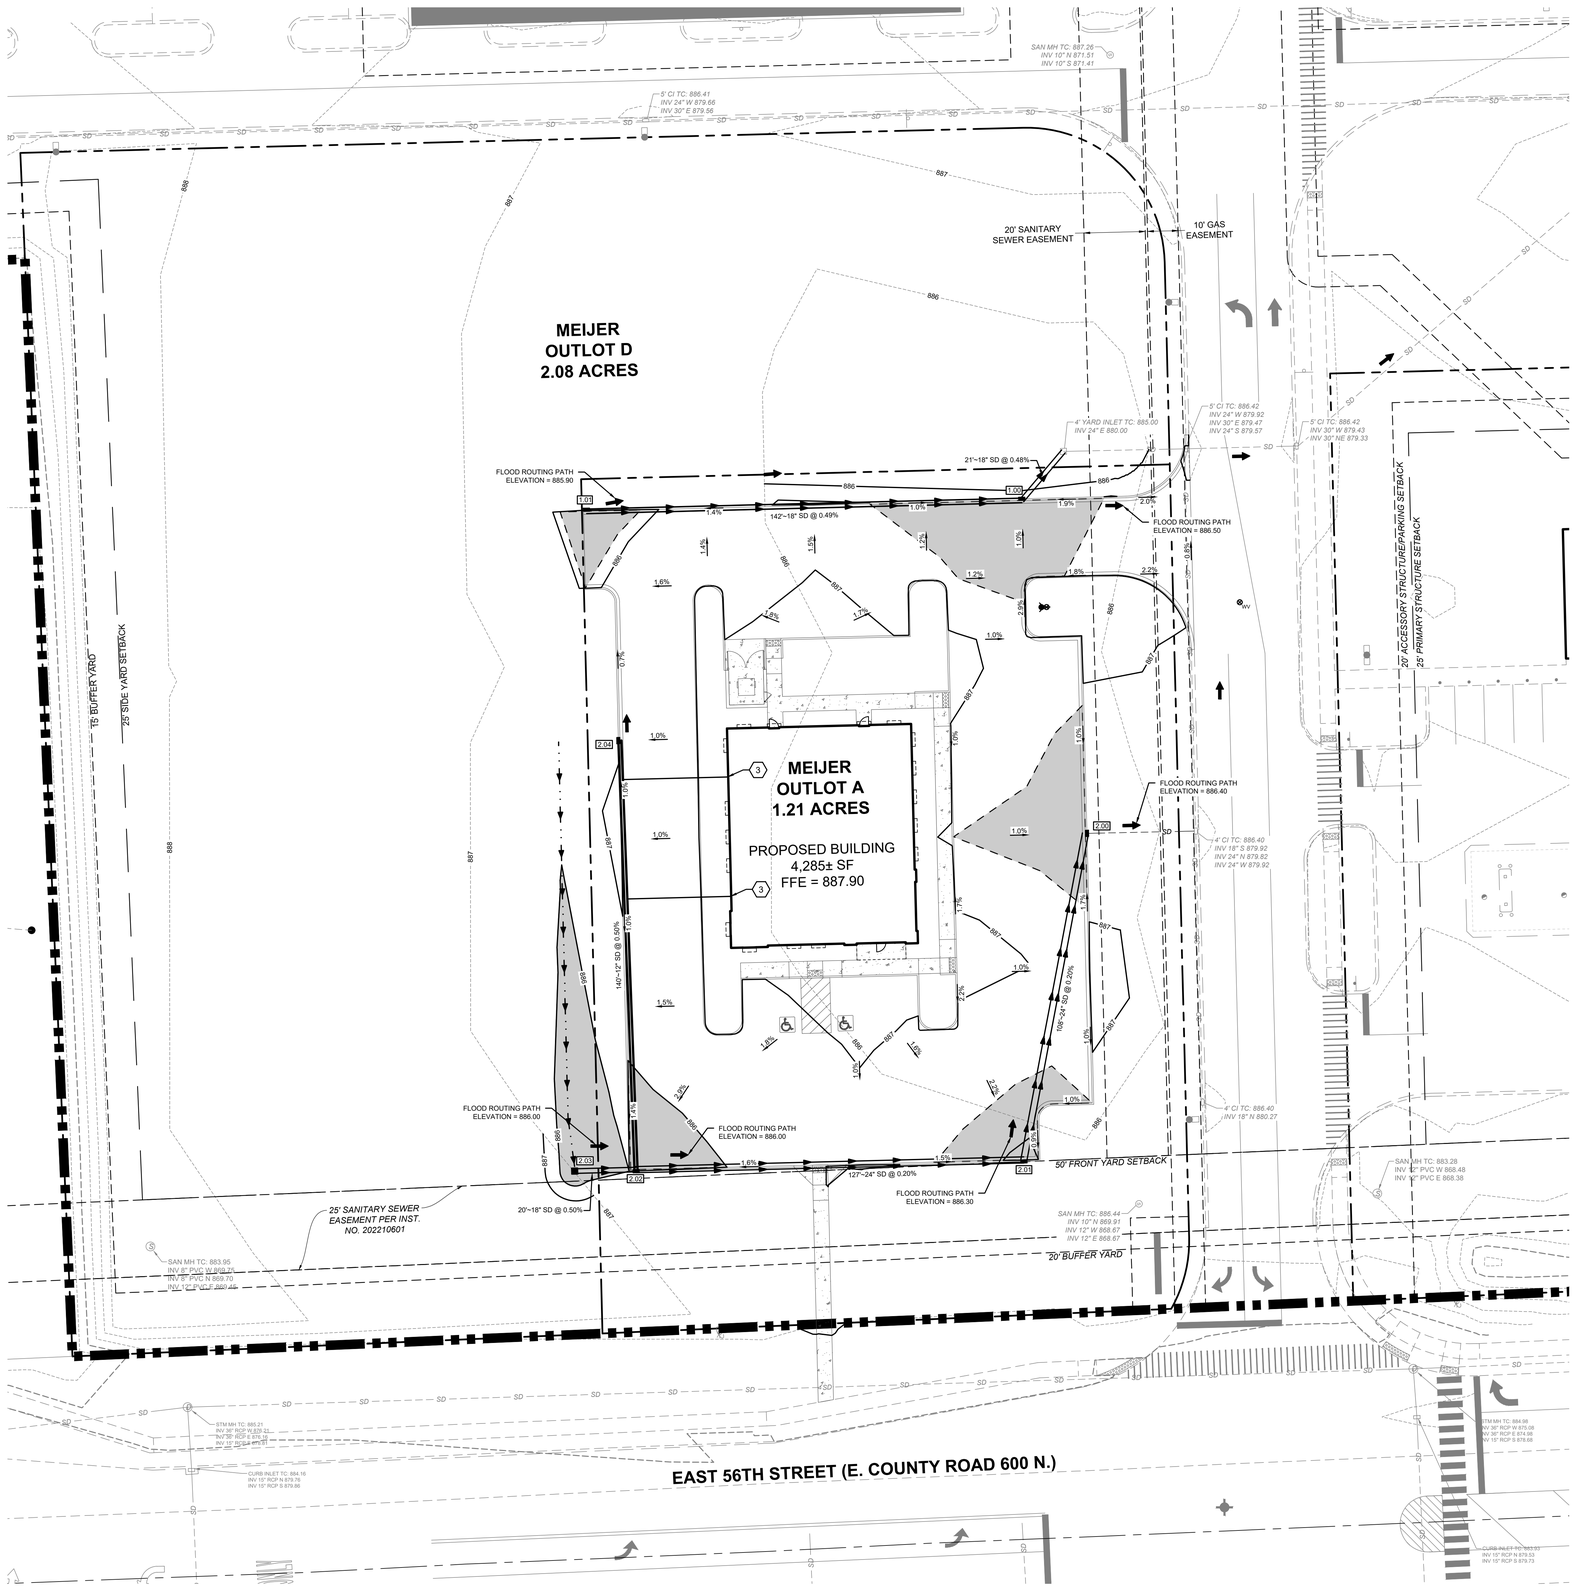

Maintenance Item	Inspection Frequency	Maintenance
Storm Structures & Pipes		
1. Access	Annually	• Open the access hatch to ensure proper function.
2. Remove Debris	Bi-Annually and after major storm events (1.50 inches or greater)	• Remove debris from the storm structures when the depth of debris exceeds 4 inches.
3. Sediment Buildup	Annually and after major storm events (1.50 inches or greater)	• Remove sediment from the drainage structure's sump when the sediment depth exceeds 18 inches.
4. Function	Annually and after major storm events (1.50 inches or greater)	• Ensure the grate and structure is not blocked.
Access Routes		
1. General Inspection	Annually and as needed	• Access routes, including roadways and sidewalks, shall be inspected and maintained as needed.
Pest Control Measures		
1. General Inspection	As needed	• Pest control measures shall be implemented to address insects, rodents, and other pests. • Natural pest control is preferred over chemical treatments.

Signage		
1. Installation and Maintenance	As needed	• Signage shall be installed and maintained in accordance with the Town of Brownsburg Construction Standards and where necessary to protect property and the public. • Native vegetation plantings shall have “No Mow” or other appropriate signage.

Note: Do not enter underground detention manholes to inspect system unless Occupational Safety & Health Administration (OSHA) regulations for confined space entry are followed.

GENERAL NOTES

1. CONDUCT SITE CLEARING OPERATIONS TO ENSURE MINIMUM INTERFERENCE WITH ROADS, STREETS, WALKS, AND OTHER ADJACENT OCCUPIED OR USED FACILITIES. DO NOT CLOSE OR OBSTRUCT STREETS, WALKS, OR OTHER OCCUPIED OR USED FACILITIES WITHOUT PERMISSION FROM AUTHORITIES HAVING JURISDICTION. STREETS AND ROADWAYS SHALL BE THOROUGHLY CLEANED AND/OR SWEPT ON A DAILY BASIS OR MORE FREQUENTLY AS REQUIRED BY THE GOVERNING AUTHORITY. RESTORE DAMAGED IMPROVEMENTS TO ORIGINAL CONDITION AS ACCEPTABLE TO PARTIES HAVING JURISDICTION.
2. PROVIDE DUST CONTROL MEASURES IN ACCORDANCE WITH LOCAL AUTHORITIES.
3. ALL STREET SURFACES, DRIVEWAYS, CULVERTS, ROADSIDE DRAINAGE DITCHES AND OTHER STRUCTURES THAT ARE DISTURBED OR DAMAGED IN ANY MANNER AS A RESULT OF CONSTRUCTION SHALL BE REPLACED IN ACCORDANCE WITH SPECIFICATIONS.
4. UNLESS SPECIFIED OTHERWISE, ALL MATERIAL AND WORKMANSHIP SHALL BE IN ACCORDANCE WITH MEIJER STANDARD SPECIFICATIONS, THE STATE DEPARTMENT OF ENVIRONMENTAL QUALITY STANDARDS, DEPARTMENT OF TRANSPORTATION SPECIFICATIONS AND/OR THE APPROPRIATE LOCAL AUTHORITIES.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL PERMITS, PERMIT FEES, LICENSES, AND LICENSE FEES, UNLESS NOTED OTHERWISE.
6. RELOCATION OF ANY UTILITIES SHALL BE PERFORMED IN ACCORDANCE WITH THE PROVISIONS OF THE APPROPRIATE UTILITY COMPANY AND/OR REGULATORY AGENCY. OBTAIN WRITTEN APPROVAL FROM THE ENGINEER BEFORE ANY UTILITY RELOCATION.
7. ELECTRONIC FILES IN DWG FORMAT WILL BE SUPPLIED TO THE CONSTRUCTION MANAGER FOR LAYOUT AND GRADING.
8. ELECTRONIC FILE USE TERMS AND CONDITIONS:
   - 8.A. RECIPIENT ACKNOWLEDGES THAT ANY USE OF THE TRANSFERRED DATA IS FOR INFORMATION ONLY AND NOT GUARANTEED OR WARRANTED BY MEIJER OR ITS CONSULTANTS. USE OF TRANSFERRED DATA BY THE RECIPIENT SHALL BE AT RECIPIENT'S SOLE RISK. RECIPIENT ACKNOWLEDGES THAT THE AUTOMATED CONVERSION OF INFORMATION AND DATA FROM THE ORIGINAL FORMAT AND SYSTEM TO AN ALTERNATE FORMAT OR SYSTEM CAN NOT BE ACCOMPLISHED WITHOUT THE INTRODUCTION OF INEXACTITUDES, ANOMALIES, AND ERRORS. RECIPIENT FURTHER ACKNOWLEDGES THAT THE ELECTRONIC DATA MAY NOT BE FULLY COMPATIBLE WITH RECIPIENT'S COMPUTER SYSTEM AND NEITHER MEIJER NOR ITS CONSULTANTS MAKE NO REPRESENTATIONS REGARDING SUCH COMPATIBILITY.
   - 8.B. ACCORDINGLY, WITH RESPECT TO THE CONVERSION AND USE OF SUCH ELECTRONIC DATA, RECIPIENT AGREES TO ASSUME ALL RISKS ASSOCIATED THEREWITH, AND TO THE FULLEST EXTENT PERMITTED BY LAW, TO HOLD HARMLESS AND INDEMNIFY MEIJER AND THEIR CONSULTANTS FROM AND AGAINST ALL CLAIMS, LIABILITIES, LOSSES, DAMAGES, AND COSTS, INCLUDING BUT NOT LIMITED TO ATTORNEY'S FEES AND COSTS, WHETHER OR NOT SUIT HAS BEEN FILED, ARISING OUT OF, OR IN ANY WAY CONNECTED WITH THE USE, MODIFICATION, MISINTERPRETATION, MISUSE, OR REUSE BY RECIPIENT OR OTHERS OF THE ELECTRONIC DATA WHICH IS PROVIDED BY MEIJER OR ITS CONSULTANTS UNDER THESE TERMS AND CONDITIONS.
   - 8.C. THESE TERMS AND CONDITIONS SHALL BE BINDING UPON THE SUCCESSORS AND ASSIGNS OF THE PARTIES.

UPON ACCEPTANCE OF THE ELECTRONIC DATA TRANSMISSION, RECIPIENT HEREBY AGREES TO THE FOREGOING TERMS AND CONDITIONS. IF RECIPIENT DOES NOT AGREE TO THE FOREGOING TERMS AND CONDITIONS, MEIJER AND ITS CONSULTANTS DO NOT AUTHORIZE THE USE OF THE TRANSMITTED DATA, AND RECIPIENT SHALL DESTROY THE TRANSMITTED DATA AND NOTIFY MEIJER OR ITS CONSULTANTS OF THE SAME BY PROVIDING WRITTEN NOTICE WITHIN ONE DAY OF TRANSMISSION. FAILURE TO PROVIDE SUCH NOTICE SHALL ACT AS WAIVER AND RECIPIENT SHALL BE BOUND TO THE FOREGOING TERMS AND CONDITIONS.

LOCAL UTILITY LOCATING AGENCY

ALL CONTRACTORS SHALL NOTIFY UTILITY COMPANIES AND GOVERNMENT AGENCIES IN WRITING OF THE INTENT TO EXCAVATE NO LESS THAN 72 HOURS PRIOR TO SUCH EXCAVATION (EXCLUSIVE OF SATURDAYS, SUNDAYS, AND HOLIDAYS) AND CALL LOCAL UTILITY LOCATING AGENCY AT 1-800-382-5544.

EXISTING UTILITY LOCATIONS SHOWN SHALL BE VERIFIED BY CONTRACTOR PRIOR TO CONSTRUCTION. LOCATIONS OF UNDERGROUND UTILITIES ON THESE DRAWINGS ARE APPROXIMATE ONLY AND BASED ON ACTUAL FIELD LOCATIONS OF VISIBLE STRUCTURES AND PLAN COMPUTATIONS.

SURVEY

EXISTING TOPOGRAPHY IS BASED ON AN ACTUAL FIELD SURVEY PERFORMED BY WOOLPERT, INC., COMPLETED ON JUNE 17, 2023 AND SUPPLEMENTED ON OCTOBER 10, 2023.

GEOTECHNICAL

REFER TO REPORT OF GEOTECHNICAL INVESTIGATION - PHASE 1 PREPARED BY ATLAS TECHNICAL CONSULTANTS LLC DATED OCTOBER 10, 2023.

REFER TO SOIL BORING LOGS BY ATLAS TECHNICAL CONSULTANTS LLC DATED AUGUST 21, 2023 TO SEPTEMBER 13, 2023.

GENERAL NOTES

1. PLANIMETRIC FEATURES SHOWN HEREON ARE BASED UPON A FIELD SURVEY COMPLETED BY WOOLPERT INC. ON JUNE 17, 2023 AND SUPPLEMENTED ON OCTOBER 10, 2023 AND WILL NOT REFLECT ANY CHANGES TO THE PHYSICAL SITE THROUGH MANMADE OR NATURAL OCCURRENCES BEYOND SAID DATE. CONTRACTOR SHALL VISIT THE SITE PRIOR TO COMMENCEMENT OF CONSTRUCTION TO VERIFY SITE CONDITIONS. ANY DISCREPANCIES BETWEEN THE ACTUAL FIELD CONDITIONS AND PLAN DOCUMENTS SHALL BE BROUGHT TO THE ATTENTION OF THE MEIJER PROJECT MANAGER IMMEDIATELY.
2. ANY USE OF THIS DRAWING BY PARTIES NOT CONTRACTED DIRECTLY WITH WOOLPERT OR CERTIFIED TO ON THIS DRAWING IS PROHIBITED WITHOUT PRIOR WRITTEN PERMISSION.
3. ONLY THE IMPROVEMENTS THAT WERE VISIBLE FROM ABOVE GROUND AT TIME OF SURVEY, THROUGH A NORMAL SEARCH AND WALK THROUGH OF THE SITE, ARE SHOWN ON THE FACE OF THIS PLAT. THIS SURVEY MAY NOT REFLECT ALL UTILITIES OR IMPROVEMENTS, IF SUCH ITEMS ARE HIDDEN BY LANDSCAPING, OR ARE COVERED BY SUCH THINGS AS DUMPSTERS, TRAILERS, SNOW, ETC.
4. ACCORDING TO THE FLOOD INSURANCE RATE MAPS - MAP NUMBERS 18063C0176E, PUBLISHED BY THE FEDERAL EMERGENCY MANAGEMENT AGENCY WITH A REVISION DATE OF JUNE 15, 2022, WHICH IS THE MOST CURRENT FLOOD INSURANCE RATE MAP AVAILABLE ON FEMA'S WEBSITE, THIS SITE IS LOCATED IN ZONE "X" (NO SCREEN) - AREAS OF MINIMAL FLOOD HAZARD, THE ABOVE REFERENCED FLOODPLAIN MAP WAS UTILIZED FOR THIS DETERMINATION.
5. RECYCLED CONCRETE MATERIAL IS DEFINED AS CRUSHED CONCRETE SLAB, FOUNDATIONS, CURBS AND SIDEWALK, ALONG WITH THE GRANULAR BASE MATERIAL ASSOCIATED WITH THESE ITEMS (EXCLUDES CRUSHED CONCRETE BLOCK). THIS MATERIAL SHALL BE CRUSHED AND OR PROCESSED TO BE IN ACCORDANCE WITH MEIJER SPECIFICATIONS AND CAN BE USED AS FOLLOWS:
   - MASS GRADING AND GENERAL FILL AREAS.
   - UTILITY TRENCH BACKFILL (EXCEPT FOR PIPE BEDDING).
   - SUBGRADE FILL MATERIAL DIRECTLY UNDER THE ASPHALT AND CONCRETE PAVEMENT SECTIONS. (MATERIAL SHALL NOT BE USED AS PART OF THE PAVEMENT SECTIONS.)
   - BACKFILL MATERIAL AROUND THE UNDERGROUND DETENTION SYSTEM (MATERIAL SHALL NOT BE USED AS PIPE BEDDING), IF USED IN THIS APPLICATION, CONTRACTOR MUST DEMONSTRATE THAT THE MATERIAL MEETS THE REQUIRED GRADATION SPECIFICATIONS AND THE MATERIAL IS FREE OF CONTAMINATION.

DEMOLITION NOTES

1. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO OBTAIN ALL REQUIRED PERMITS RELATED TO AIR QUALITY DURING DEMOLITION FROM IDEM.
2. CONTRACTOR SHALL DISPOSE OF ALL DEMOLITION DEBRIS IN A LEGAL MANNER IN ACCORDANCE WITH ALL APPLICABLE GOVERNING CRITERIA. UPON COMPLETION OF DEMOLITION WORK, CONTRACTOR SHALL CLEAR SITE OF ALL DEBRIS.
3. CONTRACTOR SHALL MAINTAIN ALL EXISTING UTILITY SERVICES TO EXISTING ADJACENT BUILDINGS TO REMAIN. CONTRACTOR TO COORDINATE WITH EXISTING BUILDING OWNER(S) SHOULD ANY SERVICE INTERRUPTIONS BE REQUIRED.
4. CONTRACTOR SHALL ENSURE THAT ALL APPROPRIATE MEASURES ARE IN PLACE SHOULD A RAIN EVENT OCCUR DURING THE REMOVAL AND/OR CONSTRUCTION OF THE STORM AND SANITARY SEWER SYSTEMS TO MAINTAIN FLOW TO THE APPROPRIATE SYSTEMS.
5. VOIDS CREATED BY REMOVAL OF EXISTING ITEMS, SUCH AS LIGHT POLES, SIGNS, ETC., SHALL BE FILLED IN ACCORDANCE WITH MEIJER SPECIFICATIONS.
6. REMOVE (UNDER PROPOSED PAVEMENT AND BUILDING)/ABANDON (UNDER PROPOSED LAWN) ANY LOCATED INACTIVE STORM OR DOWNSPOUT LINES, SANITARY SERVICES, GAS SERVICES, WATER SERVICES, LIGHTING CONDUIT OR OTHER FOUND UTILITIES PER AGENCY REQUIREMENTS.
7. CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS TO PERFORM WORK ON THE OWNER'S PROPERTY.
8. CONTRACTOR RESPONSIBLE FOR COORDINATING TEMPORARY POWER TO SITE.
9. FIRE EMERGENCY VEHICLE ACCESS MUST BE MAINTAINED DURING CONSTRUCTION.
10. PORTABLE FIRE EXTINGUISHERS MUST BE READILY AVAILABLE TO CONSTRUCTION CREWS DURING CONSTRUCTION.
11. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO VISIT THE SITE PRIOR TO COMMENCEMENT OF CONSTRUCTION TO VERIFY SITE CONDITIONS. ANY DISCREPANCIES BETWEEN ACTUAL FIELD CONDITIONS AND PLAN DOCUMENTS SHALL BE BROUGHT TO THE ATTENTION OF THE MEIJER PROJECT MANAGER IMMEDIATELY.
12. OPEN BURNING ON SITE IS PROHIBITED.

KEYNOTES ⟨X⟩

1. ITEM TO REMAIN, PROTECT IN PLACE.
2. SAWCUT PAVEMENT/CURB/SIDEWALK. REMOVE SIDEWALK AT NEAREST EXISTING JOINT.
3. EXISTING UTILITY TO BE MAINTAINED DURING CONSTRUCTION.
4. REMOVE AND RELOCATE EXISTING UTILITY STRUCTURE. SEE C-400 FOR PROPOSED LOCATION. CONTRACTOR SHALL REVIEW CONDITION OF EXISTING STRUCTURE TO BE RELOCATED IN WHICH PROPOSED PIPES ARE PROPOSED TO CONNECT, IF CONDITIONS WARRANT IT, STRUCTURE SHALL BE REPLACED.
5. REMOVE PIPE.
6. 10' GAS EASEMENT.
7. PUBLIC SANITARY EASEMENT.

BENCHMARK:

THE BASIS OF ELEVATIONS HEREON IS NAVD 88 PER OBSERVATIONS OF SELECTED STATIONS IN THE NATIONAL GEODETIC SURVEY CONTINUOUSLY OPERATING REFERENCE STATION (NGS CORS) NETWORK.
MAG NAIL SET IN THE CORNER TOP OF THE CURB JOINT - SEE C-001 FOR LOCATION.

ELEVATION = 889.36'

GENERAL NOTES

1. NO DIMENSION MAY BE SCALED. REFER UNCLEAR ITEMS TO THE ENGINEER FOR INTERPRETATION.
2. DIMENSIONS AND/OR COORDINATES ARE TO FACE OF CURB, FACE OF BUILDING (FACE OF PRECAST), EDGE OF PAVEMENT OR CENTER OF STRUCTURE OR SIGN. VERIFY BUILDING DIMENSIONS WITH ARCHITECTURAL DRAWINGS.
3. BUILDING SLABS, UNDERBED THICKNESS AND LOCATIONS ARE SHOWN FOR REFERENCE. VERIFY WITH STRUCTURAL DRAWINGS.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DEWATERING TO ACCOMPLISH ALL WORK INDICATED ON PLANS AND PERFORM REQUIRED COMPACTION OPERATIONS.
5. PROVIDE ADEQUATE BARRICADES AT DRIVES, ENTRANCES, EXCAVATIONS AND OTHER OPENINGS TO KEEP OUT UNAUTHORIZED PERSONS AND FOR PUBLIC SAFETY AND TRAFFIC CONTROL. SAFETY PROVISIONS OF APPLICABLE LAWS SHALL BE OBSERVED AT ALL TIMES. BARRICADES LEFT IN PLACE AT NIGHT SHALL BE LIGHTED.
6. NO EQUIPMENT OR MATERIAL STORAGE IS PERMITTED IN THE RIGHT-OF-WAY.
7. WORK SHALL CONFORM TO THE REQUIREMENTS OF MEIJER STANDARD SPECIFICATIONS, GOVERNING AGENCIES HAVING JURISDICTION, GRADING, PAVING AND MATERIALS SHALL COMPLY WITH THE STATE DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS FOR CONSTRUCTION AS WELL AS PROJECT SPECIFICATIONS AND DRAWINGS, IN CASE OF DISCREPANCIES BETWEEN REQUIREMENTS, THE MORE STRINGENT SHALL APPLY.
8. EXTERIOR CONCRETE SLABS ADJACENT TO BUILDING SHALL BE PLACED ON 4" STRUCTURAL CUSHION, UNLESS NOTED OTHERWISE.
9. AGGREGATE TO EXTEND 12" BEYOND BACK OF CURB OR EDGE OF PAVEMENT UNLESS OTHERWISE NOTED.
10. ALL RADII SHALL BE 4' UNLESS OTHERWISE NOTED.
11. ALL PAVEMENT MARKING SHALL BE YELLOW IN COLOR UNLESS NOTED OTHERWISE.
12. REFER TO SHEET C-701 FOR SIGNAGE/STRIPING DETAILS.

GRADING NOTES

1. ALL SPOT ELEVATIONS ARE TO:
   TOP OF PAVEMENT - (TP)
   TOP OF SLAB - (TS)
   TOP OF CURB - (TC)
   TOP OF WALL - (TW)
   GUTTER PAN - (GP)
   U.O.N.- UNLESS OTHERWISE NOTED
2. CONTOURS SHOWN ARE FOR REFERENCE ONLY.
3. PROVIDE POSITIVE DRAINAGE AT ALL TIMES TO ENSURE NO STANDING WATER WITHIN PAVEMENT, BUILDING PAD, OR GREEN AREAS.
4. FOR ALL CURB ISLANDS, CENTER OF ISLANDS TO BE A MINIMUM OF 6" HIGHER THAN TOP OF CURB.
5. RESTORE ALL STREET SURFACES, DRIVEWAYS, CULVERTS, ROADSIDE DRAINAGE DITCHES, AND OTHER PUBLIC OR PRIVATE STRUCTURES THAT ARE DISTURBED OR DAMAGED AS A RESULT OF CONSTRUCTION ACTIVITIES TO MATCH AT A MINIMUM EXISTING CONDITIONS.
6. CONTRACTOR'S MANNER AND METHOD OF INGRESS AND EGRESS WITH RESPECT TO THE PROJECT AREAS SHALL IN NO WAY PROHIBIT OR DISTURB NORMAL PEDESTRIAN OR VEHICULAR TRAFFIC IN THE VICINITY AND IS SUBJECT TO REGULATION AND WRITTEN APPROVAL OF APPROPRIATE GOVERNING AGENCIES.
7. FINISHED SUBGRADE SURFACE SHALL NOT BE MORE THAN 0.1 FEET ABOVE OR BELOW ESTABLISHED FINISHED SUBGRADE ELEVATIONS AND ALL GROUND SURFACES SHALL VARY UNIFORMLY BETWEEN INDICATED ELEVATIONS. FINISHED DITCHES SHALL BE GRADED TO ALLOW FOR PROPER DRAINAGE WITHOUT PONDING AND IN A MANNER THAT WILL MINIMIZE EROSION.
8. VERIFY THE HORIZONTAL AND VERTICAL LOCATION OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.
9. PROTECT AND MAINTAIN CROSSINGS OF OTHER UTILITIES.
10. ALL MATERIAL, SPECIFICATIONS, AND CONSTRUCTION METHODS SHALL BE IN CONFORMANCE WITH MEIJER STANDARD SPECIFICATIONS AND THOSE OF THE APPROPRIATE UTILITY COMPANIES.
11. BEFORE COMMENCING WORK, CONTRACTOR SHALL VERIFY ALL LOCATIONS AND ELEVATIONS OF EXISTING UTILITIES.
12. ENTRY LANDINGS PART OF AN ACCESSIBLE ROUTE SHALL MAINTAIN A MAXIMUM SLOPE OF 1.50% IN ALL DIRECTIONS. THIS IS INTENDED TO ALLOW FOR CONSTRUCTION TOLERANCES. SLOPES STEEPER THAN 1:48 SHALL NOT BE PERMITTED THUS MEETING THE REQUIREMENTS OF THE DEPARTMENT OF JUSTICE 2010 ADA STANDARDS FOR ACCESSIBLE DESIGN. ALL SLOPES TO BE VERIFIED AS ACCEPTABLE BY USING A 2'-0" LEVEL.
13. CONTRACTOR TO NOTIFY THE SITE ENGINEER SHOULD ANY EXISTING DRAINS AND/OR TILES BE ENCOUNTERED DURING CONSTRUCTION.

KEYNOTES (X)

1. CONNECT TO EXISTING UTILITY PER AGENCY REQUIREMENTS. CONTRACTOR TO VERIFY LOCATION OF EXISTING UTILITY IN WHICH TO MAKE CONNECTION.
2. ADJUST EXISTING UTILITY STRUCTURE TO FINISHED GRADE.
3. 6" ROOF DRAIN FOR GUTTER DOWNSPOUTS. SEE DETAIL A5 ON C-700.

GENERAL NOTES

1. THE TOWN OF BROWNSBURG RESERVES THE RIGHT TO REQUIRE ADDITIONAL ONSITE CONTROLS AS DEEMED NECESSARY TO MAINTAIN COMPLIANCE WITH THE INDIANA CONSTRUCTION STORMWATER GENERAL PERMIT AND THE TOWN'S STORMWATER MANAGEMENT ORDINANCE. ALL EROSION AND SEDIMENT CONTROLS, BEST MANAGEMENT PRACTICES AND POLLUTION PREVENTION MEASURES MUST BE INSTALLED AND MAINTAINED IN ACCORDANCE WITH THE INDIANA STORMWATER QUALITY MANUAL.
2. EXISTING SOIL SOIL TYPES, HYDROLOGIC SOIL GROUPS, AND SOIL DESCRIPTIONS ARE FROM THE NATIONAL RESOURCE CONSERVATION SERVICE'S (NRCS) WEB SOIL SURVEY. PLEASE SEE THE SOIL LEGEND FOR ADDITIONAL DETAILS.
3. REFER TO SHEET C-313 FOR EROSION CONTROL NOTES AND ESTIMATED SWPPP IMPLEMENTATION SCHEDULE.

BEST MANAGEMENT PRACTICE (BMP) PHASE 1 IMPLEMENTATION SEQUENCE

1. PER TOWN OF BROWNSBURG REQUIREMENTS, FOLLOWING APPROVAL OF THE SWPPP AND AT LEAST 72 HOURS PRIOR TO ANY LAND-DISTURBING ACTIVITIES (INCLUDING INSTALLATION OF SEDIMENT AND EROSION CONTROL MEASURES), CONTRACTOR SHALL SET UP AND CONDUCT AN ONSITE PRE-CONSTRUCTION MEETING. REQUIRED ATTENDEES INCLUDE: THE TOWN, DEVELOPER, CONTRACTOR, SEDIMENT AND EROSION CONTROL INSTALLER, AND THE QUALIFIED INDIVIDUAL FOR THE SEDIMENT AND EROSION CONTROL INSPECTIONS.
2. POST A COPY OF THE NOI AT THE CONSTRUCTION ENTRANCE ALONG WITH THE CONTACT INFORMATION OF THE PERSON RESPONSIBLE FOR IMPLEMENTING THE SWPPP. THE SWPPP SHOULD BE ONSITE AND WEEKLY SITE REPORTS NEED TO BE AVAILABLE WITHIN 48 HOURS OF A REQUEST.
3. STAKE THE PROJECT LIMITS OF DISTURBANCE AS SHOWN ON THE SWPPP DRAWING.
4. BEGIN CLEARING AND GRUBBING ONLY THE MINIMUM AREA NECESSARY FOR INSTALLATION OF PHASE 1 BMPS. CLEAR AREAS REQUIRED FOR BMPS AS EACH BMP IS BEING INSTALLED.
5. INSTALL TEMPORARY STABILIZED CONSTRUCTION ENTRANCE.
6. PERIMETER CONTROLS AND OTHER PRACTICES INTENDED TO TRAP SEDIMENT SHALL BE IMPLEMENTED PRIOR TO GRADING AND WITHIN SEVEN (7) DAYS FROM THE START OF GRUBBING FOR SAID PERIMETER CONTROLS AND PHASE 1 BMPS.
7. INSTALL PERIMETER CONTROLS.
8. INSTALL INLET PROTECTION AT EXISTING DRAINAGE STRUCTURES.
9. TEMPORARILY STABILIZE PER DETAIL C1 ON C-312 ANY AREAS DISTURBED BY THE PLACEMENT OR ADJUSTMENT OF TEMPORARY BMPS.
10. PRIOR TO MODIFICATION OF THE APPROVED SWPPP DESIGN, CONSULT WITH WOOLPERT PROJECT ENGINEER. ANY DESIGN MODIFICATIONS OR ADDENDA TO THE PROJECT ARE REQUIRED TO BE SUBMITTED TO THE TOWN OF BROWNSBURG FOR REVIEW AND APPROVAL PRIOR TO IMPLEMENTATION.

KEYNOTES (X)

1. PROPOSED BUILDING FOOTPRINT.
2. TEMPORARY STABILIZED CONSTRUCTION ENTRANCE.
3. SILT FENCE/EROSION EEL. SEE DETAIL E1 ON SHEET C-312 FOR EROSION EEL DETAIL. SEE NOTE BELOW FOR ADDITIONAL DETAILS ON SILT FENCE AND EROSION EEL INSTALLATION.
4. STOCKPILE AREA. SEE DETAIL A3 ON SHEET C-312.
5. POTENTIAL CONSTRUCTION STAGING MATERIAL STORAGE AREA (INCLUDES FUELING AREA, DUMPSTERS, CONCRETE WASHOUT, TRAILERS, PORT-O-LET, ETC.).
6. OUTFALL: SHEET FLOW INTO PROPOSED AND MODIFIED EXISTING INLETS, WHICH DISCHARGE TO THE MEIJER STORE DRAINAGE SYSTEM.

GENERAL NOTES

1. THE TOWN OF BROWNSBURG RESERVES THE RIGHT TO REQUIRE ADDITIONAL ONSITE CONTROLS AS DEEMED NECESSARY TO MAINTAIN COMPLIANCE WITH THE IDEM CONSTRUCTION STORMWATER GENERAL PERMIT AND THE CITY'S STORMWATER MANAGEMENT ORDINANCE. ALL EROSION AND SEDIMENT CONTROLS, BEST MANAGEMENT PRACTICES AND POLLUTION PREVENTION MEASURES MUST BE INSTALLED AND MAINTAINED IN ACCORDANCE WITH THE INDIANA STORMWATER QUALITY MANUAL.
2. EXISTING SOIL TYPES, HYDROLOGIC SOIL GROUPS, AND SOIL DESCRIPTIONS ARE FROM THE NATIONAL RESOURCE CONSERVATION SERVICE'S (NRCS) WEB SOIL SURVEY, PLEASE SEE THE SOIL LEGEND BELOW FOR ADDITIONAL DETAILS.
3. REFER TO SHEET C-313 FOR EROSION CONTROL NOTES AND FOR ESTIMATED SWPPP IMPLEMENTATION SCHEDULE.

BEST MANAGEMENT PRACTICE (BMP) PHASE 2 IMPLEMENTATION SEQUENCE

1. BEGIN MASS GRADING THE SITE, PROVIDE TEMPORARY STABILIZATION.
2. START CONSTRUCTION OF BUILDING PAD AND BUILDINGS, IMPLEMENT TEMPORARY STABILIZATION PER DETAIL C1 ON C-312.
3. INSTALL UTILITIES, STORM SEWERS, WATER SUPPLY LINES, SANITARY SEWERS, ETC.
4. INSTALL INLET PROTECTION MEASURES AT STORM SEWER INLETS AS EACH INLET STRUCTURE IS INSTALLED.
5. PREPARE SITE FOR PAVING, AND PAVE SITE.
6. COMPLETE GRADING, BUILDING CONSTRUCTION AND INSTALLATION OF PERMANENT STABILIZATION MEASURES ON ALL DISTURBED AREAS.
7. REMOVE ALL REMAINING TEMPORARY BMPS UPON APPROVAL OF MEIJER OR ITS DESIGNATED REPRESENTATIVE.
8. PERMANENTLY STABILIZE ANY AREAS DISTURBED BY THE REMOVAL OF TEMPORARY BMPS PER DETAIL C3 ON C-312.
9. UPON COMPLETION OF CONSTRUCTION, THE CONTRACTOR SHALL HYDRAULICALLY CLEAN THE STORM SEWERS TO THE SATISFACTION OF THE CITY ENGINEER, ALL SEDIMENT SHALL BE REMOVED FROM THE SYSTEM AND SHALL NOT BE FLUSHED DOWNSTREAM.
10. NOTIFY MEIJER OR ITS DESIGNATED REPRESENTATIVE OF FINAL SITE STABILIZATION.
11. MEIJER OR ITS DESIGNATED REPRESENTATIVE SHALL SUBMIT NOTICE OF TERMINATION INSPECTION REQUEST TO THE TOWN OF BROWNSBURG PRIOR TO FILING THE NOT WITH IDEM.
12. MEIJER OR ITS DESIGNATED REPRESENTATIVE SHALL SUBMIT NOTICE OF TERMINATION TO THE PERMITTING AGENCY.
13. NOTE: THE CONTRACTOR MAY COMPLETE CONSTRUCTION ACTIVITIES CONCURRENTLY, PROVIDED ALL PRECEDING BMPS AND STABILIZATION ACTIVITIES HAVE BEEN COMPLETELY INSTALLED.

KEYNOTES (X)

1. EROSION CONTROL BLANKET, SEE DETAIL E3 ON SHEET C-312.
2. TEMPORARY STABILIZED CONSTRUCTION ENTRANCE.
3. SILT FENCE/EROSION EEL. SEE DETAIL E1 ON SHEET C-312 FOR EROSION EEL DETAIL. SEE NOTE BELOW FOR ADDITIONAL DETAILS ON SILT FENCE AND EROSION EEL INSTALLATION.
4. STOCKPILE AREA, SEE DETAIL A3 ON SHEET C-312.
5. POTENTIAL CONSTRUCTION STAGING MATERIAL STORAGE AREA (INCLUDES FUELING AREA, DUMPSTERS, CONCRETE WASHOUT, TRAILERS, PORT-O-LET, ETC.).
6. OUTFALL: SHEET FLOW INTO PROPOSED AND MODIFIED EXISTING INLETS, WHICH DISCHARGE TO THE MEIJER STORE DRAINAGE SYSTEM.

SILT FENCE
NO SCALE

TOWN OF BROWNSBURG
DETAIL NO. EC-02
REVISION DATE: FEBRUARY 2024

Town standards can be found at www.brownsburg.org

E1 SILT FENCE

NTS

DESCRIPTION

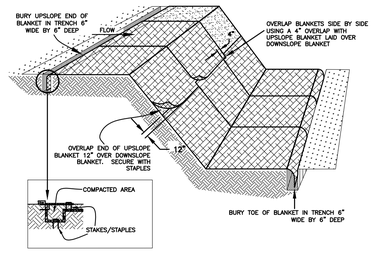

SILT FENCE IS THE MOST COMMON TEMPORARY SEDIMENT BARRIER AND CONSISTS OF A GEOTEXTILE FABRIC THAT IS ATTACHED TO SUPPORTING POSTS AND TRENCHED OR SLICED INTO THE GROUND. SEDIMENT-LADEN RUNOFF PONDS UPHILL FROM THE SILT FENCE AND RUNOFF IS TEMPORARILY STORED TO ALLOW SEDIMENT TO SETTLE OUT OF THE WATER. THIS PRACTICE APPLIES WHERE SHEET EROSION OCCURS ON SMALL DISTURBED AREAS. SILT FENCE IS INTENDED TO INTERCEPT AND DETAIN SMALL AMOUNTS OF SEDIMENT FROM DISTURBED AREAS IN ORDER TO PREVENT SEDIMENT FROM LEAVING THE SITE. SILT FENCES CAN ALSO PREVENT SHEET EROSION BY DECREASING THE VELOCITY OF THE RUNOFF. SILT FENCE IS NOT INTENDED TO BE USED IN CONCENTRATED FLOW PATHS.

INSTALLATION

1. INSTALL PARALLEL TO A CONTOUR.
2. THE SILT FENCE SHOULD BE MADE OF WOVEN GEOTEXTILE FABRIC.
3. SILT FENCE SHOULD ACCOMMODATE NO MORE THAN 1/2 TO 1 ACRE OF DRAINAGE PER 100' OF FENCE AND ON SLOPES LESS THAN 1:2 (V:H).
4. DIG A 6" TRENCH ALONG THE AREA WHERE THE FENCE IS TO BE INSTALLED.
5. PLACE 6" OF THE SILT FENCE BOTTOM FLAP INTO THE TRENCH.
6. BACKFILL THE TRENCH WITH SOIL AND COMPACT THE SOIL ON BOTH SIDES. CREATE A SMALL RIDGE ON THE UP-SLOPE SIDE OF THE FENCE.
7. INSTALL WOODEN STAKES 6 – 10' APART AND DRIVE INTO THE GROUND A MINIMUM OF 12".
8. STAPLE THE GEOTEXTILE FABRIC TO THE WOODEN STAKES.
9. JOIN SECTIONS OF SILT FENCE BY WRAPPING ENDS TOGETHER (SEE DRAWING).

MAINTENANCE

- INSPECT FREQUENTLY AND IMMEDIATELY AFTER EACH STORM EVENT. CHECK SEVERAL TIMES DURING PROLONGED STORM EVENTS. IF NECESSARY, REPAIR IMMEDIATELY.
- IF THE SEDIMENT HAS REACHED 1/3 THE HEIGHT OF THE FENCE, THE SOIL SHOULD BE REMOVED AND DISPOSED OF IN A STABLE UPLAND SITE.
- THE FENCE SHOULD BE RE-INSTALLED IF WATER IS SEEPING UNDERNEATH IT OR IF THE FENCE HAS BECOME INEFFECTIVE.
- SILT FENCE SHOULD BE REMOVED ONCE VEGETATION IS ESTABLISHED AND UP-SLOPE AREA HAS STABILIZED.
- SILT FENCE MAY CAUSE TEMPORARY PONDING AND COULD FAIL IF TOO MUCH WATER FLOWS THROUGH THE AREA.
- DO NOT USE IN AREAS WITH CONCENTRATED FLOWS.
- CHANCE OF FAILURE INCREASES IF FENCE IS INSTALLED INCORRECTLY OR IF SEDIMENT ACCUMULATION IS NOT REMOVED.

E3 EROSION CONTROL BLANKET

NTS

DESCRIPTION

EROSION CONTROL BLANKETS ARE USED TO AID IN CONTROLLING EROSION ON CRITICAL AREAS BY PROVIDING A PROTECTIVE COVER. EROSION CONTROL BLANKETS ARE USED ON SLOPES AND CHANNELS WHERE THE EROSION HAZARD IS HIGH AND PLANT GROWTH IS LIKELY TO BE SLOW TO PROVIDE ADEQUATE PROTECTIVE COVER FOR THE SEED AND SOIL UNTIL GERMINATION. EROSION CONTROL BLANKETS ARE TO BE INSTALLED IN ACCORDANCE WITH THE SWPPP DRAWING AND DETAILS AND FOLLOWING THE MANUFACTURER'S SPECIFICATIONS.

INSTALLATION

1. PREPARE SUBGRADE TO PROPER GRADE AND COMPACTION REQUIREMENTS.
2. REMOVE RUTS, ROOTS, SOIL CLODS, OR OTHER DEBRIS FROM SURFACE SUBJECT TO MULCH BLANKET INSTALLATION.
3. SPREAD OR DRILL SEED.
4. CONSULT WITH EROSION CONTROL MATERIAL SUPPLIER TO SELECT EROSION CONTROL BLANKET BASED ON SLOPE GRADIENT, EXPECTED SURFACE RUN-OFF, AND PROTECTION TERM NECESSARY (LONG OR SHORT TERM).
5. POSITION SELECTED MULCH BLANKET AS CLOSE AS POSSIBLE TO INTENDED USE LOCATION.
6. INSTALL BLANKET AT TOP OF SLOPE, FIRST ANCHORING TOE IN TRENCH 6" WIDE X 6" DEEP, PROGRESSING DOWN-SLOPE OR DOWN-GRADIENT WITH APPROXIMATELY 12" OF BLANKET EXTENDED BEYOND THE UP-SLOPE PORTION OF THE TRENCH.
7. ANCHOR THE BLANKET WITH STAPLES/STAKES PLACED APPROXIMATELY 12" APART IN THE BOTTOM OF THE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER SECURING.
8. APPLY SEED TO COMPACTED SOIL AND FOLD THE 12" PORTION OF THE BLANKET OVER COMPACTED AREA AND SECURE WITH A ROW OF STAPLES/STAKES PLACED 12" APART ACROSS THE WIDTH OF THE BLANKET.
9. UNROLL THE BLANKETS DOWN OR HORIZONTALLY ACROSS THE SLOPE. OVERLAP BLANKET EDGES BY A MINIMUM OF 4" AND BLANKET ENDS BY A MINIMUM OF 12".
10. OVERLAPS SHOULD BE IN THE DIRECTION OF EXPECTED FLOW WITH THE UP-SLOPE BLANKET PLACED OVER THE DOWN-SLOPE BLANKET EDGE.
11. SECURE DOWN-SLOPE END OF BLANKET WITH STAPLES/STAKES AND TRENCH IN.

MAINTENANCE

- CHECK AFTER A RAIN EVENT TO ENSURE THE BLANKET IS STILL IN PLACE.
- KEEP ERODED SOIL, VEHICULAR AND PEDESTRIAN TRAFFIC, AND CONCENTRATED RUNOFF AWAY FROM THE BLANKETED AREA.
- EROSION CONTROL BLANKETS AND ANCHORS MAY INHIBIT MOWING.

NOTES

1. PLACE EROSION CONTROL BLANKET PARALLEL TO FLOW AND ANCHOR SECURELY.
2. WHEN BLANKETS ARE USED IN FLOWING DITCH, BLANKETS SHOULD NOT OVERLAP IN DITCH CENTER PARALLEL TO FLOW.
3. STAPLES INSTALLED/SECURED ACCORDING TO MANUFACTURER'S SPECIFICATIONS.
4. WHERE POSSIBLE, CONSTRUCT WITH BIODEGRADABLE MATERIAL.

E5 AS-BUILT REQUIREMENTS

NTS

TOWN OF BROWNSBURG AS-BUILT REQUIREMENTS:

AFTER COMPLETION OF CONSTRUCTION AND BEFORE FINAL PROJECT ACCEPTANCE OF THE STORMWATER MANAGEMENT PLAN (THE ISSUANCE OF A "VERIFIED" NOT), A PROFESSIONALLY PREPARED AND CERTIFIED AS-BUILT DRAWINGS BY A PROFESSIONAL ENGINEER OR LICENSED LAND SURVEYOR REGISTERED IN THE STATE OF INDIANA SHALL BE SUBMITTED TO THE TOWN OF BROWNSBURG FOR REVIEW. THESE AS-BUILT PLANS MUST BE PREPARED AND CERTIFIED BY THE ENGINEER OF RECORD, I.E. THE COMPANY/ENGINEER WHO ORIGINALLY PREPARED THE SURVEY ASSOCIATED WITH THE CONSTRUCTION PLANS. IN ADDITION TO HARD COPIES, DIGITAL COPIES OF THE AS-BUILT PLANS AND FINALIZED VERSIONS OF ALL ANALYSES, MODELS, MANUALS, AND REPORTS THAT ARE CONSISTENT WITH THE AS-BUILT CONDITIONS ARE REQUIRED IN DIGITAL FORMATS ACCEPTED BY THE TOWN OF BROWNSBURG. THESE PLANS SHALL INCLUDE ALL PERTINENT DATA RELEVANT TO THE COMPLETED STORM DRAINAGE SYSTEM AND STORMWATER MANAGEMENT FACILITIES, AND SHALL INCLUDE THE FOLLOWING:

A. PIPE SIZE AND PIPE MATERIAL
B. INVERT ELEVATIONS, TOP OF CASTING ELEVATIONS, SWALE FLOW LINES, LOT ELEVATIONS, ETC.
C. TOP RIM ELEVATIONS
D. PIPE STRUCTURE LENGTHS
E. BMP TYPES, DIMENSIONS, AND BOUNDARIES/EASEMENTS
F. "AS-PLANTED" PLANS FOR BMPS, AS APPLICABLE
G. DATA AND CALCULATIONS SHOWING DETENTION BASIN STORAGE VOLUME
H. DATA AND CALCULATIONS SHOWING BMP TREATMENT CAPACITY
I. CERTIFIED STATEMENT ON PLANS STATING THE COMPLETED STORM DRAINAGE SYSTEM AND STORMWATER MANAGEMENT FACILITIES SUBSTANTIALLY COMPLY WITH CONSTRUCTION PLANS AND THE STORMWATER MANAGEMENT PERMIT AS APPROVED BY THE TOWN OF BROWNSBURG

Concrete Washout Areas

Installation:

1. Concrete wash water shall not be allowed to flow to streams, ditches, storm drains, or any other water conveyance and washout pits shall be situated a minimum of fifty (50) feet from them.
2. Field tile or other subsurface drainage structures within 10 ft. of the sump shall be cut and plugged.
3. Ensure a stable path is provided for concrete trucks to reach the washout area.
4. A highly visible sign that reads "Concrete Washout Area" shall be erected adjacent to the washout pit.
5. Surface runoff generated from upslope areas shall be diverted away from below-grade washout pits so as not to flow into them.
6. A single centralized washout area may be utilized for multiple sublots.

Sizing of Concrete Washout Pits

Above-grade (2-ft depth)		
# of concrete trucks expected to be washed out on site*	Width (ft)	Length (ft)
2	3	3
3-4	4	4
5-6	5	5
7-8	6	6
9-11	7	7
12-15	8	8

Maintenance:

7. The washout pit must be inspected daily and after heavy rains to check for leaks, identify if any plastic linings and sidewalls have been damaged by construction activities, and determine whether the pit has been filled to over 75% capacity.
8. If 75% of the original volume of the washout pit is filled, wash water should be vacuumed off or allowed to evaporate to avoid overflows. Then when the remaining material has hardened, it must be removed and properly disposed of. Once the hardened concrete is removed, the liner will need to be replaced if torn. A new pit must be constructed if the original structure is no longer suitable.
9. Before heavy rains, the washout container's liquid level should be lowered, or the container should be covered to avoid an overflow during the rain event.

Removal:

10. Once the washout pit is no longer needed, ensure all washout material has completely hardened, then remove and properly dispose of all materials. If straw bales were used, they can be spread as mulch.
11. Prefabricated containers specifically designed for concrete washout collection may be used subject to prior approval by the Engineer. Follow the manufacturer's suggestions for installation, maintenance and removal procedures.

Note: Contractor to provide and utilize a lined dumpster for use as a concrete washout as necessary. The concrete washout shall be located a minimum of 50' away from adjacent storm drainage structures.

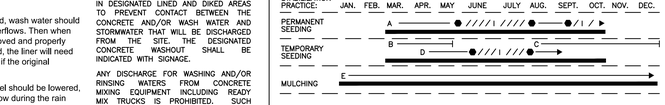

*For small projects using a maximum of only one truckload of concrete or utilizing on-site mixing, rinsing of equipment may take place on the lot without a pit, provided it can be done a minimum of fifty (50) feet away from any water conveyances.

DISCHARGE OF EXCESS OR WASTE CONCRETE AND/OR WASH WATER FROM CONCRETE TRUCKS WILL BE ALLOWED ON THE CONSTRUCTION SITE, BUT ONLY IN DESIGNATED LINED AND DIKED AREAS TO PREVENT CONTACT BETWEEN THE CONCRETE AND/OR WASH WATER AND STORMWATER THAT WILL BE DISCHARGED FROM THE SITE. THE DESIGNATED CONCRETE WASHOUT SHALL BE INDICATED WITH SIGNAGE.

ANY DISCHARGE FOR WASHING AND/OR RINSING WATERS FROM CONCRETE MIXING EQUIPMENT INCLUDING READY MIX TRUCKS IS PROHIBITED. SUCH POLLUTANTS SHALL BE ADEQUATELY TREATED AND CANNOT BE DISCHARGED TO WATERS OF THE STATE. ANY SPILLS SHALL BE CLEANED IMMEDIATELY UPON DISCOVERY.

D1 CONCRETE WASHOUT AREA

NTS

A = KENTUCKY BLUEGRASS 40%, TURF TYPE TALL FESCUE 40%, ANNUAL RYE GRASS 20% PLUS 2 TONS OF STRAW MULCH/ ACRE
APPLY MIXTURE AT A RATE OF 2 LBS. PER 1000 SQ.FT.

B = SPRING OATS 3 BUSHEL PER ACRE

C = WHEAT OR RYE 2 BUSHEL PER ACRE

D = ANNUAL RYE GRASS (1 LB. PER 1000 SQ. FT.)

E = STRAW MULCH (90 LBS. PER 1000 SQ.FT.)

●/ / ● IRRIGATION NEEDED DURING JUNE, JULY, AND / OR SEPTEMBER.

●● IRRIGATION NEEDED FOR 2 TO 3 WEEKS AFTER APPLYING SOD

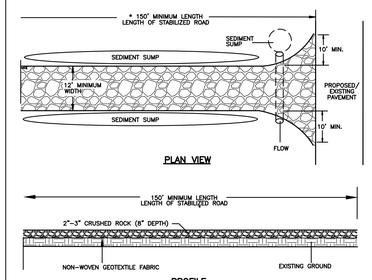

NOTE: ALL SEEDING SHALL HAVE 12-12-12 FERTILIZER APPLIED 400-600 LBS. PER ACRE OR AS SPECIFIED.

D3 SEEDING SCHEDULE

NTS

D4

NTS

DESCRIPTION

ALL ACCESS POINTS FROM THE CONSTRUCTION SITE ARE TO INCLUDE A STABILIZED CONSTRUCTION ENTRANCE/EXIT COMPOSED OF COARSE STONE TO THE DIMENSIONS AND SPECIFICATIONS SHOWN HERE. CONSTRUCTION TRAFFIC MUST ENTER AND EXIT THE SITE AT THE STABILIZED CONSTRUCTION EXIT. THE PURPOSE IS TO TRAP DUST AND MUD THAT WOULD OTHERWISE BE CARRIED BEYOND THE PERMITTED PROJECT AREA BY CONSTRUCTION TRAFFIC. THE ROUGH TEXTURE OF THE STONE HELPS TO REMOVE CLUMPS OF SOIL ADHERING TO THE CONSTRUCTION VEHICLE TIRES THROUGH THE ACTION OF VIBRATION AND JARRING OVER THE ROUGH SURFACE.

IN THE EVENT THE STABILIZED CONSTRUCTION ENTRANCE IS NOT EFFECTIVE BY ITSELF AND/OR REQUIRES A SIGNIFICANT AMOUNT OF MAINTENANCE, ADDITIONAL PRACTICES, SUCH AS WHEEL WASHING OR STREET SWEEPING, MAY BE REQUIRED.

INSTALLATION

1. STABILIZED CONSTRUCTION ACCESS ROAD SHOULD BE ESTABLISHED AT THE ONSET OF THE CONSTRUCTION ACTIVITIES AND MAINTAINED IN PLACE FOR THE DURATION OF THE CONSTRUCTION PROJECT.
2. INSTALLATION OF THIS PRACTICE SHOULD BE THE RESPONSIBILITY OF THE SITE CLEARING OR EXCAVATING CONTRACTOR.
3. ACCESS LOCATION SHOULD BE CLEARED OF WOODY VEGETATION.
4. NON-WOVEN GEOTEXTILE FABRIC SHALL BE PLACED OVER THE EXISTING GROUND PRIOR TO PLACING STONE.
5. ACCESS LENGTH SHOULD BE A MINIMUM OF 150'.
6. ACCESS WIDTH SHOULD BE 12' MINIMUM, FLARED AT THE EXISTING ROAD TO PROVIDE A TURNING RADIUS.
7. CRUSHED AGGREGATE (2" TO 3"), OR RECLAIMED OR RECYCLED CONCRETE EQUIVALENT, SHALL BE PLACED AT LEAST 8" DEEP OVER THE LENGTH AND WIDTH OF THE INGRESS/EGRESS CORRIDOR.

MAINTENANCE

- PERIODIC INSPECTION AND NEEDED MAINTENANCE SHALL BE PROVIDED AFTER EACH RAIN EVENT.
- STABILIZED ENTRANCES SHALL BE REPAIRED AND ROCK ADDED AS NECESSARY.
- SEDIMENT DEPOSITED ON PUBLIC RIGHTS-OF-WAY SHALL BE REMOVED IMMEDIATELY AND RETURNED TO THE CONSTRUCTION SITE.
- IF SOILS ARE SUCH THAT WASHING OF TIRES IS REQUIRED, IT SHALL BE DONE IN A WASH RACK AREA, STABILIZED WITH STONE, IMMEDIATELY PRIOR TO THE CONSTRUCTION ACCESS STABILIZED CORRIDOR.
- AT THE PROJECT COMPLETION, ROCK ACCESS ROAD SHOULD BE REMOVED AND DISPOSED OF UNLESS UTILIZED AS SUBGRADE FOR FINAL ROAD.
- EFFECTIVENESS LIMITED, SEDIMENT MAY BE TRACKED ONTO ROADS REQUIRING ADDITIONAL ACTION.

NOTES

1. ESTABLISH STABILIZED CONSTRUCTION ENTRANCE PRIOR TO THE INITIATION OF SITE CONSTRUCTION ACTIVITIES.
2. CARE SHOULD BE TAKEN TO PREVENT MATERIAL MOVEMENT INTO ADJACENT WETLANDS/WATERBODIES.
3. CARE SHOULD BE TAKEN TO MAINTAIN EXISTING ROADSIDE DRAINAGE VIA CULVERT INSTALLATION, WITH SEDIMENT SUMP PLACED DOWNFLOW OF CULVERT.

C5 STABILIZED CONSTRUCTION ENTRANCE

NTS

DESCRIPTION

TEMPORARY STABILIZATION MEASURES SHALL BE IMPLEMENTED IMMEDIATELY WHENEVER EARTH-DISTURBING ACTIVITIES HAVE TEMPORARILY CEASED ON ANY PORTION OF THE SITE. EARTH-DISTURBING ACTIVITIES HAVE TEMPORARILY CEASED WHEN CLEARING, GRADING, AND EXCAVATION WITHIN ANY AREA OF THE SITE THAT WILL NOT INCLUDE PERMANENT STRUCTURES WILL NOT RESUME (I.E., THE LAND WILL BE IDLE) FOR A PERIOD OF 7 OR MORE CALENDAR DAYS, BUT SUCH ACTIVITIES WILL RESUME IN THE FUTURE. THE TERM "IMMEDIATELY" IS USED TO DEFINE THE DEADLINE FOR INITIATING STABILIZATION MEASURES, IN THE CONTEXT OF THIS REQUIREMENT, "IMMEDIATELY" MEANS AS SOON AS PRACTICABLE, BUT NO LATER THAN THE END OF THE NEXT WORK DAY FOLLOWING THE DAY WHEN THE EARTH-DISTURBING ACTIVITIES HAVE TEMPORARILY CEASED. IMPLEMENTATION OF TEMPORARY STABILIZATION MEASURES ARE TO BE COMPLETED NO LATER THAN 14 CALENDAR DAYS AFTER THE INITIATION OF SOIL STABILIZATION MEASURES.

TEMPORARY STABILIZATION IS NOT ACHIEVED SIMPLY THROUGH SEEDING. IN ORDER FOR AN AREA OR CONSOLIDATION AREA TO BE SUFFICIENTLY STABILIZED VIA TEMPORARY STABILIZATION, SEED MUST GERMINATE, GROW AND PROVIDE ADEQUATE VEGETATIVE DENSITY.

ALL DISTURBED AREAS ON SLOPES SHALL BE LEFT IN A ROUGHENED CONDITION (I.E., WITH VEHICLE CLEAT MARKS RUNNING PERPENDICULAR TO THE FALL LINE OF THE SLOPE) WHEN TEMPORARY STABILIZATION IS NOT ATTAINABLE TO HELP REDUCE POTENTIAL FOR EROSION.

INSTALLATION

1. REVIEW CONSTRUCTION PHASING AND SOIL EROSION CONTROL PLAN TO IDENTIFY AREAS REQUIRING TEMPORARY SEEDING.
2. SELECT ANNUAL GRASS SEED FOR TEMPORARY COVER AREAS.
3. SEED MIXES MAY VARY, SHOULD ONLY CONTAIN ANNUAL, NON-AGGRESSIVE SPECIES, AND GENERALLY INCLUDE RYE, WHEAT, OR OAT SPECIES. SEED MIXES SHOULD BE OBTAINED FROM A SEED SUPPLIER AS SEED MIXES ARE DEPENDENT ON SOIL TYPE, LIGHT, MOISTURE, AND USE APPLICATION.
4. PREPARE SEEDBED BY REMOVAL OF CONSTRUCTION/WOODY DEBRIS. THEN SCARIFY OR RAKE SEEDBED.
5. SLOPES STEEPER THAN 1:3 SHOULD BE ROUGHENED.
6. APPLY SEED AS SOON AS POSSIBLE AFTER SEEDBED PREPARATION. MULCH IMMEDIATELY AFTER SEEDING.
7. THE TIME TO SEED IS DEPENDENT ON THE CLIMATE OF THE AREA.
8. PROTECT SEEDED AREAS FROM PEDESTRIAN/VEHICULAR TRAFFIC.
9. DIVERT CONCENTRATED FLOWS AWAY FROM SEEDED AREA UNTIL VEGETATION IS ESTABLISHED.
10. INSPECT TEMPORARY SEEDED AREAS WEEKLY AND FOLLOWING EACH RAIN EVENT UNTIL FINAL GRADING AND STABILIZATION ACTIVITIES ARE COMPLETED.
11. MUST BE FOLLOWED BY PERMANENT SEEDING.

MAINTENANCE

1. SEEDS NEED ADEQUATE TIME TO ESTABLISH.
2. MAY NOT BE APPROPRIATE IN AREAS WITH FREQUENT TRAFFIC.
3. SEEDED AREA MAY REQUIRE IRRIGATION IN DRY PERIODS.

C1 TEMPORARY STABILIZATION/SEEDING

NTS

DESCRIPTION

PERMANENT STABILIZATION MEASURES SHALL BE IMPLEMENTED IMMEDIATELY WHENEVER EARTH-DISTURBING ACTIVITIES HAVE PERMANENTLY CEASED ON ANY PORTION OF THE SITE. EARTH-DISTURBING ACTIVITIES HAVE PERMANENTLY CEASED WHEN CLEARING AND EXCAVATION WITHIN ANY AREA OF THE SITE THAT WILL NOT INCLUDE PERMANENT STRUCTURES HAVE BEEN COMPLETED. THE TERM "IMMEDIATELY" IS USED TO DEFINE THE DEADLINE FOR INITIATING STABILIZATION MEASURES. IN THE CONTEXT OF THIS REQUIREMENT, "IMMEDIATELY" MEANS AS SOON AS PRACTICABLE, BUT NO LATER THAN THE END OF THE NEXT WORK DAY FOLLOWING THE DAY WHEN THE EARTH-DISTURBING ACTIVITIES HAVE TEMPORARILY CEASED. IMPLEMENTATION OF PERMANENT STABILIZATION MEASURES ARE TO BE COMPLETED NO LATER THAN 14 CALENDAR DAYS AFTER THE INITIATION OF SOIL STABILIZATION MEASURES.

IN AREAS WHERE FINAL STABILIZATION WILL OCCUR, VEHICLE AND EQUIPMENT ACCESS WILL BE RESTRICTED IN ORDER TO MINIMIZE COMPACTION. IN ADDITION, THE SOIL MAY NEED TO BE CONDITIONED FOR SEEDING OR PLANTING. SEEDED AREAS SHALL BE PROTECTED WITH STRAW MULCH, HYDRAULIC MULCH OR A ROLLED EROSION CONTROL PRODUCT.

FINAL SITE STABILIZATION IS ACHIEVED WHEN THE ESTABLISHMENT OF PERENNIAL VEGETATIVE COVER PROVIDES A DENSITY OF AT LEAST 70 PERCENT OVER THE ENTIRE AREA TO BE STABILIZED. THIS AREA IS EXCLUSIVE OF AREAS THAT ARE COVERED WITH ROCK (CRUSHED GRANITE, GRAVEL, ETC.) OR LANDSCAPE MULCH, PAVED OR HAVE A BUILDING OR OTHER PERMANENT STRUCTURE ON THEM.

INSTALLATION

1. REVIEW SESC PLAN AND CONSTRUCTION PHASING TO IDENTIFY AREAS IN NEED OF PERMANENT VEGETATIVE STABILIZATION.
2. SELECT PERENNIAL GRASS AND GROUND COVER FOR PERMANENT COVER.
3. SEED MIXES VARY. HOWEVER, THEY SHOULD CONTAIN NATIVE SPECIES.
4. SEED MIXES SHOULD BE SELECTED THROUGH CONSULTATION WITH A CERTIFIED SEED PROVIDER AND WITH CONSIDERATION OF SOIL TYPE, LIGHT, MOISTURE, USE APPLICATIONS, AND NATIVE SPECIES CONTENT.
5. SOIL TESTS SHOULD BE PERFORMED TO DETERMINE THE NUTRIENT AND PH LEVELS IN THE SOIL. THE PH MAY NEED TO BE ADJUSTED TO BETWEEN 6.5 AND 7.0.
6. PREPARE A 3–5" DEEP SEEDBED, WITH THE TOP 3–4" CONSISTING OF TOPSOIL.
7. SLOPES STEEPER THAN 1:3 SHOULD BE ROUGHENED.
8. APPLY SEED AS SOON AS POSSIBLE AFTER SEEDBED PREPARATION. SEED MAY BE BROADCAST BY HAND, HYDROSEEDING, OR BY USING MECHANICAL DRILLS.
9. MULCH IMMEDIATELY AFTER SEEDING.
10. DORMANT SEED MIXES ARE FOR USE AFTER THE GROWING SEASON, USING SEED WHICH LIES DORMANT IN THE WINTER AND BEGINS GROWING AS SOON AS SITE CONDITIONS BECOME FAVORABLE.
11. PROTECT SEEDED AREAS FROM PEDESTRIAN OR VEHICULAR TRAFFIC.
12. DIVERT CONCENTRATED FLOWS AWAY FROM THE SEEDED AREA UNTIL VEGETATION IS ESTABLISHED.

MAINTENANCE

1. INSPECT WEEKLY AND WITHIN 24 HOURS FOLLOWING EACH RAIN EVENT IN THE FIRST FEW MONTHS FOLLOWING INSTALLATION TO BE SURE SEED HAS GERMINATED AND PERMANENT VEGETATIVE COVER IS BEING ESTABLISHED.
2. ADD SUPPLEMENTAL SEED AS NECESSARY.
3. SEEDS NEED ADEQUATE TIME TO ESTABLISH.
4. MAY NOT BE APPROPRIATE IN AREAS WITH FREQUENT TRAFFIC.
5. SEEDED AREAS MAY REQUIRE IRRIGATION DURING DRY PERIODS.
6. SEEDING SUCCESS IS SITE SPECIFIC, CONSIDER MULCHING OR SODDING WHEN NECESSARY.

C3 PERMANENT STABILIZATION/SEEDING

NTS

NOTICE:

THE PUMPING OR DIRECT DISCHARGE OF SEDIMENT-LADEN (MUDDY) WATER TO THE TOWN'S SEWER SYSTEM OR A RECEIVING STREAM IS A VIOLATION OF IDEM REGULATIONS. DISCHARGES FROM DEWATERING ACTIVITIES, INCLUDING DISCHARGES FROM DEWATERING OF TRENCHES AND EXCAVATIONS, ARE PROHIBITED UNLESS MANAGED BY APPROPRIATE CONTROLS. IN NO CASE IS WATER FROM DEWATERING ACTIVITIES TO BE PUMPED OFF-SITE WITHOUT BEING PROPERLY TREATED.

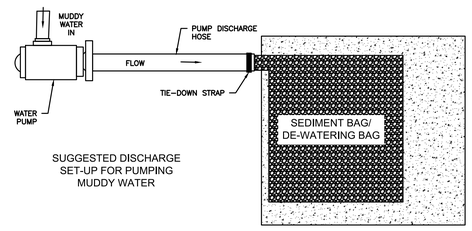

ALL INLETS RECEIVING FLOW FROM RUNOFF, PUMPING ACTIVITIES, OR OTHER DIRECT DISCHARGES SHALL BE FITTED WITH AN INLET PROTECTION DEVICE THAT IS PROPERLY SIZED AND SECURED TO REDUCE THE DISCHARGE OF SEDIMENT INTO THE STORM SEWER SYSTEM AND RECEIVING STREAM. INLET PROTECTION IS REQUIRED ON ALL INLETS RECEIVING DISCHARGE REGARDLESS OF WHETHER OR NOT THE INLET IS TRIBUTARY TO ANY DOWNSTREAM EROSION AND SEDIMENT CONTROLS.

DISCHARGES FROM DEWATERING ACTIVITIES, INCLUDING DISCHARGES FROM DEWATERING OF TRENCHES AND EXCAVATIONS, ARE PROHIBITED UNLESS MANAGED BY APPROPRIATE CONTROLS. IN NO CASE IS WATER FROM DEWATERING ACTIVITIES TO BE PUMPED OFF-SITE WITHOUT BEING PROPERLY TREATED.

SEDIMENT BASINS SHALL BE DEWATERED AT THE POND SURFACE USING A SKIMMER OR EQUIVALENT DEVICE.

DEWATERING THAT HAS SEDIMENT-LADEN WATER MUST DISCHARGE TO A SEDIMENT BASIN OR EQUIVALENT SETTLING, FILTERING, OR ENERGY DISSIPATION MEASURES TO REMOVE SUSPENDED SOLIDS BEFORE DISCHARGE. SEDIMENT BAGS, INFILTRATION TRENCHES, VEGETATED SWALES, OR FILTER BERMS MAY ALSO BE USED. SECONDARY CONTAINMENT SHOULD BE USED TO PREVENT THE POTENTIAL LEAK OF CHEMICALS USED DURING DEWATERING, SUCH AS CHEMICALS FOR FLOCCULATION.

DISCHARGE HOSES USED DURING PUMPING ACTIVITIES SHALL BE FITTED WITH SEDIMENT BAGS THAT ARE PROPERLY SIZED PER MANUFACTURER'S RECOMMENDATIONS REGARDLESS OF WHAT OTHER SEDIMENT CONTROLS ARE IN PLACE FURTHER DOWNSTREAM. SEDIMENT BAGS MUST BE PROPERLY SECURED TO THE DISCHARGE HOSE AND PLACED OVER VEGETATED AREAS, WHERE FEASIBLE, DURING DISCHARGE. SEE DETAIL BELOW OF A TYPICAL SEDIMENT BAG INSTALLATION.

SUGGESTED DISCHARGE SET-UP FOR PUMPING MUDDY WATER

DRAIN OVER VEGETATED AREA (WHERE POSSIBLE)

DISCHARGES FROM DEWATERING ACTIVITIES, INCLUDING DISCHARGES FROM DEWATERING OF TRENCHES AND EXCAVATIONS, ARE PROHIBITED UNLESS MANAGED BY APPROPRIATE CONTROLS. IN NO CASE IS WATER FROM DEWATERING ACTIVITIES TO BE PUMPED OFF-SITE WITHOUT BEING PROPERLY TREATED.

DEWATERING THAT HAS SEDIMENT-LADEN WATER MUST DISCHARGE TO A SEDIMENT BASIN OR EQUIVALENT SETTLING, FILTERING, OR ENERGY DISSIPATION MEASURES TO REMOVE SUSPENDED SOLIDS BEFORE DISCHARGE. SEDIMENT BAGS, INFILTRATION TRENCHES, VEGETATED SWALES, OR FILTER BERMS MAY ALSO BE USED. SECONDARY CONTAINMENT SHOULD BE USED TO PREVENT THE POTENTIAL LEAK OF CHEMICALS USED DURING DEWATERING, SUCH AS CHEMICALS FOR FLOCCULATION.

B1 DEWATERING

LARGE AREAS OF SOIL THAT ARE DENUDED OF VEGETATION AND HAVE NO PROTECTION FROM PARTICLES BEING PICKED UP AND CARRIED BY WIND SHOULD BE PROTECTED WITH A TEMPORARY COVER OR KEPT UNDER CONTROL WITH WATER OR OTHER SOIL ADHERING PRODUCTS TO LIMIT WIND TRANSPORTED PARTICLES EXITING THE SITE PERIMETER.

WATER TRUCKS OR OTHER DUST CONTROL AGENTS ARE TO BE USED AS NEEDED DURING CONSTRUCTION TO MINIMIZE DUST GENERATED ON THE SITE. TACKIFIERS MAY BE USED TO HOLD SOIL IN PLACE AND PREVENT DUST. MANUFACTURER RECOMMENDATIONS FOR APPLICATION RATES MUST BE USED FOR DUST CONTROL APPLICATIONS. DUST CONTROL MUST BE PROVIDED BY THE CONTRACTOR TO A DEGREE THAT IS IN COMPLIANCE WITH APPLICABLE LOCAL AND STATE DUST CONTROL REGULATIONS.

B2 DUST CONTROL

NTS

DISCHARGE FROM WASHING AND MAINTENANCE OF EQUIPMENT OR VEHICLES WILL BE ALLOWED ON THE CONSTRUCTION SITE, BUT ONLY IN DESIGNATED LINED AND DIKED AREAS TO PREVENT CONTACT BETWEEN THE WASH WATER AND STORMWATER THAT WILL BE DISCHARGED FROM THE SITE.

DISCHARGES OF CONTAMINATED WATERS FROM WASHING AND MAINTAINING VEHICLES OR EQUIPMENT, INCLUDING WASHING AND/OR RINSING WATERS FROM CONTAINERS OR APPLICATORS INVOLVED WITH THE USE OF PAINT, CONCRETE, OR OTHER SUCH MATERIALS, IS PROHIBITED. SUCH POLLUTANTS SHALL BE ADE

E4 SWPPP IMPLEMENTATION SCHEDULE

NTS

SECTION A: CONSTRUCTION PLAN

A1 PLAN INDEX ITEMS RELATED TO THE SWPPP ARE SHOWN AS NOTES ON THIS SHEET.

A2 VICINITY MAP IS SHOWN ON SHEET C-001.

A3 THIS PROJECT INVOLVES THE CONSTRUCTION OF AN APPROXIMATELY 4,300 SF DENTAL OFFICE WITH ASSOCIATED ACCESS DRIVES, PARKING, AND UTILITIES.

A4 LATITUDE N 39.851910, LONGITUDE W -86.359869

A5 LOT 6 PARCEL IN MEIJER SUBDIVISION, A REPLAT OF OI COMMERCIAL BLOCK A & BLOCK B, AS PER PLAT THEREOF, RECORDED MARCH 28, 2024 IN PLAT CABINET 9, SLIDE 51, PAGES 4A THROUGH 4C, AND AS INSTRUMENT 202405293, IN THE OFFICE OF THE RECORDER OF HENDRICKS COUNTY, INDIANA.

A6 11x17 INCH PLAT IS INCLUDED SEPARATELY.

A7 NO FLOODPLAIN, FLOODWAYS, OR FLOODWAY FRINGES ARE ON THE PROPERTY.

A8 ADJACENT LAND USES:
NORTH: COMMERCIAL
SOUTH: RESIDENTIAL
EAST: COMMERCIAL
WEST: COMMERCIAL

A9 THE PROJECT DOES NOT FALL WITHIN A WATERSHED THAT HAS AN APPROVED OR ESTABLISHED TMDL.

A10 THE SITE DISCHARGE INTO SCHOOL BRANCH STREAM WITH AN ULTIMATE RECEIVING WATER OF EAGLE CREEK RESERVOIR.

A11 SCHOOL BRANCH STREAM IS AN IMPAIRED WATERBODY ON THE 303(d) LIST. SCHOOL BRANCH STREAM IS IMPAIRED FOR FULL BODY CONTACT WITH E.COLI AS AN IDENTIFIED ISSUE. EAGLE CREEK RESERVOIR IS AN IMPAIRED FRESHWATER LAKE ON THE 303(d) LIST. EAGLE CREEK RESERVOIR IS IMPAIRED FOR HUMAN HEALTH AND WILDLIFE WITH PCBS IN FISH TISSUE AS AN IDENTIFIED ISSUE AND PUBLIC WATER SUPPLY WITH TASTE AS AN IDENTIFIED ISSUE.

A12 SOIL MAP AND DESCRIPTIONS SHOWN ON SHEETS C-310 AND C-311.

A13 THERE ARE NO WETLANDS LOCATED ON SITE.

A14 IDEM HAS DETERMINED THAT THERE ARE NO WETLANDS ON SITE.

A15 EXISTING VEGETATIVE COVER DETAILS ARE SHOWN IN THE EXISTING CONDITIONS PLAN, C-100. THERE ARE NO NATURAL BUFFERS PRESENT ON SITE.

A16 EXISTING TOPOGRAPHY IS SHOWN IN THE EXISTING CONDITIONS PLAN, C-100.

A17 EXISTING STORMWATER FLOWS ARE SHOWN ON SHEET C-310.

A18 EXISTING RUNOFF DISCHARGES PRIOR TO LAND DISTURBANCE ARE SHOWN ON THE SWPPP PLANS, C-310 AND C-311.

A19 LOCATIONS OF ALL EXISTING STRUCTURES ARE SHOWN ON THE EXISTING CONDITIONS PLAN, C-100.

A20 EXISTING STORMWATER MANAGEMENT FEATURES ARE SHOWN ON SHEET C-100.

A21 THERE ARE NO KNOWN LOCATIONS OF DIRECT STORMWATER DISCHARGE INTO GROUND WATER AREAS ON SITE OR DOWNSTREAM OF THE SITE. THERE IS AN UNSPECIFIED WELL TYPE LOCATED NORTH OF THE SUBJECT PROPERTY BUT IT IS NOT ANTICIPATED TO IMPACT DIRECT STORMWATER DISCHARGE AS IT IS LOCATED UPSTREAM OF THE SUBJECT PROPERTY.

A22 PROJECT SITE AREA = 1.5± ACRES.

A23 DISTURBED ACREAGE = 1.5± ACRES.

A24 PROPOSED CONTOURS AND SPOT SHOTS ARE PROVIDED ON THE GRADING PLANS, C-300.

A25 CONSTRUCTION LIMITS ARE SHOWN ON THE STORMWATER POLLUTION PREVENTION PLAN SHEETS, C-310 & C-311.

A26 ALL PROPOSED STORMWATER SYSTEMS ARE SHOWN ON THE GRADING PLANS, UTILITY PLANS, AND STORM PLAN AND PROFILES; C-300; C-400; C-405, RESPECTIVELY, SEE DETAILS ON SHEET C-703.

A27 PROPOSED STORMWATER DISCHARGES ARE SHOWN ON THE GRADING, UTILITY, AND PHASE 2 SWPPP PLANS, C-300; C-400; C-311, RESPECTIVELY.

A28 PROPOSED SITE IMPROVEMENTS ARE SHOWN ON THE SITE PLAN, SHEETS C-200. PROPOSED UTILITY IMPROVEMENTS ARE SHOWN ON THE UTILITY PLAN, SHEETS C-400. TWO EMERGENCY SPILLWAYS HAVE BEEN CONSTRUCTED AS A PART OF THE MEIJER MAIN STORE CONSTRUCTION PROJECT.

A29 PROPOSED STOCKPILE LOCATION IS PROVIDED ON SHEETS C-310 AND C-311.

A30 PROPOSED CONSTRUCTION STAGING AREA IS SHOWN ON SHEETS C-310 AND C-311.

A31 THERE ARE NO WETLAND AREAS LOCATED ON SITE AND WETLAND PERMIT INFORMATION LISTED IN A14.

SECTION B: CONSTRUCTION COMPONENT

B1 POTENTIAL POLLUTANT SOURCES DURING CONSTRUCTION ACTIVITIES INCLUDE SEDIMENT, CONCRETE WASTE WATER, TRASH, FOSSIL FUELS, OIL, GREASE, PAINT, EXPOSURE OF THESE POLLUTANTS TO STORMWATER RUNOFF SHOULD BE MINIMIZED BY PERFORMING ACTIVITIES SUCH AS EROSION CONTROL, EQUIPMENT STORAGE, REFUELING, MAINTENANCE AND PORT-A-LET PLACEMENT IN DESIGNED AREAS AS SHOWN ON THE EROSION CONTROL PLAN.

B2 CONSTRUCTION ENTRANCE LOCATIONS ARE SHOWN ON SHEETS C-310 AND C-311.

CONTRACTOR TO REFERENCE SHEET C-312 FOR CONSTRUCTION ENTRANCE DETAILS, FOR DETAILED SPECIFICATIONS AND INSTALLATION REQUIREMENTS, SEE INDIANA STORM WATER QUALITY MANUAL, PUBLISHED BY INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT (IDEM), OCTOBER 2007.

B3 SEE PHASE 1 AND PHASE 2 IMPLEMENTATION SEQUENCING NOTES ON SHEETS C-310 AND C-311, SEE SHEETS C-312 FOR TEMPORARY AND PERMANENT STABILIZATION DETAILS. EROSION CONTROL BLANKETS TO BE USED ON SLOPES GREATER THAN 3:1. EROSION CONTROL BLANKET LOCATIONS ARE SHOWN ON SHEETS C-310 AND C-311, EROSION CONTROL BLANKET DETAIL IS ON SHEET C-312.

B4 SEDIMENT CONTROL MEASURES FOR CONCENTRATED FLOW AREAS INCLUDE INLET PROTECTION (TYPES 1 AND 2), DETAILS CAN BE FOUND ON SHEET C-313, FOR DETAILED SPECIFICATIONS AND INSTALLATION REQUIREMENTS, SEE INDIANA STORM WATER QUALITY MANUAL, PUBLISHED BY INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT (IDEM), OCTOBER 2007.

B5 SEDIMENT CONTROL MEASURES FOR SHEET FLOW AREAS ARE SILT FENCE, CONTRACTOR TO REFERENCE THE TOWN OF BROWNSBURG CONSTRUCTION DETAIL EC-02, FOR DETAILED SPECIFICATIONS AND INSTALLATION REQUIREMENTS, SEE INDIANA STORM WATER QUALITY MANUAL, PUBLISHED BY INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT (IDEM), OCTOBER 2007.

B6 RUNOFF CONTROL MEASURES FOR SWALES AND DIVERSION DITCHES INCLUDES PERMANENT SEEDING WITH EROSION CONTROL BLANKET, DETAILS FOR EROSION CONTROL BLANKET CAN BE FOUND ON SHEET C-312. FOR DETAILED SPECIFICATIONS AND INSTALLATION REQUIREMENTS, SEE INDIANA STORM WATER QUALITY MANUAL, PUBLISHED BY INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT (IDEM), OCTOBER 2007.

B7 NOT APPLICABLE, NO OUTLET PROTECTION IS PROPOSED,

B8 NOT APPLICABLE, NO GRADE STABILIZATION STRUCTURES ARE PROPOSED.

B9 DEWATERING METHODS ARE PROVIDED ON SHEETS C-310 AND C-311, DETAIL CAN BE FOUND ON SHEET C-312.

B10 NO PROPOSED IN-STREAM ACTIVITIES WILL OCCUR ON SITE.

B11 REFERENCE INDIVIDUAL SWPPP DETAILS ON SHEETS C-312 - C-313 AND CHART BELOW FOR MAINTENANCE PROCEDURES.

B12 REFERENCE PHASE 1 AND PHASE 2 IMPLEMENTATION SEQUENCING NOTES ON SHEETS C-310 AND C-311 AND EROSION CONTROL NOTES, DETAIL E4, ON THIS SHEET.

B13 PROPOSED OUTLOTS WILL BE DEVELOPED AT A FUTURE DATE BY INDIVIDUAL OWNERS AND WILL BE REQUIRED TO OBTAIN THEIR OWN PERMIT COVERAGE.

B14 MATERIAL HANDLING AND SPILL PREVENTION PLAN:

IN ORDER TO MINIMIZE THE RELEASE OF POTENTIAL POLLUTANTS DURING CONSTRUCTION THE CONTRACTOR SHALL IMPLEMENT THIS MATERIAL HANDLING AND SPILL PREVENTION PLAN. THE CONTRACTOR SHALL REVIEW THIS PLAN WITH ALL SUBCONTRACTORS AND REQUIRE THAT THEY IMPLEMENT THE PLAN AS WELL. IF A SPILL SHOULD OCCUR PLEASE CONTACT THE APPROPRIATE AUTHORITIES BELOW:

EMERGENCY RESPONSE	911
BROWNSBURG FIRE TERRITORY	(317) 852-1190
BROWNSBURG POLICE DEPARTMENT	(317) 852-1109
INDIANA DEPARTMENT OF NATURAL RESOURCES	(877) 463-6367
INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT	(888) 233-7745
HENDRICKS COUNTY SOIL AND WATER	(317) 745-2555 EXT. 3

1. CONSTRUCTION EQUIPMENT

A. FUELING, LUBRICATION, AND FLUIDS: ALL OPERATIONS INVOLVING THE ADDITION OF FLUIDS TO EQUIPMENT SHOULD BE DONE IN ONE LOCATION, SO THAT SPILLS ARE LIMITED TO THAT SPECIFIC LOCATION WHICH WILL FACILITATE THE CLEANUP OF SPILLS, IF AN OUTSIDE FUELING TANK IS PLANNED TO BE ON SITE, IT SHALL BE DOUBLE WALLED AND STORED IN THIS DESIGNATED AREA, THIS LOCATION IS AN AREA THAT WILL NOT ALLOW SPILLED FLUIDS TO MIGRATE INTO SUBSURFACE SOILS, IN THE EVENT OF A SPILL, THE FLUID SHALL IMMEDIATELY BE CLEANED UP BY REMOVING THE CONTAMINATED SOIL OR STONE WHICH SHALL BE DISPOSED OF IN AN ACCEPTABLE MANNER, SPILLS ON HARD SURFACES SHALL BE SOAKED UP BY AN ACCEPTABLE MATERIAL SUCH AS OIL DRY AND THE ABSORBENT MATERIAL DISPOSED OF IN A PROPER MANNER, THE SPILL SHALL ALSO BE REPORTED IMMEDIATELY TO THE CONTRACTOR'S SUPERINTENDENT.

B. EQUIPMENT REPAIR, ESPECIALLY WHEN FLUIDS MUST BE REMOVED FROM THE EQUIPMENT OR THE POSSIBILITY OF FLUID SPILLS IS HIGH, SHOULD ALWAYS BE DONE OFFSITE AT A FACILITY THAT IS MORE SUITABLE THAN A CONSTRUCTION SITE TO HANDLE SPILLS. WHEN EQUIPMENT MUST BE REPAIRED ONSITE IT SHOULD BE MOVED TO THE MAINTENANCE AND FUELING AREA IF POSSIBLE, OTHERWISE, SUITABLE ON SITE CONTAINERS SHOULD BE PLACED UNDER THE EQUIPMENT DURING REPAIR TO CATCH ANY SPILLED FLUIDS AND THESE FLUIDS SHOULD BE DISPOSED OF IN A PROPER MANNER.

C. ALL REUSABLE FLUID CONTAINERS, SUCH AS GASOLINE CANS, SHALL BE INSPECTED FOR LEAKS EACH TIME THEY ARE USED, IF LEAKS ARE FOUND, THE FLUID SHALL BE REMOVED FROM THE CONTAINER IN A PROPER MANNER AND THE CONTAINER DISPOSED OF IN AN ACCEPTABLE MANNER, EMPTY DISPOSABLE CONTAINERS, SUCH AS GREASE TUBES AND LUBRICATING OIL AND BRAKE FLUID CONTAINERS, AND THEIR PACKAGING, SHALL BE DISPOSED OF IN A PROPER MANNER AND SHALL NOT BE LEFT ON THE GROUND OR IN THE OPEN ON THE CONSTRUCTION SITE.

2. CONSTRUCTION MATERIALS AND THEIR PACKAGING

A. EROSION CONTROL MEASURES SHOWN ON THESE PLANS SHALL BE IMPLEMENTED PRIOR TO AND DURING CONSTRUCTION IN THE PROPER SEQUENCING TO MINIMIZE SOIL EROSION, EROSION CONTROLS SHALL BE INSPECTED AND MAINTAINED AS DESCRIBED ELSEWHERE IN THESE PLANS, EXCESSIVE DUSTING OF SOIL ON THE SITE SHALL BE MINIMIZED BY REDUCING CONSTRUCTION TRAFFIC ACROSS BARE SOIL DURING DRY AND/OR WINDY WEATHER, AND BY APPLYING WATER OR OTHER ACCEPTABLE DUST CONTROL MEASURES TO THE SOIL. UPON COMPLETION OF CONSTRUCTION AND SUITABLE ESTABLISHMENT OF PERMANENT VEGETATION, TEMPORARY EROSION CONTROL MEASURES SUCH AS SILT FENCE AND INLET PROTECTION DEVICES SHALL BE REMOVED IN A MANNER TO MINIMIZE ADDITIONAL LAND DISTURBANCE, ANY AREAS DISTURBED BY THESE OPERATIONS SHALL BE PROPERLY STABILIZED.

B. LARGE WASTE MATERIALS CREATED BY CUTTING, SAWING, DRILLING, OR OTHER OPERATIONS SHALL BE PROPERLY DISPOSED OF IN SUITABLE ONSITE WASTE CONTAINERS, THE SITE SHALL BE CHECKED AT THE END OF THE DAY, AT MINIMUM, AND ALL WASTE MATERIALS, INCLUDING THOSE BLOWN AGENCIES OFF THE SITE BY WIND, SHALL BE PICKED UP AND DISPOSED OF IN SUITABLE CONTAINERS, WHERE POSSIBLE, OPERATIONS SUCH AS SAWING THAT CREATE SMALL PARTICLES SHOULD BE PERFORMED IN ONE SPOT IN AN AREA PROTECTED FROM WIND, AND WASTE PARTICLES COLLECTED AND DISPOSED OF FREQUENTLY TO MINIMIZE WIND DISPERSAL, PACKAGING USED TO TRANSPORT MATERIALS TO THE SITE FOR CONSTRUCTION OF THE FACILITY SHALL BE DISPOSED OF PROPERLY, WHETHER THE MATERIAL IS TAKEN OUT OF ITS PACKAGE AND INCORPORATED INTO THE PROJECT IMMEDIATELY OR STORED ONSITE FOR FUTURE USE. PACKAGED MATERIALS STORED ONSITE SHALL BE INSPECTED REGULARLY AND ANY LOOSE PACKAGING SHALL BE REPAIRED OR DISPOSED OF PROPERLY.

C. ALL DEWATERING ACTIVITIES SHALL BE DONE IN ACCORDANCE TO GOOD EROSION CONTROL PRACTICES, THESE PRACTICES SHOULD INCLUDE THE USE OF DIRT BAGS SUCH AS DANDY DIRT BAGS, THE USE OF THESE TYPES OF DEWATERING DEVICES WILL REMOVE LARGE QUANTITIES OF SILT, SEDIMENT, AND DIRT AND PREVENT THESE MATERIALS FROM ENTERING THE STORM SEWER SYSTEM.

D. IF THE USE OF LIME IS USED TO STABILIZE THE SOIL OF THE SITE THEN ALL CONSTRUCTION EQUIPMENT USED SHALL BE CLEANED OF ALL EXCESS MATERIAL WITH WATER IN THE CONSTRUCTION STAGING AREA AS SHOWN WITHIN THESE PLANS.

E. NUTRIENTS AND FERTILIZERS SHALL ONLY BE USED TO ESTABLISH RAPID VEGETATION. WHEN THESE PRODUCTS ARE UTILIZED, THE USER SHOULD PAY STRICT ATTENTION TO THE PRODUCTS RECOMMENDED USAGE.

3. CONCRETE WASTE WATER

A. ALL CONCRETE WASTE WATER SHALL BE DISPOSED OF IN THE DESIGNATED CONCRETE WASHOUT AREAS SHOWN ON SHEETS C-310 AND C-311, CONCRETE WASTE WATER SHALL BE DISCHARGED INTO A 4'-HIGH, 10'-DIAMETER DOUGHNUT-TYPE MULCH BERM CONSTRUCTED OVER A POLYETHYLENE LINER, CONTRACTOR SHALL INSPECT THIS AREA ON A DAILY BASIS AT A MINIMUM, WHEN THIS AREA BECOMES FULL, THE POLLUTANTS SHALL BE EXCAVATED, PLACED IN AN ACCEPTABLE CONTAINER AND DISPOSED OF IN A PROPER MANNER.

4. PAINT PRODUCTS

A. ALL EXCESS PAINT AND THEIR RELATED PRODUCTS SHALL BE DISPOSED OF IN THE MANNER BY WHICH THE MANUFACTURER SUGGESTS, UNDER NO CIRCUMSTANCES SHALL PAINT OR THEIR RELATED PRODUCTS BE CLEANED OR DISPOSED OF IN SOIL, SANITARY SEWERS, STORM SEWERS OR STORMWATER MANAGEMENT BASINS. ANY VIOLATIONS OF THIS SHALL BE REPORTED TO THE JOB SUPERINTENDENT.

B15 SEE SHEETS C-310 AND C-311 FOR CONSTRUCTION STAGING AREAS, WASTE REMOVAL AND CONCRETE WASHOUT AREAS, REFERENCE DETAILS ON SHEET C-312.

SECTION C: POST-CONSTRUCTION COMPONENT

C1 EXPECTED POLLUTANTS IN THE POST-DEVELOPED CONDITION ARE: SEDIMENT, OIL, GREASE, ANTIFREEZE, AND GASOLINE MAY OCCUR IN LIMITED AMOUNTS AS A RESULT OF THIS PROJECT. THE ONLY OTHER REASONABLY FORESEEN POLLUTION FROM THIS SITE WILL BE LITTER AND TRASH DUMPED BY OTHERS.

C2 THE STORMWATER MANGEMENT SYSTEM OF THIS SITE WILL CONNECT TO THE DRY DETENTION BASIN AND UNDERGROUND DETENTION SYSTEM OF THE LARGER MEIJER DEVELOPMENT LOCATED NORTHEAST OF THE SITE. VEGETATION COVERS THE TOP AND SIDES OF THE DRY BASIN, THE SITE DRAINS TO AN HDS WATER QUALITY STRUCTURE IMMEDIATELY NORTH OF THE MEIJER CONVENIENCE STORE, THAT SERVES AS PRE-TREATMENT PRIOR TO SITE RUNOFF ENTERING THE DETENTION SYSTEMS.

ALL STRUCTURES HAVE A SUMP TO CAPTURE DEBRIS AND SEDIMENT.

C3 POST-CONSTRUCTION STORMWATER MEASURES ARE SHOWN ON SHEETS C-311.

C4 SEE PHASE 1 AND PHASE 2 SEQUENCING NOTES ON C-310 AND C-312, RESPECTIVELY, FOR AN APPROPRIATE CONSTRUCTION SEQUENCING AND INSTALLATION OF EROSION CONTROL MEASURES.

C5 APPLICABLE MAINTENANCE MANUALS ARE INCLUDED SEPARATELY.

C6 OWNER CONTACT:

KEVIN WIERINGA
MEIJER STORES LIMITED PARTNERSHIP
2350 THREE MILE ROAD NW
GRAND RAPIDS, MICHIGAN 49544
PHONE: (616) 916-3288

GENERAL NOTES

1. THE CONTRACTOR SHALL CONTROL WASTE, GARBAGE, DEBRIS, WASTEWATER, AND OTHER SUBSTANCES ON THE SITE IN SUCH A WAY THAT THEY SHALL NOT BE TRANSPORTED FROM THE SITE BY THE ACTION OF WINDS, STORM WATER RUNOFF, OR OTHER FORCES. PROPER DISPOSAL OR MANAGEMENT OF ALL WASTES AND UNUSED BUILDING MATERIALS, APPROPRIATE TO THE NATURE OF THE WASTE OR MATERIAL, IS REQUIRED.
2. PUBLIC OR PRIVATE ROADWAYS SHALL BE KEPT CLEARED OF ACCUMULATED SEDIMENT. BULK CLEARING OF ACCUMULATED SEDIMENT SHALL NOT INCLUDE FLUSHING THE AREA WITH WATER. CLEARED SEDIMENT SHALL BE RETURNED TO THE POINT OF LIKELY ORIGIN OR OTHER SUITABLE LOCATION.
3. THIS EROSION CONTROL PLAN SHALL BE IMPLEMENTED ON ALL DISTURBED AREAS WITHIN THE CONSTRUCTION SITE. ALL MEASURES INVOLVING EROSION CONTROL PRACTICES SHALL BE INSTALLED UNDER THE GUIDANCE OF QUALIFIED PERSONNEL EXPERIENCED IN EROSION CONTROL, AND FOLLOWING THE PLANS AND SPECIFICATIONS INCLUDED HEREIN.
4. ALL EROSION CONTROL PRACTICES SHALL BE IN ACCORDANCE WITH MEIJER SPECIFICATIONS AND THE INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT'S "INDIANA STORM WATER QUALITY MANUAL" DATED OCTOBER 2007.

(B11) MONITORING AND MAINTENANCE GUIDELINES

EROSION CONTROL MEASURE	*MAINTENANCE FREQUENCY	INSTALLATION SEQUENCE
STONE ENTRANCE	AS NEEDED	PRIOR TO CLEARING AND GRADING
SILT FENCE	WEEKLY, AFTER STORM EVENTS AND AS NEEDED	PRIOR TO CLEARING AND GRADING
INLET PROTECTION	WEEKLY, AFTER STORM EVENTS AND AS NEEDED	PRIOR TO CLEARING AND GRADING (EX.), ALONG WITH NEW STORM SEWER INLETS (PRO.)
TEMPORARY SEDIMENT BASIN (INCLUDING OUTLET STRUCTURE, DISCHARGING PIPE, TEMPORARY SKIMMER, BAFFLE, EMERGENCY SPILLWAY)	WEEKLY, AFTER STORM EVENTS AND AS NEEDED	PRIOR TO CLEARING AND GRADING
EROSION CONTROL BLANKET	WEEKLY, AFTER STORM EVENTS AND AS NEEDED	ALONG WITH ALL EARTHWORK ACTIVITIES
SEED, SOD & LANDSCAPE	WATER AS NEEDED	AFTER FINISH GRADING
DUST CONTROL	AS NEEDED	ALONG WITH ALL EARTHWORK ACTIVITIES
CONCRETE WASHOUT	WEEKLY, AFTER STORM EVENTS AND AS NEEDED	PRIOR TO START OF ANY CONCRETE WORK
DIVERSION DITCHES/BERMS	WEEKLY, AFTER STORM EVENTS AND AS NEEDED	ALONG WITH ALL EARTHWORK ACTIVITIES
ROCK CHECK DAM	WEEKLY, AFTER STORM EVENTS AND AS NEEDED	PRIOR TO CLEARING AND GRADING (EX.), ALONG WITH DITCH GRADING (PRO.)
ROCK DONUT	WEEKLY, AFTER STORM EVENTS AND AS NEEDED	PRIOR TO CLEARING AND GRADING (EX.), ALONG WITH NEW CULVERT PIPE INLETS (PRO.)
REMOVAL OF INLET PROTECTION	N/A	AFTER ALL AREAS DRAINING TO THESE AREAS ARE STABILIZED
REMOVAL OF SILT FENCE	N/A	AFTER ALL AREAS DRAINING TO THESE AREAS ARE STABILIZED
REMOVAL OF TEMPORARY SEDIMENT BASIN APPURTENANCES	N/A	AFTER ALL AREAS DRAINING TO THESE AREAS ARE STABILIZED
REMOVAL OF DIVERSION DITCHES/BERMS	N/A	ALONG WITH INSTALLATION OF STORM SEWER SYSTEM
REMOVAL OF ROCK CHECK DAM	N/A	AFTER ALL AREAS DRAINING TO THESE AREAS ARE STABILIZED
REMOVAL OF ROCK DONUT	N/A	AFTER ALL AREAS DRAINING TO THESE AREAS ARE STABILIZED

EROSION CONTROL MEASURES MAINTENANCE REQUIREMENTS
-SEE CHART FOR MAINTENANCE REQUIREMENTS *

SILT FENCE MAINTENANCE REQUIREMENTS:
1. INSPECT THE SILT FENCE PERIODICALLY AND AFTER EACH STORM EVENT.
2. IF FENCE FABRIC TEARS, STARTS TO DECOMPOSE, OR IN ANY WAY BECOMES INEFFECTIVE, REPLACE THE AFFECTED PORTION IMMEDIATELY.
3. REMOVE DEPOSITED SEDIMENT WHEN IT REACHES HALF THE HEIGHT OF THE FENCE AT ITS LOWEST POINT OR IS CAUSING THE FABRIC TO BULGE.
4. TAKE CARE TO AVOID UNDERMINING THE FENCE DURING CLEAN OUT.
5. AFTER THE CONTRIBUTING DRAINAGE AREA HAS BEEN STABILIZED, REMOVE THE FENCE AND SEDIMENT DEPOSITS, BRING THE DISTURBED AREA TO GRADE, AND STABILIZE.

TEMPORARY GRAVEL CONSTRUCTION ENTRANCE MAINTENANCE REQUIREMENTS:
1. INSPECT ENTRANCE PAD AND SEDIMENT DISPOSAL AREA DAILY AND AFTER STORM EVENTS OR HEAVY USE.
2. RESHAPE PAD AS NEEDED FOR DRAINAGE AND RUNOFF CONTROL.
3. TOPDRESS WITH CLEAN STONE AS NEEDED.
4. IMMEDIATELY REMOVE MUD AND SEDIMENT TRACKED OR WASHED ONTO PUBLIC ROADS BY BRUSHING OR SWEEPING.
5. REPAIR ANY BROKEN ROAD PAVEMENT IMMEDIATELY.

CONCRETE WASHOUT MAINTENANCE REQUIREMENTS:
1. INSPECT EACH CONCRETE WASHOUT AREAS DAILY AND AFTER STORM EVENTS OR HEAVY USE.
2. INSPECT THE INTEGRITY OF THE OVERALL STRUCTURE. CHECK FOR LEAKS, SPILLS OR TRACKING OF SOIL BY EQUIPMENT.
3. REMOVE EXCESS CONCRETE WHEN WASHOUT SYSTEMS REACHES 50% OF THE DESIGN CAPACITY. UPON REMOVAL, INSPECT STRUCTURE. REPAIR AS NEEDED.
4. DISPOSE OF ALL CONCRETE IN A LEGAL MANNER.
5. REPLACE PLASTIC LINER AFTER EVERY CLEANING. ENLARGE AS NECESSARY TO MAINTAIN CAPACITY.

INLET PROTECTION MAINTENANCE REQUIREMENTS:
1. INSPECT EACH INLET PROTECTION MEASURE DAILY AND AFTER STORM EVENTS OR HEAVY USE.
2. INSPECT STORM INLET BASKET OR GEOTEXTILE FABRIC AND MAKE REPAIRS.
3. REMOVE ANY SEDIMENT. AVOID DAMAGING OR UNDERCUTTING FABRIC.

ROCK DONUT MAINTENANCE REQUIREMENTS:
1. INSPECT EACH ROCK DONUT MEASURE DAILY AND AFTER STORM EVENTS OR HEAVY USE.
2. MAKE NEEDED REPAIRS IMMEDIATELY.
3. REMOVE ACCUMULATED SEDIMENT WHEN IT REACHES ONE-HALF THE HEIGHT OF THE ROCK DONUT TO MAINTAIN END SECTION INLET CAPACITY.
4. ADD RIPRAP AND AGGREGATE AS NEEDED TO MAINTAIN DESIGN HEIGHT AND CROSS SECTION OF THE ROCK DONUTS.
5. WHEN THE CONTRIBUTING DRAINAGE AREA HAS BEEN STABILIZED, REMOVE RIPRAP AND AGGREGATE AND PROPERLY DISPOSE OF ALL SEDIMENT AND CONSTRUCTION MATERIAL AND RESTABILIZE.

TEMPORARY SEDIMENT BASIN MAINTENANCE REQUIREMENTS:
1. INSPECT WITHIN 24 HOURS OF A RAIN EVENT AND AT LEAST ONCE EVERY SEVEN CALENDAR DAYS.
2. REMOVE AND PROPERLY DISPOSE OF SEDIMENT WHEN IT ACCUMULATES TO ONE-HALF THE DESIGN VOLUME.
3. PERIODICALLY CHECK EMBANKMENT, EMERGENCY SPILLWAY, AND OUTLET FOR EROSION DAMAGE, PIPING, SETTLING, SEEPAGE, OR SLUMPING ALONG THE TOE OR AROUND THE BARREL; REPAIR IMMEDIATELY.
4. REMOVE TRASH AND OTHER DEBRIS FROM RISER, EMERGENCY SPILLWAY, AND POOL AREA.
5. CLEAN OR REPLACE AGGREGATE AROUND THE RISER IF THE SEDIMENT POOL DOES NOT DEWATER (DRAIN) WITHIN 48 TO 72 HOURS FOLLOWING A STORM WATER RUNOFF EVENT.
6. REMOVE BASIN AFTER DRAINAGE AREA HAS BEEN PERMANENTLY STABILIZED, INSPECTED, AND APPROVED, DO SO BY DRAINING ANY WATER, REMOVING SEDIMENT TO A DESIGNATED DISPOSAL AREA, SMOOTHING THE SITE TO BLEND WITH THE SURROUNDING AREA, AND THEN STABILIZING WITH SEED AND MULCH OR ANOTHER APPROPRIATE NONERODSIVE COVER.

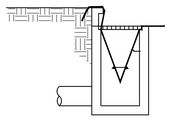

EROSION CONTROL BLANKET MAINTENANCE REQUIREMENTS:
1. INSPECT WITHIN 24 HOURS OF A RAIN EVENT AND AT LEAST ONCE EVERY SEVEN CALENDAR DAYS.
2. CHECK FOR EROSION OR DISPLACEMENT OF THE BLANKET.
3. IF ANY AREA SHOWS EROSION, PULL BACK THAT PORTION OF THE BLANKET COVERING THE ERODED AREA, ADD SOIL AND TAMP, RESEED THE AREA, REPLACE AND STAPLE THE BLANKET.

ROCK CHECK DAM MAINTENANCE REQUIREMENTS:
1. INSPECT WITHIN 24 HOURS OF A RAIN EVENT AND AT LEAST ONCE EVERY SEVEN CALENDAR DAYS.
2. IF SIGNIFICANT EROSION OCCURS BETWEEN DAMS, INSTALL AN EROSION-RESISTANT LINER IN THAT PORTION OF THE CHANNEL.
3. REMOVE ACCUMULATED SEDIMENT WHEN IT REACHES ONE-HALF THE HEIGHT OF THE DAM TO MAINTAIN CHANNEL CAPACITY. ALLOW DRAINAGE THROUGH THE DAM, AND PREVENT LARGE FLOW FROM DISPLACING SEDIMENT.
4. ADD RIPRAP AND AGGREGATE AS NEEDED TO MAINTAIN DESIGN HEIGHT AND CROSS SECTION OF THE DAMS.
5. WHEN DAMS ARE NO LONGER NEEDED, REMOVE THE RIPRAP AND AGGREGATE AND STABILIZE THE CHANNEL, USING AN EROSION-RESISTANT LINING IF NECESSARY, (RIPRAP AND AGGREGATE FROM THE DAM MAY BE REMOVED OR UTILIZED TO STABILIZE THE CHANNEL)

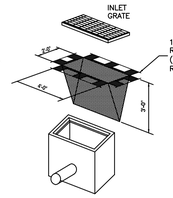

DIVERSION DITCH / BERM MAINTENANCE REQUIREMENTS:
1. INSPECT WITHIN 24 HOURS OF A RAIN EVENT AND AT LEAST ONCE EVERY SEVEN CALENDAR DAYS.
2. REMOVE SEDIMENT FROM CHANNEL / TOE OF BERM TO MAINTAIN POSITIVE GRADE.
3. CHECK OUTLETS AND MAKE NECESSARY REPAIRS IMMEDIATELY.
4. ADJUST RIDGE HEIGHT TO PREVENT OVERTOPPING.

A1 IDEM CONSTRUCTION GENERAL PERMIT NOTES

NTS

INSTALLATION DETAIL

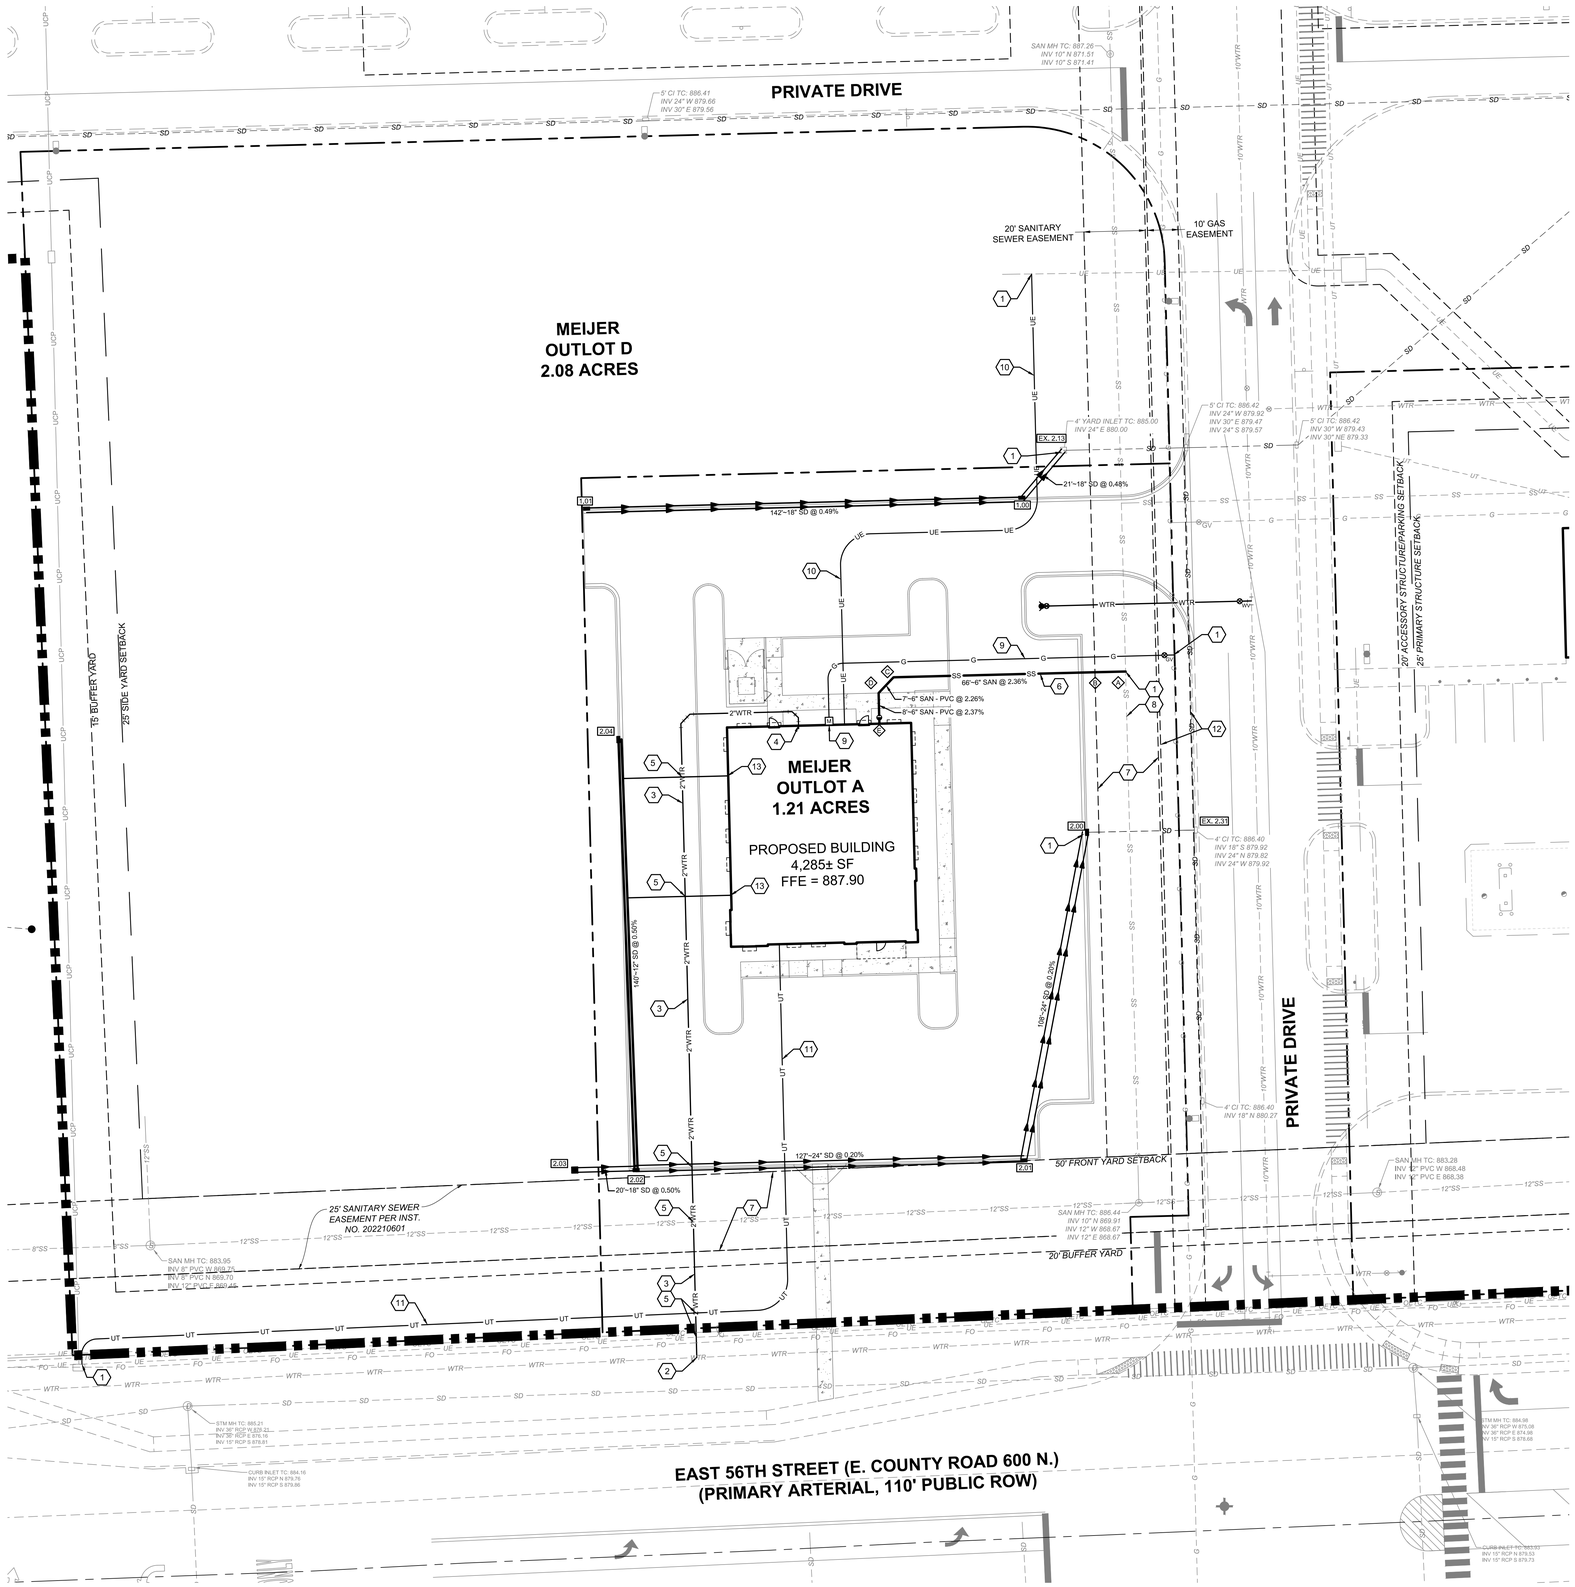

ISOMETRIC VIEW

DESCRIPTION

VARIOUS TYPES OF STORM SEWER INLET PROTECTION MEASURES ARE AVAILABLE DEPENDING ON THE TYPE OF INLET STRUCTURE (E.G., CURB OR AREA) AND THE STAGE OF CONSTRUCTION. IN GENERAL, INLET PROTECTION MEASURES ARE TEMPORARY SEDIMENT CONTROL BARRIER FORMED AROUND OR IN A STORM SEWER INLET TO HELP PREVENT SEDIMENT FROM ENTERING STORM DRAINS DURING CONSTRUCTION. INLET PROTECTION MEASURES ARE TO BE INSTALLED AS EACH INLET STRUCTURE IS CONSTRUCTED.

INSTALLATION
1. A FILTER FABRIC BAG IS HUNG INSIDE THE INLET, BENEATH THE GRATE.
2. REPLACE GRATE, WHICH WILL HOLD BAG IN PLACE.
3. ANCHOR FILTER BAG WITH 1" REBAR FOR REMOVAL FROM INLET.
4. FLAPS OF BAG THAT EXTEND BEYOND THE BAG CAN BE BURIED IN SOIL IN EARTH AREAS.

GENERAL NOTES

1. VERIFY THE HORIZONTAL AND VERTICAL LOCATION OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.
2. UTILITIES SHALL END 5 FEET FROM THE BUILDING UNLESS NOTED OTHERWISE.
3. PROTECT AND MAINTAIN CROSSINGS OF OTHER UTILITIES.
4. ALL DIMENSIONS ARE TO CENTERLINE OF PIPE, CENTER OF MANHOLE, EDGE OF PAVEMENT OR BACK OF CURB WHERE APPLICABLE. DIMENSIONS TO COLUMN LINE ASSUME 9" THICK BUILDING WALL.
5. ALL MATERIAL, SPECIFICATIONS, AND CONSTRUCTION METHODS SHALL BE IN CONFORMANCE WITH MEIJER STANDARD SPECIFICATIONS AND DETAILS AND TOWN OF BROWNSBURG AND HENDRICKS COUNTY REQUIREMENTS.
6. PROVIDE MINIMUM 18" VERTICAL CLEARANCE AT ALL UTILITY CROSSINGS.
7. BEFORE COMMENCING WORK, CONTRACTOR SHALL VERIFY ALL LOCATIONS AND ELEVATIONS OF EXISTING UTILITIES.

KEYNOTES (X)

1. CONNECT TO EXISTING UTILITY PER AGENCY REQUIREMENTS. CONTRACTOR TO VERIFY LOCATION OF EXISTING UTILITY IN WHICH TO MAKE CONNECTION.
2. CONNECT TO EXISTING WATER MAIN PER CITIZENS ENERGY GROUP REQUIREMENTS. CONTRACTOR TO VERIFY THERE IS 3' OF CLEARANCE FROM EXISTING TAPS AND FITTINGS.
3. 2" DOMESTIC WATER SERVICE. HDPE SDR9, 1.5" DOMESTIC METER AND BACKFLOW PREVENTER TO BE LOCATED INSIDE THE BUILDING.
4. COPPER OR DUCTILE IRON SHALL BE INSTALLED FROM 5 FEET OUTSIDE OF THE BUILDING FOOTER INTO THE BUILDING METER SETUP. SEE ARCHITECTURAL PLANS FOR CONTINUATION. SEE CEG STANDARDS SECTION 8.06.
5. ADJUST WATER LINE VERTICALLY AS NECESSARY TO PROVIDE 18" VERTICAL CLEARANCE FROM SANITARY OR STORM SEWER WHILE MAINTAINING APPROPRIATE COVER FOR WATER LINE.
6. 6" SANITARY SERVICE.
7. PUBLIC SANITARY EASEMENT.
8. PUBLIC SANITARY SEWER.
9. GAS SERVICE AND METER.
10. UNDERGROUND ELECTRIC SERVICE. PROVIDE (2) 4" CONDUIT FOR ELECTRIC SERVICE.
11. UNDERGROUND COMMUNICATIONS SERVICE. PROVIDE (2) 4" CONDUIT FOR TELECOMMUNICATIONS.
12. GAS EASEMENT.
13. 6" ROOF DRAIN FOR GUTTER DOWNSPOUTS.

WATER NOTES

ALL MATERIALS, INSTALLATION, TESTING, AND RELATED WORK SHALL COMPLY WITH THE CITIZENS WATER STANDARDS MANUAL, LATEST EDITION.

1. FULL-DEPTH GRANULAR BACKFILL IS REQUIRED BENEATH AND WITHIN FIVE (5) FEET OF ALL PAVEMENT, IN ACCORDANCE WITH THE CITIZENS WATER STANDARDS MANUAL, LATEST EDITION.
2. THE TRACING WIRE AND IDENTIFICATION RIBBON SHALL BE INSTALLED AS SPECIFIED IN SECTION 9.17, "INSTALLATION OF TRACING WIRE AND IDENTIFICATION RIBBON"
3. MANDATORY PIPE COVER SHALL BE 54-INCH BELOW FINISHED GRADE OR AS REQUIRED BY 327 IAC 8-3.2-17.
4. A MINIMUM OF A 10' HORIZONTAL SEPARATION AND AN 18" VERTICAL SEPARATION BETWEEN SEWER LINES (SANITARY OR STORM) AND THE WATER SERVICE LINES MUST BE MAINTAINED.
5. TAPS MUST BE A MINIMUM OF 3 FEET FROM EACH OTHER/EXISTING FITTINGS.
6. TAPS MUST BE PERPENDICULAR TO THE MAIN.
7. BENDS ARE NOT ALLOWED WITHIN THE RIGHT-OF-WAY.
8. AT LEAST 3' OF SEPARATION MUST MAINTAINED BETWEEN THE WATER SERVICE LINES AND OTHER UTILITIES.

STRUCTURE TABLE NOTES

1. EX = EXISTING.
2. CI = CURB INLET.
3. CB = CATCH BASIN.
4. MH = MANHOLE.
5. CTE = CONNECT TO EXISTING.
6. RIM/GRATE ELEVATION INDICATES:
   - 6.1. FOR MANHOLE, JUNCTION BOX/CLEANOUT: RIM ELEVATION.
   - 6.2. FOR CATCH BASIN: GRATE ELEVATION.
   - 6.3. FOR CURB INLET: TOP OF CASTING/TOP OF CURB ELEVATION.
7. ALL PROPOSED STORM AND SANITARY STRUCTURE TYPES SHALL BE IN ACCORDANCE WITH THE TOWN OF BROWNSBURG STANDARD CONSTRUCTION DETAILS UNLESS OTHERWISE NOTED.
8. CONTRACTOR SHALL REVIEW CONDITION OF EXISTING STRUCTURES TO REMAIN IN WHICH PROPOSED PIPES ARE PROPOSED TO CONNECT. IF CONDITIONS WARRANT IT, STRUCTURE(S) SHALL BE REPLACED.
9. ALL STORM GRATE CASTINGS TO BE PRE-CAST WITH A POLLUTION PREVENTION MESSAGE PERMANENTLY ATTACHED. PER TOWN OF BROWNSBURG STANDARD DETAILS SW-13 AND SW-14, POLLUTION PREVENTION MESSAGE TO STATE, AT MINIMUM, "DUMP NO WASTE <FISH ICON> DRAINS TO WATERWAY" IN MINIMUM 1 INCH HIGH LETTERS.
10. STORM SEWER PIPING TO BE HIGH DENSITY POLYETHYLENE (HDPE) FOR PIPES 12 TO 24 INCHES IN DIAMETER, POLYPROPYLENE (PP) FOR PIPES 12 TO 60 INCHES IN DIAMETER, POLYVINYL CHLORIDE (PVC) FOR PIPES 12 TO 36 INCHES IN DIAMETER, OR REINFORCED CONCRETE (RCP) FOR PIPES 12 INCHES IN DIAMETER OR LARGER IN ACCORDANCE WITH THE TOWN OF BROWNSBURG CONSTRUCTION STANDARDS, MOST CURRENT EDITION.
11. CONTRACTOR TO SIZE STORM STRUCTURES PER TOWN OF BROWNSBURG STANDARDS.
12. SUMPS ARE NOT PERMITTED IN INLET STRUCTURES PER TOWN OF BROWNSBURG STANDARDS.

A1 LANDSCAPE PLAN
1"=20'

LANDSCAPE NOTES

1. COORDINATE PLACEMENT OF PLANTS WITH UTILITY LOCATIONS AND SIGHT LINES TO BUILDING. MAKE ADJUSTMENTS AS REQUIRED TO AVOID PLANTING OVER THE UTILITIES AND/OR WITHIN SIGHT LINES TO ALL MEIJER BUILDING SIGNAGE.
2. THE CENTER OF LARGE ISLANDS IS TO BE SIX INCHES HIGHER THAN TOP OF CURB. ENSURE ALL ISLANDS ARE SLOPED FOR POSITIVE DRAINAGE.
3. ALL AREAS THAT REQUIRE SEEDING SHALL RECEIVE 4" MINIMUM TOPSOIL, UNLESS NOTED OTHERWISE.
4. SEED ALL AREAS INDICATED ON THE LANDSCAPE PLAN, THE SOIL EROSION CONTROL PLAN AND ALL DISTURBED AREA. REVIEW AREAS OF SEEDING WITH CONSTRUCTION MANAGER PRIOR TO ANY SEEDING. ANY AREAS DISTURBED BY THE CONTRACTOR WHICH ARE BEYOND THE LIMITS OF GRADING AND EARTHWORK SHALL BE SEEDED AT NO ADDITIONAL COST TO THE OWNER.
5. TOPSOIL SHALL BE TESTED AND AMENDED AS NECESSARY DURING FINAL GRADING AND PREPARATION FOR SEEDING BY CONTRACTOR.
6. ALL SHRUBS BEDS (EXISTING AND NEW) TO BE MULCHED WITH A MIN. 3 INCH LAYER OF MULCH (DOUBLE SHREDDED HARDWOOD MULCH.
7. APPLY STARTER FERTILIZER (16-32-4) AT 250 POUNDS/ACRE TO SEEDED AREAS.
8. ALL LANDSCAPE ISLANDS SHALL BE NATURAL COLOR, DYE-FREE, 3" DEEP SHREDDED HARDWOOD MULCH EXCEPT AS NOTED. PLACE MULCH OVER WEED BARRIER FABRIC AND TREAT WITH PRE-EMERGENT HERBICIDE.
9. ALL LANDSCAPING SHALL BE INSTALLED A MINIMUM OF 4' FROM THE EDGE OF PAVEMENT WHERE A VEHICLE WILL OVERHANG A LANDSCAPE BED.

LANDSCAPE CODE SUMMARY

CURRENT ZONING: C3 (HEAVY COMMERCIAL)

ON-SITE LANDSCAPING STANDARDS
COMMERCIAL USE (C3) - REQUIRED PLANT QUANTITIES ARE BASED ON OPEN SPACE. THESE PLANTING REQUIREMENTS ARE IN ADDITION TO THE OTHER LANDSCAPE REQUIREMENTS.
CALCULATED OPEN SPACE = 0.53 ACRES

SHADE TREES REQUIRED / PROVIDED:
4 SHADE TREES PER HALF ACRE OF OPEN SPACE = 5 SHADE TREES / 5 SHADE TREES

SHRUBS REQUIRED:
8 LARGE SHRUBS PER HALF ACRE OF OPEN SPACE = 8 SHRUBS / 8 SHRUBS

STREET FRONTAGE LANDSCAPING.
THE AMOUNT OF LANDSCAPING REQUIRED IS BASED ON THE LENGTH OF FRONTAGE.

LENGTH OF FRONTAGE: 245 FT
SHADE OR EVERGREEN TREES REQUIRED / PROVIDED:
(1,5 TREES / 100 LF) 4 TREES / 4 TREES

ORNAMENTAL TREES REQUIRED / PROVIDED:
(1,5 TREES / 100 LF) 4 TREES / 4 TREES

SHRUBS REQUIRED / PROVIDED:
(5 SHRUBS / 100 LF) 12 SHRUBS / 12 SHRUBS

PERIMETER PARKING LOT LANDSCAPING
THE AMOUNT OF LANDSCAPING REQUIRED IS BASED ON THE LENGTH OF FRONTAGE. TREES REQUIRED 35' O.C. ADJACENT TO R/W.

8' WIDE LANDSCAPED AREA FRONT YARD: 134 FT
SHADE TREES (1 TREE / 35 FT OF PARKING LOT FRONTAGE)
REQUIRED / PROVIDED: 4 TREES / 4 TREES

EVERGREEN SHRUBS (4 SHRUBS / 35 FT OF PARKING LOT FRONTAGE)
REQUIRED / PROVIDED: 16 SHRUBS / 16 TREES

6' WIDE LANDSCAPED AREA SIDE/REAR YARD: 505
TREES (1 TREE / 35 FT OF PARKING LOT FRONTAGE)
REQUIRED / PROVIDED: 14 TREES / 14 TREES

MEDIUM SHRUBS (4 SHRUBS / 35 FT OF PARKING LOT FRONTAGE)
REQUIRED / PROVIDED: 58 SHRUBS / 58 SHRUBS

INTERIOR PARKING LOT LANDSCAPING.
INTERIOR PARKING LOT LANDSCAPING INCLUDES 1 SHADE TREE PER PER INDIVIDUAL ISLAND OR PER 160 SQUARE FEET. LANDSCAPE ISLANDS ARE REQUIRED AT THE ENDS OF ALL ROWS OF PARKING.

TREES REQUIRED / PROVIDED:
7 TREES / 7 TREES

FOUNDATION LANDSCAPING
FAÇADES SHALL INCLUDE FOUNDATION PLANTINGS AT A RATE OF 1 SHRUB OR ORNAMENTAL TREE PER 10 FEET OF FAÇADE LENGTH.

FRONT AND SIDE FAÇADE LENGTH = 133 FT
TREES OR SHRUBS REQUIRED / PROVIDED:
14 TREES OR SHRUBS / 22 SHRUBS

BUFFER YARD PLANTING.
BUFFER YARD PLANTS MUST REACH MATURE HEIGHT OF 48" AFTER 3 YEARS AND BE AT LEAST 24 INCES TALL AT TIME OF INSTALLATION

C3 ADJACENT TO C3: NO BUFFER YARD REQUIRED

EAST 56TH STREET BUFFER YARD (HIGH INTENSITY BUFFER): 192 LF

EVERGREEN TREES REQUIRED / PROVIDED:
(1 TREE / 20 LF)* = 10 TREES / 10 TREES

LARGE SHRUBS REQUIRED / PROVIDED:
(3 LARGE SHRUBS / 20 LF)* = 29 SHRUBS / 29 SHRUBS

BERM REQUIRED:
UNDULATING BERM WITH 3'-0" HEIGHT.

   A) 4,000 PSI COMPRESSIVE STRENGTH AT 28 DAYS
   B) 564 LBS. CEMENT PER CUBIC YARD CONCRETE
   C) MAXIMUM WATER CEMENT RATIO: 0.40
   D) AIR CONTENT: 5%-7%
   E) WATER REDUCING ADMIXTURE REQUIRED
2. SIDEWALKS SHALL HAVE A BROOM FINISH WITH TOOLED EDGES AND TOOLED CONTROL JOINTS.
3. CURING COMPOUND EQUAL TO "HYDROCIDE CURING COMPOUND" AS MANUFACTURED BY SONNEBORN, SHALL BE APPLIED TO FINISHED CONCRETE.
4. EXPANSION/CONTRACTION JOINTS SHALL BE INSTALLED AT MAXIMUM OF 50' INTERVALS, AND WHERE CONCRETE WILL ABUT EXISTING WALKS, CURBING, DRIVES, OR OTHER CONCRETE.
5. EXPANSION/CONTRACTION JOINT SHALL BE INSTALLED WITH THREE (3) 1/4" DIA. SMOOTH DOWEL BARS, EACH 12" LONG. DOWEL BARS SHALL HAVE A FULL END CAP ON ONE END. EXPANSION/CONTRACTION JOINT SHALL BE FILLED WITH EXPANSION JOINT FILLER. CONNECTION TO EXISTING WALKS OR SLABS SHALL REQUIRE DRILLING TO INSTALL DOWELS. EPOXY SHALL BE USED TO SET DOWELS IN EXISTING CONCRETE.
6. AT DRIVEWAYS, CONCRETE SHALL BE REINFORCED WITH 6 x 6 x 6/6 WELDED WIRE FABRIC. REINFORCING WELDED WIRE FABRIC SHALL CONFORM TO ASTM 185-73.
7. SIDEWALK THICKNESS IN DRIVEWAY AND APRON BETWEEN SIDEWALK AND CURB SHALL MATCH THE EXISTING CONCRETE DRIVEWAY, THE EQUIVALENT CONCRETE THICKNESS OF THE HMA DRIVEWAY OR SIX (6) INCHES, WHICHEVER IS GREATER.
8. DETAIL IS MEANT TO PROVIDE GUIDANCE ONLY, RAMPS SHALL MEET THE REQUIREMENT OF INDOT STANDARD DRAWINGS E 604-SWCR AND PROWAG.

CITIZENS WATER
STANDARD PRACTICE N

REVISION DATE: 7/25/2018 ISSUE DATE: 6/8/2009

1-1/2" & 2" SERVICE LINE
SWING JOINT

NOTES:
1) ALL SIZE DI, CI, AND PVC MAINS REQUIRE A TAPPING SADDLE
2) ALL SIZE POLY MAINS REQUIRE A FUSED ON TAPPING SADDLE FOR 1-1/2" AND 2" SERVICE LINES.
3) SADDLE AND TAPPING CORP. STOP SUPPLIED & INSTALLED BY CCG. THIS MATERIAL WILL NOT BE SUPPLIED ON DEVELOPER PROJECTS.
4) ALL TAP EXCAVATIONS ARE REQUIRED TO BE BACKFILLED WITH GRANULAR OR FLOWABLE FILL TO A POINT 1'-0" ABOVE WATER MAIN
5) SWING JOINT DIRECTION MUST NOT DEVIATE FROM DRAWING.
6) A COMPRESSION FITTING MUST BE USED OUT OF CURB STOP TO SERVICE LINE.
7) STIFFENERS MUST BE USED ON ALL POLY SERVICES.
8) 4" PLASTIC RISER W/ 5-1/4" VALVE BOX MUST BE INSTALLED OVER CURB STOP AND RESTING ON CONCRETE BLOCK.
9) POLY SERVICES REQUIRE A TRACER WIRE WHICH SHOULD BE ROUTED ON THE OUTSIDE OF THE 4" RISER THEN STUBBED INSIDE THE RISER AT THE TOP. VERIFY THIS WIRE DOES NOT INTERFERE WITH THE OPERATION OF THE CURB STOP.

VEHICLE IMPACT PROTECTION FOR HYDRANTS

ADOPTED CODE FOR THE STATE OF INDIANA, TAKEN FROM THE 2006 INTERNATIONAL FIRE CODE.

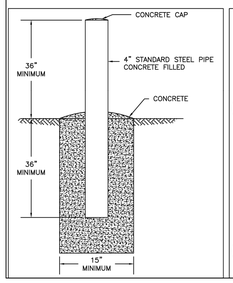

SECTION 312 VEHICLE IMPACT PROTECTION

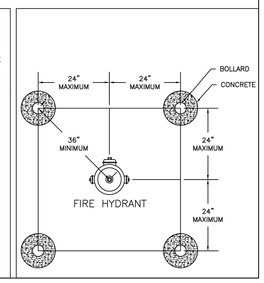

312.1 GENERAL. VEHICLE IMPACT PROTECTION REQUIRED BY THIS CODE SHALL BE PROVIDED BY POSTS THAT COMPLY WITH SECTION 312.2 OR BY OTHER APPROVED PHYSICAL BARRIERS THAT COMPLY WITH SECTION 312.3.

312.2 POSTS. GUARD POSTS SHALL COMPLY WITH ALL OF THE FOLLOWING REQUIREMENTS:

1. CONSTRUCTED OF STEEL NOT LESS THAN 4 INCHES (102 MM) IN DIAMETER AND CONCRETE FILLED.
2. SPACED NOT MORE THAN 4 FEET (1219 MM) BETWEEN POSTS ON CENTER.
3. SET NOT LESS THAN 3 FEET (914 MM) DEEP IN A CONCRETE FOOTING OF NOT LESS THAN A 15-INCH (381 MM) DIAMETER.
4. SET WITH THE TOP OF THE POSTS NOT LESS THAN 3 FEET (914 MM) ABOVE GROUND.
5. LOCATED NOT LESS THAN 3 FEET (914 MM) FROM THE PROTECTED OBJECT

312.3 OTHER BARRIERS. PHYSICAL BARRIERS SHALL BE A MINIMUM OF 36 INCHES (914 MM) IN HEIGHT AND SHALL RESIST A FORCE OF 12,000 POUNDS (53 375 N) APPLIED 36 INCHES (914 MM) ABOVE ADJACENT GROUND SURFACE.

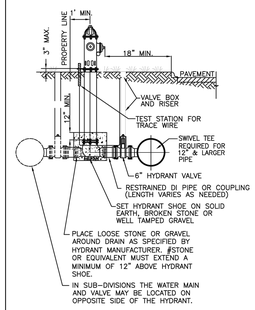

CITIZENS WATER
STANDARD PRACTICE B

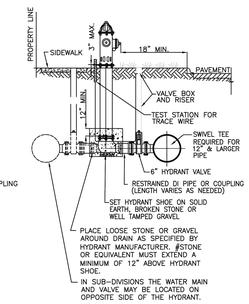

REVISION DATE: 10/02/2019 ISSUE DATE: 12/31/2019

STANDARD HYDRANT SETTING

NOTES:
1. ALL HYDRANTS SHALL BE RESTRAINED TO THE HYDRANT TEE WITH DUCTILE IRON BRANCH PIPING ENCASED IN POLYETHYLENE WRAP.
2. SWIVEL 90° BEND MAY BE USED TO INSTALL HYDRANT AND VALVE IN GRASS STRIP BETWEEN CURB & SIDEWALK.
3. A MANUFACTURED "OUT OF SERVICE" SIGN WILL BE REQUIRED ON HYDRANTS UNTIL MAIN HAS BEEN PLACED "IN SERVICE" BY THE INSPECTOR.
4. FOR BRANCH PIPE LONGER THAN 10', INSTALL TRACING WIRE ALONG HYDRANT VALVE RISER.

INTRODUCTION

This **TRAFFIC IMPACT STUDY**, prepared on behalf of David Weekley Homes, is for a proposed residential development known as "Hawk's Landing" that will be located south of CR 800 N & west of SR 267 (Green Street) in Brownsburg, Indiana.

PURPOSE

The purpose of this analysis is to determine what impact traffic generated by the proposed residential development will have on the existing adjacent roadway system. This analysis will identify any existing roadway deficiencies or ones that may occur in the future.

Conclusions will be reached that will determine if the roadway system can accommodate the anticipated traffic volumes or will determine the modifications that will be required to the system if there are identified deficiencies.

Recommendations will be made that will address the conclusions resulting from this analysis. These recommendations will address feasible roadway system improvements to provide safe ingress and egress, to and from the proposed residential development, with minimal interference to traffic on the public street system.

SCOPE OF WORK

The scope of work for this analysis is as follows:

First, obtain peak hour turning movement traffic volume counts between the hours of 6:30 AM to 9:30 AM and 3:00 PM to 8:00 PM on a typical Thursday and between the hours of 7:00 AM to 2:00 PM on a typical Sunday at the following intersections:

- CR 800 N & CR 650 E
- CR 800 N & SR 267 (Green Street)
- CR 700 N & CR 650 E
- CR 700 N & SR 267 (Green Street)
- SR 267 (Green Street) & Acre Lane

Second, estimate the year 2030 background traffic volumes by applying growth rate factors to the existing traffic volumes.

Third, estimate the number of peak hour weekday trips and Sunday midday peak hour trips that will be generated by the proposed development.

Fourth, assign and distribute the generated traffic from the proposed development to the study intersections.

Fifth, prepare a capacity analysis/level of service analysis and turn lane analysis at the study intersections for each of the following scenarios:

Scenario 1: Existing Traffic Volumes – Based on existing peak hour traffic volumes.

Scenario 2: Year 2030 Background Traffic Volumes – Based on applying growth rate factors to the existing traffic volumes.

Scenario 3: Year 2030 + Proposed Development Traffic Volumes – Based on the sum of year 2030 background traffic volumes and generated traffic volumes from the proposed development.

Sixth, prepare recommendations for the roadway geometrics that will be needed to accommodate the total traffic volumes once the proposed development is constructed.

Finally, prepare a **TRAFFIC IMPACT STUDY** report documenting all data, analyses, conclusions, and recommendations to provide for the safe and efficient movement of traffic through the study area.

DESCRIPTION OF THE PROPOSED DEVELOPMENT

The proposed development will be located south of CR 800 North & west of SR 267 (Green Street) in Brownsburg, Indiana. The proposed residential development will consist of two parcels. The west parcel will have 81 single-family homes that will be served by one full-access drive along CR 800 N and a secondary access connection to Windridge Lane. The east parcel will have 24 single-family homes that will be served via a connection to the existing Connection Pointe Christian Church access drive along SR 267 (Green Street). **Figure 1** is an area map showing the location and general layout of the proposed site. The detailed site plan for the proposed development is included in the **Appendix**.

STUDY AREA

The study area for this analysis has been defined to include the following intersections:

- CR 800 N & CR 650 E
- CR 800 N & SR 267 (Green Street)
- CR 700 N & CR 650 E
- CR 700 N & SR 267 (Green Street)
- SR 267 (Green Street) & Acre Lane / Proposed Development Access Drive
- CR 800 N & Proposed Access Drive

Figures 2A and **2B** show the existing intersection geometrics.

DESCRIPTION OF ABUTTING STREET SYSTEM

The proposed residential development will be primarily served by the public roadway system that includes CR 800 N, CR 650 E, CR 700 N, and SR 267 (Green Street).

TABLE 1 – DESCRIPTION OF THE ABUTTING STREET SYSTEM

STREET NAME	NUMBER OF LANES	SPEED LIMIT (MPH)	ROADWAY CLASSIFICATION *

EXISTING TRAFFIC VOLUMES & PEAK HOURS

Turning movement traffic volume counts were collected by the A&F Engineering at the existing study intersections between the hours of 6:30 AM and 9:30 AM and 3:00 PM and 8:00 PM on a typical Thursday and between the hours of 7:00 AM to 2:00 PM on a typical Sunday in October and November 2025 under good weather conditions. According to the turning movement traffic volume counts, the AM and PM weekday and Sunday peak hours vary slightly at each study intersection. Hence, the actual peak hours are used at each study intersection to create a "worse-case" scenario. The intersection count output summary sheets are included in the **Appendix**, and the AM and PM peak hour traffic volumes at the study intersection are shown in **Figure 3**.

REDISTRIBUTION OF EXISTING TRAFFIC VOLUMES

The west parcel of the proposed development will have a secondary access via a connection to Windridge Lane. Therefore, it is possible that existing traffic from the Windridge subdivision could utilize this connection to access CR 800 N. However, it is not anticipated that these volumes will be significant during the peak hours. Therefore, these volumes have been considered negligible for the purposes of this analysis.

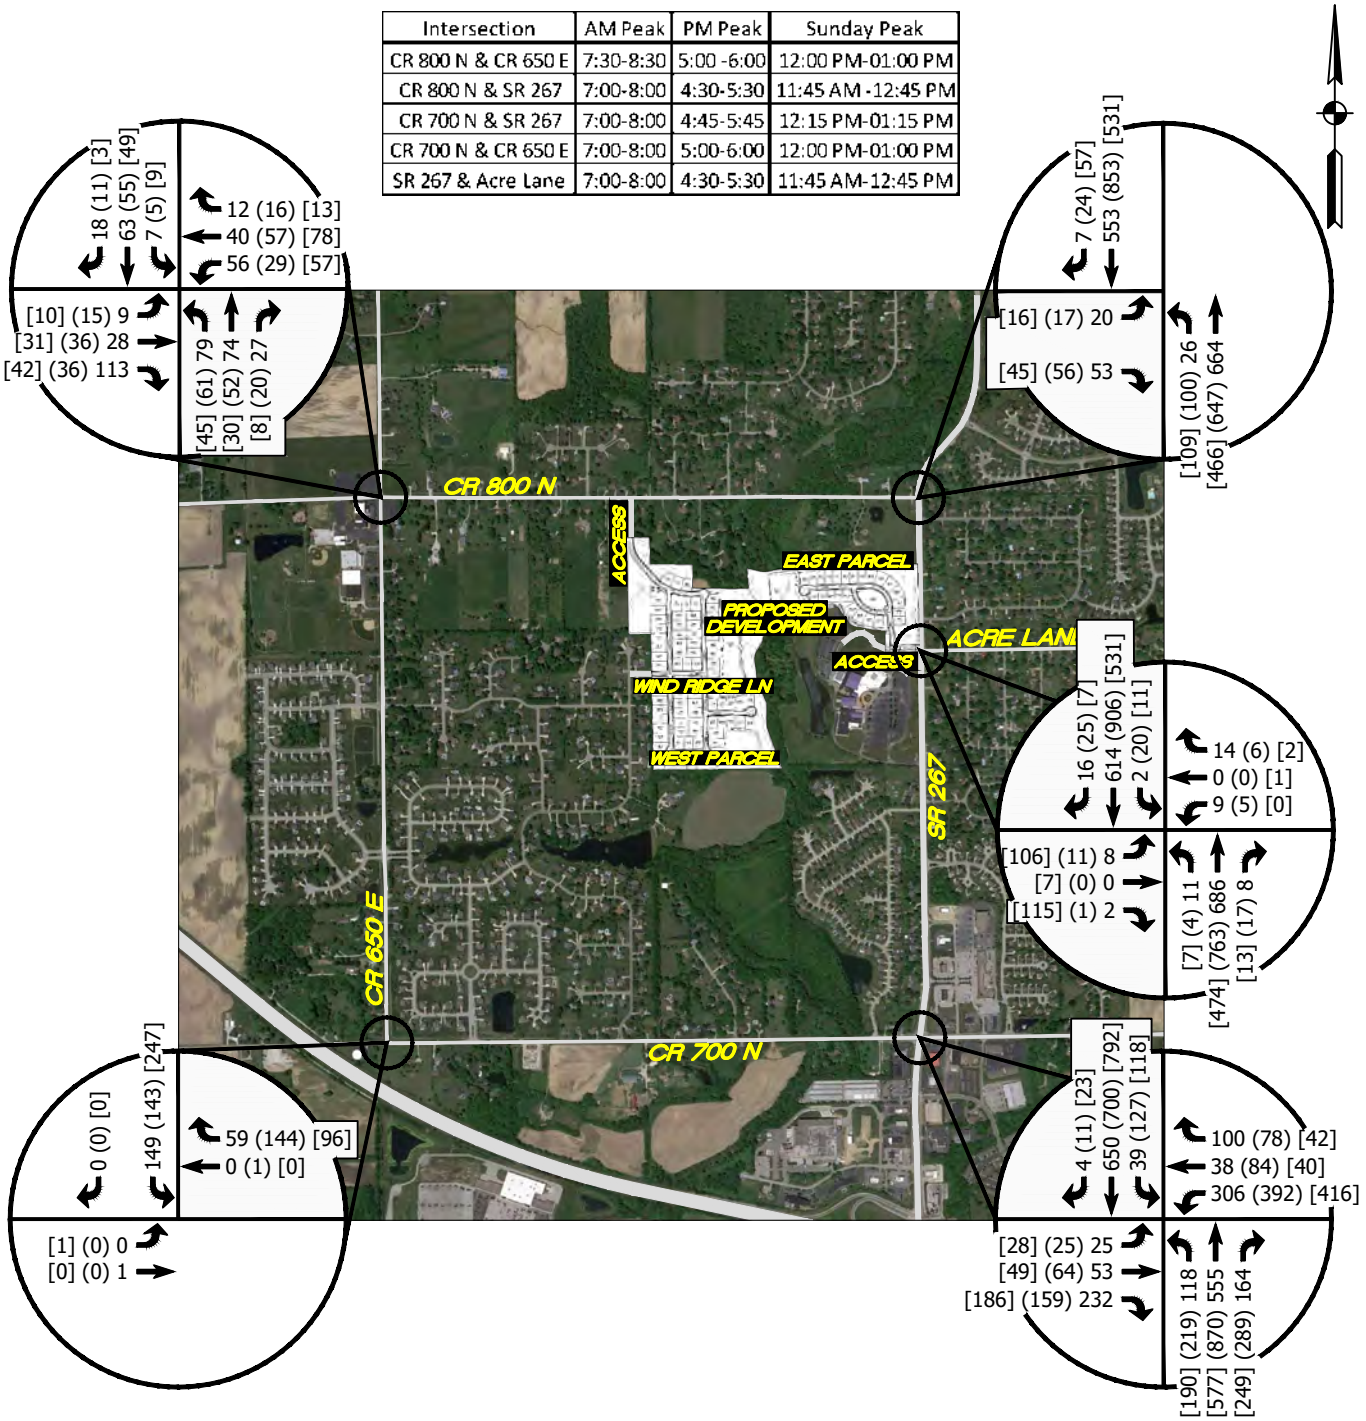

YEAR 2030 BACKGROUND TRAFFIC VOLUMES

To account for annual growth in traffic that would occur due to future development outside of the study area, growth rate factors were applied to the existing traffic volumes. Growth rate factors provided by Shrewsberry were applied to the existing traffic volumes to obtain year 2030 background traffic volumes shown in **Figure 4.**

GENERATED TRIPS FOR PROPOSED DEVELOPMENT

The estimate of newly generated traffic is a function of the development size and of the character of the land use. The ITE *Trip Generation Manual*[1] was used to calculate the number of trips that will be generated by the proposed development. This report is a compilation of trip data for various land uses as collected by transportation professionals throughout the United States in order to establish the average number of trips generated by those land uses. **Table 2** summarizes the trips that will be generated by the subject site.

TABLE 2 – GENERATED TRIPS FOR PROPOSED DEVELOPMENT

DEVELOPMENT INFORMATION			GENERATED TRIPS					
LAND USE	ITE CODE	SIZE	WEEKDAY AM PEAK HOUR		WEEKDAY PM PEAK HOUR		SUNDAY MIDDAY PEAK HOUR	
			ENTER	EXIT	ENTER	EXIT	ENTER	EXIT
Single-Family Housing (East Parcel)	210	24 DU	6	16	16	10	8	6
Single-Family Housing (West Parcel)	210	81 DU	16	44	49	30	34	25

Note: Sunday Trip Generation is based on 24-Hour Sunday trip generation data & applying time-of-day distribution data from the *ITE Trip Generation Manual* Appendices for the 12:00 PM - 1:00 PM time period.

PASS-BY & INTERNAL TRIPS

Pass-by trips are trips that are already in the existing traffic stream along the adjacent public roadway system that enter a site, utilize the site, and then return to the existing traffic stream. Residential developments don't typically generate a significant number of pass-by trips. Therefore, pass-by trips were not considered in this study.

An internal trip results when a trip is made between two or more land uses without traversing the external public roadway system. The proposed development is a single land use. Therefore, internal trips were not considered in this study.

[1] *Trip Generation Manual*, Institute of Transportation Engineers, Twelfth Edition, 2025.

ASSIGNMENT AND DISTRIBUTION OF GENERATED TRIPS

The study methodology used to determine the traffic volumes from the site that will be added to the street system is defined as follows:

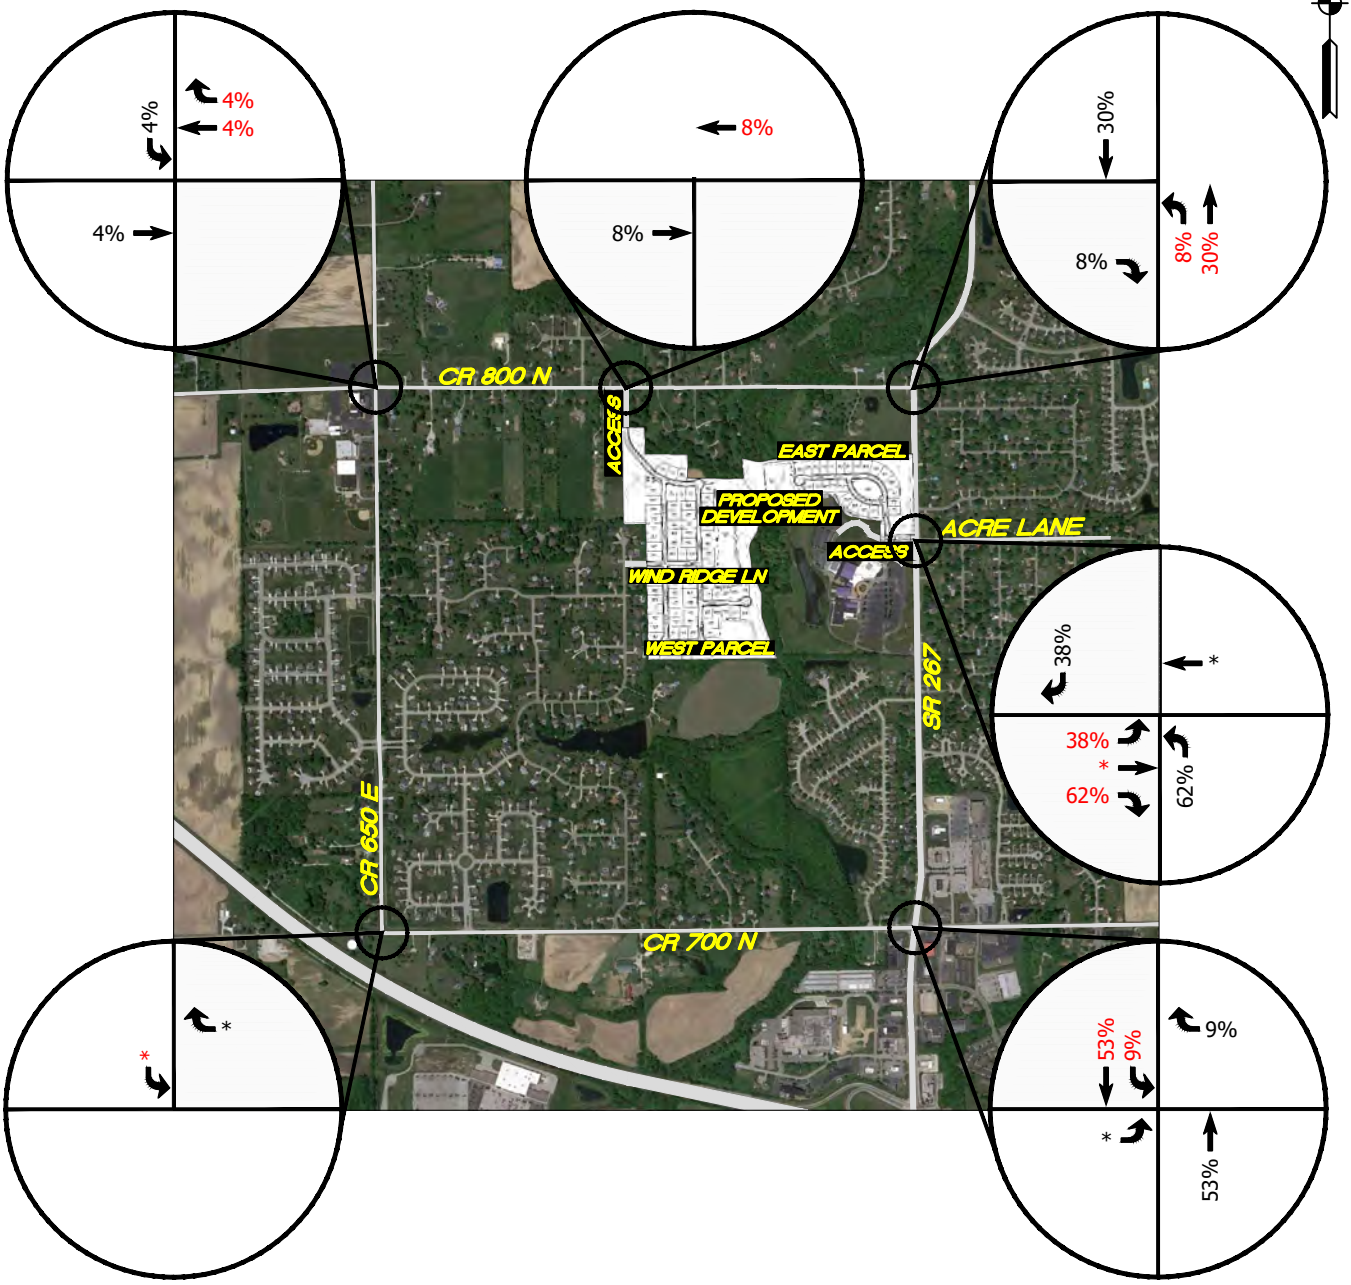

1. The volume of traffic that will enter and exit the proposed development must be assigned to the access points and to the public street system. Using the traffic volume data collected for this analysis, traffic to and from the site development has been assigned to the proposed driveways and to the public street system that will be serving the site.
2. To determine the volume of traffic that will be added to the public roadway system, the generated traffic must be distributed by direction to the public roadways at their intersection with the driveways. For the proposed development, the trip distribution was based on the location of the development, the existing traffic patterns, and the assignment of generated traffic.

Figures 5A, 5B, 5C and **5D** illustrate the assignment and distribution of generated traffic volumes for the proposed development.

GENERATED TRIPS ADDED TO THE STREET SYSTEM

The generated traffic volumes that can be expected from the proposed development have been assigned to each of the study intersections. These volumes were determined based on the previously discussed trip generation data, assignment and distribution of generated traffic. The peak hour total generated traffic volumes from the proposed development are shown in **Figure 6**, and **Figure 7** shows the sum of background year 2030 traffic volumes and generated traffic volumes from the proposed development. The separated generated traffic volumes from the east parcel and west parcel of the development are shown in **Figure A** and **Figure B** in the **Appendix.**

TURN LANE WARRANT ANALYSIS

The year 2030 background traffic volumes were combined with the generated traffic volumes from the proposed development to determine if turn lanes would be required along CR 800 N at the proposed access drive location. This analysis was done in accordance with the INDOT *Driveway Permit Guide*[2] and the results are summarized in the following table.

TABLE 3 – TURN LANE WARRANT RESULTS

LOCATION	RIGHT- TURN LANE	LEFT-TURN LANE
CR 800 N & Proposed Access Drive	✗	✗

✔=Turn Lane warranted; ✗=Turn Lane not warranted

The graphs that show the turn lane warrant criteria are shown in the **Appendix**. Furthermore, it should be noted that where turn lanes are not shown to be warranted, turn treatments could be required by Hendricks County based on local preferences.

CAPACITY ANALYSIS

The "efficiency" of an intersection is based on its ability to accommodate the traffic volumes that approach the intersection. It is defined by the Level-of-Service (LOS) of the intersection. The LOS is determined by a series of calculations commonly called a "capacity analysis". Input data into a capacity analysis includes traffic volumes, intersection geometry, and number and use of lanes. To determine the LOS at each of the study intersections, a capacity analysis has been made using the recognized computer program *Synchro/SimTraffic*[3]. This program allows intersections to be analyzed and optimized using the capacity calculation methods outlined within the *Highway Capacity Manual (HCM 7th Edition)*[4]. The following list shows the delays related to the levels of service for unsignalized and signalized intersections:

[2] INDOT *Driveway Permit Guide*, Version 1.4, Indiana Department of Transportation, 2024
[3] *Synchro/SimTraffic 12*, Cubic Transportation Systems, 2023.
[4] *Highway Capacity Manual (HCM), 7th Edition* Transportation Research Board, National Research Council, Washington, DC, 2022.

Level of Service	Control Delay (seconds/vehicle)	
	UNSIGNALIZED	SIGNALIZED
A	Less than or equal to 10	Less than or equal to 10
B	Between 10.1 and 15	Between 10.1 and 20
C	Between 15.1 and 25	Between 20.1 and 35
D	Between 25.1 and 35	Between 35.1 and 55
E	Between 35.1 and 50	Between 55.1 and 80
F	greater than 50	greater than 80

CAPACITY ANALYSIS SCENARIOS

To evaluate the proposed development's impact on the public street system, a series of traffic volume scenarios were analyzed to determine the adequacy of the existing roadway network. From this analysis, necessary recommendations can be made to improve the public street system so it will accommodate future traffic volumes. An analysis has been made for the peak hours at each of the study intersections for the following traffic volume scenarios:

Scenario 1: Existing Traffic Volumes – Based on existing peak hour traffic volumes. **Figure 3** is a summary of these traffic volumes.

Scenario 2: Year 2030 Background Traffic Volumes – Based on applying growth rate factors to the existing traffic volumes. **Figure 4** is a summary of these traffic volumes.

Scenario 3: Year 2030 + Proposed Development Traffic Volumes – Based on the sum of year 2030 background traffic volumes and generated traffic volumes from the proposed development. **Figure 7** is a summary of these traffic volumes.

The following tables summarize the level of service results at each study intersection. The *Synchro* (*HCM 7th Edition*) intersection reports illustrating the capacity analysis results are included in the **Appendix**.

TABLE 4 – LEVEL OF SERVICE SUMMARY: CR 800 N & CR 650 E

Northbound Approach	A	A	A
Westbound Left-Turn	A	A	A

Analysis considers construction of the access drive with one inbound and one outbound lane that will stop for CR 800 N.

CONCLUSIONS & RECOMMENDATIONS

The conclusions that follow are based on existing traffic volume data, trip generation, assignment and distribution of generated traffic, and the capacity analyses/level of service results. Based on the analysis and the resulting conclusions of this study, the following recommendations are formulated to ensure that the roadway system will accommodate the increased traffic volumes from the proposed development.

CR 800 N & CR 650 E

Capacity analyses for all traffic volume scenarios have shown that this intersection currently operates and will continue to operate at acceptable levels of service during the AM, PM and Sunday peak hours with the existing intersection conditions.

CR 800 N & SR 267 (GREEN STREET)

Capacity analyses have shown that all approaches to this intersection currently operate at acceptable levels of service during the AM and Sunday peak hours with the existing intersection conditions. It is expected that the eastbound approach will experience increased delays during the peak hours as future traffic is added to the intersection. However, additional analyses have shown that these future delays can be substantially reduced if an exclusive left-turn lane and an exclusive right-turn lane are constructed along the eastbound approach.

CR 700 N & SR 267 (GREEN STREET)

Capacity analyses for all traffic volume scenarios have shown that this intersection currently operates and will continue to operate at acceptable levels of service during the AM, PM and Sunday peak hours with the existing intersection conditions.

CR 700 N & CR 650 E

Capacity analyses for all traffic volume scenarios have shown that all approaches to this intersection currently operate and will continue to operate at acceptable levels of service during the AM, PM and Sunday peak hours with the existing intersection conditions.

SR 267 (GREEN STREET) & ACRE LANE/CONNECTION POINTE CHRISTIAN CHURCH/PROPOSED DEVELOPMENT ACCESS DRIVE

Capacity analyses have shown that the eastbound approach currently operates below acceptable levels of service during the weekday and Sunday peak hours. Additionally, the westbound approach currently operates below acceptable levels of service during the PM peak hour. The eastbound and westbound approach delays will increase when future traffic volumes (background and proposed development) are added to the intersection. However, it should be noted that minor street approach peak hour delays are not uncommon when the major street has high peak hour volumes.

CR 800 N & PROPOSED DEVELOPMENT ACCESS DRIVE

Capacity analyses have shown that all approaches at this intersection will operate at acceptable levels of service during the AM, PM and Sunday peak hours when the generated traffic volumes from the proposed development are added to the roadway network and the following recommended intersection conditions are considered.

- Construction of the full access drive with one inbound lane and one outbound lane.
- The intersection should be stop-controlled with the access drive stopping for CR 800 N.

NOTE:

USERS OF THE EXISTING TOPOGRAPHY PLAN ARE CAUTIONED TO CONSIDER THAT ALL NATURAL SURFACES ARE SUBJECT TO DISPLACEMENT DUE TO THE EFFECTS OF ENVIRONMENTAL AND MECHANICAL FACTORS ON SOIL PROPERTIES. THE INTERPOLATED CONTOUR LINES DEPICTED HEREON ARE REPRESENTATIVE OF THE SURFACE OF THE SITE ON THE DATE(S) THE FIELD SURVEY WAS PERFORMED. CHANGES IN SURFACE ELEVATIONS VARYING UP TO 0.5 FEET AFTER THE DATE OF THE SURVEY MAY BE POSSIBLE WITHOUT ANY OBVIOUS VISIBLE INDICATIONS. THEREFORE, IT IS RECOMMENDED THAT THE SURFACE ELEVATIONS OF THIS SITE BE VERIFIED PRIOR TO CONSTRUCTION AND THAT ANY SIGNIFICANT DISCREPANCIES BE REPORTED TO THE ENGINEER FOR EVALUATION. THE SURVEYOR IS NOT RESPONSIBLE FOR ESTIMATING OR ACCOUNTING FOR ANY VERTICAL VARIANCE CAUSED BY SUCH ENVIRONMENTAL OR MECHANICAL INFLUENCES.

THIS EXISTING TOPOGRAPHY PLAN REFLECTS ABOVE GROUND INDICATIONS OF UTILITIES AND INFORMATION AVAILABLE FROM UTILITY COMPANIES. THE ENGINEER/SURVEYOR MAKES NO GUARANTEE THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. THE ENGINEER/SURVEYOR FURTHER DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED, ALTHOUGH HE / SHE DOES CONFIRM THAT THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM THE INFORMATION AVAILABLE. THE ENGINEER/SURVEYOR HAS NOT PHYSICALLY LOCATED THE UNDERGROUND UTILITIES.

NOTES:

Per 865 IAC 1-12-12 this drawing is not intended to be represented as a retracement or original boundary survey, a route survey, or a Surveyor Location Report.

The topographic information shown hereon was obtained in the field during JULY 2024. The topographic data was gathered using a robotic total station and data collector applying standard radial surveying techniques and by global positioning equipment, utilizing the VRS Network, a real-time kinematic (RTK) correction service over the internet.

Elevations on hard surfaces or structures are accurate to within 0.05 feet, elevations on natural surfaces are accurate to within 0.10 feet. The contours shown hereon were plotted based upon interpolation of spot elevations and other topographic information and are accurate to within one half of a contour interval.

This survey reflects above ground indications of utilities and information available from utility companies. The surveyor makes no guarantee that the underground utilities shown comprise all such utilities in the area, either in service or abandoned. The surveyor further does not warrant that the underground utilities shown are in the exact location indicated, although they are located as accurately as possible from the information available. The surveyor has not physically located the underground utilities.

LANDSCAPE SPECIFICATIONS

GENERAL NOTES:

1. STREET TREES MAY BE PLANTED WHERE SUFFICIENT LANDSCAPE AREA IS PROVIDED BETWEEN THE CURB AND SIDEWALK OR IN A STREET MEDIAM. STREET TREE PLACEMENT SHOULD NOT INTERFERE WITH UTILITY LOCATIONS. WHERE STREET TREES ARE PROPOSED NEAR OR UTILITY LINES, APPROVAL MUST BE OBTAINED IN WRITING FROM IMPACTED UTILITIES PRIOR TO APPROVAL OF THE LANDSCAPE PLAN.

A. STREET TREES TO BE SPACED APPROXIMATELY 35 FEET ON CENTER. THE TYPE OF TREE SELECTED MUST HAVE AN APPROPRIATE MATURE HEIGHT AND ROOT SYSTEM TO MINIMIZE FUTURE DAMAGE AND OBSTRUCTION TO THE SIDEWALK.

B. STREET TREES MAY BE COUNTED TOWARD ANY STREET FRONTAGE OR LOT LANDSCAPING REQUIREMENT.

LANDSCAPE SPECIFICATIONS

GENERAL NOTES:

1. ALL UTILITIES SHALL BE LOCATED AND MARKED/FLAGGED BEFORE BEGINNING LANDSCAPE WORK RELOCATED PLANTS THAT ARE UNDER OR OVER UTILITIES. THE RELOCATED PLANTS TO BE APPROVED BY OWNER AND/OR LANDSCAPE ARCHITECT/DESIGNER PRIOR TO INSTALLATION. CONTRACTOR SHALL NOTIFY UTILITY LOCATE SERVICE (811) A MINIMUM OF TWO WORKING DAYS PRIOR TO EXCAVATION.
2. UTILITY LOCATION NOTE: ALL LOCATIONS SHOWN ON PLANS ARE APPROXIMATE AND BASED ON PROVIDED INFORMATION BY SURVEYOR OR CIVIL ENGINEER OR OWNER AND OR MEASURED IN THE FIELD. IF DISCREPANCIES EXIST OR ARE PRESENT, CONTRACTOR SHALL NOTIFY OWNER, OWNERS REPRESENTATIVE AND LANDSCAPE ARCHITECT/DESIGNER PRIOR TO BEGINNING ANY WORK.
3. IN CASE OF DISCREPANCIES BETWEEN THE PLANS AND PLANT LIST. THE PLAN SHALL DICTATE.
4. THESE SPECIFICATIONS COVER THE FURNISHING OF LABOR, PLANTS, EQUIPMENT, AND MATERIALS TO PERFORM LANDSCAPE OPERATIONS IN CONNECTION WITH THIS CONSTRUCTION PROJECT AT THE LOCATIONS SHOWN ON THE LANDSCAPE DRAWING.
5. PLANTS AND ALL LANDSCAPE MATERIAL TO BE STORED ON SITE WILL BE PLACED WHERE THEY ARE NOT IN CONFLICT WITH CONSTRUCTION OPERATIONS.
6. REMOVE AND CLEAN UP ALL DEBRIS AND REMOVE FROM SITE, REPAIR DAMAGED OR DISTURBED AREAS CAUSED BY LANDSCAPE CONTRACTOR.
7. TOPSOIL: TOPSOIL SHALL BE FRIABLE, NATURAL LOAM, SURFACE SOIL AND FREE OF SUBSOIL, CLAY LUMPS, BRUSH, WEEDS, LITTER, ROOTS, STONES DOMESTIC AND AGRICULTURE FERTILIZERS, HERBICIDES, AND OTHER TOXIC MATERIALS HARMFUL TO PLANT GROWTH AND ENVIRONMENT. WASTE SOILS, BORROW, OR HEAVY CLAY BASED SOILS WILL NOT BE ACCEPTED. TOPSOIL SHALL HAVE A PH VALUE OF 6.0-7.4. SUBMIT SOIL SAMPLES, PH SAMPLES, PH LEVELS AND NPK ANALYSIS PRIOR TO DELIVERY.

PLANTING NOTES:

1. REMOVE WEEDS, ORGANIC MATTER, ROCKS LARGER THAN 1.5" FROM SOIL.
2. LANDSCAPE MATERIALS: FERTILIZER: GRANULAR NON-BURNING PRODUCT COMPOSED OF NOT LESS THAN 50% ORGANIC SLOW ACTING, GUARANTEED ANALYSIS PROFESSIONAL FERTILIZER; 20% NITROGEN, 10% PHOSPHORIC ACID, AND 5% POTASH BY WEIGHT OR SIMILARLY APPROVED COMPOSITION.
3. PLANTING BACKFILL SOIL: BACKFILL PLANT PITS WITH THE FOLLOWING TOPSOIL MIXTURE: 1 PART ON-SITE TOPSOIL, 1 PART IMPORTED TOPSOIL, 1 PART COMPOST AND 1/2 POUND PLANT SPECIFIED FERTILIZER PER CUBIC YARD.
4. PLANT MATERIALS: PROVIDE TREES AND SHRUBS AS INDICATED. COMPLY WITH SIZING AND GRADING STANDARDS OF "AMERICAN STANDARD FOR NURSERY STOCK". PROVIDE ONLY SOUND, HEALTHY VIGOROUS PLANTS FREE FROM DEFECTS, DISFIGURING KNOTS, SUNSCALD INJURIES, FROST CRACKS, PLANT DISEASES, INSECTS OR ANY OTHER FORM OF DISEASE OR INFESTATION. ALL PLANTS SHALL HAVE FULLY DEVELOPED FORM WITHOUT VOIDS OR OPEN SPACES.
5. NO SUBSTITUTIONS OF PLANT MATERIAL WILL NOT BE ALLOWED. IF PLANTS ARE NOT AVAILABLE. THE CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT/DESIGNER, OWNERS REPRESENTATIVE IN WRITING. ALL PLANTS SHALL BE INSPECTED AND TAGGED WITH PROJECT I.D. AT NURSERY OR CONTRACTORS OPERATIONS PRIOR TO MOVING TO JOB SITE. PLANTS MAY BE INSPECTED AND APPROVED OR REJECTED ON THE JOB SITE BY LANDSCAPE ARCHITECT/DESIGNER OR OWNERS REPRESENTATIVE.
6. LANDSCAPE ARCHITECT/DESIGNER OR OWNERS REPRESENTATIVE RESERVES THE RIGHT TO REJECT ANY AND ALL PLANT MATERIALS DURING THE COURSE OF THE PROJECT.
7. PLANTING BED MULCH: 3 INCHES OF GRADE 'A' SHREDDED HARDWOOD MULCH WHERE PLANTING BED ADJOINS EITHER PAVEMENT OR TURF.
8. PLANTING BED FABRIC: DEWITT PRO 5 WEED BARRIER. INSTALL ONLY IN PLANTING BEDS.
9. SEE PLANTING DETAILS FOR PLANTING, PRUNING AND STAKING REQUIREMENTS.

SEEDING AND SODDING PREPARATION:

1. LANDSCAPE CONTRACTOR TO FINE GRADE AND PREPARE ALL SITE AREAS TO RECEIVE SODDING OR SEEDING. FINE GRADE SITE SMOOTH TO FINAL GRADING PLAN ELEVATIONS. FILL IN DEPRESSIONS, LOW SPOTS AND GRADE SMOOTH.
2. ALL TURF AREAS WITHIN LIMIT LINES TO RECEIVE 6" TOPSOIL PRIOR TO OPERATIONS. ONCE TOPSOIL HAS BEEN PLACED. CONSTRUCTION ACTIVITY OF ANY KIND (EXCLUDING LANDSCAPING) SHALL NOT BE PERMITTED ON OR ACROSS ANY PLANTING AREA.
3. TURF AREAS TO TO BE SCARIFIED/CULTIVATE TO A DEPTH OF 4" AND LIGHTLY ROLLED (NOT COMPACTED) PRIOR TO BEING SODDED OR SEEDED.
4. LAWNS TO BE FERTILIZED WITH 12-12-12 AT A RATE OF 10 LBS/1000 SQ.FT. PRIOR TO INSTALLATION.
5. WATER AND MAINTAIN GRASS STAND IS ESTABLISHED AND READY FOR MOWING AT A MINIMUM 4" HEIGHT. CONTRACTOR SHALL MAINTAIN LAWN FOR A PERIOD OF 60 DAYS BEYOND FINAL ACCEPTANCE BY MOWING AND WATERING AS REQUIRED TO MAINTAIN VIGOROUS GROWTH DURING ESTABLISHMENT.

SEEDED LAWN:

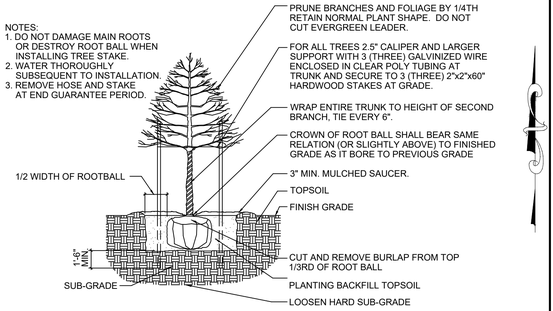

TURF TYPE TALL FESCUE - SEED

1. COMPLETE ALL OTHER LANDSCAPE PLANTINGS, MULCHING, FINE GRADING AND STAKING PRIOR TO SEEDING LAWN AREAS.
2. PROVIDE SEEDED LAWN FOR ALL LAWN AREAS UTILIZING AMER-TURF FRONT-RUNNER TURF TYPE TALL FESCUE BLEND SEED.
3. APPLY SEED AT A RATE OF 5 POUNDS PER 1000 SQUARE FEET.
4. SEED BED SHALL BE IN A FIRM BUT UNCOMPACTED CONDITION WITH A RELATIVELY FINE TEXTURE AT TIME OF SEEDING.
5. CONTRACTOR SHALL MAINTAIN SEEDING LAWN FOR A PERIOD OF 60 DAYS BEYOND FINAL ACCEPTANCE BY MOWING AND WATERING AS REQUIRED TO MAINTAIN VIGOROUS GROWTH DURING ESTABLISHMENT PERIOD.
6. LAWN AREAS SHALL NOT HAVE VOIDS LARGER THAN 6"X6". IF VOIDS ARE LARGER THAN ACCEPTABLE SIZE AN OVERSEEDING SHALL BE COMPLETED BY THE CONTRACTOR DURING THE NEXT AVAILABLE GROWING SEASON.
7. GROWING SEASON AUGUST 15TH - SEPTEMBER 20TH. SPRING GROWING SEASON MARCH 20TH - APRIL 20TH.

PROJECT WARRANTY:

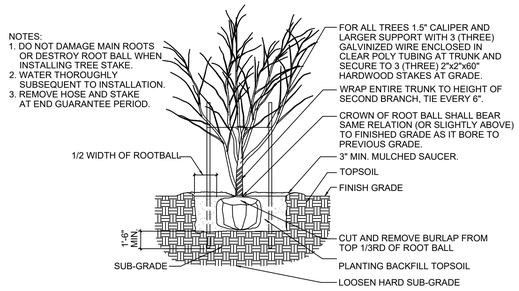

1. CONTRACTOR SHALL WARRANT TREES, SHRUBS, AND PLANTS FOR A PERIOD OF ONE YEAR AFTER DATE OF SUBSTANTIAL COMPLETION AGAINST DEFECTS INCLUDING DEATH AND UNSATISFACTORY GROWTH, EXCEPT FOR DEFECTS RESULTING FROM NEGLECT BY THE OWNER, ABUSE OR DAMAGE BY OTHERS, OR UNUSUAL PHENOMENA OR INCIDENTS WHICH ARE BEYOND INSTALLER'S CONTROL. REMOVE AND REPLACE TREES, SHRUBS OR OTHER PLANTS FOUND TO BE DEAD OR IN UNHEALTHY CONDITION DURING WARRANTY PERIOD. REPLACE TREES AND SHRUBS WHICH ARE IN DOUBTFUL CONDITION AT END OF WARRANTY PERIOD.

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 9/2/2025 at 4:03 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

RE: Hawks Landing TIS

Lauren,

We have reviewed the submitted traffic impact study (TIS) for the proposed residential development of Hawks Landing. Our review is intended to provide a review of appropriateness of intersections, traffic distributions, forecasts, and recommendations according to current industry practices. Below you will find my comments:

1. Traffic distributions, growth rates, and forecasts are appropriate as presented.
2. Resultant capacity analysis on selected intersections and recommended improvements meets acceptable performance levels.

Please contact me at 317-780-1555, x124 if you have any questions.

Sincerely,

Andrew J. Wolf, P.E.
CrossRoad Engineers, PC

Hawks Landing Primary Plat

LETTER OF INTENT

Hawk's Landing is a proposed residential development in Town of Brownsburg, Brown Township, Hendricks County, Indiana. The development is located on the Northwest corner of Green Street and Acre Lane. Hawk's Landing covers approximately 72.39 acres and will include the construction of 105 single family homes with associated roadway, utility infrastructure and amenity areas.

This development is unique in that it is split into two separate residential areas by a large creek and forested wetland bisecting the site from north to south. The eastern portion of the development, accessed from Green Street, contains 24 lots. Amenities for this portion of the development include 1.2 acres of passive open space, 1 acre of which is located within a level central common area. This area will include benches and will be available to the residents for active recreational activity. This portion of the development also includes a 0.26-mile walking trail that circles the detention pond and meanders through the wooded area along the creek and near the wetland.

The western portion of the development consists of 81 lots and is accessed by a roadway connection to Co Rd. 800 N and an existing street stub from the Windridge neighborhood (Windridge Lane). Amenities for this area will include a large 400 SF shelter house, a medium 2,560 SF multi-sport court, a 0.25-mile walking trail and 4.5 acres of passive recreational space.

Linking the eastern and western portions of the development with a pedestrian facility is not practical. The most viable means of connection would be construction of a suspension bridge, spanning the floodway along the creek. However, such a bridge would require a span of nearly 300', would likely approach $1 million dollars in cost and it is doubtful that it could be made an accessible route. Development of a bridge would require removal of trees within the riparian buffer along the creek as well as disturbance of the wetland. Mitigation of tree loss would be required and payment for disturbance of wetland area at a rate of $90,000 an acre could be anticipated. A pedestrian bridge linking both sides of the community is not viable for many of the same reasons that a vehicular bridge is not viable. The creek and wetland area is a physical barrier that is not customary on most development sites.

In recognition of that lack of a pedestrian link between the 2 portions of the neighborhood, 5 off-street parking spaces have been provided near the western amenity area. The location of the amenity area was carefully chosen to be conveniently located to serve as a mailbox kiosk location as well. Additional on-street parking is available north and west of the amenity area without the need to park in front of a home for those residents who may drive to the amenity area.

Sri Gayatri Kesara
Traffic Engineer Technician

INTRODUCTION

This **TRAFFIC IMPACT STUDY**, prepared on behalf of David Weekley Homes, is for a proposed residential development known as "Hawk's Creek" that will be located south of CR 800 North & west of SR 267 (Green Street) in Brownsburg, Indiana.

PURPOSE

The purpose of this analysis is to determine what impact traffic generated by the proposed residential development will have on the existing adjacent roadway system. This analysis will identify any existing roadway deficiencies or ones that may occur in the future.

Conclusions will be reached that will determine if the roadway system can accommodate the anticipated traffic volumes or will determine the modifications that will be required to the system if there are identified deficiencies.

Recommendations will be made that will address the conclusions resulting from this analysis. These recommendations will address feasible roadway system improvements to provide safe ingress and egress, to and from the proposed residential development, with minimal interference to traffic on the public street system.

SCOPE OF WORK

The scope of work for this analysis is as follows:

First, obtain peak hour turning movement traffic volume counts between the hours of 6:30 AM and 9:00 AM and 3:30 PM and 7:00 PM at the following intersections:

- CR 800 N & CR 650 E
- CR 800 N & SR 267 (Green Street)
- CR 700 N & CR 650 E
- CR 700 N & SR 267 (Green Street)
- SR 267 (Green Street) & Acre Lane

Second, estimate the year 2029 background traffic volumes by applying growth rate factors provided by Shrewsberry to the existing traffic volumes.

Third, estimate the number of peak hour trips that will be generated by the proposed residential development.

Fourth, assign and distribute the generated peak hour traffic from the proposed residential development to each of the study intersections.

Fifth, prepare a capacity analysis, level of service analysis and turn lane analysis at the study intersections for each of the following scenarios:

Scenario 1: Existing Traffic Volumes – Based on existing peak hour traffic volumes.

Scenario 2: Year 2029 Background Traffic Volumes – Based on applying growth rate factors provided by Shrewsberry to the existing traffic volumes.

Scenario 3: Year 2029 + Proposed Development Traffic Volumes – Based on the sum of year 2029 background traffic volumes and generated traffic volumes from the proposed development.

Sixth, prepare recommendations for the roadway geometrics that will be needed to accommodate the future traffic volumes.

Finally, prepare a **TRAFFIC IMPACT STUDY** report documenting all data, analyses, conclusions, and recommendations to provide for the safe and efficient movement of traffic through the study area.

DESCRIPTION OF THE PROPOSED DEVELOPMENT

The proposed development will be located south of CR 800 North & west of SR 267 (Green Street) in Brownsburg, Indiana. The proposed residential development will consist of two parcels. The west parcel will have 89 homes and the east parcel will have 25 homes. As proposed, the west parcel will be served by a full access drive along CR 800 N and a connection to the existing Windridge Lane. The east parcel will be served via a realigned access drive at the existing Connection Pointe Christian Church access location along SR 267 (Green Street). **Figure 1** is an area map showing the location and general layout of the proposed site.

STUDY AREA

The study area for this analysis has been defined to include the following intersections:

- CR 800 N & CR 650 E
- CR 800 N & SR 267 (Green Street)
- CR 700 N & CR 650 E
- CR 700 N & SR 267 (Green Street)
- SR 267 (Green Street) & Acre Lane/ Connection Pointe Christian Church/ Proposed Development Access Drive
- CR 800 N & Proposed Access Drive

Figures 2A & 2B show the existing intersection geometrics at the study intersections.

DESCRIPTION OF ABUTTING STREET SYSTEM

The proposed residential development will be primarily served by the public roadway system that includes CR 800 N, CR 650 E, CR 700 N, and SR 267 (Green Street).

TABLE 1 – DESCRIPTION OF THE ABUTTING STREET SYSTEM

STREET NAME	NUMBER OF LANES	SPEED LIMIT (MPH)	FUNCTIONAL CLASSIFICATION
CR 800 N	2	35	Collector
CR 650 E	2	45	Secondary Arterial
CR 700 N	2	30	Secondary Arterial
SR 267 (Green Street)	2	45	Primary Arterial

EXISTING TRAFFIC VOLUMES & PEAK HOURS

The turning movement traffic volume counts were collected by A&F Engineering at the study intersections between the hours of 6:30 AM to 9:00 AM and 3:30 PM to 7:00 PM during a typical weekday in December 2023 & May 2024 under good weather conditions. According to the turning movement counts, the AM and PM peak hours vary slightly at each study intersection. Hence, the actual peak hours are used at each study intersection to create a "worse-case" scenario. The peak hour volumes are shown on **Figure 3** and the intersection count output summary sheets, are included in the **Appendix.**

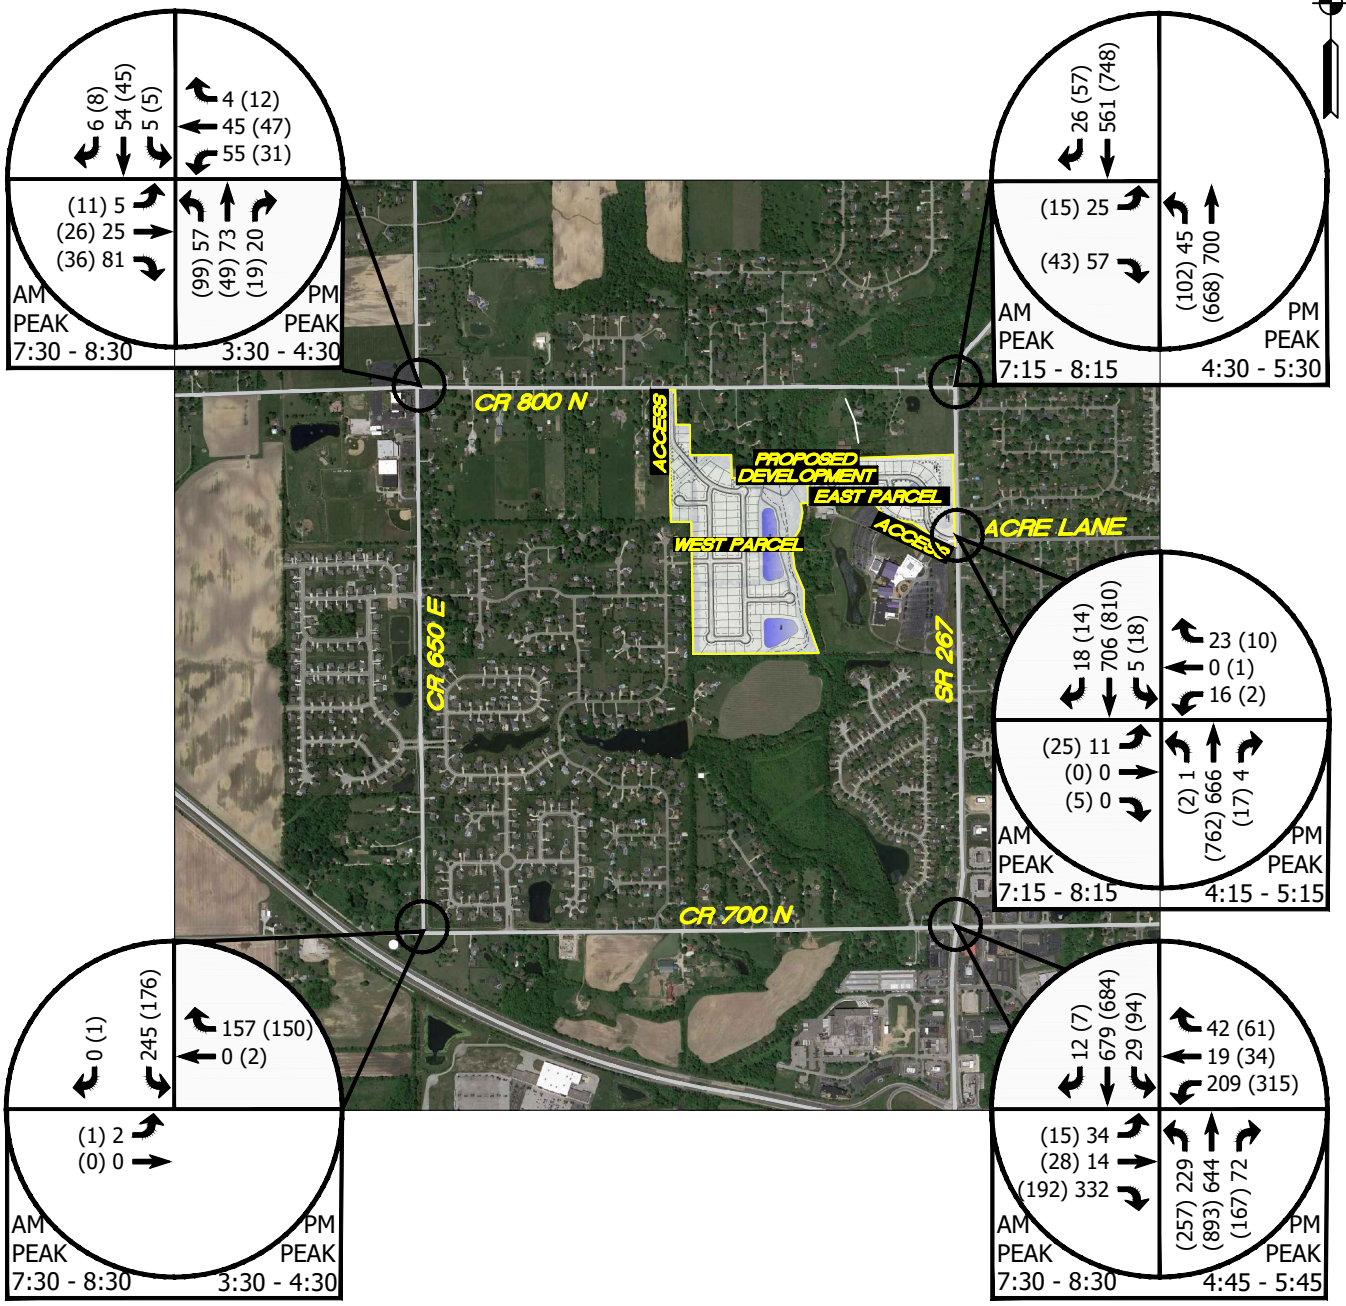

REDISTRIBUTION OF EXISTING TRAFFIC VOLUMES

The west parcel of the proposed development will have a secondary access via a connection to Windridge Lane. Therefore, it is possible that existing traffic from the Windridge subdivision could utilize this connection to access CR 800 N. However, it is not anticipated that these volumes will be significant during the peak hours. Therefore, these volumes have been considered negligible for the purposes of this analysis.

YEAR 2029 BACKGROUND TRAFFIC VOLUMES

In order to account for annual growth in traffic that would occur due to future development outside of the study area, growth rate factors are applied to the existing traffic volumes. Growth rate factors provided by Shrewsberry were applied to the existing traffic volumes to obtain year 2029 background traffic volumes. The year 2029 background traffic volumes are shown in **Figure 4.**

GENERATED TRIPS FOR PROPOSED DEVELOPMENT

The estimate of newly generated traffic is a function of the development size and of the character of the land use. The ITE *Trip Generation Manual*[1] was used to calculate the number of trips that will be generated by the proposed Hawk's Creek development. This report is a compilation of trip data for various land uses as collected by transportation professionals throughout the United States in order to establish the average number of trips generated by those land uses. **Table 2** summarizes the total number of trips that will be generated by the proposed development.

TABLE 2 – GENERATED TRIPS FOR PROPOSED DEVELOPMENT

DEVELOPMENT INFORMATION			GENERATED TRIPS			
LAND USE	ITE CODE	SIZE	AM PEAK HOUR		PM PEAK HOUR	
			ENTER	EXIT	ENTER	EXIT
Single-Family Housing (East Parcel)	210	25 DU	5	16	17	10
Single-Family Housing (West Parcel)	210	89 DU	17	50	56	33

PASS-BY & INTERNAL TRIPS

Pass-by trips are trips that are already in the existing traffic stream along the adjacent public roadway system that enter a site, utilize the site, and then return to the existing traffic stream. Residential developments do not typically attract a significant number of pass-by trips. Therefore, pass-by trip reductions are not included in this study.

An internal trip results when a trip is made between two or more land uses without traversing the external public roadway system. The proposed development is a single land use only. Hence, internal trip reductions are not considered in this study.

ASSIGNMENT AND DISTRIBUTION OF GENERATED TRIPS

The study methodology used to determine the traffic volumes from the site that will be added to the street system is defined as follows:

1. The volume of traffic that will enter and exit the proposed development must be assigned to the access points and to the public street system. Using the traffic volume data collected for this analysis, traffic to and from the site development has been assigned to the proposed driveways and to the public street system that will be serving the site.

[1] *Trip Generation Manual*, Institute of Transportation Engineers, Eleventh Edition, 2021.

2. To determine the volume of traffic that will be added to the public roadway system, the generated traffic must be distributed by direction to the public roadways at their intersection with the driveways. For the proposed development, the trip distribution was based on the location of the development, the existing traffic patterns, and the assignment of generated traffic.

Figure 5A and 5B illustrate the assignment and distribution of generated traffic volumes for the proposed development.

GENERATED TRIPS ADDED TO THE STREET SYSTEM

The generated traffic volumes from the proposed development have been assigned to each of the study intersections. These volumes were determined based on the previously discussed trip generation data, assignment and distribution of generated traffic. The total peak hour generated traffic volumes from the proposed development are shown in **Figure 6,** and **Figure 7** shows the sum of the year 2029 background traffic volumes and generated traffic volumes from the proposed development.

TURN LANE WARRANT ANALYSIS

A turn lane analysis was conducted to determine if exclusive turn lanes would be warranted at the proposed access drive along CR 800 N when the proposed residential development is constructed. This analysis was done in accordance with the INDOT *Driveway Permit Manual*[2]. The results are summarized in the following table.

TABLE 3 –TURN LANE WARRANT ANALYSIS SUMMARY

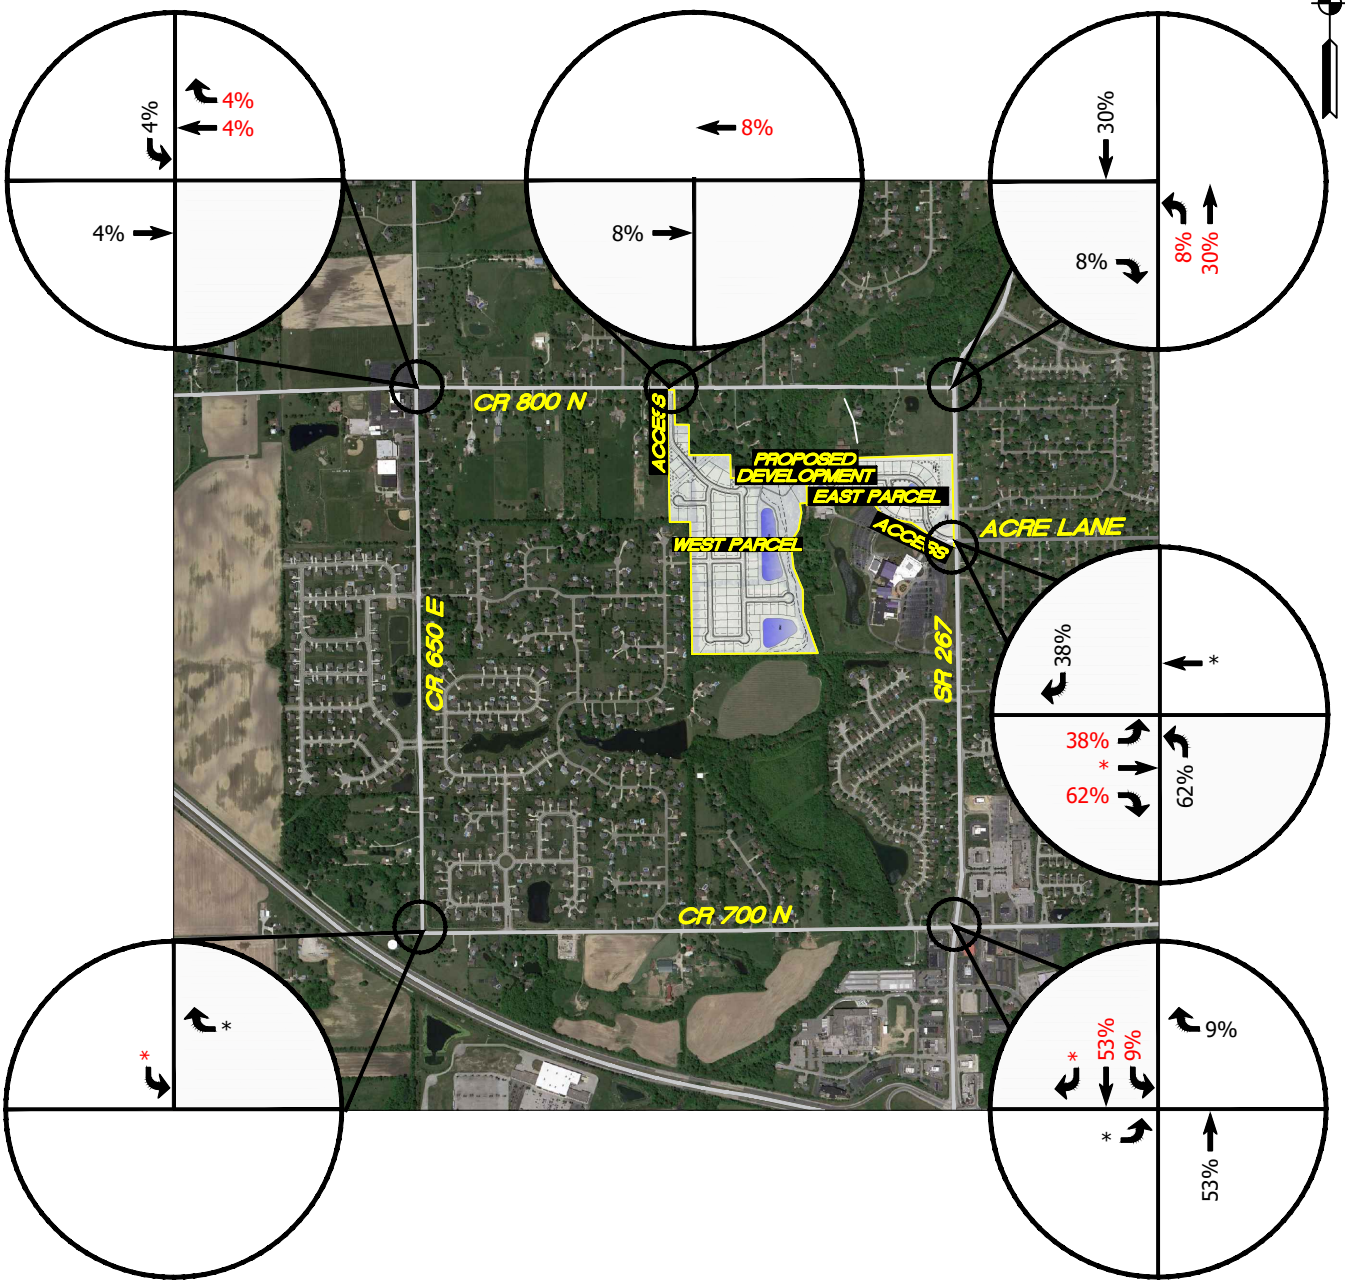

LOCATION	SCENARIO	RIGHT-TURN LANE	LEFT-TURN LANE
CR 800 N & Proposed Development Access Drive	Year 2029 Traffic Volumes + Proposed Development Traffic Volumes	✗	✗

✔ =Turn Lane warranted; ✗ =Turn Lane not warranted

The graphs that show the turn lane warrant criteria are shown in the **Appendix**.

CAPACITY ANALYSIS

The "efficiency" of an intersection is based on its ability to accommodate the traffic volumes that approach the intersection. It is defined by the Level-of-Service (LOS) of the intersection. The LOS is determined by a series of calculations commonly called a "capacity analysis". Input data into a capacity analysis include traffic volumes, intersection geometry, and number and use of lanes. To determine the LOS at each of the study intersections, a capacity analysis has been made using the recognized computer program *Synchro/SimTraffic*[3].This program allows intersections to be analyzed and optimized using the capacity calculation methods outlined within the *Highway Capacity Manual (HCM 7th Edition)*[4]. The following list shows the delays related to the levels of service for unsignalized and signalized intersections:

Level of Service	Control Delay (seconds/vehicle)	
	UNSIGNALIZED	SIGNALIZED
A	Less than or equal to 10	Less than or equal to 10
B	Between 10.1 and 15	Between 10.1 and 20
C	Between 15.1 and 25	Between 20.1 and 35
D	Between 25.1 and 35	Between 35.1 and 55
E	Between 35.1 and 50	Between 55.1 and 80
F	greater than 50	greater than 80

CAPACITY ANALYSIS SCENARIOS

To evaluate the proposed development's effect on the public street system, a series of traffic volume scenarios were analyzed to determine the adequacy of the existing roadway network. From this analysis, necessary recommendations can be made to improve the public street system so it will accommodate future traffic volumes. An analysis has been made for the peak hours at each of the study intersections for the following traffic volume scenarios:

Scenario 1: Existing Traffic Volumes – Based on existing peak hour traffic volumes.

Scenario 2: Year 2029 Background Traffic Volumes – Based on applying growth rate factors provided by Shrewsberry to the existing traffic volumes.

Scenario 3: Year 2029 + Proposed Development Traffic Volumes – Based on the sum of year 2029 background traffic volumes and generated traffic volumes from the proposed development.

[3] *Synchro/SimTraffic 12*, Cubic Transportation Systems, 2023.
[4] *Highway Capacity Manual (HCM), 7th Edition* Transportation Research Board, National Research Council, Washington, DC, 2022.

The following tables summarize the peak hour level of service results at each of the study intersections. The *Synchro* (*HCM 7th Edition*) intersection reports illustrating the capacity analysis results are included in the **Appendix**.

TABLE 4 – LEVEL OF SERVICE SUMMARY: CR 800 N & CR 650 E

APPROACH	AM PEAK			PM PEAK		
	Scenarios			Scenarios		
	1	2	3	1	2	3
Northbound Approach	B	B	B	A	A	A
Southbound Approach	A	A	A	A	A	A
Eastbound Approach	A	A	B	A	A	A
Westbound Approach	A	B	B	A	A	A
Intersection	**A**	**B**	**B**	**A**	**A**	**A**

TABLE 5 – LEVEL OF SERVICE SUMMARY: CR 800 N & SR 267 (GREEN STREET)

TABLE 9 – LEVEL OF SERVICE SUMMARY: CR 800 N & PROPOSED DEVELOPMENT ACCESS DRIVE

APPROACH	AM PEAK	PM PEAK
	Scenario 3	Scenario 3
Northbound Approach	A	A
Westbound Left-Turn	A	A

Analysis considers construction of the access drive with one inbound and one outbound lane that will stop for CR 800 N.

CONCLUSIONS & RECOMMENDATIONS

The conclusions that follow are based on existing traffic volume data, trip generation, assignment and distribution of generated traffic, capacity analyses/level of service results and a field review conducted at the site. Based on the analysis and the resulting conclusions of this study, recommendations are formulated to ensure that the roadway system will accommodate the increased traffic volumes from the proposed residential development.

CR 800 N & CR 650 E

Capacity analyses for all traffic volume scenarios have shown that this intersection currently operates and will continue to operate at acceptable levels of service during the AM and PM peak hours with the existing intersection conditions.

CR 800 N & SR 267 (GREEN STREET)

Capacity analyses have shown that all approaches to this intersection currently operate at acceptable levels of service during the AM and PM peak hours with the existing intersection conditions. It is expected that the eastbound approach will experience increased delays during the peak hours as future traffic is added to the intersection. However, additional analyses have shown that these delays can be substantially reduced if separate left-turn and right-turn lanes are constructed along the eastbound approach.

CR 700 N & SR 267 (GREEN STREET)

Capacity analyses for all traffic volume scenarios have shown that this intersection currently operates and will continue to operate at acceptable levels of service during the AM and PM peak hours with the existing intersection conditions.

CR 700 N & CR 650 E

Capacity analyses for all traffic volume scenarios have shown that all approaches to this intersection currently operate and will continue to operate at acceptable levels of service during the AM and PM peak hours with the existing intersection conditions.

SR 267 (GREEN STREET) & ACRE LANE/CONNECTION POINTE CHRISTIAN CHURCH/PROPOSED DEVELOPMENT ACCESS DRIVE

Capacity analyses have shown that the eastbound approach currently operates below acceptable levels of service during the peak hours. The eastbound and westbound approach delays will increase when future traffic volumes are added to the intersection. However, it should be noted that minor street approach peak hour delays are not uncommon when the major street has high peak hour volumes.

CR 800 N & PROPOSED DEVELOPMENT ACCESS DRIVE

Capacity analyses have shown that all approaches to this intersection will operate at acceptable levels of service during the AM and PM peak hours with the following recommended intersection conditions:

- Construction of the access drive with one inbound and one outbound lane.
- The intersection should be stop-controlled with the proposed access drive stopping for CR 800 N.

Advisory Plan Commission
TECHNICAL REVIEW COMMITTEE

TOWN OF Brownsburg
61 North Green Street | Brownsburg, Indiana 46112
Tel 317.852.1128 | Fax 317.852.1134

Project Name: Hawk's Landing Primary Plat
Record Number: PCPP-25-3
TECH Meeting Date: September 18, 2025

The following Technical Review Committee ("TECH") members provided comments for the project as detailed below:

Development Services
- ☐
- ☒ Lauren Bouslog, Planner I
- ☐ Steve Fletcher, Building Commissioner/Director
- ☐ Frank Wise, Senior Building Inspector

Town Administration
- ☐ Debbie Cook, Town Manager
- ☒ Aaron Kaytar, Capital Projects & Procurement Manager
- ☐ Ethan Pierce, Economic Development Manager

Water Department
- ☒ Frank Monts, Superintendent

Wastewater Department
- ☒ Kathy Dillon, Water Utilities Director
- ☐

Street Department
- ☐ Aaron Love, Superintendent
- ☐ Matt Griner, Asst. Superintendent

Parks Department
- ☐ Amber Lane, Director
- ☐

Fire Territory
- ☐ Paul Hudson, Fire Marshal
- ☐ Jeff Schlageter, Deputy Fire Marshal

Police Department
- ☐ Joe Grimes, Chief
- ☐ Pat Bullock, Captain
- ☐ Bryan Fultz, Major

External Agencies
- ☐ Regan Huff, BCSC
- ☐ Dave Gaston, P.S., Hend. Co. Surveyor
- ☐ John Ayers, Hendricks Co. Engineer
- ☐ Mary Atkins, Wessler Engineering
- ☐ Angie DeKemper, CountryMark
- ☐ Gerry Jones, Vectren

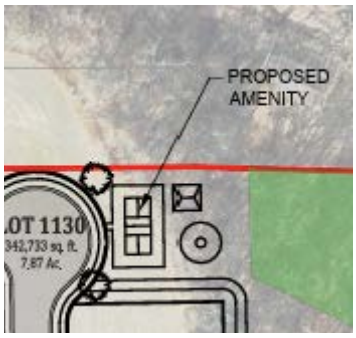

1) DEVELOPMENT SERVICES

a) A land surveyor, not an engineer needs to stamp the plat.

Primary Plat Requirements.

1. Preparation: The primary plat shall be prepared by a land surveyor licensed by the State of Indiana at a scale of no more than 1" = 100' and the sheets must be numbered in sequence if more than one sheet.

b) Label what the proposed amenities are on the legend or plat.

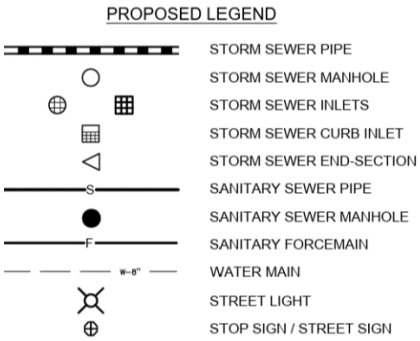

c) There need to be calculations for required and proposed vegetation on the landscape plan.

d) The tree preservation area is currently just being shown with a pale green outline. Adding a cross hatch would make it easier to see.

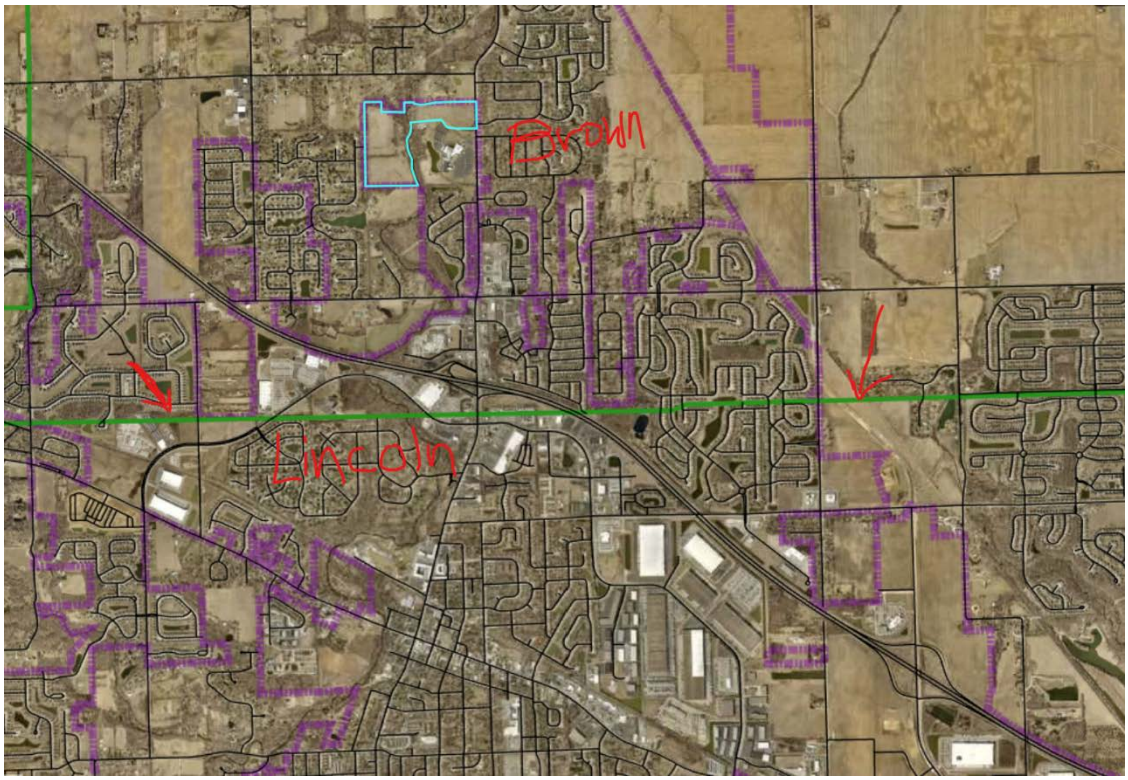

e) Add names to all new streets and write if the streets are public or private.

f) Mark the size of existing water, storm water, and sanitary sewer systems.

D.E.	DRAINAGE EASEMENT
U.E.	UTILITY EASEMENT
T.W.U.E.	WATER EASEMENT
L.B.E.	LANDSCAPE BUFFER YARD EASEMENT
IRR.	IRREGULAR
R/W	RIGHT OF WAY
B.S.L.	BUILDING SETBACK LINE
L.E.	LANDSCAPE EASEMENT
sq. ft.	SQUARE FEET

g) The Letter of Intent/ Project Info has Lincoln being the township, it needs changed to Brown Township. It changes at the green horizon line shown below.

2) BUILDING

a) None

3) CAPITAL PROJECTS

a) Depending on traffic, additional improvements may need to be done to N. Green St (SR 267).

4) ECONOMIC DEVELOPMENT

a) None

5) WATER

a) On the cover page and all future plans, the Water Dept. contact should be changed to Frank Monts.

b) I know this is just a primary plat and the water mains are just penciled in for now, but when construction plans are being drawn up, the water main coming in from SR 267 on Street "I" and around Street "G", across the creek and along Street "A" back out to CR 800 N all need to be 12" All other mains shall be 8". Please have valves on all sides of any tees, a valve on each side of the creek crossing, and hydrants spaced at 300' with hydrant locations at culdesacs per Town Standards.

c) As a reminder, the booster station on SR 267, at the SE corner of Connection Pointe Church, must be upgraded at the developer's cost before Hawk's Landing can be served.

6) WASTEWATER

a) The routing of the sanitary force main has changed significantly. The original layout provided accessibility. The updated layout has the force main placed in backyards and near the storm pond. How is safe accessibility going to be provided?

b) Please provide verification that the development cannot be served completely by gravity. Long-term operation of maintenance of a lift station when the area can be served by gravity is not cost effective for the community.

c) A reminder that downstream pump upgrades (Maple Lift Station) are needing completed at the time of sanitary line installation. The lift station is currently at capacity.

7) STREET/PUBLIC WORKS

a) None

8) PARKS

a) None

9) FIRE TERRITORY

a) None

10) POLICE

a) None

11) STORMWATER

a) See attached

12) BROWNSBURG COMMUNITY SCHOOL CORPORATION

a) None

13) **HENDRICKS COUNTY SURVEYOR**

a) None

14) **HENDRICKS COUNTY ENGINEER**

a) None

15) **COUNTRYMARK**

a) None

16) **VECTREN**

a) None

Please provide a written response to this report addressing each issue and, if necessary, indicate where on the revised plans the modification has been made.

TOWN OF BROWNSBURG STORMWATER/DRAINAGE PLAN REVIEW

CO Comment Originator
CR Comment Respondee

NAME OF PROJECT: Hawk's Landing
DESIGN PACKAGE: Primary Plat
DESIGNER: Weihe Engineers

		Wessler - Reviewer to complete		Designer to complete	
No.	PAGE/SHEET REFERENCE	CO	COMMENT	CR	RESPONSE
	General	MKA	We have no stormwater review comments for the Primary Plat. The following comments are for information and planning purposes when preparing development plans. Note that Chapter 151 was updated as of April 25, 2024.		
1	Storm sewer design	MKA	For the future development plan submittal, refer to Chapter 151.21 D. for storm sewer design standards and drainage report requirements.		
2	Flood routing	MKA	For development plans, evaluate stormwater ponding and overflow path routing for Ch. 151.21 I.		
3	Drainage Report	MKA	Refer to Chapter 151.20.B (2)(f) for drainage report guidelines. Include runoff, storm sewer sizing calculations when preparing the drainage report.		
4	Post-construction stormwater quality	MKA	Post-construction stormwater quality BMPs must be in accordance with Chapter 151.23 of the Brownsburg ordinances. An upstream BMP is required for detention ponds/underground. An Operation and Maintenance Manual will be required and easements for BMPs.		
5	County approval	MKA	Coordinate with the Hendricks County Surveyor to determine if Drainage Board approval is necessary.		
6	Details and specifications	MKA	Refer to the Town's Standard Details and Specifications when developing Construction Plans.		
7	Stormwater detention	MKA	Detention design requirements follow Brownsburg's ordinance, Chapter 151.21 and Detail EW-04 "Detention/Retention Ponds" in the Town's Standard Details and Specifications. Ordinance revised in April 2024.		
8	Adequate outlet	MKA	Ensure that there is an adequate outlet for drainage of stormwater.		
9	Erosion control and SWPPP	MKA	A SWPPP and Construction Stormwater General Permit will be required for the development plan submittal. Refer also to Chapter 151.22 for SWPPP requirements.		

These comments should not be construed as a comprehensive list of comments, and the reviewer may make additional comments based on subsequent submittals

MEMORANDUM OF UNDERSTANDING
HAWK'S CREEK

This Memorandum of Understanding ("**Agreement**") is made and entered into on this day of July 8, 2025 ("**Effective Date**"), by and between **Weekley Homes, LLC**, a Delaware limited liability company, or its assigns ("**Developer**"), and the **Board of Commissioners of Hendricks County, Indiana** ("**Commissioners**"). Developer and Commissioners are sometimes referred to as the "**Parties**".

WITNESSETH:

WHEREAS, Developer desires to develop a residential development consisting of not more than 117 single-family homes (western section) in Brown Township, Hendricks County, Indiana, known as Hawk's Creek (the "**Development**");

WHEREAS, Developer intends to construct and install an access drive for the Development along County Road 800 North (the "**Access Drive**");

WHEREAS, Developer has obtained a Traffic Impact Study, prepared by A&F Engineering Co., LLC and dated July 2024 (the "**Traffic Study**") for the Development;

WHEREAS, the Traffic Study finds, among other things, that all approaches to the Access Drive will operate at acceptable levels of service during the AM and PM peak hours with the following intersection conditions: (i) construction of the Access Drive with one inbound and one outbound lane, and (ii) the intersection should be stop-controlled with the Access Drive stopping for County Road 800 North;

WHEREAS, the Development is located entirely within the Town Brownsburg;

WHEREAS, since the county road provides ingress and egress to the Development a driveway permit is required to be issued by the County;

WHEREAS, the Commissioners believe that additional right-of-way and road improvements will be needed in the future along County Road 800 North, including without limitation acceleration and deceleration lanes and passing blisters; and

WHEREAS, Developer has agreed to contribute funds sufficient to pay a portion of the cost of such right-of-way and road improvements to County Road 800 North;

NOW THEREFORE, the Parties agree as follows:

AGREEMENT

1. Incorporation. The Recitals above are incorporated herein by reference.

2. Developer Obligations. Developer agrees to:

a. At such time that Developer prepares construction plans for the Development, Developer shall prepare construction plans for the road improvements shown on the attached Exhibit A (the "**Road Improvements**").

b. At such time that Developer prepares construction plans for the Development, Developer shall have estimates prepared for the cost of the Road Improvements, which estimates shall include the cost right-of-way acquisition, acceleration lanes, deceleration lanes, passing blister, utility relocation, and drainage improvements, in the area depicted on Exhibit A (the "**Road Improvements Estimate**").

c. At such time that Developer obtains a land disturbance permit for the Development, Developer shall pay the amount of the Road Improvements Estimate to Commissioners.

3. Commissioners' Obligations. Commissioners agree to:

a. Construct the Road Improvements at such time that Hendricks County makes improvements to County Road 800 North adjacent to and near the Access Drive.

4. Applicable Laws. This Agreement shall be subject to, governed by, and construed under the laws of State of Indiana.

5. Severability. The illegality, invalidity or unenforceability under law of any covenant, restriction, condition or other provision of this Agreement shall not impair or affect in any manner the validity, enforceability or effect of the remaining provisions of this Agreement.

6. Notice. All notices, requests or other communications hereunder shall be effective upon receipt, shall be in writing and shall be delivered in person or by first class or certified mail, postage prepaid, by overnight courier service or by electronic mail to the parties at the following addresses or at such other address as either party may hereafter furnish to the other in accordance herewith:

If to Developer:

Weekley Homes, LLC
9310 N. Meridian Street
Indianapolis, Indiana 46260
Attn: Ed Freeman, Senior Land Acquisition Manager
EFreeman@dwhomes.com

If to Commissioners:

Hendricks County Board of Commissioners
Hendricks County Government Center
355 S. Washington Street, #100
Danville, Indiana 46122
Attn: Board President

With a copy to:

Gregory E. Steuerwald
Steuerwald, Witham & Youngs, LLP
106 N. Washington Street
P.O. Box 503
Danville, Indiana 46122
Email: gseuerwald@swylawyers.com

7. Modification. This Agreement may not be modified or amended, except pursuant to a written agreement in recordable form executed by each of the parties hereto.

8. Authority. Each person signing this Agreement on behalf of a party represents that he/she is duly authorized to do so, and that when executed, this Agreement shall be the duly executed, valid and binding agreement of such party.

9. Entire Agreement. The Parties agree that this Agreement represents the entire and integrated agreement between the Parties. It supersedes all prior and contemporaneous communications, representations, whether written or oral, relating to the subject matter of this Agreement. This Agreement may be modified only by written amendments signed by the Parties hereto.

[SIGNATURES ON THE FOLLOWING PAGE]

IN WITNESS WHEREOF, this Agreement has been duly executed by the parties:

Theresa D. Lynch
Hendricks County Recorder IN
Recorded as Presented

Ordinance No. 2021-30
Brownsburg, Indiana
Sept 23, 2021

AN ORDINANCE TO AMEND THE OFFICIAL ZONING MAP OF THE TOWN OF BROWNSBURG, HENDRICKS COUNTY, INDIANA FOR CERTAIN REAL ESTATE LOCATED WEST OF AND ADJACENT TO N. GREEN STREET AND SOUTH OF CR 800 N.

WHEREAS, Lennar Homes of Indiana (the "Applicant") has filed for an amendment to the Official Zoning Map for the Town of Brownsburg, Hendricks County, Indiana (the "Proposal") for certain real estate located on Parcel(s) 32-02-34-275-002.000-026, which is more particularly described on **Exhibit A** and generally depicted on **Exhibit B** (the "Property") pursuant to I.C. 36-7-4-608, *et seq.*; and

WHEREAS, the Property is zoned IS (institutional); and,

WHEREAS, the Applicant's Proposal is to rezone the property to R3 (high density single-family residential) for the purposes of constructing a5residential subdivision; and,

WHEREAS, the Applicant's Proposal is consistent with the goals, objectives and policies of the Comprehensive Plan, and the Owner's desired use of the Property; and,

WHEREAS, the Applicant's Proposal is compatible with the current conditions and overall character of the existing development in the immediate vicinity of the Property; and,

WHEREAS, the Applicant's Proposal is the most desirable use for which the land in each district is adapted; and,

WHEREAS, the Applicant's Proposal is expected to conserve property values throughout the jurisdiction; and,

WHEREAS, the Applicant's Proposal is deemed responsible development and growth; and,

WHEREAS, the Plan Commission (the "Commission") has considered said Proposal at a public meeting, on August 23rd, 2021 and forwards the request on the proposal to the Town Council (the "Council") with a (5-1) **FAVORABLE RECOMMENDATION** and with the following conditions:

(1) All lots west of the creek will have a have a minimum lot width of 90'.

(2) A minimum of 85% of the homes west of the creek shall include a side load garage or courtyard garage.

(3) The maximum number of Lots will not exceed 110 Lots.

(4) That the Preliminary Plat shall be in substantial compliance with the Concept Plan considered with the Rezone, subject to final engineering approval of the Preliminary Plat from the Town.

(5) In the event that the Plan Commission and Council do not desire a connection from the Real Estate to the stub street on Windjammer Drive, as part of any Plat application request, Lennar shall seek a TECH Waiver(s) and any other necessary approvals from the requirement(s) that the stub street connect. In the event the TECH Waiver(s) is granted and any other approvals are obtained for the stub street not to connect and the development to substantially comply with the Concept Plan, Lennar will not connect the stub street, but will install any treatment in this area as may be required by the TECH Committee and/or Plan Commission (i.e.: emergency access only, etc.).

(6) Building Permits for homes on Lots west of the creek shall not be issued until approved access is provided by means other than the stub street at Windjammer Drive.

(7) Regarding home construction traffic: Lennar will install "No Construction Traffic" signs at the entrances to the Windridge Neighborhood for the period of home construction subject to the granting of approval by the owner(s) of real estate at the subdivision entrances allowing placement of the sign(s).

(8) Regarding Landscaping:

(a) A twenty (20) foot Tree Preservation Area shall be provided along the west perimeter of the Real Estate as depicted on the Concept Plan. The 20' Tree Preservation area shall also be extended along the north perimeter of the real estate within the common areas.

(b) In the event the preservation of existing trees within the Tree Preservation Area does not meet the landscaping planting requirements of the UDO Evergreen trees will be installed in order to meet the planting standards of the UDO. In addition to meeting the planting standards of the UDO, one evergreen tree (minimum 6 feet tall) will be added to the rear yard of each lot abutting the west perimeter of the Real Estate.

(9) In regard to the proposed bridge: Lennar shall seek input from the Indiana Department of Environmental Management (IDEM) regarding standards they have, if any, regarding the number of vehicular access points required for subdivisions served by a bridge.

(10) The approval of the Findings of Fact and Report of Determination by the Plan Commission.

NOW, THEREFORE, BE IT ORDAINED by the Town Council of the Town of Brownsburg, Hendricks County, Indiana as follows:

1) The above recitals are incorporated herein by reference as though set forth fully herein below.

2) The Applicant shall assume and be responsible for payment of all costs incurred in the preparation and filing of all changes in this ordinance.

3) The zoning on the Property, as shown on the Official Zoning Map, shall be changed to R3 (High Density Single-family Residential).

This Ordinance is hereby passed by the Town Council of the Town of Brownsburg, Indiana, this 23rd day of Sept, 2021.

BROWNSBURG TOWN COUNCIL

Travis Tschaenn, President

ATTEST:

Ann Hathaway, Clerk-Treasurer

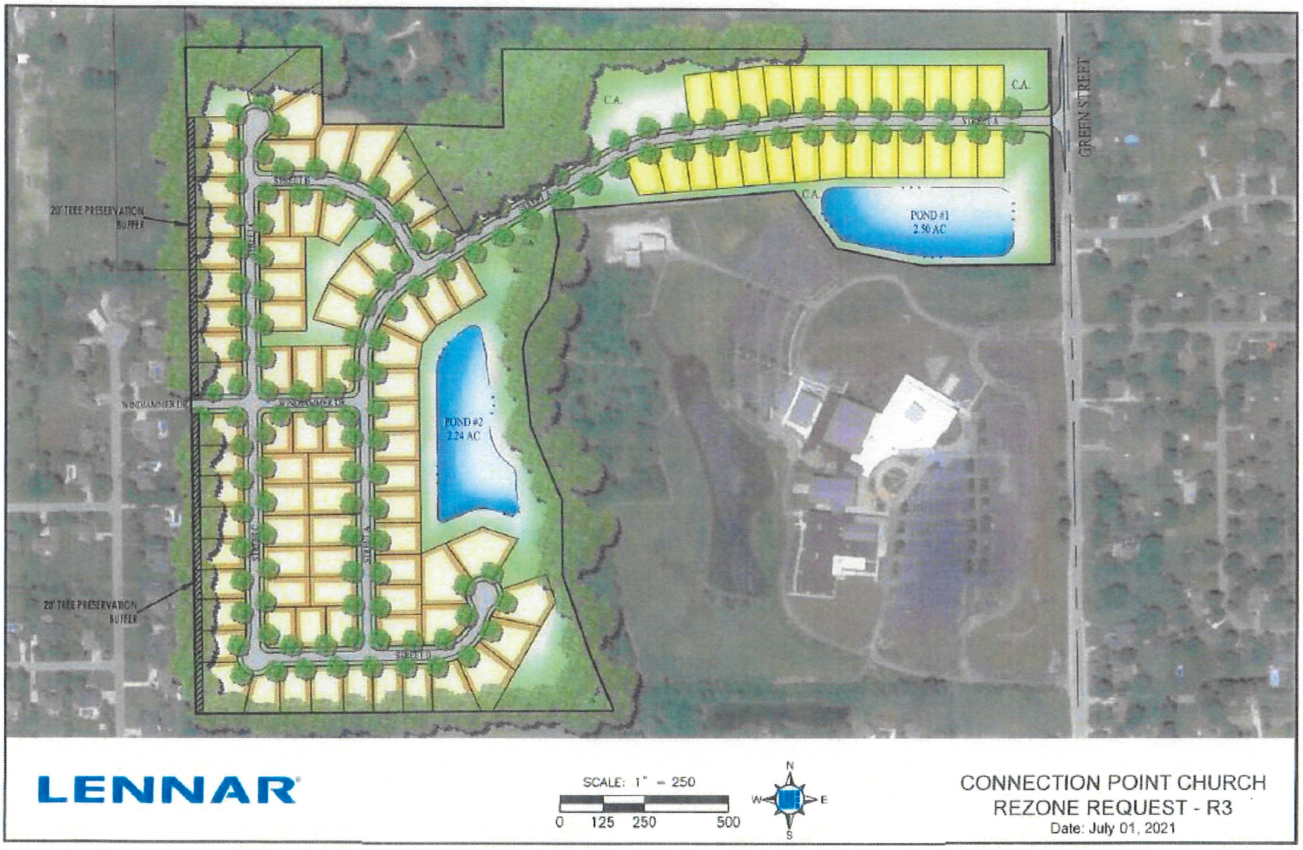

This instrument prepared by Jodi Dickey, Town of Brownsburg, 61 N. Green Street, Brownsburg, Indiana 46112. I affirm, under the penalties for perjury, that I have taken reasonable care to redact each social security number in this document, unless required by law. Jodi Dickey

Site and Zoning Map:

Project and Site Background:

The two smaller parcels in the northwest corner were brought in to be used for an entrance on to County Road 800 for Hawk's Landing, a single-family residential subdivision. The proposed new access road is called Hawk Hollow Bend and is a public street. Right-of-ways do not require annexation in order to put an entrance on the land. The houses that were proposed along this new entrance at the April 28th APC meeting have since been removed. The new proposal breaks the development into two more distinct sections, this will help with traffic dispersion going onto other roads. The original development project has been revised and will not have a vehicular bridge being built across the creek. The bridge is not feasible nor desirable in terms of ongoing maintenance and infrastructure costs. The habitat disruption, erosion, stream maintenance and mitigation and the multi-million-dollar expense were all factors in the removal of the bridge from the design. The conditional rezone request (PCCZ-24-3) was withdrawn at the April 28th APC meeting. The church to the southeast of Hawk's Landing has attempted to sell their land for some time, but the balance of the site faces various hurdles regarding entrances due to the largely landlocked west side of the church parcel (32-02-34-275-001.000-026).

New Information since October 2025:

Petitioners commissioned an update to the Traffic Study including new traffic counts both on a Thursday and Sunday. The traffic study has been reviewed by Crossroad Engineer's, the Town's consulting engineer and received feedback that the information provided is appropriate and the results on affects to selected intersections and recommended improvements meet acceptable performance standards. The study was also provided to the County Engineer. Petitioners previously worked with Indiana Department of

Transportation (INDOT), resulting in moving the location of the initial access point on SR 267 south to the current location. The petitioner entered into a Memorandum of Understanding with the Hendricks County Commissioners regarding the access point improvements on CR 800 North in July 2025.

The plat has been updated to meet the conditions of the 2021 rezoning. Petitioners have provided the following regarding the bridge connection: Linking the eastern and western portions of the development with any kind of bridge is not practical, would require the removal of trees within the riparian buffer along the creek as well as, disturbance of the floodway and wetlands.

It is staff's opinion that bridge location at this location and the resulting damage to the eco-system is not appropriate or desired. For these reasons it also the staff's opinion that the final engineering details support that the plat is as consistent as possible to the conceptual plan.

Petitioners have also provided an exhibit identifying and clarifying compliance with the lot width on the west side of the creek meeting the 90' width requirement.

Technical Review:

The TECH review for this project took place on September 18, 2025. Planning Services commented that proposed amenities need to be labeled, calculations for required and proposed vegetation need to be added to the landscape plan, the tree preservation area needed to have a cross hatch added, and street names needed to be added with a public or private designation. The township information needed changed to reflect Brown Township and the size of existing water and sanitary sewer systems will have to be added to the legend. Capital Projects commented that depending on traffic, additional improvements may need to be done to N Green St (SR 267). The Fire Department discussed AutoTurn information for the Brownsburg Fire Territory ladder truck and has been working on a solution with the applicant for the Windjammer Court stub road that connects to the neighboring Windridge North subdivision. If a Knox Box was put in, that raised questions on emergency services maneuverability due to the lot count on the west side of Hawk's Landing. Other traffic calming mechanisms were suggested such as speed tables to not impede the second access point as substantially. The Wastewater Department mentioned that the routing of the sanitary force main has changed significantly from the original layout, safe accessibility will need to be provided. The development will need to complete downstream pump upgrades to the Maple Lift station at the time of sanitary line installation. The lift station is currently at capacity. The Water Department commented to make changes in water main sizes on future construction plans. Valves are needed on all sides of any tees, a valve on each side of the creek crossing, and hydrants should be spaced 300' apart with hydrant locations at cul-de-sacs per Town Standards.

The revised Traffic Study was provided to all Technical Review Committee members for review and comment.

Criteria:

Pursuant to Chapter 8 of the Brownsburg Unified Development Ordinance the Advisory Plan Commission shall make findings of fact on the following criteria:

1) The subdivision of land meets the lot width, size, and area as provided in Chapter 2 or as modified by any waiver.

   https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=30

   a) The proposal meets the minimum dimensional requirements established for the R3 Single-Family Residential District in Chapter 2 of the UDO. Each lot provides a minimum lot area of 9,000 square feet, consistent with the required standard. Lot widths and depths have been designed to provide adequate building envelopes that accommodate required setbacks and easements.

      Based on the above information, staff believes this criterion has been met.

2) The subdivision of land provides appropriate areas and easements for necessary public utilities and drainage in accordance with **Chapter 7: Subdivision Regulations**.

   https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=168

   a) The project has been designed to comply with the development standards of the Brownsburg Unified Development Ordinance (UDO), including all applicable requirements for setbacks, easements, lot coverage, and building height. There is a large pipeline easement that causes a break in the landscaping on the west side by the Windridge subdivision. The subdivision layout provides adequate public utility and drainage easements in accordance with Chapter 7: Subdivision Regulations. These easements are located along property lines and within common areas as needed to accommodate stormwater infrastructure, sanitary sewer, water, electric, and communication facilities.

      Based on the above information, staff believes this criterion has been met.

3) The plat provides the appropriate right-of-way for the extension of public roads and infrastructure and access to internal or adjacent lots.

   a) The applicant was instructed to work with Hendricks County and INDOT to determine what road and entrance improvements would be required. The project will be broken up into two phases. The smaller east side will be constructed first, followed by the west side. The Thoroughfare Plan has SR 267 marked as a Principal Arterial and CR 800 as a Major Collector. Major collectors collect traffic from local streets and move it to larger arterial roads, reducing congestion on small neighborhood roads. The proposed new streets provide 56' of right-of-way width for a local road.

      Based on the above information, staff believes this criterion has been met.

4) The plat complies with any other applicable provision of **Chapter 7: Subdivision Regulations**.

   https://www.brownsburg.org/DocumentCenter/View/3743/Brownsburg-UDO-PDF#page=168

   a) *7.4 Easement Standards*: A 20' drainage and utility easement is present along the front of the lots followed by the 25' building setback line. There are also 10' and 15' drainage easements on the back side of the lots visibly shown on the plat. The final plat shall include any applicable easement descriptions and required language from the UDO.

   b) *7.6 Open Space Standards*: The creek is a barrier to the connectivity of this subdivision. The subdivision will function as two separate entities, however the petitioner has amended the plat to

provide for larger amenity areas on the east and west sides of the creek, meeting the standards independently for each side. They have also provided parking at the west side amenity area for those wanting to utilize the shelter or game courts. The applicant put common areas, sidewalks, and trails in the submission. This project meets the open spaces standards for the district (12% minimum required 44% provided) and has also laid out an extensive tree preservation buffer (11.78 acres preserved).

c) *7.9 Pedestrian Network Standards:* All concrete sidewalks, asphalt pathways, and crosswalk improvements must be constructed per the Town's Construction Standards and comply with requirements of the Americans with Disabilities Act (ADA). Sidewalks should be at least five feet wide. When abutting a curb, sidewalks must be at least 6 feet wide. Sidewalks must be provided on both sides of internal streets in all developments. This project meets those standards and has two walking trails in addition to sidewalks for amenities.

d) 7.11 Access Standards: The east side of the subdivision will get access to the site from Connection Pointe Dr once turning off of SR 267. You can then either take Winghaven Way or Horizon Bend to meander around that side of the neighborhood. The west side of the subdivision has two access points. You first have to turn off of E County Rd 800 N to access Hawk Hollow Bend or go through the stub road on Windridge Ct. Subdivisions cannot be designed to alienate or perpetuate the land-locking of adjacent undeveloped land. Connectivity must be considered and appropriate stub streets created for future connectivity. Where a stub street exists from a previous development, any new development shall connect to the stub street and use the existing road name.

Based on the above information, staff believes this criterion has been met.

5) The Plat Satisfies any **other applicable provisions** of the Unified Development Ordinance.

a) No special provisions that relate to the plat are noted for this site. Overlay districts are not applicable to this project.

Based on the above information, staff believes this criterion has been met.

6) The Plat Satisfies the **construction requirements** of the Brownsburg Standard Details.

a) The project did not request any waivers. Any remaining TECH comments will need to be completed before permitting. This was added as a condition of approval.

Based on the above information, staff believes this criterion has been met.

Recommendations:

The Advisory Plan Commission may request conditions and commitments related to the project and criteria. Conditions or commitments must be made as part of the motion.

Based on the information provided and the criteria responses, staff recommends a motion to

☐	Approve PCPP-25-3 as presented.
☒	Approve PCPP-25-3 with the following staff conditions: 1. All remaining technical review comments will be addressed prior to stamping the Primary Plat.

	2. The final plat shall be recorded in the Office of the Recorder of Hendricks County prior to issuance of any building permits. 3. The approval of the Findings of Fact and Report of Determination by the Plan Commission. 4. Petitioners shall comply with the Memorandum of Understanding with Hendricks County dated July 8, 2025. 5. Petitioners shall comply with the recommendations of the Traffic Study dated November 2025.
☐	Deny PCPP-25-3 based on the following criteria:

Advisory Plan Commission

Town of Brownsburg

Report Date: 12/2/2025

Purpose: Westbranch PUD Ordinance Changes

From: Kevin Tolloty, Senior Planner

General Information

The following are proposed changes to the Westbranch PUD Ordinance for discussion by the Plan Commission. The applicant, Justin Mitchell, on behalf of Onyx + East, has submitted this zoning text amendment (PCZT-25-5) to reflect the change that would need to be made to the Westbranch PUD to allow a permanent wall sign on the clubhouse. The only proposed change is to the sign standards in the chart below.

Section to be Amended

Additional District Development Standards that Apply to the TR-2 District Area
(Single-Family Front Load Homes)

Accessory Structure Standards:	Same as TR District (Sections 5.02 and 5.06 of the UDO)**
Architectural Standards:	Same as TR District (Section 5.16 of the UDO)** See also Exhibit E and Exhibit H for Additional Architectural Standards*
Anti-monotony Standards:	See attached Exhibit I.* Same as TR District (Section 5.22 of the UDO)**
Environmental Standards:	Same as TR District of the UDO (Sections 5.23 and 5.26 of the UDO)**
Fence and Wall Standards:	Pool fences shall be permitted to be 6' in height. Fences in rear and side yards shall be permitted to be 42" in height.
Home Business Standards:	Same as TR District (Section 5.32 of the UDO).**
Landscaping Standards:	For the Perimeter Planting and Bufferyard Requirements, see attached Exhibit D.1. For each individual home unit, the landscaping standard shall require the following: (i) 1 deciduous shade tree placed as a street tree; (ii) 1 ornamental tree; and, 3 shrubs. See Ex. F.1 (Rear-Load Planting Exhibit) and Ex. F.2 (Front-Load Planting Exhibit).*
Lighting Standards:	Same as TR District (Sections 5.42 and 5.43 of the UDO).**
Minimum Open Space:	See Ex. D.3 for the overall TR District Open Space Standards, including 35% minimum open space for combined TR-1 District and TR-2 District.*
Outdoor Storage Standards:	Same as TR District (Section 5.51 of the UDO).**

Parking Standards:	Same as TR District (Sections 5.56 and 5.58 of the UDO).**
Sewer and Water Standards:	Same as TR District (Section 5.64 of the UDO).**
Sign Standards:	Same as TR District (Sections 5.66 and 5.69 of the UDO)**, **except as follows: Clubhouse shall be permitted one (1) permanent, non-illuminated wall sign, not to exceed 25 square feet in size.**
Temporary Use Standards:	Same as TR District (Section 5.85 of the UDO).**
Temporary Structure Standards:	Same as TR District (Section 5.87 of the UDO).**
Trash Receptacle Standards:	Same as TR District (Section 5.90 of the UDO).**
Vision Clearance Standards:	Same as TR District (Section 5.91 of the UDO).**

*Exhibits refer to those in Ord. 2021-14

**UDO references are to the 2014 UDO, as amended

Recommendations:

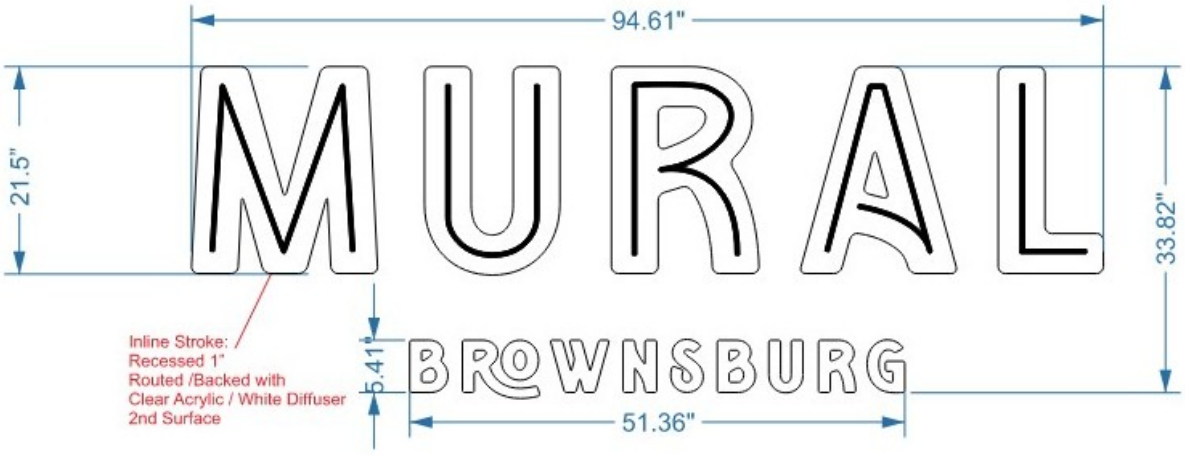

The Advisory Plan Commission may request conditions and commitments related to the project and criteria. Conditions or commitments must be made as part of the motion. For this case type, a motion will be a favorable or unfavorable recommendation forwarded to the Town Council.

Based on the information provided and the criteria responses, staff recommends a motion to:

☒	Send a **Favorable** Recommendation for PCZT-25-5 as presented.
☐	Send a **Favorable** Recommendation for PCZT-25-5 with the following staff conditions: 1.
☐	Send an **Unfavorable** Recommendation for PCZT-25-5 based on the following criteria:

Proposed Clubhouse Sign

Legal Description

A part of the Southeast quarter of Section 4, Township 16 North, Range 1 East of the Second Principal Meridian in Lincoln Township, Hendricks County, Indiana, and being more particularly described as follows, to-wit:

Beginning at a stone found marking the southeast corner of said quarter section; thence north 00 degrees 07 minutes 27 seconds west along the east line of said quarter section and the west line of Stony Brook, Subdivision, Section One, as per plat thereof recorded in Plat Book 12 Page 30 in the Office of the Recorder of Hendricks County, Indiana; 509.36 feet to the centerline of U.S.R. 136, as now located and established, also the northwest corner of said Stony Brook Subdivision; thence north 63 degrees 06 minutes 23 seconds west along said centerline 860.46 feet; thence north 63 degrees 38 minutes 05 seconds west along said centerline 319.35 feet; thence north 64 degrees 15 minutes 14 seconds west along said centerline 288.29 feet to the southeast corner of Rolling Acres Subdivision, Section One, as per plat thereof recorded in Plat Book 4 Page 134 in the Office of the Recorder of Hendricks County, Indiana; thence north 64 degrees 49 minutes 10 seconds west along said centerline and along the south line of said Rolling Acres, Section One 249.88 feet; thence south 00 degrees 19 minutes 12 seconds west parallel with the east line of the southwest quarter of the southeast quarter of said section 4 a distance of 1280.40 feet to the south line of said quarter section; thence north 89 degrees 41 minutes 16 seconds east along said south line 226.74 feet to a stone found marking the center south of said quarter section; thence continue north 89 degrees 41 minutes 16 seconds east along said south line 1320.88 feet to the point of beginning. Containing 31.93 acres, more or less, and subject to all legal highways, rights of way and easements of record.

EXCEPT
A part of the Southeast Quarter of Section 4, Township 16 North, Range 1 East, Lincoln Township, Hendricks County, Indiana, being bounded as follows:

Commencing at the Southeast Corner of said Quarter Section; thence North 00 degrees 03 minutes 45 seconds East (assumed bearing) along the East line of said Quarter Section 447.76 feet to POINT OF BEGINNING of this description, said point lying South 00 degrees 03 minutes 45 seconds West 63.33 feet from the centerline of US Highway 136 (as now located and established); thence continuing North 00 degrees 03 minutes 45 seconds East along said East line 63.33 feet to the centerline of US Highway 136; thence North 62 degrees 58 minutes 52 seconds West along said centerline 36.00 feet; thence South 27 degrees 01 minutes 08 seconds West perpendicular to said centerline 30.00 feet; thence South 28 degrees 49 minutes 10 seconds East 60.43 feet; thence South 89 degrees 56 minutes 15 seconds East perpendicular to the East line of said Quarter Section 16.50 feet to the POINT OF BEGINNING, containing 0.056 acres, more or less.

EXCEPT
A part of the Southeast Quarter of Section 4, Township 16 North, Range 1 East, Hendricks County, Indiana, and being that part of the grantors' land lying within the right-of-way lines depicted on the attached Right-of-Way Parcel Plat, marked Exhibit "B", described as follows: Beginning at the southeast corner of said section, designated as point "15" on the Location Control Route Survey recorded in Instrument 201112220 in the Office of the Recorder of said county; thence South 88 degrees 19 minutes 30 seconds West 45.00 feet along the south line of said section to point "48" designated on said Parcel Plat; thence North 01 degree 28 minutes 53 seconds West 30.98 feet to point "110" designated on said Parcel Plat; thence North 21 degrees 56 minutes 50 seconds East 32.70 feet to point "111" designated on said Parcel Plat; thence North 04 degrees 34 minutes 55 seconds West 240.35 feet to point "112" designated on said Parcel Plat; thence North 01 degree 55 minutes 58 seconds West 127.00 feet to point "47" designated on said Parcel Plat; thence North 18 degrees 25 minutes 23 seconds West 48.32 feet to point "46" designated on said Parcel Plat; thence North 37 degrees 59 minutes 27 seconds West 55.90 feet to point "49" designated on said Parcel Plat; thence North 64 degrees 33 minutes 21 seconds West 208.00 feet to point "71" designated on said Parcel Plat; thence North *25* degrees 26 minutes 39 seconds East 35.00 feet to the centerline of U.S.R 136; thence South 64 degrees 33 minutes 21 seconds East 259.00 feet along said centerline to a corner of the grantors' land; thence South 25 degrees 26 minutes 39 seconds West 30.00 feet along a line of the grantors' land to the southwestern boundary of the intersection of said U.S.R. 136 and County Road 600 East; thence South 30 degrees 12 minutes 00 seconds East 60.57 feet (60.43 feet by Instrument 94-8727, Deed Book 333, page 712) along the southwestern boundary of the intersection of said U.S.R. 136 and said county road to a corner of the grantors' land; thence North 88 degrees 31 minutes 07 seconds East 16.50 feet along a line of the grantors' land to the east line of said section; thence South 01 degree 28 minutes 53 seconds East 447.22 feet (447.76 feet by said Instrument 94-8727, Deed Book 333, page 712) along said east line to the point of beginning and containing 0.676 acres, more or less, inclusive of the presently existing right-of-way which contains 0.216 acres, more or less. The above-described land abuts the 0.56-acre parcel described in said Instrument 94-8727, Deed Book 333, page 712, and any seeming bearing discrepancies result merely from the different bearing systems upon which they are based.

ALSO
A part of the West half of the Southeast quarter of Section 4, Township 16 North, Range 1 East and described as follows:

Beginning at the Southwest corner of the said West half quarter; thence North with section bearing 101. 7 6 rods; thence South 80 degrees East 23 .2 7 rods; thence South 65 degrees East 63. 02 rods; thence South with section bearing 70 rods and 12.5 feet; thence West with the section bearing 80 rods to THE PLACE OF BEGINNING, estimated to contain 44.51 acres, more or less. EXCEPTING THE FOLLOWNG TRACT: Beginning at the Southeast corner of said half quarter; thence West on and along the South line thereof 3 .44 chains to a point; thence North parallel to the East line of said half quarter 19 .40 chains to the center of the Indianapolis and Crawfordsville Road; thence southeasterly in the center of said road to the

East line of said half quarter; thence South on and along the East line of said half quarter to the point of beginning. ALSO EXCEPT THE FOLOWING TRACT: Beginning at a stone at the Southwest corner of said half quarter section and run thence North on and along the West line thereof 7.394 chains, thence South 85 degrees 36 minutes East 7.51 chains; thence South parallel to the West line of said quarter quarter section 6.79 chains to the South line thereof; thence South 89 degrees 47.5 minutes West on and along said South line 7.488 chains to the point of beginning, containing 5.31 acres, more or less, containing in the above tract, exclusive of said exceptions 33.17 acres, more or less. Subject to all legal highways, rights of way and easements of record.

In all containing 64.368 acres, more or less.

This description is for zoning purposes only and not for the conveyance of title.

Traditional Residential District (TR) Area – For TR-1 and TR-2 Areas

District Intent	Permitted Uses	Special Exception Uses
• The Traditional Residential District (TR) of the Westbranch PD is intended to be used as a high intensity single-family detached dwellings on small to medium sized lots.	• Residential Permitted Uses: dwelling, single-family detached; and, fair housing facility (small). • Accessory Permitted Uses: home business (type 1).	• Accessory Special Exception Uses: home business (type 2) and wind turbine, small. • Residential Special Exception Uses: assisted living facility; bed and breakfast; dwelling, duplex (2 units); and, dwelling, single-family, attached.

District Development Standards: TR-1 District Area (Single-Family Front Load Homes):

Minimum Lot Area:	NA
Minimum Lot Width:	NA
Minimum Lot Frontage:	NA
Minimum Front Yard Setback –	
All Structures:	20 feet
Minimum Side Yard Setback –	NA – See below
Primary Structures:	NA
Accessory Structures:	NA
Minimum Aggregate Side Yard Setback between Dwellings	20 feet
Minimum Rear Yard Setback –	
Primary Structures:	20 feet
Accessory Structures:	20 feet
Maximum Lot Coverage:	65% (applicable to overall TR district)
Minimum Dwelling Unit Size (Excludes basement)	
One story dwelling:	2,000 sq. ft.
Two story dwelling:	2,000 sq. ft.
Maximum Number of TR-1 Units (Single-Family Front Load):	42 units
Maximum Structure Height –	
Primary Structures:	35 feet (2 ½ stories)
Accessory Structures:	20 feet

Additional District Development Standards that Apply to the TR-1 District Area (Single-Family Front Load Homes):

Accessory Structure Standards:	Same as TR District (Sections 5.02 and 5.06 of the UDO)
Architectural Standards:	Same as TR District (Section 5.16 of the UDO) See also Exhibit E and Exhibit H for Additional Architectural Standards
Anti-monotony Standards:	See attached Exhibit I.
Environmental Standards:	Same as TR District (Section 5.22 of the UDO).
Fence and Wall Standards:	Same as TR District of the UDO (Sections 5.23 and 5.26 of the UDO). Pool fences shall be permitted to be 6' in height. Fences in rear and side yards shall be permitted to be 42" in height. The Developer shall install a privacy fence that is 6' in height along the southern perimeter of the Real Estate for that segment of the Real Estate that is between the two (2) ponds located along the southern perimeter.
Home Business Standards:	Same as TR District (Section 5.32 of the UDO).
Landscaping Standards:	For the Perimeter Planting and Bufferyard Requirements, see attached Exhibit D.1. For the southern perimeter of the Real Estate that is adjacent to the Arbor Springs neighborhood, additional Perimeter Bufferyard Requirements are depicted in Exhibit D.2 which requires that the number of homes in the TR-1 District Area along the Real Estate's southern perimeter (between the two (2) ponds that are located along this segment) shall only include seven (7) homes. For the northern perimeter of the Real Estate that is adjacent to US HWY 136, all homes shall be a minimum of 100' from US HWY 136. For each individual home unit, the landscaping standard shall require the following: (i) 1 deciduous shade tree placed as a street tree; (ii) 1 ornamental tree; and, 3 shrubs See Ex. F.1 (Rear-Load Planting Exhibit) and Ex. F.2 (Front-Load Planting Exhibit).
Lighting Standards:	Same as TR District (Sections 5.42 and 5.43 of the UDO).

Minimum Open Space:	See Ex. D.3 for the overall TR District Open Space Standards, including 35% minimum open space for combined TR-1 District and TR-2 District.
Outdoor Storage Standards:	Same as TR District (Section 5.51 of the UDO).
Parking Standards:	Same as TR District (Sections 5.56 and 5.58 of the UDO).
Sewer and Water Standards:	Same as TR District (Section 5.64 of the UDO).
Sign Standards:	Same as TR District (Sections 5.66 and 5.69 of the UDO).
Temporary Use Standards:	Same as TR District (Section 5.85 of the UDO).
Temporary Structure Standards:	Same as TR District (Section 5.87 of the UDO).
Trash Receptacle Standards:	Same as TR District (Section 5.90 of the UDO).
Vision Clearance Standards:	Same as TR District (Section 5.91 of the UDO).
Additional Standards:	See Ex. D for Additional Standards, as well as for the 1 Acre Neighborhood Commercial Flex Parcel that is located in the NC/TR-1 District Area.

.

Note: All of the above standards shall be the standards that were in effect as of the date of the application submittal of this Ordinance (March 8, 2022).

Street and Alley Cross Section Requirements:

Street cross sections:	See Ex. G.1 for the required street cross sections.
Private Alleys:	See Ex. G.2 for the required private alley cross sections.

District Development Standards: TR-2 District Area (Single-Family Rear Load Homes):

Minimum Lot Area:	NA
Minimum Lot Width:	NA
Minimum Lot Frontage:	NA
Minimum Front Yard Setback –	
All Structures:	8 feet
Minimum Side Yard Setback –	NA – See below
Primary Structures:	NA
Accessory Structures:	NA
Minimum Aggregate Side Yard Setback between Dwellings	12 feet
Minimum Rear Yard Setback –	
Primary Structures:	8 feet
Accessory Structures:	8 feet
Maximum Lot Coverage:	65% (applicable to overall TR district)
Minimum Dwelling Unit Size (Excludes basement)	
One story dwelling:	1,500 sq. ft.
Two story dwelling:	1,500 sq. ft.
Maximum Number of TR-2 Units (Single-Family Rear Load homes):	145 units
Maximum Structure Height –	
Primary Structures:	35 feet (2 ½ stories)
Accessory Structures:	20 feet

Additional District Development Standards that Apply to the TR-2 District Area (Single-Family Front Load Homes):

Accessory Structure Standards:	Same as TR District (Sections 5.02 and 5.06 of the UDO)
Architectural Standards:	Same as TR District (Section 5.16 of the UDO) See also Exhibit E and Exhibit H for Additional Architectural Standards
Anti-monotony Standards:	See attached Exhibit I.
Environmental Standards:	Same as TR District (Section 5.22 of the UDO).
Fence and Wall Standards:	Same as TR District of the UDO (Sections 5.23 and 5.26 of the UDO). Pool fences shall be permitted to be 6' in height. Fences in rear and side yards shall be permitted to be 42" in height.
Home Business Standards:	Same as TR District (Section 5.32 of the UDO).
Landscaping Standards:	For the Perimeter Planting and Bufferyard Requirements, see attached Exhibit D.1. For each individual home unit, the landscaping standard shall require the following: (i) 1 deciduous shade tree placed as a street tree; (ii) 1 ornamental tree; and, 3 shrubs. See Ex. F.1 (Rear-Load Planting Exhibit) and Ex. F.2 (Front-Load Planting Exhibit).
Lighting Standards:	Same as TR District (Sections 5.42 and 5.43 of the UDO).
Minimum Open Space:	See Ex. D.3 for the overall TR District Open Space Standards, including 35% minimum open space for combined TR-1 District and TR-2 District.
Outdoor Storage Standards:	Same as TR District (Section 5.51 of the UDO).
Parking Standards:	Same as TR District (Sections 5.56 and 5.58 of the UDO).
Sewer and Water Standards:	Same as TR District (Section 5.64 of the UDO).
Sign Standards:	Same as TR District (Sections 5.66 and 5.69 of the UDO), **except as follows: Clubhouse shall be permitted one (1) permanent, non-illuminated wall sign, not to exceed 25 square feet in size.**
Temporary Use Standards:	Same as TR District (Section 5.85 of the UDO).
Temporary Structure Standards:	Same as TR District (Section 5.87 of the UDO).

Trash Receptacle Standards: Same as TR District (Section 5.90 of the UDO).

Vision Clearance Standards: Same as TR District (Section 5.91 of the UDO).

Additional Standards: See Ex. D for Additional Standards.

Note: All of the above standards shall be the standards that were in effect as of the date of the application submittal of this Ordinance (March 8, 2022).

Street and Alley Cross Section Requirements:

Street cross sections: See Ex. G.1 for the required street cross sections.

Private Alleys: See Ex. G.2 for the required private alley cross sections.

(Additional Standards)

1. 1 Acre Neighborhood Commercial Flex Parcel located within the NC/TR-1 District Area: As shown on the District Map Plan, there is a "1 Acre Neighborhood Commercial Flex Parcel" that is located within the NC/TR-1 District Area. The below standards and requirements shall apply to the 1 Acre Neighborhood Commercial Flex Parcel:

    a. Upon approval of all zoning requests and acquisition of the Real Estate by the Developer, the Developer shall place the 1 Acre Neighborhood Commercial Flex Parcel for sale and shall market the same as a "Neighborhood Commercial" outlot.

    b. In the event the 1 Acre Neighborhood Commercial Flex Parcel is purchased and acquired by a third party (as evidenced by a recorded deed of transfer) on or before December 31, 2024, said 1 Acre Neighborhood Commercial Flex Parcel shall be required to be developed in accordance with the all applicable NC District Area development standards and requirements, as the same are set forth in this Westbranch PD Ordinance.

    c. In the event that the 1 Acre Neighborhood Commercial Flex Parcel is not purchased and acquired by a third party by January 1, 2025, the Developer shall submit the Town's required application and/or any and all other documents as may be required by the Town in its sole discretion necessary for the Council to consider approval or denial of such request in its sole discretion for the Developer to develop five (5) homes within the 1 Acre Neighborhood Commercial Flex Parcel pursuant to the TR-1 District standards and requirements after the Developer completes the following:

        i. The Developer shall appear before the Town Council any time after January 1, 2025, to inform and provide the Town Council of the following: (i) the Developer has not secured any third party purchasers for the 1 Acre Neighborhood Commercial Flex Area; (ii) the Developer shall submit a written explanation of their efforts to market and sell 1 Acre Neighborhood Commercial Flex Parcel; and, (iii) the Developer shall provide written minutes of any meetings/discussions with third party prospective buyers who expressed interest in the 1 Acre Neighborhood Commercial Flex Parcel.

        ii. Approval to permit the development of the 1 Acre Neighborhood Flex Parcel shall be solely at the discretion of the Town Council at the time they review such request. In addition, in the event the Developer's request requires Plan Commission consideration and approval, the Developer shall cooperate in that process.

d. Until it is finally determined if the 1 Acre Neighborhood Commercial Flex Parcel will be a commercial use or a residential use, the existing trees along this segment of US HWY 136 shall be preserved (notwithstanding any utility conflicts affecting the development of the Real Estate).

e. In the event the 1 Acre Neighborhood Commercial Flex Parcel becomes a residential use, the Developer shall provide a naturally enhanced buffer along this segment of US HWY 136 in the area of the five (5) homes.

2. Snow Removal: The property management company shall be responsible for and incur the expense of snow removal from all roads and alley ways within the TR-1 District and TR-2 District.

3. Fountains for Ponds: All ponds in the NC District, TR-1 District and TR-2 District shall be required to have fountains.

4. "Welcome to Brownsburg" Signage Along US HWY 136: The Developer shall coordinate with the Town of Brownsburg's Development Services Director to provide a mutually agreeable location along US HWY 136 for a "Welcome to Brownsburg" sign, but such sign shall not interfere with the development, sale and use of any of the Real Estate by the Developer. The final design and expense of installing the "Welcome to Brownsburg" sign shall be by the Town of Brownsburg.

5. Rental Rates: The Developer commits that the project will always be at or above market rates, and that there shall not be any government subsidies thereof. Further, occupancy rates shall comply with all applicable Town of Brownsburg ordinances and local code and to be enforced by the Westbranch Community Association.

6. Pools: Swimming pools shall be subject to the following standards:

   a. Only in an in-ground pools shall be permitted.
   b. Pools shall require an Improvement Location Permit.
   c. Pools shall be professionally managed by the property management company.

7. Development Amenities: Development Amenities to be installed by the Developer shall include: (i) an amenity area consisting of a pool house with restrooms, in ground swimming pool of at least 400 square feet in size within thirty (30) months of recording the primary plat for the Westbranch PD Ordinance; and, (ii) a playground.

8. Landscape Buffers: For the Perimeter Planting and Bufferyard Requirements, see attached Exhibit D.1.

9. Density: A maximum of 5.0 dwellings per acre (187 Dwellings) is permitted in the combined TR-1 and TR-2 Districts.

10. Open Space: See Ex. D.2 for the proposed Open Space plan and areas.

11. Shrub Sizes: There shall be a minimum of three (3) shrubs with a mature size of 3' to 5' diameter per each home.

5.66 SI-01: General Sign Standards

This Sign Standards (SI) section applies to the following zoning districts:

PR AG RE R1 R2 R3 TR M1 M2 M3 MP IS NC UC C1 C2 HC EC I1 I2 MS HI

The following standards apply:

A. Cross Reference:
   1. *Home Businesses*: Signs associated with a home business shall be exempt from the Sign Standards section, but shall comply with the *Home Businesses Standards (HB)*.
   2. *Lighting Standards*: When illumination of signs is permitted by this Sign Standards section, all illumination and lighting associated with signs shall meet the glare, light trespass, and any other applicable *Lighting Standards (LT)*.
   3. *Special Event Signs*: Signs associated with special events as permitted in *Section 5.88: Nonresidential Temporary Use and Structure Standards* shall be exempt from the Sign Standards section, but shall comply with that section's limitations.

B. Freedom of Speech: Any permanent sign or standard temporary sign permitted by the Sign Standards may be used for freedom of speech (i.e. the expression of opinions not including commercial messages) for any length of time.

C. Permits:
   1. *Improvement Location Permit*: An Improvement Location Permit shall be required for all signs located, erected, constructed, reconstructed, enlarged, moved, or altered, except as follows:
      a. Signs undergoing periodic or routine maintenance, including painting, repainting, cleaning and changing burnt-out light elements. Maintenance does not include changing the intensity or brightness of internal or external lighting.
      b. Changing of the sign's message (i.e. content) assuming the sign area, projection, dimension, materials (e.g. changing a wood sign to a LED sign), and other "time, place, and manner" standards are not changed.
      c. Standard Temporary Signs as may be permitted in each zoning district, but shall still comply with all applicable standards.
      d. Permitted and legally complying temporary signs that are replaced due to storms, mowing, or site maintenance; and when intentionally removed and replaced at a later time (e.g. at the end of business hours and replaced at the beginning of business hours).
      e. Permanent and legally complying signs damaged by accident or mother nature, when replaced with an effectively identical sign.
   2. *State Permit*: All signs proposed to be located along a State-owned interstate or highway shall obtain the proper State sign permit or written authorization from the Indiana Department of Transportation prior to seeking an Improvement Location Permit from the Town of Brownsburg.

D. Interim Sign:
   1. *Qualification*: Any new businesses may install an interim sign if their permanent sign is not able to be installed on or before the official occupancy date; or any business that has lost a pre-existing, legally established permanent sign due to fire, automobile accident, or act of mother nature may install an interim sign while a permanent sign is being fabricated to replace the lost sign. Under all circumstances, the following conditions shall be met:
      a. Proposal for Interim Sign: The property owner shall make a request for an interim sign, including the material, location, anchoring method, proposed installation date, and other information that may be requested by the Zoning Administrator.

b. Approval of Permanent Signs: A sign permit for one (1) or more permanent signs shall be fully approved prior to any interim signs being installed. If the permanent sign was pre-existing, evidence that the sign was legally established shall be confirmed before installing the interim sign.

c. Proof of Purchase: Proof shall be provided to the Zoning Administrator that the approved permanent sign has been officially commissioned or purchased from a sign manufacturer.

d. Size and Height: An interim sign shall not be larger in sign area or mounted higher than the corresponding approved permanent sign.

e. Location: The interim sign shall generally be in the same location as the approved permanent sign.

f. Quantity: No more than one (1) interim sign per approved (or lost) permanent sign shall be installed, with a maximum of two (2) interim signs in total.

g. Time Limitation: An interim sign may be in place for up to ninety (90) days. If evidence that unforeseen circumstances has prevented the permanent sign from being installed, the Zoning Administrator can grant a one-time thirty (30) day extension.

h. Building Inspector: An inspection of the interim sign is not required. However, if the building inspector becomes aware of any safety concerns, those concerns shall be addressed to his/her satisfaction within a time-frame consistent with the safety concern.

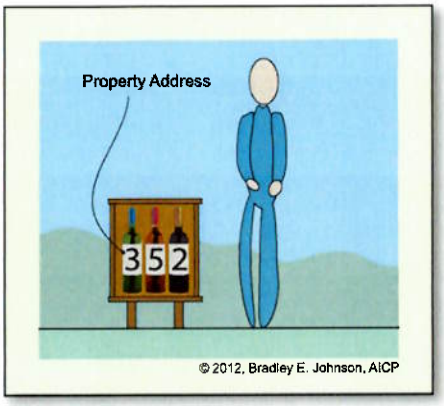

i. Maintenance: The interim sign shall be kept in good repair.

j. Removal: The interim sign shall be removed upon delivery and installation of the permanent sign(s).

E. Exempt: The following devices, as described, are not considered commercial messages and shall be exempt from the Sign Standards. However, the below described exemptions shall still meet all Vision Clearance Standards (VC) and other non-sign standards. Items that do not meet the description and that are used as part of, or fully as, a commercial message shall be regulated as a sign.

1. *Flags*: A flag or insignia of any nation, state, municipality, or other political unit is exempt. However, when a flag or insignia of any nation, state, municipality, or other political unit is used as an integral component of a commercial message, it shall comply with the sign standards for the applicable zoning district. For example, an American Flag integrated into a corporation's brand or logo.
2. *Political Signs*: Political campaign signs shall be exempt.
3. *Public Safety Message*: Posting of a public safety or privacy message by a private property owner shall be exempt, provided that no individual posting exceeds the maximum area permitted for a standard temporary sign in the applicable zoning district. Examples include "Beware of Dog," "Private Property," "No Trespassing," "Weight Limit," "Video Surveillance," and "No Turnaround."
4. *Operational Limitations or Information*: Posting of operational limitations and information shall be exempt, provided the letters are not greater than twelve (12) inches in height. Examples include hours of operation, admittance requirements, "Employees Only," "Men," "Women," "Visitor Parking," and "No deliveries."
5. *Indoor Commercial Messages*: Commercial messages displayed inside a building that cannot be viewed legibly by pedestrians or drivers outside the building shall be exempt. Examples include a commercial message on a scoreboard inside a gymnasium, a wall clock inside a restaurant with a branded logo, or product signs hanging or mounted on the wall of a retail store.
6. *Miniscule Commercial Messages*: Miniscule commercial messages displayed on or near a primary entrance shall be exempt, provided that the area of each miniscule commercial message does not exceed thirty (30) square inches and the cumulative area of all miniscule commercial messages does not exceed two (2) square feet per primary entrance. Examples include "Visa," "Master Card," "Diner's Club," "ATM Inside," and corporate logos of products sold inside.
7. *Price Tags*: A price tag in conjunction with outdoor merchandise shall not be considered a sign if less than eighty (80) square inches.

8. *Addresses*: Posting of a street address on a mailbox, building, or other prominent location to provide adequate property identification shall be exempt. However, when a street address is more than four times (4X) the minimum required address size required by the 2006 International Fire Code, or integrates graphics that convey a commercial message, then it shall be regulated as a sign. For example, an address posted on a sign illustrated with bottles of wine for a wine shop would not be exempt.

9. *Residential Nameplate*: Posting of the occupant's name in a single-family residential districts when the text is not greater than nine (9) inches in height is exempt (e.g. "Smith Family" or "Jones Place").
10. *Property Name*: A name given to a property and posted by the owners, and that does not exceed five (5) square feet in sign area is exempt. For example "Dream Cottage" or "Wild Wind Farm." However, if the sign is related to the property's use for a commercial purpose (e.g. a home business, bed and breakfast, vacation rental, or has agricultural tourism) the property name sign shall not be exempt.
11. *Required Postings*: Messages required by a State agency, State law, federal agency, or federal law shall be exempt, provided the area of the message and height of posting are consistent with the minimum requirement by the agency or law.
12. *Religious Symbols*: Religious symbols (e.g. Cross, Star of David, or Star and Crescent) incorporated into the architecture or site at places of worship occupied by the religious organizations shall be exempt. Logos, brands, or slogans used by religious organizations shall not be considered religious symbols.
13. *Murals*: A mural shall be exempt, provided it conveys no commercial message. Murals with a commercial message shall be regulated as a wall sign.
14. *Commercial Messages on a Permanent Display Board*: A commercial message attached to and contained within the sign area of a legally established permanent display board sign shall be exempt.
15. *Outdoor Sports Fields*: Any advertising or sponsor signs mounted on an outdoor scoreboard, dugout, press box, fence, bleachers, concession stand, restroom, or similar structures used in conjunction with a legally-established sport field shall be exempt if designed to be predominantly seen by the players and audience. However, if the advertising is visible from a public street and contains a commercial message intended for the non-attending public, it shall comply with the sign standards for the applicable zoning district.
16. *Directional Devices*: Directional devices used to mark the entrance or exit of an establishment for vehicle safety and information purposes that does not exceed the following limitations shall be exempt:
    a. Applicable Zoning Districts: The commercial, M2, M3, institutional, parks and recreation, or industrial zoning districts may utilize directional devices.
    b. Device Area: Directional devices shall not exceed four (4) square feet in area per face.
    c. Device Height: Directional devices shall not exceed three (3) feet in height.
    d. Quantity: Two (2) directional devices may be installed per street frontage in which the property has legally established curb cuts; with an absolute maximum of four (4).
    e. Location: Directional devices shall be subject to *Section 5.66(G): Prohibited Locations*.
    f. Message: Directional devices shall either contain the words "In," "Enter," "Entrance," "Out," "Exit," "Do Not Enter," or similar; and/or have directional arrows indicating desired traffic movement. Further, directional devices may include corporate colors or a corporate logo as long as the corporate logo does not exceed fifty percent (50%) of the device area.

17. *Wayfinding System Signs*: Wayfinding systems may be permitted for large developments that encompass multiple lots or multiple buildings, provided the following conditions are met.
    a. Wayfinding systems shall be used to direct vehicular and pedestrian traffic to specific neighborhood, amenity, or other major destinations.
    b. Wayfinding systems shall be required to have signs of consistent size, scale, and appearance.
    c. Wayfinding signs shall not exceed six (6) feet in height and two (2) square feet in sign area.
    d. Proposals for wayfinding systems shall be reviewed and approved at the discretion of the Zoning Administrator. The Zoning Administrator may take into account the need for the wayfinding system, the size and complexity of the development, quantity and location of signs, number of entrances and exits, and the appearance of signs.

F. Prohibited Signs: The following type of signs shall be prohibited.
1. *Animated*: Signs that gain attention through animation shall not be permitted, including any of the following.
    a. Signs that utilize any motion picture or animation from an LED display, LED projector, film projector, video projector, or the like.
    b. Signs that emit audible sound, odor, or visible matter.
    c. Signs that have blinking, flashing, scrolling, or fluttering lights; or changing light intensity, brightness, or color; or that give such illusion.
    d. Signs that "shoot" laser light, "cast" intense or visible light beams, or cast laser or projector-created light images onto the ground, sidewalk, wall or other visible surface.
2. *Vehicle Signs*: Vehicles with signs greater than eight (8) square feet in cumulative area shall not be permitted to be parked for the primary purpose of displaying the sign. Prohibited vehicle signs shall not be construed to include vehicles with signs on them that:
    a. Are lawfully parked overnight or during non-business hours in a discreet location.
    b. Are making deliveries, sales calls, transporting persons or property, or conducting customary practices relating to operating the business.
    c. Are used in conjunction with customary construction operations on a construction site.
3. *Lights*: Strobe lights, search lights, beacons, or any light that rapidly flashes, projects light in visible beams skyward, or projects light horizontally shall not be permitted regardless if the light is part of or independent of a sign.
4. *Signs with Moving or Movable Parts*: Signs or devices with visibly moving parts, including humans holding or acting as signs, shall not be permitted; except as may be permitted as a Special Temporary Sign.
5. *Obscene Content*: Signs that contain obscene content, indecent content, "fighting words," or profane words not allowable on broadcast television or radio during daytime hours according to the rules of the FCC; or content that would result in an NC-17 rating by the Motion Picture Association of America, shall not be permitted.
6. *Driver Hazard*: Signs that emulate emergency service vehicles or common traffic signs or signals shall not be permitted. For example, a sign that uses "Stop," "Slow," "Caution," "Danger," "Warning," or similar words mounted on a sign using similar shape, scale, color, and location resulting in driver confusion or otherwise creating an unsafe condition.
7. *Streamers*: Pennants, streamers, strings of flags, and the like with a commercial message shall be prohibited.
8. *Non-Permitted*: Any sign type not specifically permitted or that isn't clearly meeting the intent of the Sign Standards shall be prohibited.

G. Prohibited Locations: Signs regardless of type, shall not be permitted in any of the following locations, except as may be expressly permitted elsewhere in this Unified Development Ordinance:

1. *Vision Clearance*: Signs shall not be permitted in areas prohibited by *Vision Clearance Standards (VC)*.
2. *Right-of-way*: Signs shall not be permitted in any right-of-way unless authorized by the Town Council, except as allowed in *Section 5.73: Urban Commercial Sign Standards*.
3. *Poles*: Signs shall not be permitted on any traffic control device, street sign, construction sign, or utility pole.
4. *Fences*: Signs shall not be permitted on any fence.
5. *Trees*: Signs shall not be permitted to be attached to any tree, shrub, or other natural object.
6. *Benches*: Signs shall not be permitted to be attached to or integrated into any bench.
7. *Towers*: Signs shall not be permitted to be attached to or integrated into any telecommunication antennae, telecommunication tower, television antennae, or similar towers.
8. *Roofs*: Signs shall not be permitted to be placed on, set upon, attached to, or be perceived to be attached to the roof of a structure. This provision includes signs integrated into the roofing material.
9. *Fire Safety Devices*: Signs shall not be permitted on a fire escape or in a manner that substantially blocks view from the right-of-way to a fire door.
10. *Obstructs Circulation*: Signs that obstruct or interfere with safe internal or external movement of vehicular or pedestrian traffic shall not be permitted.
11. *Artificial Elevation*: Signs shall not be permitted to be installed on a berm, mound, or otherwise raised portion of the site unless the sign height is measured from the elevation at the base of the berm, mound, or raised portion of the site.
12. *Wall Signs over Windows*: No permanent wall sign shall be installed such that it covers windows in the building.

H. Maintenance: All signs and sign components shall be kept in good repair, in safe condition, and working condition. If landscaping is required around the base of a sign, it shall be maintained in living condition, consistent in character with the approval, and not overgrown. Landscaping shall be designed and maintained to be in compliance with the visibility restrictions for signs.

5.69 SI-04: Single-family and Two-family Residential Sign Standards

This Sign Standards (SI) section applies to the following zoning districts:

RE R1 R2 R3 TR M1

The following standards apply:

A. Temporary Signs: Temporary signs on individual lots shall be permitted as follows:
   1. *Location*: Temporary signs shall be located outside the Vision Clearance Triangle and a minimum of ten (10) feet from any right-of-way, or edge of pavement associated with a street or driveway.
   2. *Illumination*: Temporary signs shall not be illuminated.
   3. *Standard Temporary Signs*: Standard temporary signs shall be permitted as follows.
      a. Type: A standard temporary sign shall be a yard sign. Examples of standard temporary signs include sale of property, garage sale, and supporting school events.
      b. Quantity: One (1) standard temporary sign shall be permitted per lot frontage, plus one (1) additional sign for each 300 feet of street frontage. For corner lots, no two (2) standard temporary signs on separate frontages shall be closer than 150 feet, measured using the shortest tangent.
      c. Sign Area: The sign area for a standard temporary sign shall not exceed ten (10) square feet per side.
      d. Height Above Ground: The sign copy of a standard temporary sign shall be no more than six (6) feet above the ground. The sign structure shall not be greater than 120% taller than the sign copy.
      e. Duration: A standard temporary sign may stay in place for the duration of the temporary event. The standard temporary sign may be put in place up to seven (7) days prior to the temporary event. All standard temporary signs shall be taken down within five (5) days after the standard temporary sign's purpose no longer exists.

Exhibit "D"

Statement of Intent, Project Description and Comprehensive Plan Statement for

the Westbranch PD Ordinance - 2023 Amendment

The applicant, Onyx and East, LLC ("Onyx"), is seeking text amendment approval to the Westbranch Planned Development Ordinance, Ordinance #2022-14, which was adopted by the Brownsburg Town Council on August 25, 2022 (the "Westbranch PD"). The Westbranch PD is a mixed-use Planned Development District that consists of approximately 44 acres, which parcels are generally located at the southwest intersection of West Northfield Drive and E. US Highway 136 (collectively, the "Real Estate").

The purpose of the text amendment request (the "Westbranch Amendment Ordinance") is to add additional lot development standards that were not included in the Westbranch PD Ordinance in order to allow for the platting of individual lots in the TR-1 and TR-2 District Areas, as well as providing additional home design options for consideration.

The "Westbranch Amendment Ordinance" will meet or exceed all the requirements of *IC 36-7-4-1500* et seq. which sets forth the State of Indiana requirements for the consideration and adoption of Planned Unit Developments, and amendments thereto, by local jurisdictions. To this end the plan for the Real Estate is predominately consistent with the Goals and Objectives of the Brownsburg Comprehensive Plan and compatible with surrounding land uses and adjacent zoning districts. In this regard, The Town of Brownsburg's Comprehensive Plan Map classifies the subject Real Estate as "Single Family Detached" residential and "Neighborhood Commercial. Surrounding the Real Estate to the immediate south is the Arbor Springs residential neighborhood; (ii) to the immediate north is the US Hwy 136 and further to the north is a future industrial development; (iii) to the immediate west is N Country Road 550 E, also to the west is the Lincoln Park and estate residences; and, (iv) to the immediate east are single family residences. The Westbranch Amendment Ordinance provides a context sensitive transition residential adjacent to the surrounding residential uses and neighborhood commercial at the corner.

The Westbranch Amendment Ordinance meets the intent of the Brownsburg Zoning Ordinance, and specifically Article 4 Planned Development District in that the Westbranch Amendment Ordinance is intended to provide development standards for a mixed-use development which will include both residential and commercial uses in three (4) distinct use areas – (I) an NC District Area for neighborhood commercial uses; (ii) an RE District Area for estate lots; (iii) a TR-1 District Area; and, (iv) a TR-2 District Areas and these two (2) TR Areas will include two (2) different types of residential home offerings (single-family front load homes and single-family rear load homes).

The proposed NC District Area and RE District Area of the Westbranch Amendment Ordinance have development standards that are essentially consistent with the development standards and intent in the respective underlying zoning classifications of the Unified Development Ordinance ("UDO").

The Westbranch Amendment Ordinance for the proposed TR-1 and TR-2 District Areas adds additional lot development standards that were not included in the Westbranch PD Ordinance in order to allow for the platting of individual lots in the TR-1 and TR-2 District Areas, as well as providing additional home design options for consideration, as the development standards in the underlying TR zoning classification of the UDO do not easily comply with the development standards necessary to achieve the design intent for the TR-1 District Area (front load homes) and the TR-2 District Area (rear load homes). For the two (2) TR District Areas of the Westbranch Amendment Ordinance, the proposed development standards are limited to and only seek relief and flexibility from TR development standards of the UDO in order to produce the desired development for these two (2) TR District areas within the community.

The Westbranch Amendment Ordinance includes a mix and diversity of uses and residential home offerings. The NC District Area is intended for neighborhood commercial types of uses, the RE District Area is intended for estate lots and the TR-1 and TR-2 District Areas are intended for residential uses that offer different home offerings. The mix of uses offered within the community should benefit the immediate vicinity surrounding the Real Estate, as well as benefit the Town as a whole in providing a unique mixed-use development along an important corridor and roadway of the Town.

The NC District Area of the Westbranch Amendment Ordinance adopts the architectural standards and requirements of the UDO Section 5.18 AR-04 Commercial Architectural Standards, as those standards and requirements are more appropriate to apply to the proposed commercial buildings in the NC District Area of the Westbranch Amendment Ordinance. The RE District Area adopts the architectural standards and requirements of the UDO. For the TR-1 and TR-2 District Areas, the Westbranch Amendment Ordinance includes specific design and architectural standards (see Exhibit E and Exhibit H of the Westbranch TA Ordinance) – that, as applied, will be sensitive to the character of the surrounding area and uses and which will provide amenities for future residents.

The Westbranch TA Ordinance meets district intent and prerequisites of Article 4.1 in the following ways:

1. The Real Estate consists of two (2) parcels of that when combined are uniquely shaped with existing natural features, including the western portion of the Real Estate that includes mature tree areas, gently rolling terrain and features that deserve sensitivity. The eastern portion of the Real Estate is located at the southwest intersection of US Hwy 136 and Northfield Drive/N CR 600 E and the western portion is located south of and adjacent to US Hwy 136, and east of N. CR 550 E. The Westbranch Amendment Ordinance seeks to combine these parcels into a coherent development that is not disjointed and the subject of individual zoning requests on the various parcels that may not be part of an overall plan to effectively and appropriately develop the Real Estate.

2. The Westbranch Amendment Ordinance will provide for a mixed-use development that shall include both residential and commercial uses within in four (4) distinct use areas – NC District Area, RE District Area and the TR-1 and TR-2 District Areas for the two (2) different residential home offerings (single-family front load homes and single-family rear load homes). The two (2) TR District Areas are unique in that these areas are master-

planned and include a mixed-use lifestyle living experience in a premium residential community that shall be managed by a professional management company.

3. Because the eastern portion of the Real Estate is located in a prominent corridor of the southwest intersection of US Hwy 136 and Northfield Drive/N CR 600 E, this area is proposed to be the NC District use area which is intended per the Comprehensive Plan for neighborhood commercial types of uses area. The area just south of the NC District Use, will be the two (2) TR District Areas which will provide for a residential uses in the form of front load homes and rear load homes that will benefit the immediate vicinity area surrounding the Real Estate and the Town as a whole by providing another housing option.

4. By utilizing the unique location of the Real Estate, its unique size and taking into consideration the natural features of the Real Estate when developing a sensitive and thoughtful land plan, the Westbranch Amendment Ordinance seeks to avoid a disjointed development of the various parcels through separate rezone requests, and instead seeks to develop the parcels in a coherent and unified manner so that they live and feel more like a "micro-community" and not separate and unrelated developments.

5. Another aspect of utilizing the natural features of the site and seeking to have a connected and vibrant community, the Westbranch proposals includes a path system that allows residents in the estate section to utilize a path that will meander through some of the mature tree areas that will be preserved over to the commercial area and other residential area. Pathways such as this have the effect of creating community connection and engagement between the residents of the different areas of the development.

6. The sidewalk system within and around the community and the common areas and park areas provide the residents and public alike an opportunity to enjoy the natural features of the overall site, including the trees that will be preserved and the many new trees, shrubs and plants that will be installed upon development.

7. The original rezone to the Westbranch PD, as a "Planned Development", was desired in order to allow for the development of the Real Estate into a community that was planned with thought and the idea of connecting its residents to each other within the development and providing convenient and nearby appropriate neighborhood commercial types of uses for their enjoyment. If "straight rezone" were pursued for the development of the individual parcels to achieve the proposed Westbranch development, it would require separate rezone filings, various Board of Zoning Appeals ("BZA") approvals on various development standards from the Unified Development Ordinance for any underlying zoning district that was sought. Additionally, the platting standards would present various additional variances and waivers that would be required. Further, while rezones would require approval by the Council, the BZA is the

body that approves development standards variance requests. Further, a petitioner cannot file for a BZA variance until after the Council approves a rezone. This results in the BZA making the final land use decision/policy decision on the development of the land when that jurisdiction or role seems to rest more appropriately with the Council.

8. The Applicant chose a Planned Development rezone in order to present the Westbranch PD Ordinance and proposal as a comprehensive, master planned proposal for the Council's consideration, which proposal the Council adopted. The Applicant is now presenting the Council with a text amendment to the original Westbranch PD for the same purpose and to add additional lot development standards that were not included in the Westbranch PD Ordinance in order to allow for the platting of individual lots in the TR-1 and TR-2 District Areas, as well as providing additional home design options for consideration.

9. The Westbranch Amendment Ordinance includes a mix and diversity of uses (commercial and residential) and the proposal's intent is to provide a unique and innovative development design by providing a mix of uses in a coherent and complimentary overall design, while being sensitive to other surroundings uses, buffers and transitions.

10. Finally, the subject Real Estate meets the ownership, minimum site area and underlying zoning district prerequisites as set forth in Article 4 of the UDO and the Westbranch Amendment Ordinance is predominantly in-line with the permitted uses in the original zoning district and the Comprehensive Plan and is compatible with the land uses and adjacent zoning districts.
